Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial assumptions for January 1, 2024 funding valuation**

Discount rate sponsor elections		
• Segment rates or full yield curve	Segment	
• Look-back months	0	
		<u>Stabilized</u>
		<u>Nonstabilized</u>
• First 5 years		4.75%
• Next 15 years		4.96%
• Over 20 years		5.59%
Mortality sponsor elections		
• All participants	Section 430(h)(3) prescribed generational annuitant and nonannuitant mortality tables for 2024 plan year funding valuations. These tables are based on the Pri-2012 mortality tables projected with the IRS-modified MP-2021 mortality improvement scale, in accordance with IRS regulation 1.430(h)(3)-1.	
Other economic assumptions		
• Salary increases	4.00% per year	
• Social Security wage base	Not applicable	
• Inflation	2.50% per year	
• Expected investment return	5.50% for 2022, and 2023, and 5.75% for 2024	
• Expenses	\$64,029 added to current year normal cost	

Rationale for significant economic assumptions

- Discount rates – Prescribed by IRS and based on the plan sponsor’s election.
- Salary increases – Reflects the plan sponsor’s expectation of short and long term base salary increases.
- Expected investment return – The expected rate of return on plan assets is based on a blend of the hypothetical past performance of the plan’s target asset mix, adjusted for current market conditions, and the median simulated investment return using capital market assumptions published in Mercer Investment Consulting’s Capital Market Outlook for the plan’s target asset mix.
- Expenses – Based on actual expenses from prior year.

Demographic assumptions		
• Withdrawal	See table of sample rates.	
• Disability incidence	50% of 1955 UAW Disability Table. See table of sample rates.	
• Retirement age	Age 65 or present age if greater	
• Benefit commencement age for		
– Future vested deferred	65	
– Current vested deferred	65	
• Spouse assumptions	<u>Male participants</u>	<u>Female participants</u>
– Percentage married	80%	80%

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

— Spouse age difference	4 years younger	4 years older

• Future disabilities	33%	67%	0%
• Future deaths	0%	0%	100%
• Current vested deferred	33%	67%	0%

Rationale for significant demographic assumptions

- Mortality— Prescribed by IRS and based on the plan sponsor’s election.
- Withdrawal – The withdrawal table is based on The Actuary’s Pension Handbook, table T-3 without GA51 mortality. Annual review of the experience has shown that this table produced a reasonable approximation of the rates of terminations experienced by the Plan in recent years.
- Disability incidence – Disability incidence is based on the United Auto Workers 1955 Incidence of Disability table, separate for males and females, which is reasonably appropriate to the Plan’s population. The rates reflect an adjustment factor of 50% to better approximate total and permanent disability.
- Retirement age – Recent retirements have occurred at approximately age 65 and participants have historically worked until or near age 65. Annual review of the experience has shown that this assumption continues to be reasonable.
- Benefit commencement age – Recent benefit commencements have occurred at approximately age 65. Annual review of the experience has shown that this assumption continues to be reasonable.
- Spouse assumptions – The spouse assumptions are reasonably representative of the Plan’s current population of retirees and spouses. Annual review of the experience has shown that this assumption continues to be reasonable.
- Form of payment – Participants assumed to elect a joint and survivor annuity are assumed to elect the 75% joint and survivor annuity option and all other participants are assumed to elect a single life annuity. Annual review of the experience has shown that these assumptions continue to be reasonable.

Actuarial methods for funding**Asset methods**

The asset valuation method is an average of the adjusted market value for each year during the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Minimum funding methods**

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides disability benefits that are only partially based on a participant's accrued benefit or years of service. This benefit is allocated to the funding target based on the accrued benefit on the valuation date plus a portion of the excess of the benefit over the accrued benefit multiplied by the ratio of the participant's service at the beginning of the plan year to their service at each decrement age. This benefit is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

 For termination after January 1, 1989:

Years of Service	Vesting Percent
Less than 5	0%
5	100%

If a participant completed at least 15 years of service prior to termination, he may elect to receive a reduced pension commencing on the first day of any month following age 55 in an amount equal to his deferred age 65 pension reduced by 1/180th for each of the first 60 months and 1/360th for each of the next 60 months by which the starting date precedes normal retirement date.

Disability

- **Eligibility**
 Total and permanent disability after completing five years of service and attaining age 30
- **Benefit**
 The benefit, commencing on the employee’s normal retirement date, is computed as for normal retirement considering pay at date of disability and service to normal retirement.

Pre-retirement death

- **Conversion factors** Conversion factors for optional forms of annuity payments are based on the UP-1984 Mortality Table and 8% interest.
 In cases where the age difference between the participant and beneficiary is less than or equal to 10 years, joint-and-survivor option factors are determined assuming that the beneficiary is the same age as the participant. See table of sample factors below for a 75% joint & survivor annuity:

<u>Age</u>	<u>Factor</u>
55	0.909
60	0.890
65	0.870

For all factors, see the plan document.

Miscellaneous

- **Maximum benefits** Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2024, the limit is \$275,000.

Benefits included or excluded

Unless noted below, all benefits provided by the plan, as amended and restated effective January 1, 2014 are included in this valuation.

- **Most recent plan amendments included:** The First Amendment, executed December 14, 2017 and effective January 1, 2018.
- **Plan amendments excluded:** None
- **Late retirement increases:**
 - *Active participants:* The plan provides late retirement benefits equal to the greater of: (1) the benefit calculated at late retirement, and (2) the actuarial equivalent of the accrued benefit at normal retirement. This valuation does not include those increases since the assumed retirement age is 65.
 - *Deferred vested participants:* The plan distributes benefits to all deferred vested participants upon attaining age 65.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Schedule SB, Part V — Summary of Plan Provisions

- **IRC Section 436 benefit restrictions:**

- *Unpredictable contingent event benefits:* None
- *Plan amendments:* See above.
- *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
- *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.

- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
