(1) Name: EIDE BAILLY, LLP

(2) EIN: 45-0250958

d The opinion of an independent qualified public accountant is **not attached** as part of Schedule H because:

(1) This form is filed for a CCT, PSA, DCG or MTIA. (2) It will be attached to the next Form 5500 pursuant to 29 CFR 2520.104-50.

Part IV Compliance Questions

4 CCTs and PSAs do not complete Part IV. MTIAs, 103-12 IEs, and GIAs do not complete lines 4a, 4e, 4f, 4g, 4h, 4k, 4m, 4n, or 5. 103-12 IEs also do not complete lines 4j and 4l. MTIAs also do not complete line 4l. DCGs do not complete lines 4e, 4f, 4k, 4l, and 5, and DCGs generally complete the rest of Part IV collectively for all plans in the DCG, except as otherwise provided (see instructions).

During the plan year:

	Yes	No	Amount
a Was there a failure to transmit to the plan any participant contributions within the time period described in 29 CFR 2510.3-102? Continue to answer "Yes" for any prior year failures until fully corrected. (See instructions and DOL's Voluntary Fiduciary Correction Program.)		X	
b Were any loans by the plan or fixed income obligations due the plan in default as of the close of the plan year or classified during the year as uncollectible? Disregard participant loans secured by participant's account balance. (Attach Schedule G (Form 5500) Part I if "Yes" is checked.)		X	
c Were any leases to which the plan was a party in default or classified during the year as uncollectible? (Attach Schedule G (Form 5500) Part II if "Yes" is checked.)		X	
d Were there any nonexempt transactions with any party-in-interest? (Do not include transactions reported on line 4a. Attach Schedule G (Form 5500) Part III if "Yes" is checked.)		X	
e Was this plan covered by a fidelity bond?	X		10000000
f Did the plan have a loss, whether or not reimbursed by the plan's fidelity bond, that was caused by fraud or dishonesty?		X	
g Did the plan hold any assets whose current value was neither readily determinable on an established market nor set by an independent third party appraiser?		X	
h Did the plan receive any noncash contributions whose value was neither readily determinable on an established market nor set by an independent third party appraiser?		X	
i Did the plan have assets held for investment? (Attach schedule(s) of assets if "Yes" is checked, and see instructions for format requirements.)		X	
j Were any plan transactions or series of transactions in excess of 5% of the current value of plan assets? (Attach schedule of transactions if "Yes" is checked and see instructions for format requirements.)		X	
k Were all the plan assets either distributed to participants or beneficiaries, transferred to another plan, or brought under the control of the PBGC?		X	
l Has the plan failed to provide any benefit when due under the plan?		X	
m If this is an individual account plan, was there a blackout period? (See instructions and 29 CFR 2520.101-3.)			
n If 4m was answered "Yes," check the "Yes" box if you either provided the required notice or one of the exceptions to providing the notice applied under 29 CFR 2520.101-3.			

5a Has a resolution to terminate the plan been adopted during the plan year or any prior plan year? Yes No
If "Yes," enter the amount of any plan assets that reverted to the employer this year _____.

5b If, during this plan year, any assets or liabilities were transferred from this plan to another plan(s), identify the plan(s) to which assets or liabilities were transferred. (See instructions.)

Independent Auditor's Report

The Plan Administrator
URS Government Services Group Pension Plan
Germantown, Maryland

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of URS Government Services Group Pension Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of URS Government Services Group Pension Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2024 and 2023, and for the years then ended, stating that the certified investment information, as described in Note 6 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section:

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of URS Government Services Group Pension Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about URS Government Services Group Pension Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of URS Government Services Group Pension Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about URS Government Services Group Pension Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

URS GOVERNMENT SERVICES GROUP PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

1. Description of the Plan

The following description of the URS Government Services Group Pension Plan (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document and the *Summary Plan Description* for more complete information regarding the terms of the Plan.

General

The Plan is a frozen contributory defined benefit pension plan, subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”), as amended. Prior to December 31, 2005, (the “Plan Freeze Date”), the Plan covered specified employees of Washington Government Environmental Services Company, LLC (“WGES”), Westinghouse Government Environmental Services Company, LLC (“WGS”) and certain affiliated entities. After the Plan Freeze Date, no new participants were allowed into the Plan, participant contributions to the Plan ceased, and pension benefits stopped accruing.

The Plan is administered by the Amentum Holdings, Inc. Benefits Administration Committee as authorized by Amentum Holdings, Inc., the parent company of Amentum Nuclear & Environment Holdings, Inc. (the “Company” or “Plan Sponsor”).

Pension Benefits

The Plan provides 100 percent cliff vesting upon attainment of age 65 or completion of five years of service, as defined by the Plan. Retirement benefits are paid to participants or beneficiaries in various forms consisting of annuities, lump-sum payments, or a combination of both. The benefit that a participant is entitled to if he or she has less than five years is 100% of his or her contribution and interest attributable to these contributions.

A participant’s normal retirement benefit at age 65 is based on years of credited service and the monthly career accumulation amount of 1/12 of two percent of compensation for that year. The Plan generally provides a reduced benefit for early retirement. Eligibility for retirement is attained upon (1) completion of 10 years of eligibility service and attaining age 60 or (2) completion of 30 years of eligibility service and attaining age 58.

