Report of independent auditors

To the Board of Directors of Market Advantage, Ltd.

Opinion

We have audited the accompanying financial statements of Market Advantage, Ltd. (the "Fund"), which comprise the statement of assets and liabilities, including the condensed schedule of investments, as of December 31, 2024, and the related statements of operations and of changes in net assets and the financial highlights for the year then ended, including the related notes (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2024, and the results of its operations, changes in its net assets and the financial highlights for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the financial statements* section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Report of independent auditors (continued)

To the Board of Directors of Market Advantage, Ltd.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

1. ORGANIZATION

Market Advantage, Ltd. (the "Fund") is an exempted company incorporated under the acts of the Cayman Islands on January 30, 2008, to operate as a private investment fund. BlackRock Institutional Trust Company, N.A., a national banking association chartered in the United States ("U.S.") and a wholly-owned subsidiary of BlackRock, Inc., is the appointed investment manager of the Fund (the "Investment Manager") and is responsible for its investment activities, subject to the policies and control of the Board of Directors of the Fund (the "Directors"). State Street Bank and Trust Company, a Massachusetts trust company, serves as the custodian for the Fund. State Street Cayman Trust Company, Ltd., an indirect wholly-owned subsidiary of State Street Bank and Trust Company, serves as the administrator (the "Administrator") and transfer agent for the Fund. The Fund is registered as a mutual fund for the purposes of the Mutual Funds Act of the Cayman Islands (the "Mutual Funds Act") and, accordingly, is regulated in terms of the Mutual Funds Act. As a regulated mutual fund, the Fund is subject to the supervision of the Cayman Islands Monetary Authority.

The Fund's investment objective is to realize long-term appreciation in the value of its assets. Through its investments, the Fund seeks exposure to risks that are systematic in nature, i.e., the risks that are intrinsic to the operation of the global markets and economies. Interest rates, recession and political conflicts all represent sources of systematic risk. The Investment Manager uses proprietary methods to quantify the relative and absolute value of these risks and Asset Classes (as defined below) and adjusts the Fund's portfolio to gain diversified exposure to these risks and Asset Classes and thereby capture the premia associated with these risks and Asset Classes in an effort to maximize total return per unit of risk. The Investment Manager seeks to achieve its investment objective by investing in financial instruments (including, but not limited to, equity, bond and commodity futures, interest rate, inflation and credit default swaps, total return swaps, options, exchange- traded funds and unlisted securities) that provide broad exposure to financial markets around the world as selected by the Investment Manager, such as cash, developed sovereign debt, investment grade debt, emerging sovereign debt, high yield debt, developed equity, developed small cap equity, emerging equity, private equity, infrastructure, property, commodities ex-energy and energy markets (each, an "Asset Class"). In cases where existing financial instruments do not provide direct or the desired exposure to a relevant risk premium, the Investment Manager in its discretion, may select instruments with approximated exposure to the risk premium in order to try to gain or create exposure to such risk premium. Subject to any applicable law (including the U.S. Employee Retirement Income Security Act of 1974, as amended ("ERISA"), the Fund may, from time to time, invest in funds which are advised by the Investment Manager or its affiliates (each, a "Manager Fund"). The Investment Manager has broad investment discretion in seeking to achieve the Fund's objective. There is no assurance that the investment objective of the Fund will be achieved.

Capitalized terms used throughout the notes without definition have the same meaning as set forth in the relevant offering documents.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting: The Fund's financial statements are expressed in U.S. Dollars ("USD" and/or "$"), unless otherwise indicated, and are prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Fund is considered an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 946, *Financial Services - Investment Companies* ("ASC 946").

Estimates: The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates, and the differences could be material.

Investment Transactions, Investment Income and Expenses: Investment transactions are recorded on the date the transactions are entered into. Realized gains and losses on investment transactions are determined on an identified cost basis. The Fund's operating expenses are recorded on an accrual basis. Interest income and interest expenses, including amortization of premium and accretion of discount on debt securities are recognized on an accrual basis.

Cash, Cash Equivalents and Foreign Currencies: Cash and cash equivalents include cash and short-term investments with original maturities of three months or less (when acquired), which would be considered Level 1 investments. Short-term investment funds are valued at their reported net asset value ("NAV"). The Fund may maintain cash in one or more bank deposit accounts that, at times, may exceed U.S. federally insured limits. All cash is held with the Administrator, an affiliate to the custodian of the Fund. The Fund may hold foreign currencies and, thus, is subject to the risk associated with foreign currency exchange rate fluctuations. Foreign currencies are translated into USD amounts as of the valuation date.

Restricted Cash: As of December 31, 2024, the Fund had pledged cash of $117,942,000 with counterparties. Amounts pledged related to investments in centrally cleared swap contracts, futures contracts and over-the-counter ("OTC") derivatives contracts. Amounts pledged which are considered restricted cash, are included in cash pledged in the Statement of Assets and Liabilities.

Foreign Currency Translations and Transactions: Investments, at fair value, denominated in currencies other than USD are translated into USD at the appropriate rate of exchange in effect at the date of the financial statements. Purchases and sales of investments denominated in currencies other than USD have been translated into USD at the prevailing exchange rates on the dates of such transactions.

The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of investments held or sold for financial reporting purposes. Such currency fluctuations relative to the exchange rate on the trade date related to investments are included within net realized gain (loss) on investments and net change in unrealized appreciation (depreciation) on investments in the Statement of Operations, as applicable.

Non-investment related assets and non-investment related liabilities denominated in currencies other than USD are translated into USD at the appropriate rate of exchange in effect at the date of the financial statements. Such currency fluctuations not related to investments are included within net change in unrealized appreciation (depreciation) on foreign currency translations in the Statement of Operations. Purchases and sales of currencies, the realization of receivables, the settlement of liabilities, and the recognition

of income and expense transactions denominated in currencies other than USD have been translated into USD at the prevailing exchange rates on the dates of the transactions. Such reported realized foreign currency gains and losses from the aforementioned transactions are included within net realized gain (loss) on foreign currency transactions in the Statement of Operations.

