Schedule SB, Part V – Statement of Actuarial Assumptions/Methods
Plan: Tramec Hill Fastener, LLC Employees' Pension Trust
EIN: 45-0603877
Plan: 001

Summary of Actuarial Methods

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. A plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that a plan will be adequately and systematically funded. Annual contributions are also affected by a plan's "asset valuation method" (as well as plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

Actuarial Cost Method

The actuarial cost method used for determining the Plan's ERISA funding requirements is the Unit Credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's Normal Cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's benefits. This method is prescribed for ERISA funding requirements by the Pension Protection Act of 2006.

Asset Valuation Method

The Actuarial Value of Assets used for determining the Plan's ERISA funding requirements is equal to the Market Value of Assets. The Market Value of Assets is equal to the Fair Value of Assets as of the valuation date plus the discounted value of employer contributions made after the valuation date. These contributions are discounted to the valuation date using the Effective Interest Rate for the prior plan year.

PBGC Variable-Rate Premium Method

The standard method is used for the PBGC variable-rate premium calculation.

Amortization Method

For the Plan's ERISA funding requirements, incremental Funding Shortfall amounts are amortized over a fifteen-year period, and the related shortfall amortization payment is determined on the first valuation date following the plan year in which it arises based on the segment rates used for ERISA minimum funding purposes on that date, as prescribed under IRC Section 430.

Changes in Actuarial Methods Since Prior Valuation

None.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Plan: Tramec Hill Fastener, LLC Employees' Pension Trust

EIN: 45-0603877

Plan: 001

Summary of Actuarial Assumptions

ECONOMIC ASSUMPTIONS

Interest Rates

The current funding and PBGC interest rates are as follows. The funding interest rates are prescribed under IRS regulations based on the Plan Sponsor's interest rate election. The PBGC interest rates are based on the Plan Sponsor's elected method for determining the premium funding target.

	Minimum Funding	Maximum Deductible	PBGC Premium
Segment 1 (0–5 years)	4.75%	4.37%	5.01%
Segment 2 (5–20 years)	4.96%	4.96%	5.13%
Segment 3 (20+ years)	5.59%	4.95%	5.15%
Effective Interest Rate	5.04%	4.89%	5.12%

ERISA minimum funding: 24-month average segment rates using a zero-month lookback period, adjusted to reflect the applicable segment rate stabilization corridor.

Maximum Deductible Contribution: 24-month average segment rates using a zero-month lookback period, but not adjusted to reflect segment rate stabilization.

PBGC premium: 24-month average segment rates using a zero-month lookback period, but not adjusted to reflect segment rate stabilization. The alternative method is used for the PBGC variable rate premium calculation.

FASB ASC Topic 960: 7.00% per year. It is based on the Plan's investment policy, including target asset allocation, and Milliman's capital market expectations.

DEMOGRAPHIC ASSUMPTIONS

Mortality – PPA Funding

Pre-retirement: Non-annuitant tables as prescribed on the valuation date

Post-retirement: Annuitant tables as prescribed on the valuation date

Mortality – FAS 35

Effective January 1, 2024, the mortality table was updated to the Pri-2012 Blue Collar Mortality table (Employee, Annuitant, Disabled, and Survivor) with Projection Scale MP-2021, applied generationally. As a generational table, it reflects mortality improvements both before and after the measurement date.

Compensation Increases

None (the Plan was frozen April 30, 2011)

Administrative Expenses

None

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods
Plan: Tramec Hill Fastener, LLC Employees' Pension Trust
EIN: 45-0603877
Plan: 001

Withdrawal Rates

Table T-1 from the Pension Actuary's Handbook

Retirement rates

Participants are assumed to retire at their attainment of age 65

Marriage rates

80% of all participants not in pay status are assumed to be married, with male spouses assumed to be 3 years older than female spouses.

CHANGES IN ASSUMPTIONS SINCE PRIOR VALUATION

Interest rates for ERISA minimum funding: Effective January 1, 2024, the interest rates used to determine the minimum funding requirements were updated based on the applicable 24-month average segment rates with a four-month lookback from the valuation date, adjusted to reflect the applicable segment rate stabilization corridor.

Interest rates for Maximum Deductible Contribution: Effective January 1, 2024, the interest rates used for maximum deductible purposes were updated based on the applicable 24-month average segment rates, but not adjusted to reflect segment rate stabilization. The interest rates were updated to comply with IRS requirements.

Interest rates for PBGC premiums: Effective January 1, 2024, the interest rates used for PBGC variable rate premium purposes were updated to comply with PBGC requirements.

Mortality for ERISA minimum funding, Maximum Deductible Contribution, and PBGC premium: Effective January 1, 2024, mortality was updated as prescribed by IRC Section 430(h)(3)(A) and 417(e).

Mortality for FASB ASC 960 purposes: Effective January 1, 2024, the mortality was updated to reflect the most recent mortality projection scale published by the Society of Actuaries as of the valuation date.

