Statement by Enrolled Actuary
To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Part III Accountant's Opinion

3 Complete lines 3a through 3c if the opinion of an independent qualified public accountant is attached to this Form 5500. Complete line 3d if an opinion is not attached.

a The attached opinion of an independent qualified public accountant for this plan is (see instructions):

(1) Unmodified (2) Qualified (3) Disclaimer (4) Adverse

b Check the appropriate box(es) to indicate whether the IQPA performed an ERISA section 103(a)(3)(C) audit. Check both boxes (1) and (2) if the audit was performed pursuant to both 29 CFR 2520.103-8 and 29 CFR 2520.103-12(d). Check box (3) if pursuant to neither.

(1) DOL Regulation 2520.103-8 (2) DOL Regulation 2520.103-12(d) (3) neither DOL Regulation 2520.103-8 nor DOL Regulation 2520.103-12(d).

c Enter the name and EIN of the accountant (or accounting firm) below:

(1) Name: EIDE BAILLY LLP

(2) EIN: 45-0250958

d The opinion of an independent qualified public accountant is **not attached** as part of Schedule H because:

(1) This form is filed for a CCT, PSA, DCG or MTIA. (2) It will be attached to the next Form 5500 pursuant to 29 CFR 2520.104-50.

Part IV Compliance Questions

4 CCTs and PSAs do not complete Part IV. MTIAs, 103-12 IEs, and GIAs do not complete lines 4a, 4e, 4f, 4g, 4h, 4k, 4m, 4n, or 5. 103-12 IEs also do not complete lines 4j and 4l. MTIAs also do not complete line 4l. DCGs do not complete lines 4e, 4f, 4k, 4l, and 5, and DCGs generally complete the rest of Part IV collectively for all plans in the DCG, except as otherwise provided (see instructions).

During the plan year:

	Yes	No	Amount
a Was there a failure to transmit to the plan any participant contributions within the time period described in 29 CFR 2510.3-102? Continue to answer "Yes" for any prior year failures until fully corrected. (See instructions and DOL's Voluntary Fiduciary Correction Program.)		X	
b Were any loans by the plan or fixed income obligations due the plan in default as of the close of the plan year or classified during the year as uncollectible? Disregard participant loans secured by participant's account balance. (Attach Schedule G (Form 5500) Part I if "Yes" is checked.)		X	
c Were any leases to which the plan was a party in default or classified during the year as uncollectible? (Attach Schedule G (Form 5500) Part II if "Yes" is checked.)		X

Independent Auditor's Report

The Plan Administrator
URS Professional Solutions Pension Plan
Germantown, Maryland

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of URS Professional Solutions Pension Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of URS Professional Solutions Pension Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2024 and 2023, and for the years then ended, stating that the certified investment information, as described in Note 6 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section:

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of URS Professional Solutions Pension Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about URS Professional Solutions Pension Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of URS Professional Solutions Pension Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about URS Professional Solutions Pension Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

URS PROFESSIONAL SOLUTIONS PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

1. Description of The Plan

The following description of the URS Professional Solutions Pension Plan (the “Plan”) is provided for general information purposes only. Selected Plan provisions are described below. Participants should refer to the Plan document for more complete information regarding the terms of the Plan.

General

The Plan is a frozen noncontributory defined benefit pension plan, subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”), as amended. Prior to December 31, 2005, (the “Plan Freeze Date”), the Plan covered all employees of Washington Safety Management Solutions, LLC (the “Employer”) who, on October 1, 1997, were members of the pension plan maintained by Westinghouse Savannah River Company (“WSRC”). Other full-service employees, as defined by the Plan, not meeting the above requirements, were eligible for the Plan as of their first day of employment or reemployment with the Employer. All other employees were eligible for the Plan once they had completed one full year of service in accordance with the Plan. After the Plan Freeze Date, no new participants were allowed into the Plan and pension benefits stopped accruing.

The Plan is administered by the Amentum Holdings, Inc. Benefits Administration Committee as authorized by Amentum Holdings, Inc., the parent company of Amentum Nuclear & Environment Holdings, Inc. (the “Company” or “Plan Sponsor”).

Pension Benefits

The Plan provides for normal retirement at age 65 with completion of 15 years of service and provides 100 percent cliff vesting upon completion of 5 years of service. Benefits are determined primarily as a function of both the years of service and the highest average compensation over 36 consecutive months at any time during the participants’ employment with the Employer. The Plan generally provides for a reduced benefit for early retirement.

