**Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**

**Actuarial assumptions for January 1, 2024 funding valuation**

Discount rate sponsor elections		
• Segment rates or full yield curve	Segment	
• Look-back months	2	
	Stabilized	Nonstabilized
• First 5 years	4.75%	4.02%
• Next 15 years	4.87%	4.73%
• Over 20 years	5.59%	4.75%
Mortality sponsor elections		
• Healthy participants	Section 430(h)(3) prescribed generational annuitant and non-annuitant mortality tables for 2024 plan year funding valuations. These tables are based on the Pri-2012 mortality tables projected with the IRS modified MP-2021 mortality improvement scale, in accordance with IRS regulation 1.430(h)(3)-1.	
Other economic assumptions		
• Inflation	Not applicable	
• Actuarial equivalence for optional forms of payments	6.0% and 417(e)(3) mortality in effect for the 2024 plan year.	
• Expected investment return	7.00% per year for 2022 and 2023, not to exceed third segment rate for applicable plan year.	
• Expenses	\$49,000 added to current year normal cost	

**Rationale for economic assumptions**

- Discount Rate – Prescribed by IRS
- Mortality – Prescribed by IRS
- Actuarial Equivalence – Actuarial equivalence assumptions are defined by the Plan, which is 6.0% and the 417(e) mortality assumption updated annually.
- Expected Return on Assets – The expected rate of return on plan assets is based on an average of the hypothetical past performance, adjusted for current market conditions, and future performance of the plan’s target asset mix. The expected return on assets assumption is net of an adjustment of 20 bps for investment expenses assumed to be paid from plan assets.
- Expenses – Prior year actual administrative expenses (excluding PBGC premiums), plus expected current plan year PBGC premiums, rounded up to the next \$1,000.

Demographic assumptions				
• Benefit commencement age	65			
• Spouse assumptions	Male participants	Female participants		
– Percentage married	70%	70%		
– Spouse age difference	2 years younger	1 year older		
Form of payment	Lump sum	Single life	50% J&S	100% J&S
• Future deaths	0%	0%	100%	0%

**Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**

• Current vested deferred	0%	25%	15%	60%
<b>Unpredictable contingent event assumptions</b>	Not applicable			

**Rationale for demographic assumptions**

- Because the plan is not large enough on its own to support a credible experience study for the demographic assumptions, the percentage married assumption is based on a 2016 experience study for the 21<sup>st</sup> Century Fox America Retirement Plan. Similarly, the benefit commencement age and spousal age assumption are based on a 2024 experience study for the 21<sup>st</sup> Century Fox America Retirement Plan. The form of payment assumption is based on a 2024 experience study for this plan. These assumptions are reviewed annually for reasonableness.

**Actuarial methods for funding**

**Asset methods**

The asset valuation method is an average of the adjusted market value for each year during the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

**Participant methods**

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan administrator provides us with data on all employees as of the valuation date on behalf of the plan sponsor and identifies those employees who have been identified as eligible for the plan by completing the plan’s eligibility requirements. Only those employees identified as eligible for the plan are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break-in-service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

**Minimum funding methods**

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant’s benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan’s valuation date is the beginning of the plan year.

**Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**

- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

**Schedule SB, Part V — Summary of Plan Provisions****Benefits included or excluded**

Unless noted below, all benefits provided by the plan are included in this valuation:

- **Most recent plan amendments included:** The plan was amended effective January 1, 2024.
- **Plan amendments excluded:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **Late retirement increases:**
  - *Active participants:* The plan has no active participants.
  - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

**Plan provisions specific to funding****Additional benefits included or excluded**

- **IRC Section 436 benefit restrictions:**
  - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits for events that occurred before the valuation date but includes contingent event benefits for events that are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
  - *Plan amendments:* See above.
  - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
  - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any Unpredictable Contingent event benefits.