The Fund may issue shares with different functional currencies (the "Non-USD Currency Shares"). The subscription amounts received by the Fund for Non-USD Currency Shares may be converted into USD at the relevant exchange rate obtained by the Fund on the relevant date. The holders of Non-USD Currency Shares are subject to the risk that the value of the USD would decrease against the relevant non-USD currency. The Fund may, in the discretion of the Investment Manager, attempt to reduce or minimize the effect of fluctuations in the exchange rates on the value of the Non-USD Currency Shares by entering into spot or forward contracts, currency options and currency futures contracts or other financial instruments to hedge such risks (a "Currency Hedge"). Typically, a Currency Hedge entitles the Fund to be paid, or requires the Fund to pay, periodically, the approximate amount of any gain or (loss) resulting from an increase or a decline in the value of the USD against the non-USD currency. Non-USD Currency Shares are allocated the Fund's expenses of currency conversions and the Fund's expenses, profits or losses of any Currency Hedge indirectly related to such classes or series of shares of the Fund and may, as a result, have different performance than the other classes or series of shares of the Fund.

Due from Brokers: Due from brokers in the Statement of Assets and Liabilities consists of $2,487,691 of unsettled trades on derivative contracts, including margin cash at brokers.

Income Taxes: ASC 740, *Income Taxes* ("ASC 740"), requires the evaluation of tax positions taken or expected to be taken to determine whether a tax position of the Fund is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The tax impact to be recognized is measured as the largest amount that is greater than 50% likely of being realized upon ultimate settlement, which could result in the Fund recording a tax liability that would reduce net assets.

Based on the Fund's organizational structure, anticipated methods of operation and features, the Fund generally does not expect to be subject to U.S. federal income tax on gains from trading in securities and commodities. In addition, interest income from U.S. sources earned on bank deposits and portfolio interest as defined under the U.S. Internal Revenue Code of 1986 (as amended) are not subject to withholding for U.S. federal income tax. However, certain other income, including dividend income, certain dividend equivalent payments and certain other interest income from U.S. sources may be subject to withholding. Interest, dividend and other income realized by the Fund from non-U.S. sources, and capital gains realized, or gross sale or disposition proceeds received, on the sale of securities of non-U.S. issuers, may be subject to withholding and other taxes levied by the jurisdiction in which the income is sourced.

The Fund is invested directly and indirectly in various jurisdictions and is therefore subject to varying policies and statutory time limitations with respect to examination of tax positions. The Investment Manager has reviewed its tax positions and does not believe that there are any uncertain tax positions that require recognition of a tax liability in the Fund's financial statements. Accordingly, no income tax liability for uncertain tax positions has been recorded in the accompanying financial statements.

The Fund has been registered as an exempted company pursuant to the Companies Act of the Cayman Islands. No local income, profits or capital gains taxes are levied in the Cayman Islands at the current time and the Fund has received an undertaking from the Cayman Islands government exempting the Fund from taxation in the Cayman Islands until March 25, 2028.

In October 2021, The Organization for Economic Cooperation and Development (the "OECD") introduced a 15% global minimum tax under the Pillar Two Global Anti-Base Erosion model rules. Key provisions are being phased in during 2024 and 2025. Several OECD member countries have enacted tax legislation effective January 1, 2024, and others have announced plans to implement similar laws. While the Fund does not expect Pillar Two to have a material impact to its provision for income taxes for 2024, the rules are subject to negotiation and change. The Fund will monitor developments as more countries enact legislation and new guidance is released.

Allocations of Operations and Distributions: Income, expenses, realized and unrealized gains and losses are allocated monthly to each class based on its relative net assets.

3. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

Investment Valuation Policies: The Fund accounts for its investments in accordance with relevant authoritative guidance, which defines fair value, establishes a framework for measuring fair value, and requires enhanced disclosures about fair value measurements. U.S. GAAP defines fair value as the price the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date.

- Fixed-income investments for which market quotations are readily available are generally valued on the last available bid prices or current market quotations provided by independent dealers or prices supplied by approved independent third-party pricing services. Pricing services generally value fixed-income securities assuming orderly transactions of an institutional round lot size, but a fund may hold or transact in such securities in smaller, odd lot sizes. Odd lots may trade at lower prices than institutional round lots. The pricing services may use matrix pricing or valuation models that utilize certain inputs and assumptions to derive values, including transaction data (e.g., recent representative bids and offers), market data, credit quality information, perceived market movements, news, and other relevant information.

- Exchange-traded option contracts are valued at the mean between the last bid and ask prices at the close of the option contracts market in which the option contracts trade. An exchange-traded option contract for which there is no mean price is valued at the last bid (long positions) or ask (short positions) price. If no bid or ask price is available, the prior day's price will be used, unless it is determined that the prior day's price no longer reflects the fair value of the option contract.

- Short-term securities purchased with remaining maturities of 60 days or less are valued at amortized cost, which approximates fair value.

- Interest rate and credit default swap contracts are valued utilizing price quotes received from approved pricing services, central clearinghouses or brokers, which are derived using swap curves and models that incorporate a number of market data factors, such as discounted cash flows, trades, values of the underlying reference

instruments, yield curves, credit curves, measures of volatility, prepayment rates and correlation of such inputs. Total return swap contracts are valued utilizing quotes received daily by independent pricing services or through brokers, which are derived using models that incorporate market trades and fair value of the underlying reference instruments.

- Forward foreign currency exchange contracts are valued at the mean between the bid and ask prices which are determined as of the close of trading based on that day's prevailing forward exchange rate for the underlying currencies. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available.

- Futures contracts are valued based on that day's last reported settlement price or trade price on the exchange where the contract is traded.