Even though the Plan is frozen, a participant, through continued employment with the Employer, earned eligibility credit for vesting and retirement purposes. Pension benefits for active participants in the Plan as of the Plan Freeze Date were based on pay and service earned through December 31, 2005.

Vesting

Participants become fully vested in their normal monthly benefit upon completion of five years of service.

Form of Benefit

At the time of retirement, if the actuarial present value of an employee's total pension is \$5,000 or less, the actuarial value of the employee's pension will be paid to the employee in a single lump sum. Otherwise, participants may elect to receive their pension benefits based on the acceptable method of payment, as defined in the Plan document.

Death and Disability Benefits

If an active employee dies, the spouse may be entitled to a spouse survivor benefit. Depending on the employee's age and/or eligibility service at the time of death, the spouse may qualify for an immediate spouse survivor benefit or a deferred spouse survivor benefit. The amount of spouse survival benefit is dependent upon the employee's length of service at time of death.

An active full-service employee who becomes permanently disabled and has at least 15 years of eligible service may qualify for a retirement benefit as long as the disability exists. The disability benefit is a lifetime-unreduced pension equal to the pension benefit earned as of the date of retirement.

Funding Policy

The Company contributes such amounts as are necessary to provide assets sufficient to meet the benefit obligations to be paid to Plan participants. Annual contributions are made based on amounts required to at least meet the minimum funding provisions of ERISA. An actuarial valuation is used to determine whether anticipated benefits may reasonably be provided from anticipated contributions when combined with existing assets of the Plan. For the year ended December 31, 2024 the Company was not required to make contributions to the Plan and met the minimum funding requirements of ERISA. For the year ended December 31, 2023, the Company made contributions of \$137,000. The Company's contribution for 2023 exceeded the minimum funding requirements established by ERISA.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America using the accrual basis of accounting.

Valuation of Investments

The fair value of interest in the URS Government Services Group Master Trust ("Master Trust"), is based on the beginning of the year value of the Plan's interest in the trust plus actual contributions and allocated investment earnings less actual distributions and allocated administrative expenses. Investments are reported at fair value. Fair value is the price that would be received when an asset is sold or paid to transfer a liability in an orderly transaction between market participants at the measurement date. (See Note 4 for a description of fair value measurements under Accounting Standards Codification ("ASC") 820). Investment earnings, interest and dividends are reported as a single amount as plan interest in investment gains of the Master Trust (see Note 5 for information about the Master Trust).

The Master Trust records purchases and sales of securities on a trade date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as those held during the year.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Market risks include global events which could impact the value of investment securities, such as a pandemic or international conflict. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Administrative Expenses

The Plan's expenses are paid by either the Plan or the Company, as provided by the Plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying Statements of Changes in Net Assets Available for Benefits. In addition, certain investment-related expenses are included in the investment gains of the master trust as presented in the accompanying Statements of Changes in Net Assets Available for Benefits.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Subsequent Events

The Plan has evaluated subsequent events through September 26, 2025, the date the financial statements were available to be issued.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) current employees or their beneficiaries. Because the benefits under the Plan are frozen, the accumulated plan benefits for active employees are based on their accrued benefits as of the Plan Freeze Date. Future active employee compensation and credited service increases are no longer applicable after the Plan Freeze Date. Due to the Plan freeze, benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included and are fully attributable to employee service rendered to the valuation date.

The computations of the actuarial present value of accumulated Plan benefits were made as of January 1, 2024. Had the valuation been performed as of December 31, there would be no material differences.

The actuarial present value of accumulated plan benefits as of January 1, 2024, as determined by the actuary, is as follows:

Vested benefits:	
Participants and beneficiaries currently receiving benefits	\$ 18,588,650
Other participants	<u>7,191,128</u>
Total vested benefits	25,779,778
Nonvested benefits	<u>125,000</u>
Total actuarial present value of accumulated plan benefits	<u><u>\$ 25,904,778</u></u>

The actuarial present value of changes in accumulated plan benefits for the period January 2, 2023 to January 1, 2024, as determined by the actuary, is as follows:

Actuarial present value of accumulated plan benefits at beginning of year	<u>\$ 26,243,137</u>
Increase (decrease) during the period attributable to:	
Benefits paid	(1,815,378)
Interest due to the decrease in the discount period	1,469,456
Actuarial losses	8,061
Change in assumptions	<u>(498)</u>
Net (decrease) increase	<u>(338,359)</u>
Actuarial present value of accumulated plan benefits at end of year	<u><u>\$ 25,904,778</u></u>

The actuarial present value of accumulated plan benefits is determined by an independent firm of consulting actuaries and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability or retirement) between the valuation date and the expected date of payment.

Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, the effect of such changes could be material to the Plan's financial statements.

The significant actuarial assumptions used in the valuation for January 1, 2024 are shown below:

Mortality basis	Benefit weighted Pri-2012 base mortality table with MP-2021 generational projection scales with white collar adjustments and the benefit-weighted Pri-2012 contingent spouse mortality tables after retiree death
Discount rate	5.8%
Retirement Age	Ranging from 1% at age 50 to 100% at age 70; weighted average retirement age is 61
Rate of pay increases	Not applicable

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were terminated, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Fair Value Measurements

FASB Accounting Standards Codification (“ASC”) No. 820, “*Fair Value Measurements and Disclosures*,” establishes a framework for measuring fair value. This framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The fair value hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1	Inputs to the valuation methodology are quoted prices available in active markets for identical investments as of the reporting date.
Level 2	Inputs to the valuation methodology include: <ul style="list-style-type: none">• quoted prices for similar assets or liabilities in active markets;• quoted prices for identical or similar assets or liabilities in inactive markets;• inputs other than quoted prices that are observable for the asset or liability;• inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
Level 3	Inputs to the valuation methodology are unobservable inputs in situations where there is little or no market activity for the asset or liability and the reporting entity makes estimates and assumptions related to the pricing of the asset or liability including assumptions regarding risk.

A financial instrument’s level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used to measure assets at fair value. There have been no changes in the methodologies used as of December 31, 2024 and 2023.

Mutual funds – A mutual fund is an investment company registered under the Investment Company Act of 1940 that pools the capital of many investors and invests it in stocks, bonds, short-term money market instruments and/or other securities. These investments are public investment vehicles valued at the closing price reported in the active market in which the investments are traded. These investments are classified within Level 1 of the valuation hierarchy.

U.S. government securities – Valued using pricing models maximizing the use of observable inputs for similar securities.

Corporate bonds - Valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flows approach that maximizes observable

inputs, such as current yields of similar instruments but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks or a broker quote if available.

Collective trust funds - A collective investment trust is a trust for the collective investment and reinvestment of assets contributed from employee benefit plans maintained by more than one plan. These investments are valued using the net asset value (“NAV”) provided by the administrator of the collective trust. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. The NAV is used as a practical expedient to estimate fair value. The collective investment trusts are not classified within the fair value hierarchy; however, the amounts measured using NAV are disclosed to permit reconciliation of the fair value of investments to the Statements of Net Assets Available for Benefits.

The following tables set forth by level, within the fair value hierarchy, the Master Trust’s assets at fair value as of December 31, 2024 and 2023, respectively.

There were no unfunded commitments as of December 31, 2024 and 2023.

5. Interest in URS Government Services Group Master Trust

The Plan's investment assets are held in a trust account at The Bank of New York Mellon ("Trustee") and consist of an undivided interest in an investment account of the URS Government Services Group Master Trust ("Master Trust"), a master trust established by WGS and WGES and administered by the Trustee. The Master Trust and one other pension plan, which is part of the Master Trust, also transferred to Amentum. Use of the Master Trust permits the commingling of trust assets with the assets of the other pension plan for investment and administrative purposes. Although assets of these pension plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment income (loss) of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans. The Plan's interest in the Master Trust represents approximately 44.2% and 44.7% of the net assets of the Master Trust as of December 31, 2024 and 2023, respectively. The Plan's investment earnings in the Master trust for the years ended December 31, 2024 and 2023, was a gain of \$1,729,157 and a gain of \$3,801,041, respectively.

The following table presents the net assets of the Master Trust as of December 31:

	Master Trust		Plan's Interest in Master Trust

Net investment earnings	<u>\$ 3,955,677</u>	<u>\$ 8,457,822</u>

6. Certified Investments

Certain information related to investments disclosed in the accompanying financial statements, including investments held as of December 31, 2024 and 2023, and net appreciation in fair value of investments, interest and dividends for the years then ended, was obtained by management and agreed to or derived from information certified as complete and accurate by Bank of New York Mellon/BNY Mellon, N.A. (the "Plan Trustee").

