Report of Independent Auditors

The U.S. Benefits Committee, the Plan Participants and the Plan Administrator of
Fluor Corporation Employees' Savings Investment Plan

Opinion

We have audited the financial statements of Fluor Corporation Employees' Savings Investment Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statement of changes in net assets available for benefits for the year ended December 31, 2024, and the related notes (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan at December 31, 2024 and 2023, and the changes in its net assets available for benefits for the year ended December 31, 2024, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Supplemental Schedule Required by ERISA

Our audits were conducted for the purpose of forming an opinion of the financial statements as a whole. The supplemental schedule of assets (held at end of year) as of December 31, 2024, (referred to as the "supplemental schedule"), is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to auditing procedures applied in the audits of

the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedule, we evaluated whether the supplemental schedule, including its form and content, is presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the supplemental schedule is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Fluor Corporation Employees' Savings Investment Plan
Notes to Financial Statements
December 31, 2024

1. Description of the Plan

The Fluor Corporation Employees' Savings Investment Plan (the plan) is a defined contribution plan sponsored by Fluor Corporation (Fluor or the company). The plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The following provides only general information about the plan. Participants should refer to the plan document for a complete description of the plan's provisions.

The plan's operations and design are overseen by Fluor's U.S. Benefits Committee and Global Benefits Committee (collectively, plan management). Plan management is responsible for administering the plan on behalf of participants, establishing investment policies and objectives (including investment portfolio diversification and risk concentration guidelines), monitoring investment activity and ongoing investment performance, funding strategies and other corporate oversight. The plan may utilize professional investment managers to assist plan management.

A master trust agreement requires that The Northern Trust Company (the trustee), either directly or indirectly, hold the plan's assets in a master trust and administer and distribute those assets in accordance with the plan.

One component of the plan is an employee stock ownership plan (ESOP) which was originally established for participants to invest in Fluor stock. All of the investments in the Fluor Common Stock Fund are held by the ESOP. Participants may no longer acquire additional interests in the Fluor Common Stock Fund but can still sell or transfer their investment out of the Fluor Common Stock Fund.

Contributions

Certain employees of Fluor are eligible to participate in the plan and may begin making contributions to the plan as soon as their first day of employment. Participants may elect to contribute from 1% of their compensation to a maximum percentage of 50%, subject to the Internal Revenue Service (IRS) limit of \$23,000 during 2024. Participants who have attained age fifty before the end of the year are eligible to make catch-up contributions allowing them to maximally contribute up to \$30,500 during 2024. Participants may make contributions as either pre-tax contributions, post-tax (Roth) contributions or a combination of both.

Company matching contributions made to the plan are in accordance with the "safe harbor" provisions of the Internal Revenue Code (the Code). For participants who have completed one year of service, the company's matching contribution is equal to 100% of the participant's contribution to the plan, limited to 5% of the participant's eligible compensation. The company's matching contributions are initially invested in the same funds as the participant contributions but may be subsequently transferred to other funds by the participant. Participants are fully vested at all times in both their and the company matching contributions and earnings thereon.

The company may annually make an additional discretionary contribution for participants who have completed one year of service. The discretionary contribution is determined by plan management and may not exceed 15% of the aggregate eligible compensation of all participants in the plan.

Fluor Corporation Employees' Savings Investment Plan

Notes to Financial Statements (continued)

The 2024 discretionary contribution, paid in 2025, for salaried and craft participants was as follows:

Salaried Participants		Craft Participants	
Total Years of Service as of Last Day of Plan Year	Discretionary Contribution (as a % of Eligible Compensation)	Total Years of Service as of Last Day of Plan Year	Discretionary Contribution (as a % of Eligible Compensation)
1-9	4%	1-9	1%
10-19	5%	10 or more	2%
20-29	6%		
30 or more	7%		

Participants vest in the annual discretionary contribution based on length of service but become fully vested after 3 years of service. The unvested portion of terminated participant accounts is available to reduce company contributions or to pay administrative expenses, at the discretion of plan management. Participants who terminate service by reason of retirement, death or permanent and total disability become fully vested upon termination of service.

