Independent Auditor's Report

To the Participants and Employee Benefit Committee
L3Harris Pension Plan for Employees at the Pacific Missile Range Facility
Melbourne, FL

Opinion

We have audited the financial statements of L3Harris Pension Plan for Employees at the Pacific Missile Range Facility (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years ended December 31, 2024 and 2023, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, information regarding the net assets available for benefits of the Plan as of December 31, 2024 and 2023, and the changes in its net assets available for benefits for the years ended December 31, 2024 and 2023, in accordance with accounting principles generally accepted in the United States of America (US GAAP).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

As discussed in Note 10 to the financial statements, the Plan was merged into the L3Harris Technologies Consolidated Pension Plan effective December 31, 2024. Our opinion is not modified with respect to that matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with US GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are issued or are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgement made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Note 1. Description of the Plan

The following description of the L3Harris Pension Plan for Employees at the Pacific Missile Range Facility (the Plan) provides only general information. Participants should refer to the *Plan document* for a more complete description of the Plan's provisions, which is available from Plan management.

General

The Plan is a defined benefit plan covering substantially all hourly employees of L3Harris Technologies, Inc. Critical Networks, Pacific Missile Range Facility, a division of L3Harris Technologies, Inc., who are represented by the International Brotherhood of Electrical Workers, Local 1260 or the Inland Boatmen Union of the Pacific Hawaii Region. On June 29, 2019, L3 Technologies, Inc. (L3) completed its merger with Harris Corporation (Harris) to create L3Harris Technologies, Inc. (the Company) (the Plan Sponsor). The Plan funds are held in the L3Harris Pension Master Trust. See Note 3 for further information regarding the Master Trust. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended. During 2021, the contract covering the participants in the Plan ended and was not renewed by the Company. As a result, all active participants were terminated as of March 31, 2021.

Effective December 31, 2024, the Plan was merged into the L3Harris Technologies Consolidated Pension Plan ("CPP"). The net assets of \$42,343 were transferred to the CPP. See Note 10 and 11 for additional information.

Master Trust

The Northern Trust Company (the Trustee or Northern Trust) serves as trustee of the Plan and administers the Plan's investment assets. The Plan's assets consist of an undivided interest in an investment account of the L3Harris Pension Master Trust, EIN 36-6668234, a master trust established by the Company and administered by the Trustee. The Master Trust includes the combined assets of the Plan, as well as several other employee benefit plans of the Company. Although assets of the Plan are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain of the investment account to the participating plans. The net investment income of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans. A schedule of the Master Trust assets has been filed with the U.S. Department of Labor and includes the Plan's proportionate share of such assets at December 31, 2024 and 2023.

Eligibility

All L3Harris Technologies, Inc. Critical Networks, Pacific Missile Range Facility locations are eligible to participate upon the later of (i) the attainment of age 21 or the completion of one year of service, or (ii) upon the attainment of age 40. In addition, to enroll in the Plan and become a participant, an eligible active employee must agree to make participant contributions equal to 3% of earnings during the plan year.

Funding Policy

Contributions to provide benefits under the Plan are made solely by the Company and eligible employees. Effective March 31, 2021, there are no eligible employees. Employees' accumulated contributions on January 1, 2024 and 2023 were \$4,074 and \$4,289 respectively, including interest credit using an interest rate determined by Section 411(c)(2)(c) of the Internal Revenue Code compounded annually. Employee contributions were credited interest at a rate of 5.25% and 4.62% as of January 1, 2024 and 2023, respectively.

The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary. The Company met the minimum funding requirements of ERISA for the years ended December 31, 2024 and 2023.

Pension Benefits

Participants are eligible for monthly benefit payments upon reaching age 65. The normal monthly benefit payment is equal to 2.25% of the participant's earnings during each year of participation, divided by 12. A participant is immediately vested in their contributions into the Plan and is entitled to their pension benefit after five years of service. Prior to that time, the participant is not vested, but will, upon termination of employment, receive a return of his or her accumulated contributions, plus interest.