Even though the Plan is frozen, a participant, through continued employment with the Company, continues to earn eligibility credit for vesting and retirement purposes. Pension benefits for active participants in the Plan as of the Plan Freeze Date were based on pay and service earned through December 31, 2005.

Vesting

Participants become fully vested in their normal monthly benefit upon completion of five years of service.

Form of Benefit

At the time of retirement, if the actuarial present value of an employee's total pension is \$5,000 or less, the actuarial value of the employee's pension will be paid to the employee in a single lump sum. Otherwise, participants may elect to receive their pension benefits based on the acceptable method of payment, as defined in the Plan document.

Death Benefits

If an active employee dies, the spouse may be entitled to a spouse survivor benefit. Depending on the employee's age and/or eligibility service at the time of death, the spouse may qualify for an immediate spouse survivor benefit or a deferred spouse survivor benefit. The benefit payable to the spouse is equal to 55% of the employee's early retirement benefit, except that the benefit is reduced as if the employee retired at the date of death (subject to a maximum benefit reduction for early commencement) and assuming that a joint and survivor benefit and 55% form of payment had been elected. Benefit payments are guaranteed for 60 months and payable to the spouse's beneficiary. If the employee was not married and dies before retirement, the named beneficiary will receive a refund of the employee's contributions to the Plan plus interest earned.

Funding Policy

The Company contributes such amounts as necessary to provide assets sufficient to meet the benefit obligations to be paid to Plan participants. Annual contributions are made based on amounts required to at least meet the minimum funding provisions of ERISA. An actuarial valuation is used to determine whether anticipated benefits may reasonably be provided from anticipated contributions when combined with existing assets of the Plan. For the years ended December 31, 2024 and 2023, the Company was not required to make contributions to the Plan and met the minimum funding requirements of ERISA

Prior to the Plan Freeze Date, active participants were required to contribute 1.5% of their salary to the Plan as a condition of accruing a benefit. Participants were immediately vested in their contributions, including earnings thereon. Total participant accumulated contributions as of December 31, 2024 and 2023, were \$215,168 and \$249,510, respectively, including interest credited each January at the annual rate of 120% of the federal mid-term interest rate for the first month of the Plan year and (5.25% and 4.62% for 2024 and 2023, respectively).

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America using the accrual basis of accounting.

Valuation of Investments

The fair value of interest in the URS Government Services Group Master Trust ("Master Trust"), is based on the beginning of the year value of the Plan's interest in the trust plus actual contributions and allocated investment earnings less actual distributions and allocated administrative expenses. Investments are reported at fair value. Fair value is the price that would be received when an asset is sold or paid to transfer a liability in an orderly transaction between

market participants at the measurement date. (See Note 4 for a description of fair value measurements under Accounting Standards Codification (“ASC”) 820). Investment earnings, interest and dividends are reported as a single amount as plan interest in investment gains of the Master Trust (see Note 5 for information about the Master Trust).

The Master Trust records purchases and sales of securities on a trade date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan’s gains and losses on investments bought and sold as well as those held during the year.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Market risks include global events which could impact the value of investment securities, such as a pandemic or international conflict. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Administrative Expenses

Plan fees and expenses, including fees and expenses connected with administrative services by external service providers, asset management fees and other administrative expenses are paid from Plan assets. Certain administrative expenses are paid by the Company. Expenses that are paid directly by the Company are excluded from these financial statements. Fees for administration, investment advice, actuarial, and other services are generally charged to the Plan based on customary or contracted rates for such services. The Plan’s assets are managed by independent investment managers who charge a management fee based on assets under management.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Subsequent Events

The Plan has evaluated subsequent events through September 26, 2025, the date the financial statements were available to be issued.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) current employees or their beneficiaries. Because the benefits under the Plan are frozen, the accumulated plan benefits for active employees are based on their accrued benefits as of the Plan Freeze Date. Future active employee compensation and credited service increases are no longer applicable after the Plan Freeze Date. Due to the Plan freeze, benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included and are fully attributable to employee service rendered to the valuation date.

The computations of the actuarial present value of accumulated Plan benefits were made as of January 1, 2024. Had the valuation been performed as of December 31, there would be no material differences.

The actuarial present value of accumulated plan benefits as of January 1, 2024, as determined by the actuary, is as follows:

Vested benefits:	
Participants and beneficiaries currently receiving benefits	\$ 22,894,260
Other participants	<u>8,918,132</u>
Total vested benefits	31,812,392
Nonvested benefits	<u>-</u>
Total actuarial present value of accumulated plan benefits	<u><u>\$ 31,812,392</u></u>

The actuarial present value of changes in accumulated plan benefits for the period January 2, 2023 to January 1, 2024, as determined by the actuary, is as follows:

Actuarial present value of accumulated plan benefits at beginning of year	<u>\$ 32,510,630</u>
Increase (decrease) during the period attributable to:	
Benefits paid	(2,413,304)
Interest due to the decrease in the discount period	1,878,239
Actuarial losses	117,342
Change in assumptions	<u>(280,515)</u>
Net decrease	<u>(698,238)</u>
Actuarial present value of accumulated plan benefits at end of year	<u>\$ 31,812,392</u>

The actuarial present value of accumulated plan benefits is determined by an independent firm of consulting actuaries and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability or retirement) between the valuation date and the expected date of payment.

Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, the effect of such changes could be material to the Plan’s financial statements.

The significant actuarial assumptions used in the valuation for 2024 are shown below:

Mortality basis	Benefit weighted Pri-2012 base with mortality table with MP-2021 projection scales with no collar adjustment and projected generationally
Discount rate	6.10%
Retirement Age	Ranging from 8% at age 58 to 100% at age 70; weighted average retirement age is 62
Rate of pay increases	Not applicable

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were terminated, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Fair Value Measurements

FASB Accounting Standards Codification (“ASC”) No. 820, “Fair Value Measurements and Disclosures,” establishes a framework for measuring fair value. This framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The

fair value hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1	Inputs to the valuation methodology are quoted prices available in active markets for identical investments as of the reporting date.
Level 2	Inputs to the valuation methodology include: <ul style="list-style-type: none">• quoted prices for similar assets or liabilities in active markets;• quoted prices for identical or similar assets or liabilities in inactive markets;• inputs other than quoted prices that are observable for the asset or liability;• inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
Level 3	Inputs to the valuation methodology are unobservable inputs in situations where there is little or no market activity for the asset or liability and the reporting entity makes estimates and assumptions related to the pricing of the asset or liability including assumptions regarding risk.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used to measure assets at fair value. There have been no changes in the methodologies used as of December 31, 2024 and 2023.

Mutual funds - A mutual fund is an investment company registered under the Investment Company Act of 1940 that pools the capital of many investors and invests it in stocks, bonds, short-term money market instruments and/or other securities. These investments are public investment vehicles valued at the closing price reported in the active market in which the investments are traded. These investments are classified within Level 1 of the valuation hierarchy.

U.S. government securities - Valued using pricing models maximizing the use of observable inputs for similar securities.

Collective trust funds - A collective investment trust is a trust for the collective investment and reinvestment of assets contributed from employee benefit plans maintained by more than one plan. These investments are valued using the net asset value ("NAV") provided by the administrator of the collective trust. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. The NAV is used as a practical expedient to estimate fair value. The collective investment trusts are not classified within the fair value hierarchy; however, the amounts measured using NAV are disclosed to permit reconciliation of the fair value of investments to the Statements of Net Assets Available for Benefits.

Corporate bonds – Valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks or a broker quote if available.

The following tables set forth by level, within the fair value hierarchy, the Master Trust’s assets at fair value as of December 31, 2024 and 2023, respectively.

	As of December 31, 2024			
	Quoted Prices in Active Markets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Fair Value

There were no unfunded commitments as of December 31, 2024 and 2023.

5. Interest in URS Government Services Group Master Trust

The Plan's investment assets are held in a trust account at The Bank of New York Mellon ("Trustee") and consist of an undivided interest in an investment account of the URS Government Services Group Master Trust ("Master Trust"), a master trust established by WGS and WGES and administered by the Trustee. The Master Trust and one other pension plan, which is part of the Master Trust, also transferred to Amentum. Use of the Master Trust permits the commingling of trust assets with the assets of the other pension plan for investment and administrative purposes. Although assets of these pension plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment income (loss) of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans. The Plan's interest in the Master Trust represents approximately 55.8% and 55.3% of the net assets of the Master Trust as of December 31, 2024 and 2023. The Plan's investment earnings in the Master trust for the years ended December 31, 2024 and 2023, was a gain of \$2,249,684 and a gain of \$4,715,075, respectively.

The following table presents the net assets of the Master Trust as of December 31:

6. Certified Investments

Certain information related to investments disclosed in the accompanying financial statements, including investments held as of December 31, 2024 and 2023, and net appreciation in fair value of investments, interest and dividends for the years then ended, was obtained by management and agreed to or derived from information certified as complete and accurate by Bank of New York Mellon/BNY Mellon, N.A. (the "Plan Trustee").

7. Related-Party and Party-In-Interest Transactions

Fees paid by the Plan for investment fund services provided to the Plan were \$45,152, and \$37,004, for the years ended December 31, 2024 and 2023, respectively. These transactions qualify as exempt party-in-interest transactions under ERISA.

8. Tax Status

The Internal Revenue Service (“IRS”) has determined and informed the Plan by a letter dated May 20, 2014, that the Plan, as amended through December 2012, and related trust were designed in accordance applicable regulations of the Internal Revenue Code (“Code”) and therefore, the related trust is exempt from taxation. The Plan has been amended since receiving the determination letter. The Plan administrator believes that the Plan continues to be qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

9. Plan Termination

Although it has not expressed any intention to do so, the Plan Sponsor has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event the Plan is terminated, the net assets of the Plan will be allocated as specified by the Plan document in accordance with ERISA and its related regulations.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (“PBGC”) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor’s pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan’s termination. However, there is a statutory ceiling on the form of benefit payment elected by the participant at Plan termination. The ceiling varies depending on the form of benefit payment elected by the participant at the time of termination.

Whether all participants will receive vested benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan’s net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC. Any balance remaining after satisfaction of all liabilities of the Plan shall be returned to the Company.