7. Related-Party and Party-In-Interest Transactions

Fees paid by the Plan for investment fund services provided to the Plan were \$38,304, and \$29,169, for the years ended December 31, 2024 and 2023, respectively. These transactions qualify as exempt party-in-interest transactions under ERISA.

8. Tax Status

The Internal Revenue Service (“IRS”) has determined and informed the Plan by a letter dated October 31, 2014, that the Plan, as amended and restated through December 2012, and related trust were designed in accordance with applicable regulations of the Internal Revenue Code (“Code”) and therefore, the related trust is exempt from taxation. The Plan has been amended since receiving the determination letter. The Plan administrator believes that the Plan continues to be qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

9. Plan Termination

Although it has not expressed any intention to do so, the Plan Sponsor has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event the Plan is terminated, the net assets of the Plan will be allocated as specified by the Plan document in accordance with ERISA and its related regulations.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (“PBGC”) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor’s pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan’s termination. However, there is a statutory ceiling on the form of benefit payment elected by the participant at Plan termination. The ceiling varies depending on the form of benefit payment elected by the participant at the time of termination.

Whether all participants will receive vested benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan’s net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC. Any balance remaining after satisfaction of all liabilities of the Plan shall be returned to the Company.

Schedule SB, Part V Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis:

- Applicable month September
- Interest rate basis Segment rates

	Reflecting Corridors	Not Reflecting Corridors
Interest rates:		
● First segment rate	4.75%	3.62%
● Second segment rate	4.87%	4.46%
● Third segment rate	5.59%	4.52%
● Effective interest rate	5.08%	4.42%

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

- Assumed return for asset smoothing¹

Year	Unlimited Return	3 rd Segment Rate	Limited Return
2023	6.80%	5.74%	5.74%
2022	6.40%	5.92%	5.92%

¹ The assumed return for asset smoothing is used in the development of the Actuarial Value of Assets (AVA). The assumed return for each year can be no greater than the third segment rate (reflecting corridors).

Annual rates of increase:

- Compensation N/A
- Future Social Security wage bases N/A
- Statutory limits on compensation N/A
- Administrative expenses

Plan related expenses are assumed to be the average of actual administrative expenses net of PBGC premiums in the prior three years, plus expected PBGC premiums for the current year, rounded to the nearest ten thousand. The amount included this year for plan-related administrative expenses is \$290,000.

Demographic Assumptions

Inclusion Date The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees There are no new entrants after the plan freeze date of December 31, 2005.

Mortality

- **Healthy** The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using separate mortality rates for annuitants (“Healthy Annuitants” table) and non-annuitants (based on “Employees” table) without collar or amount adjustments with generational projection using the capped and adjusted Scale MP-2021, as prescribed in final regulations published October 20, 2023.

- **Disabled** Disabled participants are assumed to have the same mortality as healthy participants.

Termination Rates varying by age:

Percentage leaving during the year	
Attained Age	Males and Females
20	22.02%
25	16.72
30	12.60
35	9.54
40	7.52
45	6.00

Retirement For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which participants retire by age are shown below:

Percentage retiring during the year	
Attained Age	Males and Females
50-54	1%
55	10
56-61	5
62	25

Average age: 62

Benefit In service death benefit

- Age 65 with 5 years of service
- Age 60 with 10 years of service
- Age 55 with 15 years of service
- Age 58 where age plus service is greater than or equal to 85

commencement date Deferred vested benefit Deferred vested participants who may be eligible for pre-65 supplemental back payments under the current eligibility interpretation are assumed to commence benefits at their earliest retirement age. Otherwise, age 65 is assumed.