Participants are eligible to receive early retirement benefits between the ages of 55 and 65 upon the completion of five years of continuous service. Early retirement benefits are computed in a manner similar to normal retirement at age 65, except that benefits are reduced by certain factors, as outlined in the Plan document, for each month that the early retirement date precedes the normal retirement date.

Death Benefits

A married employee who is a vested participant is automatically covered by the preretirement death benefit option, which will provide a benefit for the surviving spouse upon death prior to retirement, unless coverage is waived. The benefit would be equal to the benefit the spouse would have received had the employee retired on the date of death, computed under the normal form of payment and subject to certain limitations.

Note 2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared using the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America (US GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; and disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's interest in the Master Trust is presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust. Fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefits are recorded upon distribution.

Administrative Expenses

Administrative expenses of the Plan are paid by the Master Trust on behalf of the Plan, as provided in the plan document and the Master Trust agreement. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statement of changes in net assets available for benefits. Administrative expenses generally consist of consulting fees, auditing fees, recordkeeping fees, and insurance expense. In addition, certain investment related expenses are included in Plan's interest in the Master Trust investment income (loss) presented in the accompanying statement of changes in net assets available for benefits.

Plan Management's Review of Subsequent Events

The Plan has evaluated subsequent events through October 10, 2025, the date the financial statements were available to be issued.

Note 4. Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the services employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

The actuarial present value of the accumulated plan benefits is determined by the Plan's independent actuary, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The accumulated plan benefits information at January 1, 2024 was as follows:

Actuarial present value of accumulated plan benefits		
Vested benefits		
Participants currently receiving payments	\$	22,410
Other participants		11,762
Non-vested benefits		-
Total actuarial present value of accumulated plan benefits	\$	34,172

The change in the actuarial present value of the Plan's accumulated plan benefits from January 1, 2023 to January 1, 2024 is attributable to the following:

Actuarial present value of accumulated plan benefits at January 1, 2023	\$	34,365
Increase (decrease) during the year attributable to:		
Benefit payments		(2,838)
Interest accumulation		2,473
Benefits accumulated and other plan experience		171
Assumption changes		1
Actuarial present value of accumulated plan benefits at January 1, 2024	\$	34,172

The assumption changes reflected above are due to the contribution projection interest rate used to accumulate employee contributions changed from 4.62% to 5.25%.

L3Harris Pension Plan for Employees at The Pacific Missile Range Facility

Notes to Financial Statements (In thousands)

The significant actuarial assumptions used in the Plan valuations as of January 1, 2024 were as follows:

Discount Rate:	The assumed interest rate is 7.5%.
Investment Return:	7.5% per annum.
Retirement:	100% retirement for terminated vested participants who were eligible for early retirement at the time of the facility shutdown in 2021. All other terminated vested participants are assumed to retire at age 65, or at current age if older than 65.
Mortality Basis:	The mortality assumption used is based on the Pri-2012 tables projected with the Buck Modified 2021 Improvement Scale. The Buck Modified Projection Scale is a modified version of MP-2021 Improvement Scale using a long-term improvement rate of 0.75%.

These actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2024. Had the valuations been performed as of December 31, there would be no material differences.

Note 5. Plan Termination

While the Company has not expressed any intent to do so, it is free to discontinue its contributions at any time and to terminate the Plan, subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Benefits attributable to employee contributions, taking into account those paid out before termination.
- b. Benefits attributable to participants who have retired at least three years before the termination date of the Plan or those participants who were eligible to retire and receive pension benefits at least three years before, but who did not elect to retire at that time.
- c. Benefits commencing at retirement age to participants who are eligible to receive guaranteed benefits under ERISA.
- d. All vested and non-vested benefits.

L3Harris Pension Plan for Employees at The Pacific Missile Range Facility

Notes to Financial Statements (In thousands)

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether participants receive all benefits to which they are entitled under the terms of the Plan should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation, up to specified limits.

Note 6. Fair Value Measurements

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurement*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability; and
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Notes to Financial Statements (In thousands)

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2024 and 2023.