Economic Assumptions

Interest rate basis:

- Applicable month
September
- Interest rate basis
Segment rates

Interest rates:

	Reflecting Corridors	Not Reflecting Corridors
■ First segment rate	4.75%	3.62%
■ Second segment rate	4.87%	4.46%
■ Third segment rate	5.59%	4.52%
■ Effective interest rate	5.06%	4.41%

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

- Assumed return for asset smoothing¹

Year	Unlimited Return	3 rd Segment Rate	Limited Return
2023	6.80%	5.74%	5.74%
2022	6.40%	5.92%	5.92%

¹ The assumed return for asset smoothing is used in the development of the Actuarial Value of Assets (AVA). The assumed return for each year can be no greater than the third segment rate (reflecting corridors).

Plan-related expenses

Plan related expenses are assumed to be the average of actual plan-related expenses net of PBGC premiums in the prior three years, plus the expected PBGC premium for the current year, rounded to the nearest ten thousand. The amount included this year for plan-related administrative expenses is \$280,000.

Demographic Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	There are no new entrants after the plan freeze date of December 31, 2005.
Mortality	
Healthy	The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using separate mortality rates for annuitants (“Healthy Annuitants” table) and non-annuitants (based on “Employees” table) without collar or amount adjustments with generational projection using the capped and adjusted Scale MP-2021, as prescribed in final regulations published October 20, 2023.
Disabled	Disabled participants are assumed to have the same mortality as healthy participants.

¹ Not applicable as this assumption currently has no impact on liability. The projected employee contribution account balance is expected to be smaller than the career average benefit for all active participants. Terminated non-vested participants who have deferred the refund of employee contributions are assumed to take their balances on the valuation date.

Target normal cost Present value of benefits expected to accrue during plan year (zero since the plan was frozen) plus plan-related expenses expected to be paid from plan assets during plan year, as required by regulations under IRC §430.

Actuarial value of assets Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.80% during 2023 and 6.40% during 2022 (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits Not Valued All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions and, based on that review, is not aware of any significant benefits required to be valued that were not.

The plan pays small benefits with a present value up to \$5,000 in a single lump sum payment (in addition to lump sum provisions for participants with pre-1995 benefits or employee contributions only). Such small lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

Sources of Data and Other Information

The plan sponsor, through its third party administrator, furnished participant data as of January 1, 2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor and/or the trustee. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust). The expected administrative expenses are rounded to the nearest ten thousand. We believe that this approach to estimating future expenses does not significantly conflict with what would be reasonable because it considers both historical and expected future changes in the level of expenses.
Assumed return for asset smoothing	We have relied on the plan's investment consultants' estimate of expected return on assets. We understand that this assumption reflects the plan's investment consultants' estimate of future experience for trust asset returns considering the plan's current asset allocation and any expected changes during the fiscal year in which the plan year begins, current market conditions and the expectations for future market conditions. The assumed return for 2023 is based on the expected return on assets selected by the plan sponsor for FY 2023 for ASC 715 reporting. However, the return was decreased by 20 basis points for assumed investment advisory expenses during the prior plan year (based on actual expenses as a percentage of the beginning of year market value of assets rounded up to the nearest 10 basis points) which are not included in the administrative expense load to normal cost. We believe that the assumption chosen does not significantly conflict with what would be reasonable based on the results of the WTW expected return modeler.

Assumptions Rationale – Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Retirement	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed. Participants are assumed to commence benefits immediately upon retirement. Participants hired after 1994 receive a 6% per year reduction for benefits commencing before age 65. Those hired before 1995 and electing an annuity receive a 4% per year reduction for benefits commencing before age 65 (or at age 58 with 30 years of eligibility service, a 3% per year reduction prior to age 60). Because the accrued benefits are frozen and because substantial early retirement subsidies only impact some of the participants reaching retirement eligibility, the timing of retirement and benefit commencement has a diminished impact on the plan's liability.

SCHEDULE SB ATTACHMENTS

For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

Benefit Commencement date for deferred benefits

- Preretirement death benefit
Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value. We believe the assumptions selected do not significantly conflict with what would be reasonable.
- Deferred vested benefit
For active participants who terminate, deferred vested benefits are assumed to commence at earliest retirement age. Deferred vested participants' assumed commencement age is a single age intended to capture the average age at commencement. Deferred vested early commencement factors are not subsidized so the difference between this approach and using assumed commencement rates at multiple ages is not expected to be significant.

Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible, but deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant. We believe the assumptions selected do not significantly conflict with what would be reasonable.

Form of payment

Married participants are assumed to elect the 55% J&S with 5-year certain guarantee, and single participants are assumed to elect single life annuity with 5-year certain guarantee. While actual experience indicates that more participants elect 100% J&S compared to 55% J&S, the selection among 100%, 75%, versus 55% J&S annuity as the form of payment assumption does not have a significant impact on the plan obligation. We did not review the lump sum election assumption, because few active and deferred vested participants have a pre-12/31/1994 accrued benefit which is eligible for the lump sum form of payment. The form of payment assumption is based on an experience review performed in 2017. We believe the assumptions selected do not significantly conflict with what would be reasonable.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs).

Changes in Assumptions and Methods Since Prior Valuation

Change in assumptions since prior valuation

Under the Pension Protection Act of 2006, the following assumption changes were made:

- The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.
- The mortality table used to calculate the funding target was updated to reflect current IRS prescribed assumptions.
- The lump sum mortality assumption was updated to reflect current IRS prescribed assumptions.

