EIN/PN: 34-0276860 / 025

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Funding assumptions selection and rationale

Actuarial Standard of Practice No. 27 ("ASOP 27") provides guidance to actuaries on economic assumptions for measuring pension obligations. Actuarial Standard of Practice No. 35 ("ASOP 35") provides guidance to actuaries on demographic and other noneconomic assumptions for measuring pension obligations. Under these ASOPs, for each assumption that has a significant effect on the measurement and that the actuary has selected, the actuary should disclose the information and analysis used to support the actuary's determination that, in the actuary's professional judgement, it is reasonable for the purpose of the measurement. No information or analysis is needed for any assumption prescribed by law or regulation.

The interest rates and mortality assumption used for this measurement are prescribed by law.

The economic assumption that has a significant effect on the measurement and that the actuary has selected is the expected rate of return on plan assets. The expected asset return assumption was based on an analysis of long term expected returns for the asset classes in which the plan's assets were invested as of the measurement date. Demographic and other non-economic assumptions having a significant impact on the measurement of the Funding Target are retirement rates and the frequency of optional forms of payment. These assumptions were originally chosen by the predecessor enrolled actuary and are based on the plan sponsor's anticipated experience. Actual experience for prior year was reviewed and compared to the assumption. Changes are made, as appropriate, based on the review.

Use of Models

Actuarial Standard of Practice No. 56 ("ASOP 56") provides guidance to actuaries when performing actuarial services that involve designing, developing, selecting, modifying, using, reviewing, or evaluating models. Gallagher used third-party software to perform the calculations that underlie the actuarial information contained in this report. The model in the third-party software calculated the actuarial information provided in this report using plan provisions, data, and assumptions as of a measurement date under rules applicable to the calculations. Gallagher has an extensive review process whereby the results of the calculations are checked using detailed sample output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other outputs are similarly reviewed in detail and at a high level for accuracy, reasonability, and consistency with prior results. Gallagher also reviews the model when software changes occur. The review is performed by experts who are familiar with applicable rules and the way the model generates its output.

Future actuarial measurements

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report.

Actuarial cost method

The Funding Target is the present value of accrued benefits based on compensation and service to date. Schedule SB, Part V – Statement of Actuarial Assumptions/Methods (continued)

Non-Prescribed Funding Assumptions and Methods (continued)

Asset valuation method

The Actuarial Value of Assets is market value as of the valuation date, including the discounted value of accrued contributions, reduced by 2/3 of the gain/(loss) for the immediately preceding plan year and reduced by 1/3 of the gain/(loss) for the plan year before that. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by current law and regulation to be not greater than the applicable third Segment Rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

	Actuary's Assumption	Third Segment Rate	Reflecting Limit
2024 Expected Return	7.50%	5.59%	5.59%
2023 Expected Return	7.50%	5.74%	5.74%
2022 Expected Return	7.50%	5.92%	5.92%

Summary of Changes from the January 1, 2023 Valuation

- The interest rate basis was updated to the current rates as specified in IRS Regulation 1.430(h)(2)-1. These rates are constrained in accordance with relevant legislation.
- The mortality assumption was updated according to the projection as specified in IRS Regulation 1.430(h)(3)-1, as amended in the Federal Register on October 20, 2023, in TD 9983, 88 FR 72357, applied on a static basis, using the blended annuitant/non-annuitant table applicable to small plans.