Schedule SB, Part V – Statement of Plan Provisions
Plan: Tramec Hill Fastener, LLC Employees' Pension Trust
EIN: 45-0603877
Plan: 001

Summary of Principal Plan Provisions

This summary of plan provisions is intended to only describe the essential features of the Plan. All eligibility requirements and benefit amounts shall be determined in strict accordance with the plan document itself.

Definitions

Accrued Benefit

The accrued benefit for each participant is determined under the fractional rule and is equal to that amount which is in the same proportion to the participant's normal retirement benefit as the participant's years of accrual service completed as of the date of determination bear to the total years of accrual service the participant would complete if he were to continue to participate until his normal retirement date. The benefit was frozen effective April 30, 2011.

Actuarial Equivalent

Actuarial equivalent means a form of benefit differing in time, period and/or manner of payment from another form of benefit but having the same value when computed based upon the following interest and mortality assumptions:

Interest: 7% per annum, compounded annually

Mortality: 1983 Group Annuity Mortality Table

For purposes of lump sum determinations under IRC 417(e), actuarial equivalence is determined using the following interest and mortality assumptions:

Interest: Phased-in interest rates for the first month prior to the plan year in which the distribution is made

Mortality: Table described in Revenue Ruling 2007-67

Average Monthly Compensation

A participant's average monthly compensation, as of a given date, is determined by dividing the total compensation he received during the 5 consecutive compensation periods (during the last 10 consecutive years) for which his compensation was highest by the number of months during such period for which he received compensation. No fractional compensation periods will be taken into account.

A participant's excess average monthly compensation is that portion, if any, of his average monthly compensation that is in excess of his monthly integration level.

Compensation

Compensation reflects that compensation which is treated as FICA wages without regard to the Social Security taxable wage base. Compensation also includes any amounts that are treated as salary reduction contributions and used to purchase non-taxable benefits under Section 125 or 401(k) of the Internal Revenue Code.

The compensation period is the 12-month period that begins each January 1 and ends each December 31.

Effective Date

The effective date of the Plan is November 1, 1966.

Schedule SB, Part V – Statement of Plan Provisions
Plan: Tramec Hill Fastener, LLC Employees' Pension Trust
EIN: 45-0603877
Plan: 001

Vesting schedule

A participant's vested percentage will be determined in accordance with the following table:

Years of Vesting Service	Vested Percentage
Less than 3 Years	0%
3 Years	20%
4 Years	40%
5 Years	60%
6 Years	80%
7 Years or more	100%

Year of service

For eligibility purposes: Years of service for purposes of eligibility to participate in the Plan are referred to as years of eligibility service and are determined using the elapsed time method.

All of an employee's years of eligibility service are taken into account in determining his eligibility to participate.

For benefit purposes: Years of service for purposes of computing a participant's normal retirement benefit are referred to as years of benefit service and are determined using the hours of service method. A year of benefit service is credited for each plan year in which a participant is credited with at least 1,000 hours of service. Only full years of service will be credited.

All of a participant's years of benefit service are taken into account in determining his monthly benefit except:

- Service for which the employee was not entitled to receive compensation; and
- Service while the employee was not in an eligible employee classification.

For accrual purposes: Years of service for purposes of computing a participant's accrued benefit are referred to as years of accrual service and are determined using the hours of service method. A year of accrual service is credited for each plan year in which a participant is credited with at least 1,000 hours of service. Only full years of service are credited.

All of a participant's years of accrual service are taken into account in determining his accrued benefit except:

- Service for which the employee was not entitled to receive compensation; and
- Service while the employee was not in an eligible employee classification.

For vesting purposes: Years of service for purposes of computing a participant's vested percentage are referred to as years of vesting service and are determined using the hours of service method. A year of vesting service is credited for each computation period in which an employee is credited with at least 1,000 hours of service. The computation period is the 12 consecutive month period beginning with the employee's employment commencement date and anniversaries thereof. Only full years of service are credited.

All of a participant's years of vesting service are taken into account in determining his vested percentage.

Schedule SB, Part V – Statement of Plan Provisions
Plan: Tramec Hill Fastener, LLC Employees' Pension Trust
EIN: 45-0603877
Plan: 001

Participation

An employee will become a participant in the Plan on the January 1st of the year in which the attainment of age 20 and 1/2 and the completion of 6 months of employment is attained. No new entrants into the Plan effective April 30, 2011.

Normal retirement

Each participant who becomes eligible for a normal retirement benefit under the Plan will be entitled to receive a monthly retirement pension benefit beginning at the participant's normal retirement date and payable in the normal benefit form.

Normal retirement benefit: A participant's normal retirement benefit is a monthly pension benefit commencing on his normal retirement date payable in the normal benefit form in an amount equal to:

0.65% of his average monthly compensation multiplied by years of benefit service, plus 0.50% of his excess average monthly compensation multiplied by his years of benefit service not to exceed 35 years.

The benefit was frozen effective April 30, 2011.

Normal benefit form: Lifetime Pension, 10 Years Certain - Monthly pension benefit payable for the lifetime of the participant with payments guaranteed for a minimum of 10 years. In the event of the participant's death prior to the expiration of 10 years, the same monthly pension benefit will be continued to the participant's beneficiary for the remainder of the 10-year period.