Domestic and international equity: Domestic and international equity includes common and preferred stocks, domestic listed and foreign listed equity securities, unit trust equities, stapled securities, open-ended and closed-ended mutual funds, exchange-traded funds (registered investment companies), and these are generally valued at the closing price reported on the major market on which the individual securities are traded at the measurement date.

REITs: Real Estate Investment Trusts (REITs) consist of securities that trade on the major exchanges and invest directly in real estate, either through properties or mortgages.

Fixed income investments: Fixed income investments include U.S. Government securities, corporate bonds, corporate convertible bonds, asset-backed securities, bank loans, government mortgage backed securities, non-government backed collateralized mortgage obligations and municipal obligations, which are generally valued using pricing models that use verifiable, observable market data such as interest rates, benchmark yield, and bids provided by brokers or dealers, or quoted prices of securities with similar characteristics.

Short-term investments: Short-term investments are primarily comprised of short-term money market funds, which invest primarily in short-term, high quality money market securities such as government obligations, commercial paper, time deposits and certificates of deposit which are valued at cost, which approximate fair value, or valued at quoted market prices of identical instruments.

Partnerships/joint ventures: Limited partnership funds include buy-out (developing companies), mezzanine (funds providing mezzanine loans to companies), venture capital (start-up companies), distressed asset (distressed companies undergoing bankruptcies, etc.), commodities (businesses in commodity related sectors), real estate (residential, commercial, and industrial real estate), international equity and venture capital, and are typically limited partnership investment structures and/or joint ventures. Limited partnership valuations are based on the valuation of the underlying investments, which include inputs such as cost, operating results, discounted future cash flows and market-based comparable data. Net asset value (NAV) is used as a practical expedient to estimate fair value.

Hedge funds: Hedge funds include equity long/short, event driven, multi-strategy, real estate and fund of funds, and are typically limited partnership investment structures. Limited partnership interests in hedge funds are primarily valued using a market approach based on net asset value (NAV) calculated by the funds and are not publicly available. NAV is used as a practical expedient to estimate fair value.

Common collective trusts: Common collective trusts (CCTs) are valued at NAV and are arrangements in which the funds of individual trusts are pooled to avail themselves of professional investment management and achieve greater diversification of investment, stability of income, or other investment objectives. CCTs are reported at NAV, as of the measurement date. NAV is used as a practical expedient to estimate fair value.

Investments at fair value	\$ 8,116,067	\$ 8,365,510

Changes in Fair Value of Level 3 Assets

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another.

We evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits.

During 2024, several commercial mortgage loans were transferred from Level 3 to Level 2. This reclassification was based on an evaluation of the pricing inputs, which concluded that the effect of unobservable inputs on the pricing determination was not significant.

- (a) Limited partnership interests in private equity funds are not redeemable from the general partner. Private equity interests can be sold through a secondary sale to a third party. Distributions are generally received through the liquidation of the underlying assets of the funds. Other partnerships include distressed asset investments, venture capital funds, mezzanine funds. These partnerships (except for commodities, real estate, and international equity) are expected to be liquidated in approximately the next three to ten years. Redemption frequency for international equity are monthly and redemption notice period is 30 days. There is no redemption frequency or redemption notice period for all other partnerships and joint ventures.
- (b) Fund of funds hedges invest in a variety of investments, mainly other hedge funds, of different styles with the goal of generating diversified returns in all types of market environments. Real estate hedge funds commonly invest in real estate investment trusts. However, as the name states, they may also invest in real estate properties such as residential and commercial properties and land. Other hedge funds include multi-strategy and event driven funds. Multi-strategy funds have an objective to add value from mispriced securities. These funds have entered into full redemption requests and are expected to be liquidated over the next year. Event driven funds are single direct funds attempting to generate returns in all types of market environments with appropriate amounts of risk.
- (c) Redemption restrictions vary, within 30 to 91 days, by investment management agreement but are based on the initial investment date and take into account liquidity terms, notice periods, redemption schedules, withdrawal with or without penalties and lock-ups, if any. In certain cases, full redemption may be extended over a period of time.