Other than the prescribed changes in the discount rate and mortality, the following other changes in assumptions were made as part of this valuation:

- The assumed plan-related expenses added to the target normal cost were changed from \$470,000 for the prior valuation to \$280,000 for the current valuation to account for higher expected expenses to be paid from the trust. The amount has been updated from the prior year, however the process for estimating plan-related expenses has not changed.
- The assumed return for asset smoothing was changed from 6.40% for 2022 to 6.90% for 2023 to reflect a change in the EROA with a decrease for investment advisory expenses. The assumed return is capped by the third segment rate in both years.

Change in methods since prior valuation

- There have been no changes in methods since the prior valuation.

Plan Name	URS Government Service Group Pension Plan
Valuation Date	January 1, 2024
Enrolled Actuary	Katelyn L. Bailey
Enrollment Number	23-08880

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Schedule SB, Part V Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis:

- Applicable month September
- Interest rate basis Segment rates

Interest rates:

	Reflecting Corridors	Not Reflecting Corridors
■ First segment rate	4.75%	3.62%
■ Second segment rate	4.87%	4.46%
■ Third segment rate	5.59%	4.52%
■ Effective interest rate	5.06%	4.41%

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

- Assumed return for asset smoothing¹

Year	Unlimited Return	3 rd Segment Rate	Limited Return
2023	6.80%	5.74%	5.74%
2022	6.40%	5.92%	5.92%

¹ The assumed return for asset smoothing is used in the development of the Actuarial Value of Assets (AVA). The assumed return for each year can be no greater than the third segment rate (reflecting corridors).

Annual rates of increase

- Compensation N/A
- Future Social Security wage bases N/A
- Statutory limits on compensation N/A
- Interest on employee contribution balances N/A¹

Plan-related expenses

Plan related expenses are assumed to be the average of actual plan-related expenses net of PBGC premiums in the prior three years, plus the expected PBGC premium for the current year, rounded to the nearest ten thousand. The amount included this year for plan-related administrative expenses is \$280,000.

Demographic Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	There are no new entrants after the plan freeze date of December 31, 2005.
Mortality	
Healthy	The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using separate mortality rates for annuitants ("Healthy Annuitants" table) and non-annuitants (based on "Employees" table) without collar or amount adjustments with generational projection using the capped and adjusted Scale MP-2021, as prescribed in final regulations published October 20, 2023.
Disabled	Disabled participants are assumed to have the same mortality as healthy participants.

¹ Not applicable as this assumption currently has no impact on liability. The projected employee contribution account balance is expected to be smaller than the career average benefit for all active participants. Terminated non-vested participants who have deferred the refund of employee contributions are assumed to take their balances on the valuation date.

Target normal cost Present value of benefits expected to accrue during plan year (zero since the plan was frozen) plus plan-related expenses expected to be paid from plan assets during plan year, as required by regulations under IRC §430.

Actuarial value of assets Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.80% during 2023 and 6.40% during 2022 (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits Not Valued All benefits described in the Plan Provisions section of this report were valued. WTW has reviewed the plan provisions and, based on that review, is not aware of any significant benefits required to be valued that were not.

The plan pays small benefits with a present value up to \$5,000 in a single lump sum payment (in addition to lump sum provisions for participants with pre-1995 benefits or employee contributions only). Such small lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

Sources of Data and Other Information

The plan sponsor, through its third party administrator, furnished participant data as of January 1, 2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor and/or the trustee. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust). The expected administrative expenses are rounded to the nearest ten thousand. We believe that this approach to estimating future expenses does not significantly conflict with what would be reasonable because it considers both historical and expected future changes in the level of expenses.
Assumed return for asset smoothing	We have relied on the plan's investment consultants' estimate of expected return on assets. We understand that this assumption reflects the plan's investment consultants' estimate of future experience for trust asset returns considering the plan's current asset allocation and any expected changes during the fiscal year in which the plan year begins, current market conditions and the expectations for future market conditions. The assumed return for 2023 is based on the expected return on assets selected by the plan sponsor for FY 2023 for ASC 715 reporting. However, the return was decreased by 20 basis points for assumed investment advisory expenses during the prior plan year (based on actual expenses as a percentage of the beginning of year market value of assets rounded up to the nearest 10 basis points) which are not included in the administrative expense load to normal cost. We believe that the assumption chosen does not significantly conflict with what would be reasonable based on the results of the WTW expected return modeler.

Assumptions Rationale – Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Retirement	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed. Participants are assumed to commence benefits immediately upon retirement. Participants hired after 1994 receive a 6% per year reduction for benefits commencing before age 65. Those hired before 1995 and electing an annuity receive a 4% per year reduction for benefits commencing before age 65 (or at age 58 with 30 years of eligibility service, a 3% per year reduction prior to age 60). Because the accrued benefits are frozen and because substantial early retirement subsidies only impact some of the participants reaching retirement eligibility, the timing of retirement and benefit commencement has a diminished impact on the plan's liability.

