Independent Auditors' Report

The Plan Administrator
Philadelphia Corporation for Aging Pension Plan
Philadelphia, Pennsylvania

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of the Philadelphia Corporation for Aging Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of and for the years ended December 31, 2024 and 2023, stating that the certified investment information, as described in Note 5 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities for the Audit of the Financial Statements section

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certifications, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter - Supplemental Schedules Required by ERISA

The supplemental Schedule H, Line 4i – Schedule of Assets (Held at End of Year) and Schedule H, Line 4j – Schedule of Reportable Transactions as of and for the year ended December 31, 2024 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements.

The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- the information in the supplemental schedule related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Philadelphia Corporation for Aging Pension Plan

Notes to Financial Statements

December 31, 2024 and 2023

(1) Description of Plan

The following brief description of the Philadelphia Corporation for Aging Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the plan document for more complete information.

General

The Plan was established on January 1, 1974, as a defined benefit pension plan covering substantially all employees of Philadelphia Corporation for Aging and PCA Care Connections (collectively, the Company) who have attained the age of twenty-one years and have completed 1,000 hours of service. Employee contributions were allowed prior to August 1, 1978, at which time the Plan was amended to make the Plan noncontributory. In addition, a second set of benefits was created for participants hired on or after January 1, 2010. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). The plan administrator is responsible for the oversight of the Plan, determines the appropriateness of the Plan's investments and monitors investment performance.

The Plan was amended effective July 15, 2021. As of that date, the Plan ceased benefit accruals and no additional employees were eligible to join the Plan. In addition, effective December 31, 2021, eligible compensation for purposes of determining final average earnings was ceased.

Funding Policy

The Company's funding policy is for the Company to contribute an amount that will meet or exceed the annual ERISA minimum funding requirement. The Plan is subject to the Full Funding Limitations, which restricts contributions to an amount which, when added to Plan assets, will not exceed the accrued liability plus normal cost. No employee contributions are permitted. The Company's contributions for 2024 and 2023 comply with the minimum funding requirements of ERISA.

Pension Benefits

Employees are entitled to monthly pension benefits beginning at normal retirement age of 65. The Plan permits early retirement at age 55 if the employee has a vested interest. The annual retirement benefit at normal retirement is a percentage of the employee's final average earnings times years of credited service, plus an additional percentage of the employee's final average earnings in excess of the Social Security Average Wage times credited service, maximized at 35 years.

The employee's retirement benefit or vested deferred benefit was previously payable in the form of an annuity commencing on their retirement date. Effective July 15, 2010, benefits not previously funded in the form of a purchased annuity will be funded directly through Plan assets. Such benefits may be made in monthly payments under a Non-Refund Life Annuity, Full Cash Refund Annuity, Modified Cash Refund Life Annuity, Period Certain and Continuous Annuity, Joint and Survivor Life Annuity, Joint and Survivor with Period Certain and Continuous Annuity, or the employee may elect a single lump-sum option.

Notes to Financial Statements

December 31, 2024 and 2023

(1) Description of Plan, Continued

Death and Disability Benefits

Employees who become permanently disabled continue to accumulate retirement benefits until age 65 or their earlier retirement date. The employees receive benefits as though they had been employed throughout the period of disability.

Pre-retirement survivor benefits are payable to the surviving spouse of a vested employee regardless of age, with minimum monthly payments equal to the benefits available under the Joint and Survivor Annuity option. If a vested participant dies before early retirement age of 55, then the survivor benefit will not begin until the time the participant would have turned age 55.

Purchase of Group Annuity Contract

In February 2023, the Plan purchased a group annuity contract in the net amount of \$61,655,557 through Principal Life Insurance Company (Principal Life), to provide for future benefits of a group of approximately 315 participants receiving monthly benefits under the Plan (Annuity Contract).

Under the Annuity Contract, Principal Life will make monthly benefit payment to this group of participants in accordance with the plan provisions, as defined, beginning May 1, 2023.

