## INDEPENDENT AUDITOR'S REPORT

To the Plan Administrator of Cincinnati Financial Corporation Retirement Plan:

### Opinion

We have audited the financial statements of Cincinnati Financial Corporation Retirement Plan (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2024 and 2023, and the changes in its net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

### Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

## **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

## **Supplemental Schedules Required by ERISA**

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of assets (held at end of year) as of December 31, 2024 and of reportable transactions for the year ended December 31, 2024 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information

directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

## NOTES TO FINANCIAL STATEMENTS AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023

---

### 1. DESCRIPTION OF THE PLAN

The following description of the Cincinnati Financial Corporation Retirement Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

**General** — The Plan is a defined benefit plan. Cincinnati Financial Corporation and subsidiaries (the "Company") contribute such amounts annually as are necessary on an actuarial basis to provide the Plan with assets sufficient to meet the benefits to be paid to Plan members. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Employee Benefits Committee serves as administrator, trustee and recordkeeper of the Plan.

**Pension Benefits** — The Company froze entry into the Plan for new associates effective June 30, 2008. Participants in the Plan who were at least 40 years of age on August 31, 2008, had the option to either remain in the Plan or receive a payout of their accrued benefit balances. Except for those participants over the age of 40 who elected to remain in the Plan, the Company froze benefit accruals under the Plan effective August 31, 2008. Vested participants under 40 years of age on August 31, 2008, automatically received a payout of their accrued benefit balances. Those participants who remained in the Plan continued to have their pension benefits calculated as described below. The Plan allows for a lump sum distribution at any time for terminated participants with vested balances.

Under the Plan, prior to January 1, 2000, employees who retired at age 65 and employees with five or more years of service became fully vested and were entitled to monthly pension benefits, beginning at normal retirement age (65), equal to the sum of (a) nine-tenths of one percent of the participant's final average earnings multiplied by years of service up to fifteen years and (b) one and one-fifth percent of the participant's final average earnings multiplied by years of service in excess of fifteen years (not to exceed 40 years). Final average earnings are defined as the average of a participant's highest five consecutive years of base pay during the participant's last ten consecutive years of employment, ending with the year before a participant terminates employment.

The Board of Directors of the Company approved a change in the Plan's pension benefit formula, effective January 1, 2000. Under the new formula, annual retirement benefits are calculated as the sum of (1) years of service up to fifteen multiplied by the sum of (a) nine-twentieths of one percent of the participant's average earnings and (b) one and seven-twentieths percent of the participant's average earnings up to \$35,000 and (2) years of service in excess of fifteen (not to exceed 40 years) multiplied by the sum of (a) three-fifths of one percent of the participant's average earnings and (b) one and four-fifths percent of the participant's average earnings up to \$35,000. Benefits were increased for all employees earning under a certain level in base pay. The benefit increase was on a sliding scale where benefits were doubled for anyone earning under \$35,000. The benefit increase declines to zero at \$103,000 in base pay. Participants retiring after January 1, 2000, may still receive benefits calculated under the old formula if that amount is greater. Also effective January 1, 2000, certain benefits that were previously provided under a nonqualified

plan (supplemental employee retirement plan) are now included in this Plan. These additional benefits paid by the Plan do not impact the tax qualified status of the Plan.

The Plan permits early retirement for which the participant is to receive benefit payments equal to the participant's accrued benefit reduced by one-half percent for each month by which the commencement date of the benefit precedes age 65.

If a participant has been married for at least one year prior to the commencement of benefit payments, benefit payments are to be paid in the form of a 50% joint and survivor annuity. The participant may elect to receive one of the following reduced benefit options: guaranteed five or 10 years of survivor payments to the spouse in the event of death, a 66 2/3%, 75% or 100% joint and survivor annuity, or the participant may elect to receive a lump-sum distribution upon retirement. The Plan provides for certain restrictions to the contingent annuity options if the participant designates a non-spouse beneficiary.