EIN / PN: 26-1320627/008
Plan Sponsor: Amentum Nuclear & Environment Holdings, Inc
Valuation Date: January 1, 2024

SCHEDULE SB ATTACHMENTS

For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

Benefit Commencement date for deferred benefits

- Preretirement death benefit
Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value. We believe the assumptions selected do not significantly conflict with what would be reasonable.
- Deferred vested benefit
For active participants who terminate, deferred vested benefits are assumed to commence at earliest retirement age. Deferred vested participants' assumed commencement age is a single age intended to capture the average age at commencement. Deferred vested early commencement factors are not subsidized so the difference between this approach and using assumed commencement rates at multiple ages is not expected to be significant.

Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible, but deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant. We believe the assumptions selected do not significantly conflict with what would be reasonable.

Form of payment

Married participants are assumed to elect the 55% J&S with 5-year certain guarantee, and single participants are assumed to elect single life annuity with 5-year certain guarantee. While actual experience indicates that more participants elect 100% J&S compared to 55% J&S, the selection among 100%, 75%, versus 55% J&S annuity as the form of payment assumption does not have a significant impact on the plan obligation. We did not review the lump sum election assumption, because few active and deferred vested participants have a pre-12/31/1994 accrued benefit which is eligible for the lump sum form of payment. The form of payment assumption is based on an experience review performed in 2017. We believe the assumptions selected do not significantly conflict with what would be reasonable.

Source of Prescribed Methods

Changes in Assumptions and Methods Since Prior Valuation

Change in assumptions since prior valuation

Under the Pension Protection Act of 2006, the following assumption changes were made:

- The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.
- The mortality table used to calculate the funding target was updated to reflect current IRS prescribed assumptions.
- The lump sum mortality assumption was updated to reflect current IRS prescribed assumptions.

Other than the prescribed changes in the discount rate and mortality, the following other changes in assumptions were made as part of this valuation:

- The assumed plan-related expenses added to the target normal cost were changed from \$470,000 for the prior valuation to \$280,000 for the current valuation to account for higher expected expenses to be paid from the trust. The amount has been updated from the prior year, however the process for estimating plan-related expenses has not changed.
- The assumed return for asset smoothing was changed from 6.40% for 2022 to 6.90% for 2023 to reflect a change in the EROA with a decrease for investment advisory expenses. The assumed return is capped by the third segment rate in both years.

Change in methods since prior valuation

Plan Provisions

The plan was originally effective April 1, 1999 and was frozen as of December 31, 2005. It was amended and restated effective January 1, 2012. This valuation accounts for the plan as amended through the valuation date.

Covered Employees	All Eligible Employees may participate in the Plan. Eligible Employees are those employed at non-Excluded Units of the Westinghouse Government Services Company, LLC who are either non-represented or represented by a collective bargaining unit that has a written agreement with URS regarding participation in the Plan.
Participation Date	Date of becoming a covered employee.

Definitions

Credited Service	<p><i>For the plan year April 1, 1999 through December 31, 1999:</i></p> <p>Only post-April 1, 1999 credited service is included, pending the plan merger and corresponding transfer of assets from CBS Corporation representing benefits accrued through March 31, 1999.</p> <p><i>For plan years beginning January 1, 2000:</i></p> <p>Generally, all service as a contributing participant in the Plan is used to determine pension benefit amounts. Prior to January 1, 1995, all service as an Employee of CBS Corporation was generally included as Credited Service. Service while employed with an Affiliated Entity or Excluded Unit is not included. Service is included while receiving benefits under URS's salary continuance and extension program or short-term or long-term disability plan, or after being determined to be "Totally Disabled", up to a maximum continuous period of two years.</p> <p>No additional credited service is accrued on or after the plan freeze date of December 31, 2005.</p>
Eligibility Service	All Credited Service, plus service that would be credited except that the Employee elects not to contribute to the Plan or is employed by an Affiliated Entity or an Excluded Unit.
Vesting Date	The date the Participant completes five years of Eligibility Service or reaches Normal Retirement Date.
Plan Compensation	Generally, regular compensation paid to a participant inclusive of overtime, bonus and other additional compensation payments, except that only 50% of an annual incentive award payable under any management incentive program is included.

Normal Retirement Retirement on Normal Retirement Date

Early Retirement The first of any month following the date the Participant attains:

- (i) age 58 with at least 30 years of Eligibility Service or
- (ii) age 60 with at least 10 years of Eligibility Service.

Pre-retirement Death Benefit Death while accruing Eligibility Service and after attainment of Early Retirement Eligibility or any of the following:

<u>Age</u>	<u>Eligibility Service</u>
any	25 years or more
60 or older	10 years or more
50 or older	15 years or more

Vested Death Benefit Death after vesting date and before pre-retirement death benefit eligibility.

Benefits Paid Upon the Following Events

Normal Retirement Generally, a monthly amount equal to the greater of (a) The Career Accumulation Method and (b) the Flat Rate Method.

(a) Career Accumulation Method: the sum of (i) and (ii)

- (i) the monthly amount accumulated to January 1, 1992
- (ii) 1/12 of 2% of Compensation for each calendar year commencing on or after January 1, 1992 in which an Employee contributed. A minimum of \$15 per year of Credited Service applied for 1992, 1993, and 1994 regardless of an Employee's election to contribute to the Plan.

(b) Flat Rate Method: the sum of (i) and (ii)

- (i) \$31 for years of Credited Service while contributing to the Plan
- (ii) \$13 for years of Credited Service prior to January 1, 1995 in which an Employee was eligible to contribute to the Plan but elected not to contribute.