Benefits Paid

If employment ends for any reason, participants are eligible to receive a distribution of their vested account balance. Distributions can be made in lump-sum amounts or periodic payments. Participants invested in Fluor common stock may request Fluor common stock valued at current market value on the distribution date in lieu of or in combination with cash. If the account balance is \$1,000 or less, a distribution will be made in a lump-sum following the end of employment. If the amount to be distributed exceeds \$1,000 and the participant does not request a distribution, the participant's account remains in the plan unless requested by the participant. When a participant dies, the entire amount in the participant's account is allocated to the participant's beneficiaries, as described in the plan document. Under certain hardship conditions, as defined in the plan document, participants may elect to withdraw a portion of their account balance at any time during the plan year. Additionally, participants who have reached age 59½ have the option of withdrawing all or part of their vested account balance at any time, and must begin distributions at age 73.

Notes Receivable from Participants

The plan allows participants to borrow up to 50% of their vested account balance. Borrowings can be between \$1,000 and \$50,000, reduced by the participant's highest borrowing balance in the previous 12 months. Such borrowings are evidenced by promissory notes, bear interest at prevailing market rates (e.g., prime rate plus 1%) and are repaid through payroll deductions. The maximum length of each promissory note is 15 years for a primary residence note or 5 years for all other notes. Participants are allowed to have only one note outstanding at any time.

Fluor Corporation Employees' Savings Investment Plan

Notes to Financial Statements (continued)

Income Tax Status

The plan has received a determination letter from the IRS dated September 23, 2015, stating that the plan is qualified under Section 401(a) of the Code and, therefore, the related trust is exempt from federal income taxes. Subsequent to this determination by the IRS, the plan was amended and restated. Plan management believes the plan, as amended and restated, continues to operate in compliance with the applicable requirement of the Code.

Accounting principles generally accepted in the United States (GAAP) require plan management to evaluate uncertain tax positions taken by the plan. The financial statement effects of a tax position are recognized when the position is more likely than not to be sustained upon examination by the IRS based on the technical merits. Plan management has analyzed the tax positions taken by the plan and has concluded that there are no uncertain positions taken or expected to be taken. The plan has recognized no interest or penalties related to uncertain tax positions. The plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Participant Accounts

An individual account is maintained for each participant. Participant designated funds consist of the Target Date, Stable Value, Total Bond Index, Diversified Bond, S&P 500 Index, Small/Mid Cap Equity, Non-U.S. Equity, Non-U.S. Equity Index, Small/Mid Cap Equity Index, Real Return and Fluor Common Stock Funds and a Self-Directed Brokerage Account (SDBA). The asset allocations of these designated funds comprise various debt and equity securities. Each account is adjusted for contributions or withdrawals and net investment income or loss allocated to the individual participants in each fund. If no funds are selected by the participant, then the contributions are directed to the appropriate Target Date funds based on participant age. Participants are allowed to transfer a portion or all of the balance in their accounts between funds on a daily basis. However, participants can make transfers into the Small/Mid Cap Equity, Small/Mid Cap Equity Index, S&P 500 Index, Non-U.S. Equity, Non-U.S. Equity Index or Real Return funds only once per calendar month. Participants are limited to a maximum of three trades per 30 days, with the ability to always move to the Stable Value fund.

Rollover Contributions

Participants may make rollover contributions into the plan from other qualified plans.

Asset Transfers from TRS 401(k) Retirement Plan

If a participant of the TRS 401(k) Retirement Plan (TRS plan), a separate defined contribution plan sponsored by a wholly owned subsidiary of Fluor, becomes eligible for participation in the plan, an automated process transfers the participant's TRS plan balance to the plan.

Plan Termination

While the company has not expressed any intent to terminate the plan, it has the right to do so at any time. In the event of plan termination, participants will become fully vested in their accounts.

2. Summary of Significant Accounting Policies

Investments

The Fluor DC Investments (as later defined) are stated at fair value as follows:

Corporate equity securities are valued based on the last trade or official close of an active market or exchange on the last business day of the year. Securities not traded on the last business day are valued at the last reported bid price. The readily determinable fair value of investments in common or collective trusts (CCTs) represents the net asset value of the shares or units as published on the last business day of the year. The estimated fair value of investments in CCTs without a readily determinable fair value represents the underlying net asset value of the shares or units of such funds as determined by the issuer.

The SDBA is provided for participants who want more investment choices than the core options offered by the plan. Through the SDBA, participants have access to a wide range of mutual funds. As of December 31, 2024 and 2023, the investment holdings of the participants via the SDBA included a large variety of mutual funds valued at fair value, which represents the net asset value of the shares of such funds as published on the last business day of the year.