Disability benefit	Earlier of: <ul style="list-style-type: none">• Immediately with 15 years of service• Age 65
Retirement benefit	Upon termination of employment
Form of payment	Participants are assumed to elect the normal form.
Percent married	For purposes of determining assumed form of payment and for valuing the pre-retirement surviving spouse's benefit, 80% of the participants eligible for spouses' benefits are assumed to be married.
Spouse age	Male spouses are assumed to be three years older than female spouses.
Covered pay	Not applicable. The plan was frozen as of December 31, 2005.
At-risk assumptions	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.
Timing of future decrements	Retirements, withdrawals, disabilities, and deaths are assumed to occur in the middle of the year.
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year (zero since the plan was frozen) plus plan-related expenses expected to be paid from plan assets during plan year.
Actuarial value of assets	<p>Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.80% during 2023 and 6.40% during 2022 (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.</p>
Benefits Not Valued	<p>All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions and, based on that review, is not aware of any significant benefits required to be valued that were not.</p> <p>The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.</p>

Sources of Data and Other Information

The plan sponsor, through its third party administrator, furnished participant data as of January 1, 2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor and/or the trustee. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

SCHEDULE SB ATTACHMENTS

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust). Assumed expenses are rounded to the nearest ten thousand. We believe that this approach to estimating future expenses does not significantly conflict with what would be reasonable because it considers both historical and expected future changes in the level of expenses.
Assumed return for asset smoothing	We have relied on the plan's investment consultants' estimate of expected return on assets. We understand that this assumption reflects the plan's investment consultants' estimate of future experience for trust asset returns, reflecting the plan's current asset allocation and any expected changes during the fiscal year that includes the valuation date, current market conditions and the expectations for future market conditions. The assumed return for 2023 is based on the expected return on assets selected by the plan sponsor for FY 2023 for ASC 715 reporting. However, the return was decreased by 20 basis points for assumed investment advisory expenses during the prior plan year (based on actual expenses as a percentage of the beginning of year market value of assets rounded up to the nearest 10 basis points) which are not included in the administrative expense load to normal cost. We believe that the assumption chosen does not significantly conflict with what would be reasonable based on the results of the WTW expected return modeler.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Retirement Rates	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed. Participants are assumed to commence benefits immediately upon retirement. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

Benefit Commencement

Date for deferred benefits

- Preretirement death benefit
Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.
- Deferred vested benefit
For active participants who terminate, deferred vested benefits are assumed to commence at age 65. Deferred vested participants' assumed commencement age is a single age intended to capture the average age at commencement.

Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

Form of payment

Participants are assumed to elect the normal form of benefit for married and single participants based on the assumed married percentage. Election of alternate optional forms of benefit is not expected to cause a material change in liability. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Change in Assumptions and Methods Since Prior Valuation

Change in Assumptions
Since Prior Valuation

Under the Pension Protection Act of 2006, the following assumption changes were made:

- The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.
- The mortality table used to calculate the funding target was updated to reflect current IRS prescribed assumptions.

Other than the prescribed changes in the discount rate and mortality, the following other changes in assumptions were made as part of this valuation:

- The assumed plan-related expenses added to the target normal cost were changed from \$480,000 for the prior valuation to \$290,000 for the current valuation to account for lower expected expenses to be paid from the trust. The amount has been updated from the prior year; however, the process for estimating plan-related expenses has not changed.
- The assumed return for asset smoothing was changed from 6.40% for 2022 to 7.00% for 2023 to reflect an increase in the expected rate of return on assets. The assumed return is capped by the third segment rate in both years.
- The retirement decrement was extended past age 65 to assume retirement rates of 50% for ages 65-69 and 100% at age 70 to account for active participants retiring after age 65.

Change in methods since
prior valuation

- There have been no changes in methods since the prior valuation.

 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Part V Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis:

- Applicable month September
- Interest rate basis Segment rates

	Reflecting Corridors	Not Reflecting Corridors
Interest rates:		
● First segment rate	4.75%	3.62%
● Second segment rate	4.87%	4.46%
● Third segment rate	5.59%	4.52%
● Effective interest rate	5.08%	4.42%

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

- Assumed return for asset smoothing¹

Year	Unlimited Return	3 rd Segment Rate	Limited Return
2023	6.80%	5.74%	5.74%
2022	6.40%	5.92%	5.92%

¹ The assumed return for asset smoothing is used in the development of the Actuarial Value of Assets (AVA). The assumed return for each year can be no greater than the third segment rate (reflecting corridors).

Annual rates of increase:

- Compensation N/A
- Future Social Security wage bases N/A
- Statutory limits on compensation N/A
- Administrative expenses

Plan related expenses are assumed to be the average of actual administrative expenses net of PBGC premiums in the prior three years, plus expected PBGC premiums for the current year, rounded to the nearest ten thousand. The amount included this year for plan-related administrative expenses is \$290,000.