In the event that the application of a valuation approach results in a price for an investment that is deemed not to be representative of the fair value of such investment, or if a price is not available, the investment will be valued by the Global Valuation Committee, in accordance with policies approved by the Directors as reflecting fair value ("Fair Value Assets"). When determining the valuation of the Fair Value Assets, the Administrator, in consultation with the Global Valuation Committee and under the supervision of the Directors, seeks to determine the price that the Fund might reasonably expect to receive from the current sale of that asset in an arm's-length transaction. Fair value determinations shall be based upon all available factors that the Administrator, in consultation with the Global Valuation Committee and under the supervision of the Directors deems relevant, consistent with the principles of fair value measurement, which may include the market approach, income approach or a weighted combination of both and/or, in the case of recent investments, the recent transaction price approach, as appropriate.

The market approach generally consists of using comparable market transactions, by reference to a recent transaction price or by reference to observable valuation measures for companies that are determined by the Global Valuation Committee to be comparable ("Comparable Companies"), coupled with the use of unobservable inputs, which may include earnings before interest, taxes, depreciation and amortization ("EBITDA") multiple or earnings multiple. Observable inputs used in the market approach to derive a valuation multiple may include the public prices for securities issued by, and the relevant performance metrics of, Comparable Companies; and/or transaction prices involving securities of the Comparable Companies.

The income approach generally is used to discount future cash flows to present value. These factors include, but are not limited to (i) attributes specific to the investment or asset; (ii) the principal market for the investment or asset; (iii) the customary participants in the principal market for the investment or asset; (iv) data assumptions by market participants for the investment or asset, if reasonably available; (v) quoted prices for a similar investment or asset in active markets; and (vi) other factors, such as future cash flows, interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, recovery rates, liquidation amounts and/or default rates.

Due to the inherent uncertainty of valuations of such investments, the fair values may differ from the values that would have been used had an active market existed.

Fair Value Measurements: ASC 820, *Fair Value Measurement* ("ASC 820"), provides a framework for measuring fair value and requires specific disclosures about financial instruments at the measurement date. Investments and derivative financial instruments measured and reported at fair value are classified and disclosed in one of the following categories:

- Level 1 - Unadjusted quoted prices in active markets/exchanges that are accessible at the measurement date for identical, unrestricted assets or liabilities;

- Level 2 - Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly; and

- Level 3 - Inputs that are unobservable and significant to the entire fair value measurement (including the Global Valuation Committee's assumptions used in determining the fair value of financial instruments).

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the fair value disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investments and derivative financial instruments and is not necessarily an indication of liquidity or the risks associated with investing in those investments.

Investments classified within Level 3 have significant unobservable inputs used by the Global Valuation Committee in determining the price for fair valued investments. Level 3 investments include equity or debt issued by privately held companies or funds that may not have a secondary market and/or may have a limited number of investors. The categorization of a value determined for financial instruments is based on the pricing transparency of the financial instruments and is not necessarily an indication of the risks associated with investing in those securities.

4. SECURITIES AND OTHER INVESTMENTS

Inflation-Indexed Bonds: Inflation-indexed bonds are fixed income securities whose principal value is periodically adjusted according to the rate of inflation. If the index measuring inflation rises or falls, the principal value of inflation-indexed bonds will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Any upward or downward adjustment in the principal amount of an inflation-indexed bond will be included as interest income in the Statement of Operations, even though investors do not receive their principal until maturity (as adjusted for inflation), which is guaranteed in the case of U.S. Treasury inflation-indexed bonds. For bonds that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

5. DERIVATIVE FINANCIAL INSTRUMENTS

The Fund may engage in various portfolio investment strategies using derivative contracts both to increase the returns of the Fund and/or to manage its exposure to certain risks, such as credit risk, equity risk, interest rate risk and foreign currency exchange rate risk. These contracts may be transacted on an exchange or OTC.

Forward Foreign Currency Exchange Contracts: The Fund enters into forward foreign currency exchange contracts as an economic hedge against either specific transactions or investments and/or share classes to gain or reduce exposure to foreign currencies (foreign currency exchange rate risk). A forward foreign currency exchange contract is an agreement between two parties to buy and sell currency at a set exchange rate on a specified date. When used by the Fund, these contracts may help to manage the overall exposure to the currencies (foreign currency exchange rate risk), in which some of the Fund's investments and/or share classes are denominated and in some cases, may be used to obtain exposure to a particular market. The contracts are traded OTC and not on an organized exchange. The Fund also hedges the non-USD currency exposure of any class of the Fund denominated in a foreign currency. Appreciation (depreciation) attributable to foreign currency class hedging are allocated solely to the applicable foreign currency class of the Fund.

The contract is marked-to-market and the change in market value is recorded as unrealized appreciation (depreciation) in the Statement of Operations. Appreciation (depreciation) on forward foreign currency exchange contracts is recorded for financial statement purposes as unrealized until the contract settlement date. Upon maturity or early settlement of the forward foreign currency exchange contracts, a realized gain or (loss) is recorded in the Statement of Operations equal to the difference between the value at the time it was opened and the value at the time it was closed. Cash amounts pledged for forward foreign currency exchange contracts, if any, are considered restricted and are included in cash pledged as collateral for OTC derivatives in the Statement of Assets and Liabilities.

Futures Contracts: The Fund may purchase or sell futures contracts to gain exposure to, or economically hedge against, changes in interest rates (interest rate risk), changes in the value of equity securities (equity risk), changes in commodity prices or changes in foreign currencies (foreign currency exchange rate risk). Futures contracts are exchange-traded agreements between the Fund and a counterparty to buy or sell a specific quantity of an underlying instrument at a specified price on a specified date. Depending on the terms of a contract, futures contracts are settled either through physical delivery of the underlying instrument on the settlement date or by payment of a cash amount on the settlement date. Upon entering into a futures contract, the Fund is required to deposit initial margin with the broker in the form of cash or securities in an amount that varies depending on a contract's size and risk profile. The initial margin deposit must then be maintained at an established level over the life of the contract. Amounts pledged, which are considered restricted, are included in cash pledged for futures contracts in the Statement of Assets and Liabilities.

Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the fluctuation in market value of the contract ("variation margin"). Variation margin is recorded as unrealized appreciation (depreciation) and, if any, shown as variation margin receivable (or payable) on futures contracts in the Statement of Assets and Liabilities. When the contract is closed, the Fund records a realized gain or (loss) equal to the difference between the notional value of the contract at the time it was opened and the notional value at the time it was closed. The use of futures contracts involves the risk of an imperfect correlation in the movements in the price of futures contracts and interest rates, foreign currency exchange rates or the underlying assets.

Option Contracts: The Fund may purchase and write call and put option contracts to increase or decrease its exposure to underlying instruments including equity risk, interest rate risk and/or commodity price risk and/or, in the case of written option contracts, to generate gains from option contracts premiums.

A call option contract gives the purchaser (holder) of the option contract the right (but not the obligation) to buy, and obligates the seller (writer) to sell (when the option contract is exercised), the underlying instrument at the exercise or strike price at any time or at a specified time during the option contract period. A put option contract gives the holder the right to sell and obligates the writer to buy the underlying instrument at the exercise or strike price at any time or at a specified time during the option contract period.

When the Fund purchases (writes) an option contract, an amount equal to the premium paid (received) by the Fund is reflected as an asset (liability). The amount of the asset (liability) is subsequently marked-to-market to reflect the current market value of the option contract purchased (written). When an instrument is purchased or sold through an exercise of an option contract, the related premium paid (or received) is added to (or deducted from) the basis of the instrument acquired or deducted from (or added to) the proceeds of the instrument sold. When an option contract expires or the Fund enters into a closing transaction, the Fund realizes a gain or (loss) on the option contract to the extent of the premium received or paid or gain or (loss) to the extent the cost of the closing transaction exceeds the premium received or paid. In purchasing and writing option contracts, the Fund bears the risk of an unfavorable change in the value of the underlying instrument or the risk that the Fund may not be able to enter into a closing transaction due to an illiquid market. Exercise of a written option contract could result in the Fund purchasing or selling a security when the Fund otherwise would not, or at a price different from the current market value.

The Fund may purchase and write options on swaps ("swaption contract") primarily to preserve a return or spread on a particular investment or portion of the Fund's holdings, as a duration management technique or to protect against an increase in the price of securities it anticipates purchasing at a later date. The purchaser and writer of a swaption contract is buying or granting the right to enter into a previously agreed upon interest rate or credit default swap agreement (interest rate risk and/or credit risk) at any time before the expiration of the option.

The maximum financial exposure for swaption and written put options is limited to the number of contracts written and the related strike prices (assuming that the spot rate of underlying currency is zero). As of December 31, 2024, the Fund has a maximum financial exposure of $320,165,344 relating to swaption and written put option contracts. These swaption and written put option contracts have expirations of about five months as of December 31, 2024. The maximum financial exposure of swaption and written put options contracts can be reduced by the Fund's investment in purchased put options, the strike value of which is $320,958,080 as of December 31, 2024. The fair value of purchased put option contracts as of December 31, 2024 is $602,253.

Swap Contracts: Swap contracts are entered into to manage exposure to issuers, markets and securities. Such contracts are agreements between the Fund and a counterparty to make periodic net payments on a specified notional amount or a net payment upon termination. Swap contracts are privately negotiated in the OTC market and may be entered into as a bilateral contract ("OTC swap contracts") or centrally cleared ("centrally cleared swap contracts"). Swap contracts are marked-to-market and changes

in value are recorded as unrealized appreciation (depreciation).

For OTC swap contracts, any upfront premiums paid are recorded as assets and any upfront fees received are recorded as liabilities and are shown as swap contracts premiums paid and swap contracts premiums received, respectively, in the Statement of Assets and Liabilities and amortized over the term of the OTC swap contracts. The fluctuation in market value is recorded as unrealized appreciation (depreciation) on swap contracts in the Statement of Assets and Liabilities. Payments received or made by the Fund for OTC swap contracts are recorded in the Statement of Operations as realized gains or losses, respectively. When an OTC swap contract is terminated, the Fund will record a realized gain or (loss) equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract, if any. Generally, the basis of the contracts is the premium received or paid.

In a centrally cleared swap contract, immediately following execution of the swap contract, the swap contract is novated to a central counterparty (the "CCP") and the Fund faces the CCP through a broker. Upon entering into a centrally cleared swap contract, the Fund may be required to deposit initial margin with the broker in the form of cash or securities in an amount that varies depending on the size and risk profile of the particular swap contract. Amounts pledged, which are considered restricted cash, are included in cash pledged for centrally cleared swap contracts in the Statement of Assets and Liabilities. The change in valuation of centrally cleared swap contract is recorded as a receivable or payable for variation margin in the Statement of Assets and Liabilities until the centrally cleared swap contract is terminated at which time a realized gain or (loss) is recorded.

Swap contract transactions involve, to varying degrees, elements of interest rate, credit and market risk in excess of the amounts recognized in the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions.

Credit Default Swap Contracts: Credit default swap contracts are entered into to manage exposure to the market or certain sectors of the market, to reduce risk exposure to defaults of corporate and/or sovereign issuers or to create exposure to corporate and/or sovereign issuers to which the Fund is not otherwise exposed (credit risk). The Fund enters into credit default swap contracts to provide a measure of protection against the default of an issuer (as buyer of protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). The Fund may either buy or sell (write) credit default swap contracts on single-name issuers (corporate or sovereign), a combination or basket of single-name issuers or traded indexes. Credit default swap contracts on single-name issuers are agreements in which the protection buyer pays fixed periodic payments to the protection seller in consideration for a guarantee from the seller to make a specific payment should a negative credit event take place (e.g., bankruptcy, failure to pay, obligation accelerators, repudiation, moratorium or restructuring). Credit default swap contracts on traded indexes are agreements in which the protection buyer pays fixed periodic payments to the protection seller in consideration for a guarantee from the seller to make a specific payment should a write-down, principal or interest shortfall or default of all or individual underlying securities included in the index occurs. As a buyer, if an underlying credit event occurs, the Fund will either receive from the seller an amount equal to the notional amount of the swap contract and deliver the referenced security or underlying securities comprising of an index or receive a net settlement of cash equal to the notional amount of the swap contract less the recovery value of the security or underlying securities comprising of an index. As a seller (writer), if an underlying credit event occurs, the Fund will either pay the buyer an amount equal to the notional amount of the swap contract and take delivery of the referenced security or underlying securities comprising of an index or pay a net settlement of cash equal to the notional amount of the swap contract less the recovery value of the security or underlying securities comprising of an index.