In the event of Principal Life insolvency, and resulting default on payments, the participants are protected by the insurer's general account and secondarily by the State Guaranty Associates.

Vesting

Benefits are vested when the employee has completed three years of service with the Company (five years for employees hired on or after January 1, 2010) or upon attaining early retirement age of 55.

(2) Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Philadelphia Corporation for Aging Pension Plan

Notes to Financial Statements

December 31, 2024 and 2023

(2) Summary of Significant Accounting Policies, Continued

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes gains and losses on investments bought and sold as well as held during the year.

Pension Benefits

Benefit payments to participants are recorded upon distribution.

Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as a deduction in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in net appreciation (depreciation) in fair value of investments presented in the accompanying statements of changes in net assets for benefits.

Subsequent Events

The Plan has evaluated subsequent events through October 9, 2025, the date the financial statements were available to be issued.

Notes to Financial Statements

(3) Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- Benefits attributable to employee contributions, taking into account those paid out before termination.
- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under the Plan provisions in effect at any time during the five years preceding Plan termination.
- Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed subsequently).
- All other vested benefits (that is, vested benefits not insured by the PBGC).
- All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsors and the level of benefits guaranteed by the PBGC.

(4) Actuarial Present Value of Accumulated Pension Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' highest average compensation for a consecutive five year period. Benefits payable under all circumstances – retirement, death, disability and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

(4) Actuarial Present Value of Accumulated Pension Benefits, Continued

The actuarial present value of accumulated plan benefits is determined by an independent actuary from Principal and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. Had the valuations been performed as of December 31, there would be no material differences.

The computation of the actuarial present value of accumulated plan benefits was made as of January 1, 2024 and 2023.

The purchase of the Annuity Contract described in Note 1 has a significant impact and would have resulted in an approximate \$62,000,000 reduction in the actuarial present value of the accumulated plan benefits had the determination been made as of December 31, 2023.

Certain significant actuarial assumptions are as follows as of January 1, 2024 and 2023:

	2024	2023
Mortality	The Pri-2012 Total dataset base rate mortality table projected generationally using MP-2021.	Pri-2012 Employer Tables with the Retiree and Contingent Survivor Tables for annuitants projected generationally using MP-2021.
Discount rate	5.00%	4.50%
Normal retirement age	65 years old	65 years old
Investment return	6.00%	5.00%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits is as follows as of January 1:

	2024	2023
Vested benefits:		
Active participants	\$ 39,812,731	\$ 44,766,873
Participants receiving benefits	4,066,335	63,807,965
Inactive participants	16,873,762	24,096,569
	<u>60,752,828</u>	<u>132,671,407</u>
Nonvested benefits	4,668	42,420
Total actuarial present value of accumulated plan benefits	<u>\$ 60,757,496</u>	<u>\$ 132,713,827</u>

(4) Actuarial Present Value of Accumulated Pension Benefits, Continued

The change in the present value of accumulated plan benefits was as follows for the years beginning January 1:

	2024	2023
Actuarial present value of accumulated plan benefits, beginning of year	\$ 132,713,827	\$ 152,689,024
Benefits accumulated and plan experience	(2,456,969)	503,672
Increase for interest due to the decrease in the discount period	4,451,044	5,266,181
Benefits paid	(68,355,634)	(4,492,026)
Change in assumptions	(5,594,772)	(21,253,024)
Net decrease	(71,956,331)	(19,975,197)
Actuarial present value of accumulated plan benefits, end of year	\$ 60,757,496	\$ 132,713,827

(5) Financial Information Certified by a Trustee

Certain information related to investments disclosed in the accompanying financial statements and ERISA-required supplemental schedules, including investments held at December 31, 2024 and 2023, and net appreciation (depreciation) in fair value of investments for the years ended December 31, 2024 and 2023, was obtained by management and agreed to or derived from information certified as complete and accurate by Principal Trust Company (Principal), a qualified institution.

(6) Fair Value Measurements

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Philadelphia Corporation for Aging Pension Plan

Notes to Financial Statements

December 31, 2024 and 2023

(6) Fair Value Measurements, Continued

Level 2: Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the assets or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2024 and 2023.

