Statement of Actuarial Assumption/Methods

Plan Name: Brian P. Olofsson, MD Retirement Plan and Trust

EIN: 36-3493366 Plan #: 002

The actuarial cost method is a particular technique used by the actuary for establishing the amount and incidence of annual actuarial costs. The actuarial cost method determines the portion of the ultimate cost of a pension plan that should be allocated to each year (known as the normal cost). The cost method is thus a budgeting tool that helps to ensure that the pension plan will be adequately and systematically funded.

The annual cost for a pension plan is determined using the unit credit cost method. The ultimate cost for a pension plan will be determined not by the cost method but by the benefits and expenses which become payable and the earnings which are obtained on the investments of the Plan. In addition, the choice of actuarial assumptions will affect the current level of contributions and pattern of future contributions.

Under the unit credit cost method, the target normal cost for each participant is equal to the present value of the projected benefit (salary increases may be included) one year from the valuation date minus the present value of accrued benefits as of the valuation date. The target normal cost for the Plan is the total of the individually computed target normal costs for all participants including the costs for any death or disability benefits under the Plan.

The target liability at any point in time for an active participant is the present value of the participant's accrued benefit. For persons receiving benefits or entitled to a deferred vested retirement income, the target liability is equal to the present value of their future benefit payments. The total target liability for the Plan is the total of the individually computed target liability amounts for all participants.

Certain assumptions are made in the calculation of the target liability, such as: interest rates, mortality, turnover, etc. which are assumed to hold for many years into the future. Since actual experience may differ somewhat from the assumptions, the costs determined by the valuation must be regarded as estimates of the true costs of the Plan.

The actuarial value of assets equals the fair market value of assets.

Definitions

Annual earnings:

Total W-2 wages.

Eligible Employee:

Minimum age 21 and completion of one year of service.

Entry date:

Entry date means January 1 or July 1 that coincides with or next follows the date that the eligibility requirements are met.

Benefit account, earnings credit and interest credit:

The balance of a participant's benefit account is the sum of their Principal Credits and Interest Credits.

Accrual of Principal Credit:

For each plan year in which an individual is an active participant and completes at least 1,000 hours of service, their benefit account will be increased by the following earnings credits:

Group 1: Owner-Employee	37.75% of Compensation
Group 2: Physicians not in Group 1	0.00% of Compensation
Group 3: Lineal decedent of Group 1 participant	0.00% of Compensation
Group 4: All Employees not listed above	4.10% of Compensation

Accrual of Interest Credits:

For each plan year and continuing until the last month before payment of a participant's benefit, the hypothetical account shall be credited with a hypothetical interest amount. The interest is credited by multiplying the balance of the participant's hypothetical account as of the beginning of the plan year by the applicable interest rate.

Applicable Interest Rate:

The applicable interest rate is 5%.

Limitation year:

The limitation year is the 12-month period beginning January 1 and ending December 31.

Normal retirement age:

A participant's normal retirement age is age 65.

One year break-in-service:

A one-year break-in-service occurs in any plan year during which the employee completes 500 or fewer hours of service.

Plan year:

The plan year is the 12-month period beginning January 1 and ending December 31.

Statement of Plan Provisions

Plan Name: Brian P. Olofsson, MD Retirement Plan and Trust

EIN: 36-3493366 Plan #: 002

Vested accrued benefit:

A participant's vested accrued benefit as of a given date is equal to the product of his accrued benefit multiplied by his vested percentage as of that same date.

Vesting schedule:

Participant's vested percentage will be based on the following schedule: 0-2 years – 0%, 3+ years – 100%.

Year of vesting service:

A year of vesting service is credited for a plan year in which an employee has at least 1000 hours of service. Service during plan years prior to the plan year in which the individual attains age 18 will be disregarded.

Participation:

The plan participation date is the first day of the Plan Year coincident with or next following the date they attain age 21, provided that they are an Eligible Employee.

Normal retirement:

The normal retirement pension is equal to the accrued benefit. The normal form of payment is a straight life annuity.

Optional benefit forms:

Optional benefit forms are available and equal to the actuarial equivalent of the normal benefit form. Such distribution may be in one or more of the following forms:

Lump sum

Life annuity – a straight life annuity payable monthly and ending on the participant's death.

Joint & 50% survivor pension - monthly pension benefit payable during the joint lifetime of the participant and the joint annuitant; reduces to 50% of the original amount upon the death of the participant.

Pre-retirement death benefit:

A participant's surviving beneficiary will be entitled to receive a death benefit in the event of the death of a participant prior to the commencement of a monthly pension benefit that is equal to the present value of the participant's vested accrued benefit.

Disability benefit:

The plan does not provide disability benefits.

Termination benefit:

In the event of the termination of a participant's employment prior to his or her normal retirement date, the participant will be entitled to a deferred pension that is the actuarial equivalent of the vested accrued benefit payable at the normal retirement date.