For participants who qualify for an Early, Normal or Late Retirement Benefit, as defined by the Plan, lump sum distributions are calculated using the greater lump sum resulting from use of the Pension Benefit Guaranty Corporation ( PBGC) lump sum interest rate and plan mortality tables or the applicable Internal Revenue Service (IRS) 417(e) interest rates and mortality tables. Effective January 1, 2021, the PBGC changed its method of publishing interest rates associated with calculating lump sum distributions, instead indicating the PBGC would align with the applicable IRS 417(e) interest rates and mortality tables for lump sum calculations. This revised approach affects only lump sum distributions and requires a modification to the calculation method. For lump sum distributions that occur after January 1, 2021, the IRS 417(e) interest rate and IRC Section 417(e) mortality rates, updated annually and projected into the future, will apply in the calculation to determine the benefit amount for the valuation, as the prior PBGC interest rate will no longer be updated by the PBGC. The IRS 417(e) interest rate is published monthly, and the Plan has elected to use the rate published each August for the following year's benefit calculations.

All participants are vested in the Plan.

The Plan is amended periodically to update existing plan provisions based on changes in legislation or regulations affecting retirement plans. On December 29, 2022, the SECURE 2.0 Act of 2022 was enacted as part of the Consolidated Appropriations Act, 2023. The provisions include additional increases to RMD age, elimination of PBGC variable rate premium indexing, changes to mortality improvement rates, new annual funding notice requirements, amended paper statement rules, and other provisions. The United States Department of the Treasury and the Internal Revenue Service continue to issue guidance and regulations implementing provisions of SECURE 2.0. The deadline for amending plan documents has been extended to December 31, 2026, as such, the Plan sponsor is currently evaluating the provisions of SECURE 2.0 and related guidance to determine the full impact to the Plan and participants.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Basis of Accounting** — The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

**Use of Estimates** — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

**Risks and Uncertainties** — The Plan utilizes various investment instruments, including states, municipalities and political subdivision fixed maturities, corporate fixed maturities, common equities and United States Government securities. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Market risks include global events which could impact the value of investment securities, such as a pandemic or international conflict. Due to the level of

risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

**Investment Valuation and Income Recognition** — The Plan's investments are stated at fair value. Fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for description of valuation methods.

Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date. Interest income is recorded on the accrual basis. Net appreciation includes the Plan's gains and losses on investments sold as well as held during the year.

**Administrative Expenses** — The Plan primarily pays a portion of allowable legal, actuarial, accounting expenses and PBGC insurance from Plan assets. All other administrative expenses are paid by the Company as permitted by the Plan document. These expenses consist of fees for actuarial services, asset management and recordkeeping.

**Payment of Benefits** — Benefit payments to participants are recorded upon distribution.

**Subsequent Events** — Subsequent events have been evaluated through October 8, 2025, which is the date financial statements were available to be issued. There were no subsequent events requiring modifications or disclosures in these financial statements.

### 3. FUNDING POLICY

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make discretionary cash contributions to the Plan based on amounts recommended by the Plan's independent actuary. The Company met the minimum funding requirements of ERISA for the years ended December 31, 2024 and 2023.

### 4. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. The actuarial present value of accumulated plan benefits is determined by an independent actuary using the traditional unit credit actuarial cost method. The amount results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits presented in the accompanying financial statements are presented using beginning of year information date. The actuarial present value of accumulated plan benefits below is measured as of January 1, 2024, which is a proxy for December 31, 2023.

	2023
Vested benefits:	
Participants and/or beneficiaries currently receiving benefits	\$ 44,863,386
Other participants	196,316,119
Total actuarial present value of accumulated plan benefits	<u>\$ 241,179,505</u>

The changes in the actuarial present value of accumulated plan benefits for the year ended December 31 were as follows:

	2023
Additions (deductions):	
Benefits accumulated	\$ 9,465,055
Interest due to decrease in discount period	13,162,913
Benefits paid - current payments	(48,349,962)
Actuarial gains	(804,972)
Changes in discount rate assumption	4,421,369
Changes in lump sum rate assumption	4,716,341
Changes in demographic assumptions	(2,637,654)
Net deductions	<u>(20,026,910)</u>
Balance - beginning of year	<u>261,206,415</u>
Balance - end of year	<u>\$ 241,179,505</u>

The effect of Plan amendments on accumulated plan benefits is recognized during the year in which such amendments are adopted. There were no amendments effective January 1, 2024, recognized in the actuarial present value of accumulated plan benefits.