The following table summarizes the Fund's exposure to credit default swaps as of December 31, 2024 where the Fund is acting as a seller or guarantor:

Reference Debt Obligation	*Expiration Dates*	*Credit Rating Range*	*Notional Sold[(a)]*	*Fair Value*	*Potential Recovery/Purchased Credit Protection*
Index Credit Default Swap Contracts:					
High yield debt	12/21/29	BB- - B+	$ 150,675,322	$ 11,983,026	$ —
Investment grade debt	12/21/29	BBB- - BBB+	1,525,138,234	20,780,671	—
			$ 1,675,813,556	$ 32,763,697	$ —

[(a)] The maximum potential amount the Fund may be required to pay should a negative credit event take place as defined under the terms of the agreement.

Interest Rate Swap Contracts: Interest rate swaps contracts are entered into to gain or reduce exposure to interest rates or to manage duration, the yield curve or interest rate risk by economically hedging the value of the fixed rate bonds which may decrease when interest rates rise (interest rate risk). Interest rate swap contracts are agreements in which one party pays a stream of interest payments, either fixed or floating rate, in exchange for another party's stream of interest payments, either fixed or floating rate, on the same notional amount for a specified period of time. Interest rate caps and floors, which are types of interest rate swap contracts, are agreements in which one party agrees to make payments to the other party to the extent that interest rates rise above a specified rate cap or fall below a specified rate floor in return for a premium. In more complex swap contracts, the notional principal amount may decline (or amortize) over time.

Total Return Swap Contracts: Total return swap contracts are entered into to gain exposure to a security or market without owning such security or investing directly in such market or to exchange the risk/return of one market (e.g., fixed-income) with another market (e.g., equity or commodity prices) (equity risk, commodity price risk and/or interest rate risk). Total return swap contracts are agreements in which there is an exchange of cash flows whereby one party commits to make payments based on the total return (e.g., coupons plus capital gains/losses and/or dividends) of an underlying instrument in exchange for fixed or floating rate interest payments. To the extent the total return of the instrument or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty.

Master Netting Arrangements: In order to better define contractual rights and to secure rights that will help the Fund mitigate its counterparty risk, the Fund may enter into an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement" or an "MNA") or a similar agreement with its derivative contract

counterparties. An ISDA Master Agreement is a bilateral agreement between the Fund and a counterparty that governs certain OTC derivatives and typically contains, among other things, collateral posting terms and netting provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, the Fund may, under certain circumstances, offset with the counterparty certain derivative financial instruments' payables and/or receivables with collateral held and/or posted to create one single net payment.

The provisions of the ISDA Master Agreement typically permit a single net payment in the event of default including the bankruptcy or insolvency of the counterparty. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against the right of offset in bankruptcy, insolvency or other events. In addition, certain ISDA Master Agreements allow counterparties to OTC derivatives to terminate derivative contracts prior to maturity in the event the Fund's net assets decline by a stated percentage or the Fund fails to meet the terms of its ISDA Master Agreements, which would cause the Fund to accelerate payment of any net liability owed to the counterparty. To the extent amounts due to the Fund from its counterparties are not fully collateralized, contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance. The Fund attempts to mitigate counterparty risk by only entering into agreements with counterparties that it believes have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties.

Collateral Requirements: For derivatives traded under an ISDA Master Agreement, the collateral requirements are typically calculated by netting the mark-to-market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by the Fund and the counterparty. A party to an ISDA Master Agreement may also require additional collateral from the other party to the ISDA Master Agreement should the other party fail to secure a certain credit rating on certain of its debt obligations.

Cash collateral that has been pledged to cover obligations of the Fund and cash collateral received from the counterparty, if any, is reported separately in the Statement of Assets and Liabilities as cash pledged as collateral and cash received as collateral, respectively. Non-cash collateral pledged by the Fund, if any, is noted in the Condensed Schedule of Investments. Generally, the amount of collateral due from or to a counterparty is subject to a certain minimum transfer amount threshold before a transfer is required, which is determined at the close of business of the Fund. Any additional required collateral may be delivered to/pledged by the Fund on the next business day. Pursuant to the terms of an MNA, the Fund and the counterparties may not be permitted to sell, re-pledge or use cash and non-cash collateral it receives. The Fund generally agrees not to use non-cash collateral that it receives but may, absent default or certain other circumstances defined in the underlying ISDA Master Agreement, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty. To the extent amounts due to the Fund from its counterparties are not fully collateralized, contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance. Likewise, to the extent the Fund has delivered collateral to a counterparty and stands ready to perform under the terms of its agreement with such counterparty, it bears the risk of loss from a counterparty in the amount of the value of the collateral in the event the counterparty fails to return such collateral. Based on the terms of agreements, collateral may not be required for all derivative contracts.

For financial reporting purposes, the Fund does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Statement of Assets and Liabilities.

6. RELATED PARTY TRANSACTIONS

Management Fees: The Fund has entered into an investment management agreement with the Investment Manager to provide investment management services to the Fund. Under this agreement, the Fund is charged a fixed monthly management fee which is paid monthly in arrears in respect of each series of class shares. The management fee is calculated based on NAV of each series of class shares as of the close of business on the last Business Day (as defined in Note 7) of each month (after deducting expenses).