Statement by Enrolled Actuary
To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Statement of Actuarial Assumption/Methods

Plan Name: Brian P. Olofsson, MD Retirement Plan and Trust

EIN: 36-3493366 Plan #: 002

The actuarial cost method is a particular technique used by the actuary for establishing the amount and incidence of annual actuarial costs. The actuarial cost method determines the portion of the ultimate cost of a pension plan that should be allocated to each year (known as the normal cost). The cost method is thus a budgeting tool that helps to ensure that the pension plan will be adequately and systematically funded.

The annual cost for a pension plan is determined using the unit credit cost method. The ultimate cost for a pension plan will be determined not by the cost method but by the benefits and expenses which become payable and the earnings which are obtained on the investments of the Plan. In addition, the choice of actuarial assumptions will affect the current level of contributions and pattern of future contributions.

Under the unit credit cost method, the target normal cost for each participant is equal to the present value of the projected benefit (salary increases may be included) one year from the valuation date minus the present value of accrued benefits as of the valuation date. The target normal cost for the Plan is the total of the individually computed target normal costs for all participants including the costs for any death or disability benefits under the Plan.

The target liability at any point in time for an active participant is the present value of the participant's accrued benefit. For persons receiving benefits or entitled to a deferred vested retirement income, the target liability is equal to the present value of their future benefit payments. The total target liability for the Plan is the total of the individually computed target liability amounts for all participants.

Certain assumptions are made in the calculation of the target liability, such as: interest rates, mortality, turnover, etc. which are assumed to hold for many years into the future. Since actual experience may differ somewhat from the assumptions, the costs determined by the valuation must be regarded as estimates of the true costs of the Plan.

The actuarial value of assets equals the fair market value of assets.

Definitions

Annual earnings:

Total W-2 wages.

Eligible Employee:

Minimum age 21 and completion of one year of service.

Entry date:

Entry date means January 1 or July 1 that coincides with or next follows the date that the eligibility requirements are met.

Benefit account, earnings credit and interest credit:

The balance of a participant's benefit account is the sum of their Principal Credits and Interest Credits.

Accrual of Principal Credit:

For each plan year in which an individual is an active participant and completes at least 1,000 hours of service, their benefit account will be increased by the following earnings credits:

Group 1: Owner-Employee	37.75% of Compensation
Group 2: Physicians not in Group 1	0.00% of Compensation
Group 3: Lineal decedent of Group 1 participant	0.00% of Compensation
Group 4: All Employees not listed above	4.10% of Compensation

Accrual of Interest Credits:

For each plan year and continuing until the last month before payment of a participant's benefit, the hypothetical account shall be credited with a hypothetical interest amount. The interest is credited by multiplying the balance of the participant's hypothetical account as of the beginning of the plan year by the applicable interest rate.

Applicable Interest Rate:

The applicable interest rate is 5%.

Limitation year:

The limitation year is the 12-month period beginning January 1 and ending December 31.

Normal retirement age:

A participant's normal retirement age is age 65.

One year break-in-service:

A one-year break-in-service occurs in any plan year during which the employee completes 500 or fewer hours of service.

Plan year:

The plan year is the 12-month period beginning January 1 and ending December 31.

Statement of Plan Provisions

Plan Name: Brian P. Olofsson, MD Retirement Plan and Trust

EIN: 36-3493366 Plan #: 002

Vested accrued benefit:

A participant's vested accrued benefit as of a given date is equal to the product of his accrued benefit multiplied by his vested percentage as of that same date.

Vesting schedule:

Participant's vested percentage will be based on the following schedule: 0-2 years – 0%, 3+ years – 100%.

Year of vesting service:

A year of vesting service is credited for a plan year in which an employee has at least 1000 hours of service. Service during plan years prior to the plan year in which the individual attains age 18 will be disregarded.

Participation:

The plan participation date is the first day of the Plan Year coincident with or next following the date they attain age 21, provided that they are an Eligible Employee.

Normal retirement:

The normal retirement pension is equal to the accrued benefit. The normal form of payment is a straight life annuity.

Optional benefit forms:

Optional benefit forms are available and equal to the actuarial equivalent of the normal benefit form. Such distribution may be in one or more of the following forms:

Lump sum

Life annuity – a straight life annuity payable monthly and ending on the participant's death.

Joint & 50% survivor pension - monthly pension benefit payable during the joint lifetime of the participant and the joint annuitant; reduces to 50% of the original amount upon the death of the participant.

Pre-retirement death benefit:

A participant's surviving beneficiary will be entitled to receive a death benefit in the event of the death of a participant prior to the commencement of a monthly pension benefit that is equal to the present value of the participant's vested accrued benefit.

Disability benefit:

The plan does not provide disability benefits.

Termination benefit:

In the event of the termination of a participant's employment prior to his or her normal retirement date, the participant will be entitled to a deferred pension that is the actuarial equivalent of the vested accrued benefit payable at the normal retirement date.