Investments in the Stable Value Fund consist of fully benefit-responsive synthetic guaranteed investment contracts (synthetic GICs) and a CCT short-term investment fund. Synthetic GICs, which are reported at contract value, are comprised of an underlying asset and a "wrapper" contract. A guaranteed investment contract is an insurance contract that guarantees its owner principal repayment and a stated rate of interest for a specified period of time. Wrapper contracts essentially modify the investment characteristics of underlying securities to those of guaranteed investment contracts. The wrapper contracts provide that benefit-responsive distributions for specific underlying securities may be withdrawn at contract value. Contract value represents contributions made, plus interest earned, less withdrawals. Benefit-responsive distributions are generally defined as withdrawals due to a participant's retirement, disability, death or participant-directed transfers, in accordance with the terms of the plan.

Net investment income of the master trust is allocated to the plan based on the ratio of the plan's investment in the master trust to the total value of the related master trust investments as of the beginning of the day.

Purchases and sales of investments are recorded on the trade date. Net appreciation and depreciation includes the gains and losses on investments bought and sold as well as held during the year. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Risks and Uncertainties

The master trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the plan's financial statements.

Fluor Corporation Employees' Savings Investment Plan

Notes to Financial Statements (continued)

The master trust's concentrations of credit risk are dictated by the plan's provisions, as well as those of ERISA and participants' investment preferences. The Stable Value Fund primarily invests in contracts of financial institutions with at least "A" credit ratings. The master trust's exposure to credit risk on the wrapper contracts is limited to the value of the contracts with each financial institution. Plan management believes that no significant concentrations of credit risk exist within any investment option at December 31, 2024 or 2023.

Contributions

Participant contributions are recorded when the company makes payroll deductions from the participant's compensation. Company matching contributions, if any, are recorded at the same time as the participant contribution.

The discretionary contribution is recorded at the end of the plan year and is paid by Fluor in the following year. The contribution may be made in cash or by transfer of certain other assets held by Fluor. Discretionary contributions were \$39 million and \$34 million for 2024 and 2023, respectively.

Unvested forfeitures of less than \$1 million as of both December 31, 2024 and 2023, respectively, were used to reduce company contributions in the following year.

Benefits Paid

Benefits, terminations and withdrawals are recorded when paid.

Notes Receivable from Participants

Notes receivable from participants represent participant loans that are recorded at their unpaid principal balance plus any accrued but unpaid interest. Interest income on notes receivable from participants is recorded when it is earned. Related fees are recorded as administrative expenses and are expensed when they are incurred. No allowance for credit losses has been recorded as of December 31, 2024 or 2023. If a participant ceases to make note repayments and plan management deems the participant note to be a distribution, the participant note balance is reduced and a benefit payment is recognized.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires plan management to make estimates that affect the amounts reported in the financial statements. Although such estimates are based on plan management's most recent assessment of the underlying facts and circumstances utilizing the most current information available, actual results could differ from those estimates.

Subsequent Events

Plan management has evaluated subsequent events through June 13, 2025, the date the financial statements were available to be issued.

3. Master Trust

Investments

Fluor collectively manages the investments of the plan and the TRS plan (collectively, the Fluor DC Investments). The Fluor DC Investments are held in a single master trust account in which all the investments are participant-directed.

The plan's investments consist of its approximate 99% owned share of the net assets held by the master trust as of both December 31, 2024 and 2023.

The Target Date funds are CCT funds for which the investment asset allocations are based on a target maturity date intended to coincide with a participant's eligible retirement date. These funds hold a mix of stock, bond and real estate index funds designed to gradually become more conservative as the target year approaches. Upon reaching the target year, the maturing fund is combined with another fund (the Target Date Retirement Fund), which is designed to provide those participants a lower-risk investment vehicle. Participant-directed redemptions out of the Target Date funds can occur on a daily basis, whereas redemptions directed by Fluor require a 30 day notification period.

Fluor Corporation Employees' Savings Investment Plan

Notes to Financial Statements (continued)

Certain investments in CCTs consist of equity and bond index funds that do not have a readily determinable fair value and are reported at net asset value. At the present time, there no restrictions on how the plans may redeem these investments.