Common collective trusts: Valued using a net asset value (NAV). The NAV of a collective trust is based on the market values of the underlying securities in an active market. The beneficial interest of each participant is represented in units. Units are issued and redeemed daily at the fund's closing NAV. Valued at the closing price reported on the active market on which the individual securities are traded.

There were no significant transfers among investment levels during the years ended December 31, 2024 and 2023.

The following table summarizes investments measured at fair value based on the NAV per share as a practical expedient as of December 31:

	2024	2023	Unfunded Commitment	Redemption Frequency	Redemption Notice Period
Common collective trusts	\$ 55,448,978	\$ 60,828,006	None	Daily*	N/A

* Redemption restricted to one every 30 days

(7) Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated August 20, 2015, that the Plan is designed in accordance with the applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC, and, therefore, believes that the Plan is qualified and the related trust is tax exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the plan and recognize a tax liability if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

(8) Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(9) Related Party Transactions and Party-In-Interest

Certain plan investments are shares of common collective trusts managed by an affiliate of Principal. Principal is the custodian as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions, which are exempt from the prohibited transaction rules. The Plan paid certain fees to Principal and various service providers during 2024 and 2023. These transactions qualify as party-in-interest transactions, which are exempt from the prohibited transaction rules.

Assumptions prescribed by law

Mortality

Before benefit payment period
IRS Prescribed Mortality - Generational Non-annuitant, male and female.

During benefit payment period
IRS Prescribed Mortality - Generational Annuitant, male and female.

Assumptions selected by actuary

Inflation 2.40% increase per year.
Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.

Asset return 6.00% for the current plan year.
The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.

Expected expense The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets, with an updated estimate of PBGC premiums. This is the best estimate available of upcoming year's expenses.

Retirement Active participants

Age	Probability of retirement	Age	Probability of retirement
55-59	2.0%	65	10%
60-61	5.0%	66-67	20%
62	7.5%	68-69	25.0%
63-64	5.0%	70	100%

Active participants are assumed to receive a suspension of benefit notice prior to reaching normal retirement date.

Inactive participants are assumed to retire at age 65.

We don't have the plan experience necessary to directly set this assumption; therefore, we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design. As we gain plan experience, we will monitor and make appropriate adjustments in the future.

Disability

None.

We don't have the plan experience necessary to directly set this assumption; therefore, we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design. As we gain plan experience, we will monitor and make appropriate adjustments in the future.

Marriage

100% married; husbands are 3 years older than wives.

We don't have the plan experience necessary to directly set this assumption; therefore, we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design. As we gain plan experience, we will monitor and make appropriate adjustments in the future.

Withdrawal

Selected rates of withdrawal are shown below:

Age	Rate of withdrawal
25	15.45%
40	10.30%
55	1.88%

We don't have the plan experience necessary to directly set this assumption; therefore, we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design. As we gain plan experience, we will monitor and make appropriate adjustments in the future.

Form of benefit

Participants are assumed to receive their benefits on the normal form at the assumed retirement ages.

This assumption is based on the results of recent experience analysis and anticipated future experience.

Retirement cost of living adjustment

2.00% per year for employees hired before January 1, 2010.

Not applicable for employees hired on and after January 1, 2010.

Retirement cost of living adjustment should be consistent with the inflation assumption, not to exceed 2.00% as defined by the plan.

Methods prescribed by law

Liability measure

Funding target is the present value of the benefits accrued on the valuation date.

Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

Assets by employer

Assets for each employer are the amount available by Employer under §4044 of ERISA as of the valuation date. We calculate the liability for each participant utilizing the PBGC's plan termination assumptions as would be required under a 4044 allocation. Then each participant's liability is broken down into various priority categories. These categories are as follows:

PC1 and PC2 – employee contributions.

PC3 – all benefits for participants currently in pay status and deferred members that would have been eligible to retire 3 years prior to the valuation date with benefits accrued 5 years prior.