Early retirement

Early retirement date: A participant's early retirement date is the first day of the month so elected by the participant that coincides with or next follows the date upon which the participant satisfies attainment of age 55; and completion of 15 years of vesting service.

Early retirement benefit: A participant's early retirement benefit is equal to the actuarial equivalent of his accrued benefit determined as of his early retirement date.

Late retirement

An active participant who continues his employment with the employer beyond his normal retirement date may begin to receive his late retirement benefit to which he is entitled as of his late retirement date.

Late retirement date: A participant's late retirement date is the first day of the month coincident with or next following the date he retires and requests the commencement of his late retirement benefit after he has continued in the employ of the employer beyond his normal retirement date.

Late retirement benefit: A participant's late retirement benefit is equal to an amount which is the greater of (1) the actuarial equivalent of his normal retirement benefit at his normal retirement date, determined as of his late retirement date or (2) the monthly benefit which is based on the normal retirement benefit formula using the participant's years of benefit service and compensation through his late retirement date.

Disability retirement

Disability retirement date: A participant's disability retirement date is the first day of the month coincident with or next following the date of termination of his employment due to disability provided such participant has been found to be eligible for a disability retirement benefit.

An active participant will be eligible for a disability retirement benefit under the Plan upon the occurrence of permanent disability.

Schedule SB, Part V – Statement of Plan Provisions
Plan: Tramec Hill Fastener, LLC Employees' Pension Trust
EIN: 45-0603877
Plan: 001

Disability retirement benefit: An eligible participant's disability retirement benefit is equal to the monthly retirement benefit commencing on his disability retirement date that is the actuarial equivalent of the participant's accrued benefit determined as of his disability retirement date.

If a participant satisfies the requirements for a disability retirement benefit and also satisfies the requirements for a vested accrued benefit, the portion of his disability retirement benefit that is the actuarial equivalent of his vested accrued benefit will be payable in the normal benefit form (or any optional benefit form) and will be subject to the joint and survivor annuity distribution requirements. The remaining portion, if any, of the actuarial equivalent of the participant's disability retirement benefit will be payable as a lifetime pension with a monthly benefit payable for the participant's lifetime with payments terminating upon his death.

Optional benefit forms

Optional benefit forms are available and equal to the actuarial equivalent of the normal benefit form and may be in an amount more than or less than that provided by the normal benefit form depending on the option selected. Such distribution may be in one or more of the following forms:

- Lifetime Pension - monthly pension benefit payable for the lifetime of the participant with payments terminating upon the death of the participant.
- Joint & 50% Contingent Survivor Pension - monthly pension benefit payable during the joint lifetime of the participant and the joint annuitant; reduces to 50% of the original amount upon the death of the participant.
- Joint & 66.6667% Contingent Survivor Pension - monthly pension benefit payable during the joint lifetime of the participant and the participant's spouse; reduces to 66.6667% of the original amount upon the death of the participant.
- Joint & 75% Contingent Survivor Pension - monthly pension benefit payable during the joint lifetime of the participant and the participant's spouse; reduces to 75% of the original amount upon the death of the participant.

Pre-retirement death benefit

A participant's beneficiary will be entitled to receive a death benefit in the event of the death of a participant prior to the commencement of a monthly pension benefit.

The participant's designated beneficiary will be entitled to receive a death benefit equal to the present value of the participant's accrued benefit.

Termination benefit

In the event of the termination of a participant's employment for any reason other than death, disability or retirement, the participant will become entitled to receive a monthly pension benefit commencing on his normal retirement date equal to his vested accrued benefit.

Schedule SB, Line 32 – Schedule of Amortization Bases
Plan Name: Tramec Hill Fastner LLC Employees' Pension Trust

Shortfall Amortization

The amount needed to amortize the Funding Shortfall to the Applicable Funding Target for the plan year beginning January 1, 2024 is determined below. The Funding Shortfall is amortized in seven level payments using the interest rates for determining the Applicable Funding Target for the current plan year.

1. Present value of remaining prior Shortfall Amortizations					
	<u>Date</u> <u>Established</u>	<u>Amortization</u> <u>Amount</u>	<u>Years</u> <u>Remaining</u>	<u>Present Value</u> <u>Factor</u>	<u>Present</u> <u>Value</u>
a.	1/1/2022	\$1,404	13	9.900673	\$13,901
b.	1/1/2023	<u>33,022</u>	14	10.433628	<u>344,539</u>
c.	Total	34,426			358,440
2. Shortfall Amortization for current plan year					
a.	Applicable Funding Target				1,827,163
b.	Actuarial Value of Assets less Prefunding Balance				1,560,820
c.	Is the plan exempt from establishing a Shortfall Amortization for the current year?				No
d.	Funding Shortfall [(a) - (b), but not < \$0]				266,343
e.	Net Funding Shortfall [If (d) > \$0, (d) - (1c), otherwise n/a]				(92,097)
f.	Amortization factor				10.941397
g.	Shortfall Amortization for current plan year [(e) ÷ (f)]				(\$8,417)
3. Total Shortfall Amortizations [(1c) + (2g), but not < \$0]					
					26,009