Note 7. Risks and Uncertainties

The Plan, through the Master Trust, invests in various investment securities that are exposed to various risks such as interest rates, market and credit risks. Market values of investments may decline for a number of reasons, including changes in prevailing market and interest rates, increases in defaults and credit rating downgrades. Market risks include global events, which could impact the value of investment securities, such as a pandemic or international conflict. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that some changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are determined and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 8. Tax Status

The Plan obtained its latest determination letter on and dated March 6, 2018, in which the Internal Revenue Service (IRS) stated that the Plan and related trust, as then designed, were in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, Plan management believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

US GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Note 9. Related Party and Party-in-Interest Transactions

Certain Master Trust investments are shares of common collective trusts managed by Northern Trust Company, the Trustee for the Plan. Buck Global, LLC provides actuarial and related services for the Plan. As described in Note 2, the Plan paid certain expenses related to plan operations and investment activity to various services providers. These transactions are party-in-interest transactions under ERISA.

Note 10. Plan Merger and Transfer

This Plan merged into the L3Harris Technologies Consolidated Pension Plan effective as of December 31, 2024, with a transfer out of the Plan totaling \$42,343. The transfer is included in the statement of changes in net assets available for benefits as of December 31, 2024.

Note 11. Plan Amendment

Effective December 31, 2024, the Plan was amended to reflect the merger with the L3Harris Technologies Consolidated Pension Plan. Under this amendment, the terms of the Plan, as in effect immediately prior to the merger, shall continue to be in effect at and after the Plan Merger. The effect of this amendment is not reflected in the accumulated plan benefits discussed in Note 4 as of January 1, 2024.

L3Harris Pension Plan for Employees at Pacific Missile Range Facility

EIN/PN: 34-0276860 / 235

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Funding assumptions selection and rationale

Actuarial Standard of Practice No. 27 (“ASOP 27”) provides guidance to actuaries on economic assumptions for measuring pension obligations. Actuarial Standard of Practice No. 35 (“ASOP 35”) provides guidance to actuaries on demographic and other noneconomic assumptions for measuring pension obligations. Under these ASOPs, for each assumption that has a significant effect on the measurement and that the actuary has selected, the actuary should disclose the information and analysis used to support the actuary’s determination that, in the actuary’s professional judgement, it is reasonable for the purpose of the measurement. No information or analysis is needed for any assumption prescribed by law or regulation.

The interest rates and mortality assumption used for this measurement are prescribed by law.

The economic assumption that has a significant effect on the measurement and that the actuary has selected is the expected rate of return on plan assets. The expected asset return assumption was based on an analysis of long term expected returns for the asset classes in which the plan’s assets were invested as of the measurement date. The demographic and other non-economic assumptions that have a significant impact on the measurement of the Funding Target are retirement rates and the frequency of optional forms of payment. These assumptions are based on the plan sponsor’s anticipated experience and are reasonable given historic gain and loss experience of the plan. Actual experience is reviewed each year and compared to the assumption. Changes are then made, as appropriate, based on this review.

Use of Models

Actuarial Standard of Practice No. 56 (“ASOP 56”) provides guidance to actuaries when performing actuarial services that involve designing, developing, selecting, modifying, using, reviewing, or evaluating models. Gallagher used third-party software to perform the calculations that underlie the actuarial information contained in this report. The model in the third-party software calculated the actuarial information provided in this report using plan provisions, data, and assumptions as of a measurement date under rules applicable to the calculations. Gallagher has an extensive review process whereby the results of the calculations are checked using detailed sample output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other outputs are similarly reviewed in detail and at a high level for accuracy, reasonability, and consistency with prior results. Gallagher also reviews the model when software changes occur. The review is performed by experts who are familiar with applicable rules and the way the model generates its output.

Future actuarial measurements

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report.

Effective Interest Rate	4.43%	3.24%

* Used for minimum funding and benefit restriction purposes.

** Used for maximum tax-deduction, ERISA Section 4010 reporting, and low-default-risk obligation measure purposes.

The interest rates used for funding purposes are the Segment Rates with 4-month lookback, constrained in accordance with relevant legislation.