Early Retirement

Employees Hired after December 31, 1994:

Determined as for Normal Retirement except that benefits are reduced by $\frac{1}{2}$ percent per month that Early Retirement Date precedes Participant's Normal Retirement Date.

Employees Hired before January 1, 1995:

If a Lump Sum form of payment is elected, the Participant will receive the sum of (i) and (ii), as follows:

- (i) A payment equal to the lump sum equivalent of the normal retirement benefit determined as of December 31, 1994. The lump sum equivalent will be calculated assuming benefits begin at Early Retirement Date. Benefits are reduced for early commencement by $\frac{1}{3}$ of 1% for each month that the Early Retirement Date precedes Normal Retirement Date, or, if the Participant has 30 or more years of Eligibility Service, by $\frac{1}{4}$ of 1% for each month that Early Retirement Date precedes the first of the month following the Participant's 60th birthday.
- (ii) An annuity equal to the difference between (a) the normal retirement benefit (based on total Credited Service) determined as of the Participant's Early Retirement Date and reduced by $\frac{1}{2}$ of 1% for each month that Early Retirement Date precedes Normal Retirement Date, and (b) the normal retirement benefit determined as of December 31, 1994, reduced for early commencement as described in (i) above.

If a Participant has Eligibility Service both before January 1, 1995 and after December 31, 1994, and an annuity form of payment is elected, the Participant's benefit is determined as for normal retirement except that benefits are reduced for early commencement by $\frac{1}{3}$ of 1% for each month that the Early Retirement Date precedes Normal Retirement Date, or, if the Participant has 30 or more years of Eligibility Service, by $\frac{1}{4}$ of 1% for each month that Early Retirement Date precedes the first of the month following the Participant's 60th birthday. Further, if the benefit payable at NRD using the Flat Rate Method produces a higher monthly benefit, then the unreduced Flat Rate benefit is payable upon Early Retirement.

Early retirement factors will not be less than those determined using the Pri-2012 mortality table for retirees projected to 2035 with MP-2020 and an interest rate of 5.0%.

Early Retirement Supplements

For Employees hired prior to January 1, 1995 who retire early and elect an annuity form of payment, a temporary monthly supplement is payable until age 62 equal to \$10 per year of Credited Service.

Deferred retirement

An active participant working beyond NRD may defer retirement after age 65 and continue to accrue benefits until his deferred retirement date.

Pre-retirement Death

Immediate benefit payable to Participant's spouse equal to 55% of the applicable amount below, adjusted for form assuming that the participant had elected the Joint and 55% form of payment:

If the participant had fewer than 30 years of service, the amount is the greatest of the participant's

- a. Normal Retirement Benefit determined as of December 31, 1994 using the Career Accumulation Method, reduced by 1/3 of 1% for each month that the date of death precedes Normal Retirement Date up to a maximum reduction of 20%
- b. Normal Retirement Benefit determined as of December 31, 1994 using the Flat Rate Method
- c. Normal Retirement Benefit determined as of the participant's date of death, reduced by 1/2 of 1% for each month that the date of death precedes Normal Retirement Date up to a maximum reduction of 42%.

If the participant had 30 or more years of service, the amount is the greatest of the participant's

- a. Normal Retirement Benefit determined as of December 31, 1994 using the Career Accumulation Method
- b. Normal Retirement Benefit determined as of December 31, 1994 using the Flat Rate Method
- c. Normal Retirement Benefit determined as of the participant's date of death, reduced by 1/2 of 1% for each month that the date of death precedes Normal Retirement Date up to a maximum reduction of 42%

If the surviving spouse of a Participant who has Eligibility Service both before January 1, 1995 and after December 31, 1994 elects to receive the entire benefit as a monthly annuity, then (a) and (b) are changed to be based on the Normal Retirement Benefit determined as of the participant's date of death, not as of December 31, 1994 (regardless of whether the participant had 30 years of service). Payments are guaranteed for 60 months and payable to the spouse's beneficiary if necessary.

Vested death

Deferred benefit, payable to Participant's spouse at what would have been the employee's earliest benefit commencement date, equal to 55% of the Termination Benefit, assuming that the Joint and 55% form of payment had been elected. Payments are guaranteed for 60 months and payable to the spouse's beneficiary if necessary.

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions

The plan was originally effective April 1, 1999 and was frozen as of December 31, 2005. It was amended and restated effective January 1, 2012. This valuation accounts for the plan as amended through the valuation date.

Covered Employees	All Eligible Employees may participate in the Plan. Eligible Employees are those employed at non-Excluded Units of the Westinghouse Government Services Company, LLC who are either non-represented or represented by a collective bargaining unit that has a written agreement with URS regarding participation in the Plan.
Participation Date	Date of becoming a covered employee.

