PLAN YEAR ENDING: December 31, 2024

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Funding Method

Funding method as required by the Pension Protection Act of 2006. Under this method, the plan's funding target is determined as the sum of the actuarial present values (as of valuation date) of the individual accrued benefits taken into account for valuation purposes as of the beginning of the plan year.

The target normal cost is the sum of actuarial present values (on the valuation date) of the benefits deemed to accrue in the plan year.

An individual's accrued benefit for valuation purposes as of any determination date with respect to any assumed separation date(s) is the accrued benefit described under the plan, based on credited service as of the determination date, with plan compensation, benefits, and offset (if any), projected to the separation date.

The benefit deemed to accrue for an individual during a plan year is the excess of the accrued benefit for valuation purposes at the end of the plan year over the accrued benefit for valuation purposes at the beginning of the plan year.

If multiple separation dates are used, the actuarial present values take into account the probability of each separation event.

Changes Since the Prior Valuation

- There was a change in the enrolled actuary for the plan as well as the business organization providing actuarial services for the plan.
- There is a change in the actuarial method for the plan year that qualifies for automatic approval under Revenue Procedure 2017-56, Section 4.02 (“Approval for change in funding method due to change in valuation software”). The funding target, target normal cost (without regard to any adjustments for employee contributions and plan-related expenses) and actuarial value of assets, as determined by the new valuation software as of the valuation date for the prior plan year, are both within 2% of those values as determined by the prior valuation software, and approval under Section 4.02 was not used in the prior plan year. The other requirements of Section 4.02 are also satisfied.

Line 15, Reconciliation of differences between valuation results and amounts used to calculate AFTAP

The plan was terminated effective December 31, 2024. Because the plan's valuation date is not the first day of the plan year, the AFTAP that would be reported on Line 15 would be the AFTAP for the 2025 plan year. Since the plan was not subject to any 436 limitations at the time of termination of the plan or after, no AFTAP is provided.

PLAN YEAR ENDING: December 31, 2024

Schedule SB, Part V – Summary of Plan Provisions

Changes Since the Prior Valuation

- The definition of a Year of Participation was modified. Previously, a Year of Participation was a Plan Year in which a Participant completes 1,000 or more Hours of Service.
- The Plan was terminated effective December 31, 2024.

Schedule SB, line 25 – Change in Method

The following method changes occurred since the prior valuation:

- There was a change in the enrolled actuary for the plan as well as the business organization providing actuarial services for the plan.
- There is a change in the actuarial method for the plan year that qualifies for automatic approval under Revenue Procedure 2017-56, Section 4.02 (“Approval for change in funding method due to change in valuation software”). The funding target, target normal cost (without regard to any adjustments for employee contributions and plan-related expenses) and actuarial value of assets, as determined by the new valuation software as of the valuation date for the prior plan year, are both within 2% of those values as determined by the prior valuation software, and approval under Section 4.02 was not used in the prior plan year. The other requirements of Section 4.02 are also satisfied.