Type of Shares	*Fee Terms*
Class A	A tiered annual fee the sum of: (i) 0.50% of the NAV of each series for that portion of the Fund investment amount equal to or less than $100 million, (ii) 0.45% of the NAV of each series for that portion of the Fund investment amount over $100 million but less than or equal to $500 million, and (iii) 0.40% of the NAV of each series for that portion of the Fund investment amount over $500 million.
Class AA	An annual fee of 0.38%.
Class B	Not subject to any management fee.
Class C	Not subject to any management fee.
Class D	Not subject to any management fee.
Class E	A tiered annual fee the sum of: (i) 0.30% of the NAV of each series for that portion of the Fund investment amount equal to or less than $1 billion, (ii) 0.25% of the NAV of each series for that portion of the Fund investment amount over $1 billion but less than or equal to $2 billion, and (iii) 0.22% of the NAV of each series for that portion of the Fund investment amount over $2 billion.
Class F	A tiered annual fee the sum of: (i) 0.42% of the NAV of each series for that portion of the Fund investment amount equal to or less than $200 million and (ii) 0.35% of the NAV of each series for that portion of the Fund investment amount over $200 million.

The management fee is calculated based on the NAV of each shareholder's series of shares in U.S. dollars, and is paid in U.S. dollars. If, as the result of an additional subscription, the Fund Investment Amount of a holder of Class A-USD, A-JPY, A-CAD, C-USD, D-USD, E-USD, F-USD and F-CAD shares, as applicable, exceeds the applicable Fund Investment Amount thresholds, such shareholder's management fee is adjusted at such time as the additional subscription becomes effective (unless otherwise agreed by the Directors in consultation with the Investment Manager), and is subject to the applicable management fee until the month during which the Fund Investment Amount falls below the applicable Fund Investment Amount thresholds described above. If, as the result of a redemption, the Fund Investment Amount of a holder of Class A-USD, A-JPY, A-CAD, C-USD, D-USD, E-USD, F-USD, and F-CAD shares, as applicable, falls below the applicable Fund Investment Amount thresholds, such shareholder's management fee is adjusted at such time (unless otherwise agreed by the Directors in consultation with the Investment Manager) into the applicable management fee until the month during which the Fund Investment Amount equals or exceeds the applicable Fund Investment Amount thresholds. A shareholder's Fund Investment Amount is the monthly calculated NAV per share multiplied by the number of Class A-USD, A-JPY, A-CAD, C-USD, D-USD, E-USD, F-USD, and F-CAD shares, as applicable, held by such shareholder. The Investment Manager may elect to reduce, waive or calculate differently the management fee with respect to certain shareholders. For the year ended December 31, 2024, the Fund incurred management fees totaling $3,262,928, of which $815,800 was payable as of December 31, 2024.

Board of Directors: The activities of the Fund are overseen by its Directors. As of December 31, 2024 the Fund's Directors are Noelle L'Heureux, Jennifer Collins (independent), Ian Pilgrim (independent) and W. William Woods (independent).

7. SHARE CAPITAL

The Fund has an authorized capital of U.S. $50,000 divided into 50 million participating shares with a par value of $0.001 per share, which shares may be issued as shares of any class. The Management Shares are voting shares and have been issued to MaplesFS Limited as trustee of BlackRock Offshore Funds STAR Trust.

Management Shares do not participate in the profits of the Fund. The Fund is offering Class A-USD, A-GBP, A-AUD, A-EUR, A-CAD, A-JPY, B-USD, B-GBP, B-AUD, B-EUR, B-CAD and B-JPY shares to investors. All classes of shares beginning with "A-" are subject to the management fee and all classes of shares beginning with "B-" are not subject to the management fee. The Fund is authorized to issue the shares in one or more different series or classes, as determined from time to time by the Directors in consultation with the Investment Manager, which may differ in terms of, among other things, the fees charged, functional currency, voting rights, redemption rights and minimum and additional subscription amounts. The Directors have also created Class AA-USD shares, Class BB-USD shares, Class C-USD shares, Class D-USD shares, Class E-USD shares, and Class F-USD shares. The Class AA-USD shares, Class BB-USD shares, Class D-USD shares, Class E-USD shares and Class F-USD shares have the rights, privileges and obligations identical to those of Class A-USD shares, except that Class AA-USD shares, Class BB-USD shares, Class E-USD shares, and Class F-USD shares are subject to different management fees. The Class C-USD shares have rights, privileges and obligations identical to those of Class B-USD, except that Class C-USD shares have voting rights. No Class A-GBP, A-AUD, A-EUR, BB-USD, B-GBP, B-AUD, B-EUR or B-JPY shares were issued or outstanding as of December 31, 2024.

Shares are offered from time to time in the discretion of the Directors, in consultation with the Investment Manager, subject to any restrictions under applicable law. Generally, the Fund accepts subscriptions for shares as of the close of business on the last day of any month (each, a "Dealing Day") on which banks are open for business in New York, New York (a "Business Day") or such other Business Day as may be determined in the discretion of the Directors (in consultation with the Investment Manager). Subscription documents with respect to any subscription for any Dealing Day must be received by 4:00 p.m. New York time on the Business Day at least 3 Business Days prior to the applicable Dealing Day. If subscription documents are not received by 4:00 p.m. New York time on the Business Day at least 3 Business Days prior to the applicable Dealing Day and cleared funds are not received by 4:00 p.m. New York time on the Business Day at least 2 Business Days prior to the applicable Dealing Day, such amounts are held by the Fund until the following Dealing Day, subject to the right of the Directors to waive such timing requirements in their absolute discretion. Shares are initially offered at a purchase price of $1,000 per share, or the relevant amount set forth in the "Functional Currency Table" (as defined in the confidential memorandum for the Fund) and at their net asset value ("NAV") thereafter, subject to the minimum initial subscription. Class A-USD, A-GBP, A-AUD, A-EUR, A-CAD, A-JPY, E-USD, and F-USD shares are offered in series and each shareholder is issued its own series. Class B-USD, B-GBP, B- AUD, B-EUR, B-CAD, B-JPY, AA-USD, BB-USD, C-USD and D-USD shares are not issued in series. The minimum initial subscription for shares in the Fund is $5 million, or the relevant amount set forth in the Functional Currency Table. The minimum subscription for additional shares is $1 million, or the relevant amount set forth in the Functional Currency Table. The Directors may, in their sole discretion, change the amount of the required minimum subscriptions, provided that at no time will the minimum initial subscription be less than $100,000, or its foreign currency equivalent, or such other amount as may be specified under Cayman Islands act from time to time.

