Assumptions prescribed by law

Mortality	<p>Before benefit payment period</p> <p>IRS Prescribed Mortality - Generational Non-annuitant, male and female.</p> <p>During benefit payment period</p> <p>IRS Prescribed Mortality - Generational Annuitant, male and female.</p>
-----------	---

Assumptions selected by actuary

Inflation	<p>2.25% increase per year.</p> <p>Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.</p>
Asset return	<p>5.50% for the current plan year.</p> <p>The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.</p>
Expected expense	<p>The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets. This is the best estimate available of upcoming year's expenses.</p>
Retirement	<p>Age 62 for all non-retired participants, except for those who terminate with a cash balance benefit who are assumed to receive their benefits immediately.</p> <p>This assumption is based on the results of recent experience analysis and anticipated future experience. Some participants retire early since the plan provides an early retirement subsidy beginning at age 62.</p>
Upcoming year salary increase	<p>The preceding year's salary is increased by 4.00% at each age. Note: not used for Plan accounting calculations.</p> <p>Expected salary increase is composed of salary inflation, a real wage growth and a merit increase. This reflects company salary increase philosophies along with more recent experience of the plan participants.</p>
Disability	<p>1987 Commissioner's Group Disability Table, six month elimination period, male and female.</p> <p>We rely on a publicly published table due to the limited size of the plan. The 1987 CGDT was recommended by the Society of Actuaries for pension valuation purposes.</p>
Marriage	<p>100% married; husbands are 3 years older than wives.</p> <p>This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.</p>

Withdrawal	<p>2003 Society of Actuaries Small Plan Age Table, multiplied by 0.40.</p> <p>We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries. A multiplier of 0.40 is applied to this table to reflect the results of the most recent experience analysis and anticipated future experience.</p>
Wage base increase	<p>3.40% per year.</p> <p>Our Wage Base increase assumption are based on inflation and the real wage differential forecast from Social Security Trustee Report. Based on average annual real wage growth forecast from the Social Security Trustee report and historical averages, our best estimate places this assumption at 3.50%.</p>
Form of benefit and basis	<p>100% of participants who are eligible for the cash balance benefit formula are assumed to elect a benefit paid as a lump sum at retirement, death, disability, or termination.</p> <p>100% participants not eligible for the cash balance formula (due to employment termination prior to 01/01/2009) are assumed to elect a lump sum at retirement or death.</p> <p>Current year lump sum basis as prescribed by plan; updated annually as part of plan experience. (2022: 4% interest pre-retirement and 0% interest post-retirement and 1983 Group Annuity Mortality blended 50% male and 50% female)</p> <p>Participants have a history of electing lump sums at any event and are paid according to plan provisions.</p> <p>All optional payments under the cash balance formula are the actuarial equivalent of the account balance.</p> <p>The basis to compare the traditional benefit to the account balance, where applicable, is the same as in this section.</p>
Cash balance interest crediting rate	<p><i>3.50% compounded annually</i></p> <p><i>This rate is a long-term estimate of the 30-year Treasury Rate used to credit interest according to the plan provisions.</i></p>

Methods prescribed by law

Liability measure

Funding target is the present value of the benefits accrued on the valuation date.

Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

Benefit accrual

All benefits paid at decrement are considered in total and then split to determine how much is included in funding target. The following pieces are included in the funding target.

The portion based on the plan's definition of accrued benefit.

The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement.

The benefits included in target normal cost are calculated similarly, by splitting the benefits. The target normal cost is based on the difference between the amount included in Funding Target and an amount calculated assuming the participant accrues service through the end of the plan year.

Methods selected by plan sponsor

Asset method

The asset valuation method is prescribed by law for plans that elect to use a value other than market value.

For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.

The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.

When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.

Segment rates

24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.

PBGC premium basis

Variable rate premiums are calculated using census, market value of assets and the one-month average of corporate bond rates in effect on the valuation date. You elected this Standard interest method for the 01/01/2008 plan year and the method must be used for five years before a change can be made.

Segment 1 years 0-5	Segment 2 years 5-20	Segment 3 years 20+
5.01%	5.13%	5.15%

Methods elected by actuary

Retirees	Assets and liabilities for current and future retirees are included.
Vested benefits	<p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.</p>

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality	Based on Pri-2012 White collar base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2023).
-----------	---

Mortality base rates	<p>Before benefit payment period Employee amount-weighted, male and female</p> <p>During benefit payment period Retiree amount-weighted, male and female</p>
----------------------	--

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The White collar base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

Mortality improvement

Principal 2023 MI scale is based on MIM-2021-v4 application tool issued by SOA in October 2023 with the following parameters:

Parameter	Principal 2023
Historical dataset	SSA
Whittaker-Henderson Graduation	Order 3
Interpolation Structure	Basic
Graduated MI data last year ("jumping off" point)	2017
H/D transition ultimate year by age/cohort	2029/2029
Weight placed on interpolation by cohort	50%
Initial Slope periods (constraint)	2016-2017 (0.000)
LTR	SSA LTR 2023
COVID-19 or Excess load	None ¹

¹Based on the sponsor’s input, plan experience does not show a need for long-term excess death or Covid death load adjustments.

See [Mortality documentation](#) for rationale and additional information.

Interest rate used to value liabilities

5.50%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes’ arithmetic returns of the plan’s target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age
National Mining Association Retirement Plan
EIN 52-1916480 Plan No. 003

Active participants are expected to retire at the plan's assumed retirement age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

(1) Age	(2) Expected Active Headcount	(3) Retirement Rate	(4) Expected Retirements (2)*(3)	(5) Weighted Age (1)*(4)

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document. This report reflects the provisions of the plan signed 01/20/2016 (2016 plan document).