The significant actuarial assumptions used in the January 1, 2024 valuation, which is a proxy for December 31, 2023, were:

- Mortality: Annuitants:
  - o Pri-2012 table with Scale MP-2021 generational projection
- Mortality: Non-annuitants:
  - o Pri-2012 table with Scale MP-2021 generational projection
- Retirement age: Average retirement ages ranging from 60 to 72
- Discount rate: 5.04%
- Salary increase: 3.25% for under age 55, 2.75% for ages between 55 and 59, and 2.25% for at or beyond age 60

- Form of payment: 80% lump sum and 20% annuity

Lump sums were paid using the applicable interest rates under section 417(e), which approximates the corporate bond yield curve. As of December 31, 2023, the single equivalent interest rate used to replicate the factor for lump sum conversion for 2024 was 5.50%.

On January 1, 2023 the Plan paid lump sums of \$42,216,566 to participants. The increase in participants electing lump sum payments occurred due to the rising interest rate environment as changes in interest rates can have significant impacts on lump sum calculations. Interest rates are set based on the August IRS 417(e) rate and used for the following year's benefit calculations. Communication was made to Plan participants noting that interest rates may have a downward impact on lump sum values for payments occurring after January 1, 2023 if rates remain elevated, which resulted in increased retirements. This payment decreases plan assets and would decrease the current year accumulated plan benefits by an amount materially consistent with the amount paid.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan was to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

## **5. FAIR VALUE MEASUREMENTS**

In accordance with accounting guidance for fair value measurements and disclosures, the Plan categorized its financial instruments, based on the priority of the observable and market-based data for the valuation technique used, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices with readily available independent data in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable market inputs (Level 3). When various inputs for measurement fall within different levels of the fair value hierarchy, the lowest observable input that has a significant impact on fair value measurement is used. There have been no changes in the methodologies used at December 31, 2024 and 2023, and ultimately the Employee Benefits Committee determines fair value. Financial instruments are categorized based upon the following characteristics or inputs to the valuation techniques:

- Level 1 – Financial assets and liabilities for which inputs are observable and are obtained from reliable quoted prices for identical assets or liabilities in active markets. This is the most reliable fair value measurement and includes, for example, active exchange-traded equity securities.
- Level 2 – Financial assets and liabilities for which fair values are based on quoted prices in markets that are not active or for which values are based on similar assets and liabilities that are actively traded. This also includes pricing models for which the inputs are corroborated by market data.
- Level 3 – Financial assets and liabilities for which fair values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement.

The Plan bases fair value for investments in common equities and United States Government securities at the closing price reported in the active market in which the individual security is traded. Common equities and United States Government securities are categorized as Level 1. The technique used for fixed maturity securities is the application of market based modeling. The inputs used for all classes of fixed maturity securities include relevant market information by asset class, trade activity of similar securities, marketplace quotes, benchmark yields, spreads off benchmark yields, interest rates, U.S. Treasury or swap curves, yield to maturity and economic events. Excluding United States Government, fixed maturities are categorized as Level 2. All Level 2 fixed maturity securities are priced by a nationally recognized pricing vendor. The methods described above may produce a fair value measurement that may not be reflective of future fair

values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with those of other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement.

The following tables illustrate the fair value hierarchy for those assets measured at fair value on a recurring basis at December 31, 2024 and 2023. The Plan did not have any liabilities carried at fair value or any Level 3 assets at or during the years ended December 31, 2024 and 2023.

Excluded from the tables below are cash on hand of \$36,172,944 and \$16,431,391 at December 31, 2024 and 2023, respectively.

## 6. RELATED PARTY AND EXEMPT PARTY-IN-INTEREST TRANSACTIONS

The Company paid immaterial fees for custodial services to Fifth Third Bancorp, the custodian as defined by the Plan, and therefore, this transaction qualified as a party-in-interest transaction during 2024 and 2023.

At December 31, 2024 and 2023, the Plan held 100,610 shares of common stock of Cincinnati Financial Corporation, the sponsoring employer, with a fair value of \$14,457,657 and \$10,409,111, respectively, and a cost basis of \$27,734 at both December 31, 2024 and 2023. During 2024 and 2023, the Plan sold no shares

of the Company's common stock. During the years ended December 31, 2024 and 2023, the Plan recorded dividend income from this stock of \$319,940 and \$295,793, respectively.