Definitions

Credited Service	<p><i>For the plan year April 1, 1999 through December 31, 1999:</i></p> <p>Only post-April 1, 1999 credited service is included, pending the plan merger and corresponding transfer of assets from CBS Corporation representing benefits accrued through March 31, 1999.</p> <p><i>For plan years beginning January 1, 2000:</i></p> <p>Generally, all service as a contributing participant in the Plan is used to determine pension benefit amounts. Prior to January 1, 1995, all service as an Employee of CBS Corporation was generally included as Credited Service. Service while employed with an Affiliated Entity or Excluded Unit is not included. Service is included while receiving benefits under URS's salary continuance and extension program or short-term or long-term disability plan, or after being determined to be "Totally Disabled", up to a maximum continuous period of two years.</p> <p>No additional credited service is accrued on or after the plan freeze date of December 31, 2005.</p>
Eligibility Service	All Credited Service, plus service that would be credited except that the Employee elects not to contribute to the Plan or is employed by an Affiliated Entity or an Excluded Unit.
Vesting Date	The date the Participant completes five years of Eligibility Service or reaches Normal Retirement Date.
Plan Compensation	Generally, regular compensation paid to a participant inclusive of overtime, bonus and other additional compensation payments, except that only 50% of an annual incentive award payable under any management incentive program is included.

Normal Retirement Retirement on Normal Retirement Date

Early Retirement The first of any month following the date the Participant attains:

- (i) age 58 with at least 30 years of Eligibility Service or
- (ii) age 60 with at least 10 years of Eligibility Service.

Pre-retirement Death Benefit Death while accruing Eligibility Service and after attainment of Early Retirement Eligibility or any of the following:

<u>Age</u>	<u>Eligibility Service</u>
any	25 years or more
60 or older	10 years or more
50 or older	15 years or more

Vested Death Benefit Death after vesting date and before pre-retirement death benefit eligibility.

Benefits Paid Upon the Following Events

Normal Retirement Generally, a monthly amount equal to the greater of (a) The Career Accumulation Method and (b) the Flat Rate Method.

(a) Career Accumulation Method: the sum of (i) and (ii)

- (i) the monthly amount accumulated to January 1, 1992
- (ii) 1/12 of 2% of Compensation for each calendar year commencing on or after January 1, 1992 in which an Employee contributed. A minimum of \$15 per year of Credited Service applied for 1992, 1993, and 1994 regardless of an Employee's election to contribute to the Plan.

(b) Flat Rate Method: the sum of (i) and (ii)

- (i) \$31 for years of Credited Service while contributing to the Plan
- (ii) \$13 for years of Credited Service prior to January 1, 1995 in which an Employee was eligible to contribute to the Plan but elected not to contribute.

Early Retirement

Employees Hired after December 31, 1994:

Determined as for Normal Retirement except that benefits are reduced by $\frac{1}{2}$ percent per month that Early Retirement Date precedes Participant's Normal Retirement Date.

Employees Hired before January 1, 1995:

If a Lump Sum form of payment is elected, the Participant will receive the sum of (i) and (ii), as follows:

- (i) A payment equal to the lump sum equivalent of the normal retirement benefit determined as of December 31, 1994. The lump sum equivalent will be calculated assuming benefits begin at Early Retirement Date. Benefits are reduced for early commencement by $\frac{1}{3}$ of 1% for each month that the Early Retirement Date precedes Normal Retirement Date, or, if the Participant has 30 or more years of Eligibility Service, by $\frac{1}{4}$ of 1% for each month that Early Retirement Date precedes the first of the month following the Participant's 60th birthday.
- (ii) An annuity equal to the difference between (a) the normal retirement benefit (based on total Credited Service) determined as of the Participant's Early Retirement Date and reduced by $\frac{1}{2}$ of 1% for each month that Early Retirement Date precedes Normal Retirement Date, and (b) the normal retirement benefit determined as of December 31, 1994, reduced for early commencement as described in (i) above.

If a Participant has Eligibility Service both before January 1, 1995 and after December 31, 1994, and an annuity form of payment is elected, the Participant's benefit is determined as for normal retirement except that benefits are reduced for early commencement by $\frac{1}{3}$ of 1% for each month that the Early Retirement Date precedes Normal Retirement Date, or, if the Participant has 30 or more years of Eligibility Service, by $\frac{1}{4}$ of 1% for each month that Early Retirement Date precedes the first of the month following the Participant's 60th birthday. Further, if the benefit payable at NRD using the Flat Rate Method produces a higher monthly benefit, then the unreduced Flat Rate benefit is payable upon Early Retirement.

Early retirement factors will not be less than those determined using the Pri-2012 mortality table for retirees projected to 2035 with MP-2020 and an interest rate of 5.0%.

Early Retirement Supplements

For Employees hired prior to January 1, 1995 who retire early and elect an annuity form of payment, a temporary monthly supplement is payable until age 62 equal to \$10 per year of Credited Service.

Deferred retirement

An active participant working beyond NRD may defer retirement after age 65 and continue to accrue benefits until his deferred retirement date.

Schedule SB, Line 24 Change in Actuarial Assumptions

Other than the prescribed changes in the discount rate and mortality, the following other changes in assumptions were made as part of this valuation:

- The assumed plan-related expenses added to the target normal cost were changed from \$470,000 for the prior valuation to \$280,000 for the current valuation to account for higher expected expenses to be paid from the trust. The amount has been updated from the prior year, however the process for estimating plan-related expenses has not changed.
- The assumed return for asset smoothing was changed from 6.40% for 2022 to 6.90% for 2023 to reflect a change in the EROA with a decrease for investment advisory expenses. The assumed return is capped by the third segment rate in both years.
