2024 Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

---

**A. Actuarial Assumptions for Funding Purposes**

Valuation Interest Rate (Minimum Funding)	The 24-Month Average Segment Rates applicable for January 2024 adjusted for ARPA (4.75%, 4.96%, 5.59%).
Cash Balance Interest Crediting Rate	4.55%.
Retirement (Not-at-risk funding target)	Active participants are assumed to retire at the end of the Fiscal Year in which age 65 is attained, or age at June 30, if older.
Mortality	None.
Withdrawal	None.
Disability	None.
New Entrants	No new entrants are assumed to enter the Plan after the valuation date.
IRS Section 415(b) Limit	For 2024, the maximum benefit limitation is \$275,000.
Form of Payment	100% of participants will elect a lump sum.
Maximum Compensation	Compensation was limited to \$345,000 for 2024 for the purposes of calculating benefits.
Pre-Retirement Death Benefit	Because the assumed form of payment is a lump sum payable at Normal Retirement and there is no forfeiture upon death, the value of the Pre-Retirement Death Benefit was implicitly determined by not reflecting pre-retirement mortality.

**B. Actuarial Methods for Funding Purposes**

1. Actuarial Cost Method

The actuarial cost method is the Unit Credit Actuarial Cost Method.

Under this cost method, the target liability is defined as the present value of the accrued benefits on the valuation date. The funding shortfall is the excess, if any, of the amount by which the target liability exceeds the actuarial value of Plan Assets.

The target normal cost, determined on the valuation date, is the amount required to fund the benefit expected to be earned in the current year plus expected expenses.

2. Asset Valuation Method

Market value.

**C. Assumptions Rationale**

Valuation Interest Rates	The interest rate assumption used is prescribed by IRC section 430(h) subject to specified elections by the plan sponsor.
Cash Balance Interest Crediting Rate	Based on the asset allocations and capital market expectations as of January 1, 2024, 4.55% is a reasonable long-term rate of return on plan assets assumption, which is used to calculate assumed Deemed Investment Experience for the participants.
Pre-Retirement Mortality	Because the assumed form of payment is a lump sum payable at Normal Retirement and there is no forfeiture upon death, the value of the Pre-Retirement Death Benefit was implicitly determined by not reflecting pre-retirement mortality. Furthermore, given the small population covered under the Plan, mortality experience is difficult to predict and it is reasonable to assume no pre-retirement mortality.
Post-Retirement Mortality	100% of participants are assumed to elect a lump sum. This assumption is based on best expectations of future experience given plan provisions. Alternative forms of payment are not expected to generate material gains or losses.
Withdrawal	No withdrawal is assumed due to low historical turnover rates and given that the small population covered under the Plan makes this assumption difficult to predict. This assumption is not expected to generate material actuarial gains or losses as participants are not expected to terminate prior to become fully vested.
Retirement	Retirement rates are based on the plan sponsor's historical experience and expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed. The President received an in-service distribution first starting in 2018 and under the terms of the Plan, must continue to receive in-service distributions as of each subsequent June 30 while actively employed.
Form of Payment	100% of participants are assumed to elect a lump sum. This assumption was based on best expectations given plan provisions. Alternative forms of payment are not expected to generate material gains or losses.

**C. Assumptions Rationale (cont.)**

Disability

No disability is assumed due to a low historical incidence of disability. Plan makes this assumption difficult to predict. This assumption is not expected to generate material actuarial gains or losses as there is no forfeiture upon disability benefit is provided under the Plan.

**Statement by Enrolled Actuary**

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

2024 Schedule SB, Line 22 - Weighted Average Retirement Age

---

**Weighted Average Retirement Age**

The normal retirement age in the Plan is defined as age 65. For the purposes of the actuarial valuation as of January 1, 2024, all participants are assumed to retire at the end of the year in which age 65 is attained, or age at June 30 of the current Plan Year, if older. For the purposes of calculating the weighted average retirement age, an average retirement age was calculated based on assumed retirement age.

<u>Retirement Age</u>	<u>Retirement Rate</u>	<u>Weighted Average Retirement Age</u>
65, or age at June 30 of year if older	100.0%	68.50