## **7. FEDERAL INCOME TAX STATUS**

The Company received an opinion from the IRS, dated January 23, 2018, which states the individually designed Plan document satisfies the applicable provisions of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. The Company and Plan administrator believe that the Plan is currently designed and operated in compliance with the applicable requirements of the IRC, and the Plan and related trust continue to be tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. The Plan administrator has analyzed the tax positions taken by the Plan and has concluded that, as of December 31, 2024, there were no uncertain positions taken or expected to be taken that would require recognition of a liability or asset or disclosure in the Plan financial statements. While the Plan is subject to routine audits by taxing jurisdictions, no audits are currently in progress for any tax periods. The Plan administrator believes it is no longer subject to income tax examinations for Plan years 2021 and earlier.

## **8. PLAN TERMINATION**

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder and the Plan document.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested, normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive the benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide these benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty while other benefits may not be provided for at all.

## Demographic Assumptions

**Inclusion date** The valuation date coincident with or next following the date on which the employee becomes a participant

**New or rehired employees** It was assumed there will be no new or rehired employees.

### Mortality

- **Healthy** Separate rates for non-annuitants based on Pri-2012 “Employees” and “Healthy Annuitants” (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as specified in the regulations under §1.430(h)(3)-1 using the IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).

- **Disabled** Separate rates for non-annuitants based on Pri-2012 “Employees” and “Healthy Annuitants” (participants and beneficiaries combined) tables, respectively, without collar or amount adjustments and then projected forward with a generational projection as specified in the regulations under §1.430(h)(3)-1 using the IRS adjusted Scale MP-2021 (i.e., MP-2021 with no mortality improvement for 2020-2023 and future mortality improvement capped at 0.78% for years after 2024).

**Termination** Rates varying by age.

## Retirement

Rates varying by age:

Representative rates*	
Age	Rate
60	5%
61	10%
62-64	15%
65-71	40%
72	100%

\*For the Pension plan, the rates for 2024 were assumed to be 25% of the age-graded table shown above for ages below 72.

### Benefit commencement date:

- Preretirement death benefit: The later of the death of the active participant or the date the participant would have attained age 60.
- Deferred vested benefit: The later of age 60 or termination of employment
- Retirement benefit: Upon termination of employment

### Form of payment

80% of participants are assumed to elect a lump sum and 20% of participants are assumed to elect an annuity at commencement for all benefits other than the preretirement death benefit. Preretirement death benefits are assumed to be paid as a life annuity.

### Percent married

80% of males and females. Used to value preretirement death benefits.

### Spouse age

Male participants are assumed to have spouses three years younger and female participants are assumed to have spouses three years older.

### Covered pay

Annualized 2022 base pay increased one year by the salary increase assumption indicated above

### Plan-related expenses

\$81,417

<b>Loads</b>	To value death benefits after termination, the termination liability was loaded by 0.7%.
<b>At-risk assumptions</b>	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year. In addition, these participants are assumed to elect a lump sum.
<b>Timing of benefit payments</b>	Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

## Methods

<b>Valuation date</b>	First day of plan year
<b>Funding target</b>	Present value of accrued benefits as required by regulations under IRC §430.
<b>Target normal cost</b>	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
<b>Actuarial value of assets for determining minimum required contributions</b>	<p>Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of fair value, including contributions receivable.</p> <p>The method of computing the actuarial value of assets complies with the rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than market value. As a result, the actuarial value of assets will be lower than the market value in some years and higher in other years. However, over the long term under PPA's smoothing rules, the method has a significant</p>

bias to produce an actuarial value of assets that is below the market value of assets.

## **Benefits not valued**

All benefits were valued except the minimum benefit for former participants of the Inter-Ocean Home Office; the difference in liabilities and results is negligible.

WTW has reviewed the plan provisions with Cincinnati Financial Corporation and, based on that review, is not aware of any significant benefits required to be valued that were not.

## **Sources of Data and Other Information**

The plan sponsor furnished participant data as of January 1, 2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. No data adjustments were made and we are unaware of any data adjustments made by the provider.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

## **Assumptions Rationale - Significant Economic Assumptions**

### **Discount rate**

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

### **Lump sum conversion rate**

As required by IRC 430, lump sum benefits are valued using "annuity substitution."

### **Plan-related expenses**

As required by regulations, plan-related expenses are the prior year actual administrative expenses and are an estimate of the expenses to be paid from the trust during the coming year.

### **Rates of increase in Compensation:**

Assumed compensation increases are based on plan sponsor expectations.