Demographic Assumptions

- Inclusion Date The valuation date coincident with or next following the date on which the employee becomes a participant.

- New or rehired employees There are no new entrants after the plan freeze date of December 31, 2005.

- Mortality
 - Healthy The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using separate mortality rates for annuitants (“Healthy Annuitants” table) and non-annuitants (based on “Employees” table) without collar or amount adjustments with generational projection using the capped and adjusted Scale MP-2021, as prescribed in final regulations published October 20, 2023.

 - Disabled Disabled participants are assumed to have the same mortality as healthy participants.

- Termination Rates varying by age:

Percentage leaving during the year	
Attained Age	Males and Females
20	22.02%
25	16.72
30	12.60
35	9.54

Average age: 62

Benefit commencement date In service death benefit

- Age 65 with 5 years of service
- Age 60 with 10 years of service
- Age 55 with 15 years of service
- Age 58 where age plus service is greater than or equal to 85

Deferred vested benefit Deferred vested participants who may be eligible for pre-65 supplemental back payments under the current eligibility interpretation are assumed to commence benefits at their earliest retirement age. Otherwise, age 65 is assumed.

Form of payment	Participants are assumed to elect the normal form.	
Percent married	For purposes of determining assumed form of payment and for valuing the pre-retirement surviving spouse's benefit, 80% of the participants eligible for spouses' benefits are assumed to be married.	
Spouse age	Male spouses are assumed to be three years older than female spouses.	
Covered pay	Not applicable. The plan was frozen as of December 31, 2005.	
At-risk assumptions	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.	
Timing of future decrements	Retirements, withdrawals, disabilities, and deaths are assumed to occur in the middle of the year.	
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year (zero since the plan was frozen) plus plan-related expenses expected to be paid from plan assets during plan year.
Actuarial value of assets	<p>Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.80% during 2023 and 6.40% during 2022 (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.</p>
Benefits Not Valued	<p>All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions and, based on that review, is not aware of any significant benefits required to be valued that were not.</p> <p>The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.</p>

Sources of Data and Other Information

The plan sponsor, through its third party administrator, furnished participant data as of January 1, 2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor and/or the trustee. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust). Assumed expenses are rounded to the nearest ten thousand. We believe that this approach to estimating future expenses does not significantly conflict with what would be reasonable because it considers both historical and expected future changes in the level of expenses.
Assumed return for asset smoothing	We have relied on the plan's investment consultants' estimate of expected return on assets. We understand that this assumption reflects the plan's investment consultants' estimate of future experience for trust asset returns, reflecting the plan's current asset allocation and any expected changes during the fiscal year that includes the valuation date, current market conditions and the expectations for future market conditions. The assumed return for 2023 is based on the expected return on assets selected by the plan sponsor for FY 2023 for ASC 715 reporting. However, the return was decreased by 20 basis points for assumed investment advisory expenses during the prior plan year (based on actual expenses as a percentage of the beginning of year market value of assets rounded up to the nearest 10 basis points) which are not included in the administrative expense load to normal cost. We believe that the assumption chosen does not significantly conflict with what would be reasonable based on the results of the WTW expected return modeler.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Retirement Rates	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed. Participants are assumed to commence benefits immediately upon retirement. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

Benefit Commencement

Date for deferred benefits

- Preretirement death benefit
Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.
- Deferred vested benefit
For active participants who terminate, deferred vested benefits are assumed to commence at age 65. Deferred vested participants' assumed commencement age is a single age intended to capture the average age at commencement.

Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

Form of payment

Participants are assumed to elect the normal form of benefit for married and single participants based on the assumed married percentage. Election of alternate optional forms of benefit is not expected to cause a material change in liability. For the reasons discussed above, we believe the assumptions selected do not significantly conflict with what would be reasonable.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Change in Assumptions and Methods Since Prior Valuation

Change in Assumptions
Since Prior Valuation

Under the Pension Protection Act of 2006, the following assumption changes were made:

- The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.
- The mortality table used to calculate the funding target was updated to reflect current IRS prescribed assumptions.