Generally, shareholders have the right to redeem all or any portion of their shares as of the last day of any calendar month or such other Business Day as may be determined in the discretion of the Directors (in consultation with the Investment Manager). Each date as of which a share may be redeemed is herein referred to as a "Redemption Date". Written requests for redemptions must be received by 4:00 p.m. New York time by the Investment Manager on the Business Day at least 3 Business Days prior to the applicable Redemption Date, which notice period may be waived or reduced by the Directors in their absolute discretion. Shareholders may redeem shares in $1 million minimums or the relevant amount set forth in the Functional Currency Table. Partial redemptions which would have the effect of reducing a shareholder's remaining investment to less than $10 million, or the relevant amount set forth in the Functional Currency Table, are not permitted, subject to the right of the Directors to waive these minimums in their absolute discretion. For any Redemption Date on which the Fund receives redemption requests totaling in the aggregate more than $1 billion, the Directors, in their sole discretion, may reduce all or a portion of such redemption requests in excess of such amount, and all redemption requests received in respect of such Redemption Date will be reduced pro rata based on the redeeming shareholders' pro rata share of the NAV of the Fund as of the immediately prior Redemption Date. Redemption of any amounts not redeemed pursuant to the prior sentence will require an additional redemption request and, for the avoidance of doubt, will not be given priority to any other redemption requests received for any subsequent Redemption Date. The Directors may reduce or increase such amounts in their sole discretion. The Fund did not defer any redemption requests in the foregoing manner during the year ended December 31, 2024. Shares of a particular series are redeemed at their NAV per share price net of any applicable fees and costs. Payment of redemption proceeds is generally made within 5 Business Days of the Redemption Date.

8. PRINCIPAL RISKS

Commodity Risk: The Fund invests in commodity related investments. Events adversely impacting related commodities markets may have an adverse effect on the value of the Fund's portfolio. To the extent that the Fund invests a substantial portion of its assets in commodity related investments, the Fund may be more sensitive to adverse economic conditions impacting the commodities markets. Price movements for commodity interests are influenced by, among other things: changing supply and demand relationships; weather; agricultural, trade, fiscal, and monetary policies of governments; political and economic events and policies; changes in national and international interest rates and rates of inflation; currency devaluations and re-evaluations; and emotions of the marketplace. Additionally, the commodity markets are subject to temporary distortions or other disruptions due to various factors, including the lack of liquidity in the markets, the participation of speculators and government regulation and intervention. The risk of loss in trading commodities can be substantial. If the market moves against its position, the Fund may be called upon by its broker to deposit a substantial amount of additional margin, on short notice, in order to maintain its position. If it does not provide the requested amounts within the prescribed time, its position may be liquidated at a loss, and it will be liable for any resulting deficit in its account.

Concentration Risk: The Fund is subject to concentration risk by investing a significant portion of its assets in certain types of investments, which may include obligations of sovereign governments and other entities, issuers located in a particular country or geographic area, public and private issuers located in or significantly exposed to developing countries or issuers engaged in a particular industry. Positions taken and commitments made by the Fund often involve substantial amounts and significant exposure to individual issuers and businesses, including non-investment grade issuers. As a result, the investment performance of the Fund may be substantially adversely affected by the unfavorable performance of certain types of investments, which may adversely affect the value of its net assets.

Certain shareholders may own a substantial amount of fund shares and/or hold their fund investments for a limited period of time. Large redemptions by these shareholders may force the Fund to sell investments to satisfy redemption requests, which may negatively impact the fund's NAV and/or accelerate the realization of taxable income/gain, cause the Fund to make additional taxable distributions to shareholders and possibly wind up its operations.

The Fund invests a significant portion of its assets in investments of issuers located in the U.S. A decrease in imports or exports, changes in trade regulations, inflation and/or an economic recession in the U.S. may have a material adverse effect on the U.S. economy. Proposed and adopted policy and legislative changes in the U.S. may also have a significant effect on U.S. markets generally, as well as on the value of certain investments. Governmental agencies project that the U.S. will continue to maintain elevated public debt levels for the foreseeable future which may constrain future economic growth. Circumstances could arise that could prevent the timely payment of interest or principal on U.S. government debt, such as reaching the legislative "debt ceiling". Such non-payment would result in substantial negative consequences for the U.S. economy and the global financial system. If U.S. relations with certain countries deteriorate, it could adversely affect issuers that rely on the U.S. for trade. The U.S. has also experienced increased internal unrest and discord. If these trends were to continue, they may have an adverse impact on the U.S. economy and the issuers in which the Fund invests.

Counterparty Credit Risk: Counterparty credit risk is the risk of losses due to the failure of a counterparty to perform according to the terms of a contract. Many of the markets in which the Fund effects its transactions are not publicly traded. The participants in such markets are typically not subject to credit evaluation and regulatory oversight as are members of "exchange based" markets. This exposes the Fund to the risk that a counterparty may fail to settle open transactions or be unable to perform on its commitments.

For OTC option contracts purchased, the Fund bears the risk of loss of the amount of the premiums paid plus the positive change in market values net of any collateral held by the Fund should the counterparty fail to perform under the contracts. Option contracts written by the Fund do not typically give rise to counterparty credit risk, as option

contracts written generally obligate the Fund, and not the counterparty, to perform. The Fund may be exposed to counterparty credit risk with respect to options written to the extent the Fund deposits collateral with its counterparty to a written option.