## Assumptions Rationale - Significant Demographic Assumptions

<b>Healthy Mortality</b>	Assumptions used for funding purposes are as prescribed by IRC §430(h).
<b>Disabled Mortality</b>	Assumptions used for funding purposes are as prescribed by IRC §430(h).
<b>Termination</b>	Assumed termination rates, 3% under age 52, 2% for age 53-57 and 3% for 58 and above, are based on an experience study performed in 2023. We believe the assumptions do not significantly conflict with what would be reasonable because they reflect recent experience.
<b>Retirement</b>	Retirement rates are based on an experience study performed in 2023. Based on discussions with the Company, the retirement rates for the Pension plan, the rates for 2024 were assumed to be 25% of the age-graded table. We believe the assumptions do not significantly conflict with what would be reasonable because they reflect recent experience.
<b>Deferred vested benefit commencement</b>	Deferred vested participants' assumed commencement age is the age at which a participant is eligible for subsidized early retirement reductions.
<b>Form of Payment</b>	Based on six year plan experience (2013-2018) and future expectations, 80% of participants are assumed to take a lump sum and 20% are assumed to elect an annuity form of payment in the Pension Plan (for all benefits other than the preretirement death benefit).

## Source of Prescribed Methods

<b>Funding methods</b>	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

## Changes in Assumptions and Methods

### Change in assumptions and methods since prior valuation

- The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2022 to September 2023 as required by IRC §430.
- The mortality table used to calculate the funding target and target normal cost was updated to reflect the latest mortality tables, mortality improvement scale, and a change from using a static projection of mortality improvement to a generational projection as required by guidance issued by IRS under IRC §430.
- The rate of retirement and withdrawal have been updated based on an experience study done in 2023. The rates of retirement for the qualified plan are assumed to be 25% of the age-based rate during 2024.
- The mortality table used to determine lump sums was changed from the table used to determine IRS minimum lump sum distributions in 2023 to the applicable table for 2024. The basis for this assumption remains unchanged.
- The Salary increase is assumed to be 4.00% for 2024 and then using the age-based table thereafter.
- The plan-related expense assumption was changed from \$102,595 to \$81,417. The basis for this assumption remains unchanged.

<b>Postponed retirement</b>	Greater of the monthly pension benefit determined as of actual retirement date or the monthly pension benefit determined as of NRD, actuarially increased to the actual retirement date
<b>Vested termination</b>	<p>For payments commencing after age 60, monthly pension benefit determined as of termination date, reduced 0.5% for each month that commencement of payments precedes the participant's NRD.</p> <p>For payments commencing prior to age 60, monthly pension benefit determined as of termination date, reduced to be the actuarial equivalent (using the assumptions contained in IRC Section 417(e)(3)) of the participant's normal retirement benefit.</p>
<b>Death with pre-retirement spouse benefits</b>	Monthly pre-retirement spouse benefit is payable

## Other Plan Provisions

<b>Forms of payment</b>	<p>Pre-retirement spouse benefits are payable only as described above. Monthly pension benefits are paid as described above, if the participant has no spouse as of the date payments begin, or if the participant so elects. Participants terminating employment prior to age 60 can receive an immediate lump sum that is the actuarial equivalent of the normal retirement benefit using the assumptions mandated by IRC Section 417(e)(3). As required by law, these participants can also elect an immediate life annuity (for single participants) or a 50% joint and survivor annuity (for married participants). Otherwise, benefits are paid in the form of the 50% joint and survivor annuity option or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan.</p> <p>Actuarially equivalent optional forms of payment (based on current IRC Section 417(e)(3) assumptions or the 1983 Group Annuity Mortality Tables for males, set back 1 year and 8% interest, if more favorable) include:</p> <ul style="list-style-type: none"><li>• 50%, 66<sup>2</sup>/<sub>3</sub>%, 75%, and 100% contingent annuity.</li><li>• Five and ten-year certain and life.</li><li>• Single life (for married participants).</li><li>• Lump sum on retirement (determined using PBGC Appendix B interest rates and the 1983 GAM male (setback one year)</li></ul>

mortality assumptions, held to a minimum of the lump sum determined using the IRC Section 417(e) basis).

## **Maximum on benefits and pay**

All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

## **Future Plan Changes**

No future plan changes were recognized in determining benefit obligations and pension cost. WTW is not aware of any future plan changes which are required to be reflected.

## **Changes in Benefits Valued Since the Prior Year**

There were no changes in benefits valued since the prior year.