Mortality

Mortality tables mandated by applicable law and regulation as specified in IRS Regulation 1.430(h)(3)-1, as amended in the Federal Register on October 20, 2023, in TD 9983, 88 FR 72357, applied on a static basis, using the blended annuitant/non-annuitant table applicable to small plans.

Actuarial cost method

The Funding Target is the present value of accrued benefits based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including plan related expenses expected to be paid from plan assets during the year.

EIN/PN: 34-0276860 / 235

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods (continued)

Non-Prescribed Funding Assumptions and Methods

The following assumptions were selected by the plan's enrolled actuary. The asset valuation method was selected by the plan sponsor with the actuary's advice and is an acceptable method under the applicable provisions of the Internal Revenue Code and associated regulations.

Expenses

Expected plan related expenses equal to prior year plan related expenses, excluding the prior year PBGC premiums plus current year PBGC premium were added to the Target Normal Cost. This amount is equal to \$345,016.

Frequency of optional payment forms

70% of future retirees are assumed to take a life annuity. Those future retirees who are assumed not to take a life annuity are assumed to take a Joint and Survivor 50% or 75% Option with equal probability.

Marital percentage

85% of participants are assumed to be married at death. Husbands are assumed to be 3 years older than their wives.

Retirement rates

Terminated vested participants that were eligible for early retirement at the time of the facility shut down in 2021 are assumed to commence receiving benefits immediately. Other terminated vested participants are assumed to retire at age 65.

Disability rates

None assumed.

Withdrawal rates for active participants not eligible for retirement

None assumed.

Employee contribution

Interest rates used to accumulate employee contributions with interest:

Current Year:	5.25%
Prior Year:	4.62%

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods (continued)

Non-Prescribed Funding Assumptions and Methods (continued)

Asset valuation method

The Actuarial Value of Assets is market value as of the valuation date, including the discounted value of accrued contributions, reduced by 2/3 of the gain/(loss) for the immediately preceding plan year and reduced by 1/3 of the gain/(loss) for the plan year before that. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by current law and regulation to be not greater than the applicable third Segment Rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

	Actuary's Assumption	Third Segment Rate	Reflecting Limit
2024 Expected Return	7.50%	5.59%	5.59%
2023 Expected Return	7.50%	5.74%	5.74%
2022 Expected Return	7.50%	5.92%	5.92%

Summary of Changes from the January 1, 2023 Valuation

- The interest rate basis was updated to the current rates as specified in IRS Regulation 1.430(h)(2)-1. These rates are constrained in accordance with relevant legislation.
- The mortality assumption was updated according to the projection as specified in IRS Regulation 1.430(h)(3)-1, as amended in the Federal Register on October 20, 2023, in TD 9983, 88 FR 72357, applied on a static basis, using the blended annuitant/non-annuitant table applicable to small plans.
- Contribution projection interest rate used to accumulate employee contributions changed from 4.62% to 5.25%.
- The assumption changes listed above increased the Funding Target.

Schedule SB, Line 15 – Reconciliation of Differences Between Valuation Results and Amounts Used to Calculate AFTAP

The AFTAP shown in Line 15 of the 2024 Schedule SB is the value that appears on the actual 2024 AFTAP Certification dated September 30, 2024, according to the values shown below:

Funding Target	\$	42,799,453
Actuarial Value of Assets	\$	43,821,921
Adjusted Funding Target	\$	42,902,200
Adjusted Actuarial Value of Assets	\$	43,924,668
Prefunding Balance	\$	3,624,834
Annuity Purchase during 2022 and 2023 Plan Years for NHCE	\$	102,747

The 2024 AFTAP of 102.38% cannot be directly calculated from the funding target and value of plan assets shown on the Schedule SB because of the omission of the annuity purchase during 2022 and 2023 plan years for NHCE. Additionally, the final valuation results decreased the prefunding balance reported on line 13 by \$2,947,382 compared to the amount used to develop the AFTAP amount above.