Other than the prescribed changes in the discount rate and mortality, the following other changes in assumptions were made as part of this valuation:

- The assumed plan-related expenses added to the target normal cost were changed from \$480,000 for the prior valuation to \$290,000 for the current valuation to account for lower expected expenses to be paid from the trust. The amount has been updated from the prior year; however, the process for estimating plan-related expenses has not changed.
- The assumed return for asset smoothing was changed from 6.40% for 2022 to 7.00% for 2023 to reflect an increase in the expected rate of return on assets. The assumed return is capped by the third segment rate in both years.
- The retirement decrement was extended past age 65 to assume retirement rates of 50% for ages 65-69 and 100% at age 70 to account for active participants retiring after age 65.

Change in methods since
prior valuation

- There have been no changes in methods since the prior valuation.

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions

The plan was originally effective October 1, 1997 and was frozen as of December 31, 2005. It was amended and restated effective August 10, 2012. This valuation accounts for the plan as amended through the valuation date.

Covered Employees	Eligible employees who were participating in the WSRC plan on September 30, 1997 became participants on the Effective Date. Employees of WSMS who are either a Full Service Employee (working at least 20 hours a week on a regular basis) or a Limited Service Employee (working part-time with less than 1,000 Hours of Service). Employees are no longer eligible to enter the plan as of December 31, 2005.
Participation Date	A Full Service Employee becomes a participant on date of hire. A Limited Service Employee becomes a participant after completing one year of Eligibility Service.

Definitions

Eligibility service	<p>Includes all service with WSMS and Affiliated Employers. Includes prior service under the Prior Plan in effect on March 31, 1989 and the WSRC Pension Plan as of September 30, 1997.</p> <p>For those Employees employed on or before December 31, 1995, at least 1,000 hours of service count as one full year of Eligibility Service. After January 1, 1996; however, Eligibility Service for a Full Service Employee begins on the date the Employee completes an Hour of Service. Eligibility Service for Full Service Employees also includes defined absences.</p>
Credited Service	<p>Full Service Employee: Credited Service begins on completion of an Hour of Service and ends on Severance Date.</p> <p>Limited Service Employee: one year of Credited Service for each year of Eligibility Service when the Employee completes 2,080 Hours of Service. However, if Hours of Service are at least 1,000, but less than 2,080, Credited Service is based on a fraction of Hours of Service over 2,080.</p> <p>Prior to September 30, 1997, all service as an Employee was generally included as Credited Service. Credited Service includes service with WSMS and WSRC.</p> <p>Credited service will no longer be accrued after the plan freeze date of December 31, 2005.</p>
Vesting Date	The date the Participant completes five years of Eligibility Service.

Early retirement factors will not be less than those determined using the Pri-2012 mortality table for retirees projected to 2035 with MP-2020 and an interest rate of 5.0%.

Incapacity Retirement Benefit

Equal to the normal retirement pension accrued to date of retirement.

Vested Termination Benefit

For pension payments commencing before age 65, (or age 60 with at least 30 years of Eligibility Service), benefit will be reduced by .004167 (5% on an annual basis) for each month prior to month participant would have been entitled to an unreduced pension benefit (age 60 or 65).

Early commencement factors will not be less than those determined using the Pri-2012 mortality table for retirees projected to 2035 with MP-2020 and an interest rate of 5.0%.

Deferred Vested Supplemental Benefit

\$200 multiplied by credited service with WSMS divided by the credited service the employee would have had through early retirement date. Such benefit shall be payable monthly at age 65 and continue after the death of the employee to the spouse, if still alive.

Employer-Paid Survivor Benefits

WSMS pays entire cost of benefit, immediate benefit payable to survivor equal to approximately 40% of pension benefit. Employer-Paid Survivor Benefit is greater of:

- (i) Credited Service x Average Monthly Pay x .5%
- (ii) Credited Service x \$4 + 4% x Average Monthly Pay

If Credited Service is less than 15 years, the 4% of Average Monthly Pay is multiplied by Credited Service divided by 15.

Member Paid Pre-Retirement Spouse Benefits

Immediate benefit payable to spouse equal to 10% of Participant's reduced pension and is combined with the Employer Paid Survivor Benefit. Coverage ends when Participant retires. For pre-December 31, 2005 annuity start dates, participant's pension amount is reduced by:

- .015% for each month coverage is in effect beginning at age 55, but before age 65 and
- .025% for each month after age 65, if Participant is still actively employed.

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions

The plan was originally effective October 1, 1997 and was frozen as of December 31, 2005. It was amended and restated effective August 10, 2012. This valuation accounts for the plan as amended through the valuation date.