PC4 – vested benefits not included in PC1 – PC3 up to the PBGC maximum guaranteed benefit.

PC5 – same as PC4 but reflects vested benefits above the PBGC maximum guarantee.

PC6 – all non-vested benefits

Methods selected by plan sponsor

Asset method

The asset valuation method is prescribed by law for plans that elect to use a value other than market value.

For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.

The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.

When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.

Segment rates 24-month average with no weighting to prior law basis. Use rates where December is the last month included in the average.

PBGC premium basis Variable rate premiums are calculated using census, market value of assets and the one-month average of corporate bond rates in effect on the valuation date. You elected this Standard interest method for the 01/01/2023 plan year and the method must be used for five years before a change can be made.

Segment 1 years 0-5	Segment 2 years 5-20	Segment 3 years 20+
5.01%	5.13%	5.15%

Methods elected by actuary

Retirees Assets and liabilities for current and future retirees are included.

Vested benefits A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant’s vesting percentage applicable to each benefit on the valuation date.

The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality Based on Pri-2012 Total dataset base rate mortality table projected generationally using MP-2021.

Mortality base rates

Before benefit payment period

Employee amount-weighted, male and female

During benefit payment period

Retiree amount-weighted, male and female

Contingent survivors – Contingent survivor amount-weighted, male and female. Participants in pay status who cannot be identified as survivors use the same table as retirees.

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 3" is reasonable for this plan.

Mortality improvement

MP-2021 is the most recent improvement scale published by the SOA in October 2021.

In selecting this assumption, we considered the other parameters available in the MIM-2021-v4 application tool issued by the SOA in October 2023 and consider the selections in MP-2021 reasonable. Based on the sponsor's input, plan experience does not show a need for long-term excess death or Covid death load adjustments.

Interest rate used to value liabilities

5.00%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Accrual service	Period of service from date of participation expressed as whole years and fractional parts of a year where a partial month is a complete month. Accrual service is frozen effective July 15, 2021.
Vesting service	Period of service from date of hire expressed as whole years and fractional parts of a year where a partial month is a complete month.
Accrued benefit adjustment	The lesser of potential accrual service to normal retirement date or 35 divided by potential accrual service to normal retirement date.

Integration level The monthly average of the social security taxable wage bases in effect under section 230 of the Social Security Act for each year in the 35 year period ending with the year in which the employee attains social security retirement age.

Cost of living adjustment **For participants hired prior to January 1, 2010.**
A retiree's benefit under the plan shall be increased each May 1st of the calendar year after their benefit commencement date. The increase is based on the ratio of the Consumer Price Index for all Urban Consumers for December 31 preceding that year compared to the second preceding December 31. The increase must be more than 1% from the preceding year, subject to a maximum increase of 2% annually.

Optional forms of benefit payments **For participants hired on and after January 1, 2010.**
A retiree is not eligible to receive a cost of living adjustment.
The optional forms of benefit payments are:

- Monthly annuity payable for life
- Monthly annuity payable for 10 or 15 years certain and life.
- Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75, or 100.
- Monthly annuity payable for 10 years certain and life and survivorship life annuity with survivorship percentages of 66 2/3 or 100.
- Monthly annuity payable as a full cash refund.

The optional form conversion basis is 8.5% interest and the 1983 IAM female mortality table for payments other than lump sums.

Lump sum provisions

Small amount force out (SAFO) – allowed up to \$1,000.

Conversion – greater of the deferred or immediate rate with early retirement factor based on applicable interest rate and applicable mortality table as set forth in Code Section 417. The applicable interest rate uses the fifth calendar month preceding the first day of the stability period which is the plan year.

Lump sums in excess of SAFO – allowed at retirement.

Conversion – greater of the deferred or immediate rate with early retirement factor based on applicable interest rate and applicable mortality table as set forth in Code Section 417. The applicable interest rate uses the second calendar month preceding the first day of the stability period which is quarterly.

Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

Significant Event

The enrolled actuary has not been made aware that any significant events have occurred during the year.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