Plan eligibility

Service One hour of service with the employer.

Normal retirement benefit

Age The later of a participant's 65th birthday or the first day of the plan year in which a participant attains five years of plan participation.

Form Monthly annuity payable for life (optional forms may be elected prior to retirement).

Amount (accrued benefit) Accrued Benefit as of December 31, 2008: Past service benefit plus future service benefit.

Past Service Benefit: a) multiplied by b) multiplied by c)

- a) Accrued benefit as of June 30, 1995.
- b) Average compensation for the current year divided by average compensation as of June 30, 1995, but not less than 1.0.
- c) To protect the 100 month payment guarantee associated with benefits earned under the National Coal Association Retirement Plan, 1.049.

Future Service Benefit: The sum of d) through f)

- d) 1.5% of average compensation multiplied by credited service after June 30, 1995 with a maximum of 35 years.
- e) 0.45% of average compensation in excess of covered compensation multiplied by credited service after June 30, 1995, with a maximum of 35 years.
- f) 1.5% of average compensation multiplied by years of credited service above 35 years.

Credited service used to determine the accrued benefit as of June 30, 1995 counts towards the 35 year maximum reference above.

Accrued benefit on and after December 31, 2008: Cash balance account.

The sum of g) and h):

- g) A participant's opening balance, if any.
- h) A participant's pay credit and interest credit for each year beginning on and after January 1, 2009.

Minimum Accrued Benefit

- 1) Accrued benefit created by a member's contribution account.
- 2) Accrued benefit in effect as of June 14, 1995.
- 3) Accrued benefit in effect as of December 31, 2008 plus cash balance account earned on and after January 1, 2009 starting with a \$0 opening balance
- 4) For participants with at least 15 years of credit service as of December 31, 2008, 90% of the accrued benefit under the pre-2009 benefit formula.

Early retirement benefit

Age	Attained age 55 with 5 years of credited service.
Form	Same as normal retirement benefit.
Amount	Accrued benefit as of December 31, 2008 and the grandfathered 90% of pre-2009 formula benefit are reduced 1/3 of 1% for each full calendar month that precedes the month coincident with or next following a participant's 62 birthday.

Late retirement benefit

Form	Same as normal retirement benefit.
Amount	Greater of accrued benefit on normal retirement date actuarially increased to late retirement date, or accrued benefit on late retirement date.

Termination benefit

Vesting percentage	Prior to January 1, 2009: After 5 years of service or eligible for normal retirement, 100% On and after January 1, 2009: After 3 years of service or eligible for normal retirement, 100%.
Form	Same as normal retirement benefit with income deferred until normal retirement date.
Amount	Accrued benefit on date of termination multiplied by the vesting percentage.

Pre-Retirement Death Benefit

Eligibility	Participant fully vested in an accrued benefit.
Form	Monthly annuity payable to beneficiary (spouse if continuously married for one year) deferred to participant's Earliest Retirement Date if later than the date of death.
Amount	If death occurs, the amount paid to the beneficiary is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified 50% join and survivor annuity in effect, then died the next day. Alternatively, the beneficiary may elect to receive the cash balance account.

Disability benefit

Eligibility	Receiving disability benefits under the Social Security Act due to being totally and permanently disabled and Before 1/1/2009: 5 years of credited service On and after 1/1/2009: 3 years of credited service
Amount	Before 1/1/2009: Payable at normal retirement date, accrued benefit calculated assuming continued credited service and constant compensation from date of disability to normal retirement date. On and after 1/1/2009: Account balance on date of disability.

Definitions

Actuarial Equivalent	Interest at 7.5% compounded annually and the mortality table described in Revenue Ruling 95-6.
Average Compensation	The monthly average of total pay received for the highest 60 consecutive calendar months prior to event date. Unless eligible for the minimum accrued benefit #4, the average compensation is frozen as of December 31, 2008.
Covered Compensation	The monthly average of the Social Security taxable wage bases (in effect under Section 230 of the Social Security Act) for each year in the 35-year period ending with the year the employee attains Social Security retirement age.
Credited Service	Service with the employer from date of first hour of service until the first day a break in service begins.
Interest Credit	The 30-year Treasury Rate for November of the preceding the valuation date. Effective 1/1/2012, the minimum interest rate is 2.75%.
Member's Contribution Account	Member's contributions accumulated to date of determination with interest as stated in the plan. Contributions are no longer required after June 1, 1979 (or January 1, 1979 for participants under the American Mining Congress Employees' Retirement Plan).

Pay Credit

Pay credit is based on age nearest birthday as of the end of the plan each plan year and associated total compensation received.

Age as of December 31	Additional Annual Pay Credits Percentage of Compensation
Less than 30	3%
30-39	4%
40-44	5%
45-49	6%
50-54	7%
55 or older	8%

If a participant terminates employment during a plan year, the pay credit is determined as the end of the month coincident with or prior to termination date using compensation to that date.

Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

Significant Event

The enrolled actuary has not been made aware that any significant events have occurred during the year.

Schedule SB, Line 24 – Change in Actuarial Assumptions
National Mining Association Retirement Plan
EIN 52-1916480 Plan No. 003

Certain non-prescribed assumptions have been changed since last year. These assumptions were changed to better reflect the anticipated experience of your plan. See the attachment, Part V – Statement of Actuarial Assumptions/Methods, for the rationale for each assumption.

The cash balance interest rate was increased from 3.00% to 3.50% annually.