Covered Employees	Eligible employees who were participating in the WSRC plan on September 30, 1997 became participants on the Effective Date. Employees of WSMS who are either a Full Service Employee (working at least 20 hours a week on a regular basis) or a Limited Service Employee (working part-time with less than 1,000 Hours of Service). Employees are no longer eligible to enter the plan as of December 31, 2005.
Participation Date	A Full Service Employee becomes a participant on date of hire. A Limited Service Employee becomes a participant after completing one year of Eligibility Service.

Definitions

Eligibility service	<p>Includes all service with WSMS and Affiliated Employers. Includes prior service under the Prior Plan in effect on March 31, 1989 and the WSRC Pension Plan as of September 30, 1997.</p> <p>For those Employees employed on or before December 31, 1995, at least 1,000 hours of service count as one full year of Eligibility Service. After January 1, 1996; however, Eligibility Service for a Full Service Employee begins on the date the Employee completes an Hour of Service. Eligibility Service for Full Service Employees also includes defined absences.</p>
Credited Service	<p>Full Service Employee: Credited Service begins on completion of an Hour of Service and ends on Severance Date.</p> <p>Limited Service Employee: one year of Credited Service for each year of Eligibility Service when the Employee completes 2,080 Hours of Service. However, if Hours of Service are at least 1,000, but less than 2,080, Credited Service is based on a fraction of Hours of Service over 2,080.</p> <p>Prior to September 30, 1997, all service as an Employee was generally included as Credited Service. Credited Service includes service with WSMS and WSRC.</p> <p>Credited service will no longer be accrued after the plan freeze date of December 31, 2005.</p>
Vesting Date	The date the Participant completes five years of Eligibility Service.

- (ii) immediate regular pension equal to the deferred pension reduced 2% - 5% for each year date of retirement precedes the earlier of age 65 or the unreduced early retirement date.

Early retirement factors will not be less than those determined using the Pri-2012 mortality table for retirees projected to 2035 with MP-2020 and an interest rate of 5.0%.

Incapability Retirement Benefit

Equal to the normal retirement pension accrued to date of retirement.

Vested Termination Benefit

For pension payments commencing before age 65, (or age 60 with at least 30 years of Eligibility Service), benefit will be reduced by .004167 (5% on an annual basis) for each month prior to month participant would have been entitled to an unreduced pension benefit (age 60 or 65).

Early commencement factors will not be less than those determined using the Pri-2012 mortality table for retirees projected to 2035 with MP-2020 and an interest rate of 5.0%.

Deferred Vested Supplemental Benefit

\$200 multiplied by credited service with WSMS divided by the credited service the employee would have had through early retirement date. Such benefit shall be payable monthly at age 65 and continue after the death of the employee to the spouse, if still alive.

Employer-Paid Survivor Benefits

WSMS pays entire cost of benefit, immediate benefit payable to survivor equal to approximately 40% of pension benefit. Employer-Paid Survivor Benefit is greater of:

- (i) Credited Service x Average Monthly Pay x .5%
- (ii) Credited Service x \$4 + 4% x Average Monthly Pay

If Credited Service is less than 15 years, the 4% of Average Monthly Pay is multiplied by Credited Service divided by 15.

Member Paid Pre-Retirement Spouse Benefits

Immediate benefit payable to spouse equal to 10% of Participant's reduced pension and is combined with the Employer Paid Survivor Benefit. Coverage ends when Participant retires. For pre-December 31, 2005 annuity start dates, participant's pension amount is reduced by:

- .015% for each month coverage is in effect beginning at age 55, but before age 65 and
- .025% for each month after age 65, if Participant is still actively employed.

Schedule SB, Line 24 Change in Actuarial Assumptions

Other than the prescribed changes in the discount rate and mortality, the following other changes in assumptions were made as part of this valuation:

- The assumed plan-related expenses added to the target normal cost were changed from \$480,000 for the prior valuation to \$290,000 for the current valuation to account for lower expected expenses to be paid from the trust. The amount has been updated from the prior year; however, the process for estimating plan-related expenses has not changed.
- The assumed return for asset smoothing was changed from 6.40% for 2022 to 7.00% for 2023 to reflect an increase in the expected rate of return on assets. The assumed return is capped by the third segment rate in both years.
- The retirement decrement was extended past age 65 to assume retirement rates of 50% for ages 65-69 and 100% at age 70 to account for active participants retiring after age 65.