With exchange-traded purchased option contracts and futures contracts and centrally cleared swap contracts, there is less counterparty credit risk to the Fund since the exchange or clearinghouse, as counterparty to such instruments, guarantees against a possible default. The clearinghouse stands between the buyer and the seller of the contract; therefore, the credit risk is limited to failure of the clearinghouse. While offset rights may exist under applicable law, the Fund does not have a contractual right of offset against a clearing broker or clearinghouse in the event of a default (including the bankruptcy or insolvency) of the clearing broker or clearinghouse. Additionally, counterparty credit risk exists in exchange-traded futures contracts and centrally cleared swap contracts with respect to initial and variation margin that is held in a clearing broker's customer accounts. While clearing brokers are required to segregate customer margin from their own assets, in the event that a clearing broker becomes insolvent or goes into bankruptcy and at that time there is a shortfall in the aggregate amount of margin held by the clearing broker for all its clients, typically the shortfall would be allocated on a pro rata basis across all the clearing broker's customers, potentially resulting in losses to the Fund.

The Fund manages counterparty credit risk by entering into transactions only with counterparties that it believes have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties.

Currency Risk: The Fund may invest in financial instruments and may enter into transactions denominated in currencies other than its functional currency. Consequently, the Fund may be exposed to risks that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the Fund's assets or liabilities denominated in currencies other than the functional currency. The Fund may enter into forward foreign currency exchange contracts to manage the risk associated with foreign currency exchange fluctuations. The use of forward foreign currency exchange contracts involves the risk that the value of a foreign currency rate decreases due to movements in the value of the referenced foreign currencies.

Indemnifications: In the normal course of business, the Fund enters into contracts that contain a variety of representations that provide general indemnification. The Fund's maximum exposure under these arrangements is unknown because it involves future potential claims that may be made against the Fund, which cannot be predicted with any certainty. However, based on past experience, the Fund expects the risk of material loss therefrom to be remote.

Interest Rate Risk: The Fund may invest a significant portion of its assets in fixed-income securities and/or use derivatives tied to the fixed-income markets. Changes in the market interest rates or economic condition may affect the value and/or liquidity of such investments. Interest rate risk is the risk that prices of bonds, debt securities and other fixed-income securities will increase as interest rates fall and decrease as interest rates rise. The Fund may be subject to a greater risk of rising interest rates during a period of historically low interest rates. Changing interest rates may have unpredictable effects on markets, may result in heightened market volatility, and could negatively impact the Fund's performance.

Leverage Risk: Various forms of leverage are used in the investment strategy of the Fund. While leverage presents opportunities for increasing the total return on investments, it has the effect of potentially increasing losses as well. Accordingly, any event which adversely affects the value of an investment could be magnified to the extent leverage is utilized. The cumulative effect of the use of leverage with respect to any investments in a market that moves adversely to such investments could result in a substantial loss that would be greater than if the investment were not leveraged.

Market Risk: In the normal course of its business, the Fund may invest in securities and/or other instruments and may enter into transactions where risks exist due to fluctuations in the market (market risk). The value of investments held by the Fund may decline in response to certain events, including those directly involving the issuers whose investments are owned by the Fund, whether caused by factors specific to an individual investment, its issuer or any factor affecting investments traded in the market; conditions affecting the general economy; the overall market as well as local, regional or global political and/or social instability; regulation, taxation or international tax treaties between various countries; or currency, interest rate and price fluctuations. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the Fund and its investments. Such events are beyond the Fund's control, and the likelihood that they may occur cannot be predicted.

The Fund may invest in derivative financial instruments that involve varying degrees of off-balance sheet market risk, and changes in the market values of the financial instruments underlying such derivative financial instruments frequently result in changes in the Fund's unrealized appreciation (depreciation) on such derivative financial instruments as reflected in the Statement of Operations. Off-balance sheet market risk exists when the maximum potential loss on a particular financial instrument is greater than the carrying value of such financial instrument.

Non-U.S. Investments: Investments outside the U.S. or denominated in non-U.S. currencies pose currency exchange risks (including blockage, devaluation and non-exchangeability), as well as a range of other potential risks, which could include, depending on the country involved, expropriation, confiscatory taxation, political or social instability, illiquidity, price volatility and market manipulation. In addition, less information may be available regarding non-U.S. issuers and non-U.S. companies may not be subject to accounting, auditing and financial reporting standards and requirements comparable to or as uniform as those of U.S. companies following U.S. GAAP or a similar basis of accounting. Transaction costs of investing outside the U.S. are generally higher than in the U.S. There is generally less government supervision and regulation of exchanges, brokers and issuers than there is in the U.S. The Fund might have greater difficulty taking appropriate legal action in non-U.S. courts. Non-U.S. markets also have different clearance and settlement procedures, which in some markets have at times failed to keep pace with the volume of transactions; thereby creating substantial delays and settlement failures that could adversely affect the Fund's performance.

Prepayment Risk: The Fund may be exposed to prepayment risk, which is the risk that borrowers may exercise their option to prepay principal earlier than scheduled during periods of declining interest rates, which would force the Fund to reinvest in lower yielding securities.

Price Risk: Price risk is the risk that the value of an investment will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or any factor affecting investments traded in the market. As the Fund's investments are carried at fair value with fair value changes recognized in the Statement of Operations, all changes in market conditions will directly affect net assets. A derivative contract may suffer a mark-to-market loss if the value of the contract

decreases due to an unfavorable change in the market rates or values of the underlying instrument.

9. SUBSEQUENT EVENTS

Management has evaluated the impact of all subsequent events on the Fund's financial statements through March 10, 2025, the date these financial statements were available to be issued, and has determined that there were no subsequent events requiring adjustment to or disclosure in these financial statements.