Net Investment Income

Net investment income for the Fluor DC Investments for 2024 is as follows:

	Fluor DC Investments
	<i>(In thousands)</i>
Net appreciation in fair value of investments	\$ 403,706
Interest on synthetic GICs	17,176
Interest	91
Dividends	1,086
Investment management and administrative expenses	(3,513)
Other	331
Total net investment income	\$ 418,877

4. Stable Value Fund (Synthetic GICs)

The Stable Value Fund is part of the master trust. Investment income, net of expenses, of the Stable Value Fund totaled \$16 million for 2024.

The Stable Value Fund holds synthetic GICs in which it participates in asset and liability risks. In the case of a full liquidation event, the issuer is responsible for covering any amount by which the contract value exceeds the fair value of the underlying portfolio. Risks arise when entering into any investment contract due to the potential inability of the issuer to meet the terms of the contract. To the extent that an issuer has failed to meet the terms of a contract, synthetic GICs would then also bear the risk of default or the lack of liquidity of the underlying portfolio assets.

The future crediting rates of synthetic GICs are driven by the performance of the underlying assets. Synthetic GICs are designed to reset crediting rates on a quarterly basis, which cannot be less than 0%. The crediting rate of the synthetic GICs tracks current market yields on a trailing basis. The rate reset allows the synthetic GICs to converge with the fair value of the underlying portfolio over time, assuming the portfolio continues to earn the current yield for a period of time equal to the portfolio duration.

There are certain events not initiated by plan participants that limit the ability of the plan to transact with the issuer at contract value. Each contract issuer specifies the events that may trigger a market value adjustment. Such events may include: material amendments to the Stable Value Fund's structure or administration; changes to the plans' competing investment options; complete or partial termination of the Stable Value Fund; the Stable Value Fund no longer qualifying for exemption from federal income taxes; the redemption of all or a portion of the interests in the Stable Value Fund held; the closing or sale of a subsidiary, employing unit or affiliate; the

Fluor Corporation Employees' Savings Investment Plan

Notes to Financial Statements (continued)

bankruptcy or insolvency of the plan sponsor; the merger with another plan; change in law, regulation, ruling, administrative or judicial position or accounting requirement applicable to the Stable Value Fund; and the delivery of any communication to plan participants designed to influence a participant not to invest in the Stable Value Fund. Plan management does not believe that the occurrence of any such foregoing event is probable.

Direct transfers from the Stable Value Fund to the SDBA are prohibited and any amount transferred from the Stable Value Fund to any of the other investment options available under the plan may not be subsequently transferred to the SDBA for a period of 90 days from the initial date of transfer out of the Stable Value Fund.

5. Fair Value Measurements

The three levels of the fair value hierarchy under GAAP are described as follows:

- Level 1 — quoted prices in active markets for identical assets and liabilities
- Level 2 — inputs other than quoted prices in active markets for identical assets and liabilities that are observable, either directly or indirectly
- Level 3 — unobservable inputs

Fluor Corporation Employees' Savings Investment Plan

The following table presents, for each of the fair value hierarchy levels, the Fluor DC Investments' assets and liabilities that are measured at fair value on a recurring basis.

(1) Amounts include securities on loan under the 2023 security lending program, no such program existed in 2024.

6. Related Party and Party-In-Interest Transactions

Certain investments in the CCT accounts are managed by the trustee and BlackRock (an investment manager), both of whom have a fiduciary responsibility to the plan. Additionally, a portion of the plan's assets are invested in BlackRock CCTs and Fluor common stock. Transactions involving Fluor common stock represent party-in-interest transactions. Master trust holdings for BlackRock, the trustee and Fluor common stock amounted to approximately \$982 million, \$1.5 billion and \$84 million, respectively, as of December 31, 2024. Master trust holdings for BlackRock, the trustee and Fluor common stock amounted to approximately \$921 million, \$1.3 billion and \$84 million, respectively, as of December 31, 2023. None of the party-in-interest transactions are believed to be prohibited transactions.

Investments managed by BlackRock represented 28% and 29% of the Fluor DC Investments, respectively, as of both December 31, 2024 and 2023. Investments managed by the trustee represented 43% and 40% of the Fluor

DC Investments, respectively, as of December 31, 2024 and 2023. Investments in Fluor common stock represented 2% and 3% of the Fluor DC Investments, respectively, as of December 31, 2024 and 2023.
