Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

a The attached opinion of an independent qualified public accountant for this plan is (see instructions):

(1) Unmodified (2) Qualified (3) Disclaimer (4) Adverse

b Check the appropriate box(es) to indicate whether the IQPA performed an ERISA section 103(a)(3)(C) audit. Check both boxes (1) and (2) if the audit was performed pursuant to both 29 CFR 2520.103-8 and 29 CFR 2520.103-12(d). Check box (3) if pursuant to neither.

(1) DOL Regulation 2520.103-8 (2) DOL Regulation 2520.103-12(d) (3) neither DOL Regulation 2520.103-8 nor DOL Regulation 2520.103-12(d).

c Enter the name and EIN of the accountant (or accounting firm) below:

(1) Name: COHNREZNICK LLP

(2) EIN: 33-4144829

d The opinion of an independent qualified public accountant is **not attached** as part of Schedule H because:

(1) This form is filed for a CCT, PSA, DCG or MTIA. (2) It will be attached to the next Form 5500 pursuant to 29 CFR 2520.104-50.

Part IV Compliance Questions

4 CCTs and PSAs do not complete Part IV. MTIAs, 103-12 IEs, and GIAs do not complete lines 4a, 4e, 4f, 4g, 4h, 4k, 4m, 4n, or 5. 103-12 IEs also do not complete lines 4j and 4l. MTIAs also do not complete line 4l. DCGs do not complete lines 4e, 4f, 4k, 4l, and 5, and DCGs generally complete the rest of Part IV collectively for all plans in the DCG, except as otherwise provided (see instructions).

During the plan year:

| | Yes | No | Amount |
|--|-----|----|---------|
| a Was there a failure to transmit to the plan any participant contributions within the time period described in 29 CFR 2510.3-102? Continue to answer "Yes" for any prior year failures until fully corrected. (See instructions and DOL's Voluntary Fiduciary Correction Program.) | | X | |
| b Were any loans by the plan or fixed income obligations due the plan in default as of the close of the plan year or classified during the year as uncollectible? BASF Corporation Salaried Employees' Pension Plan

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of BASF Corporation Salaried Employees' Pension Plan (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 ("ERISA"), as permitted by ERISA Section 103(a)(3)(C) ("ERISA Section 103(a)(3)(C)"). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan ("investment information") by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA ("qualified institution").

Management has obtained certifications from a qualified institution as of December 31, 2024 and 2023, and for the years then ended, stating that the certified investment information, as described in Note 7 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section:

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America ("GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant

ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current Plan instrument, including all Plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the *Scope and Nature of the ERISA Section 103(a)(3)(C) Audit* section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a significant likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

(1) Description of the Plan

The following description of the BASF Corporation Salaried Employees' Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for a more complete description of the provisions of the Plan and detailed definitions of various Plan terms.

BASF Corporation (the Sponsor) administers the Plan through its Pension and Savings Plan Committee (the Plan Administrator) under the authority of the Pension and Benefits Committee of the Sponsor's Board of Directors. Effective as of August 31, 2017, the Plan has an agreement with J.P. Morgan Chase Bank, N.A. (the Trustee) whereby substantially all of the assets of the Plan are held in the BASF Corporation Master Trust (the Master Trust). The Master Trust was established by the Sponsor and is administered by the Trustee. The trust fund distributes the benefits to participants in accordance with the provisions of the Plan. The assets of the Plan are managed by the Trustee and several investment managers of the Sponsor.

a) General

The Plan is a defined benefit pension plan providing retirement benefits to the Sponsor's eligible salaried and nonbargaining unit hourly employees of BASF Americas Corporation (the Company), or any of its subsidiaries or affiliates which have adopted the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

The Plan became effective January 1, 1987, and has been amended since that time.

Effective January 1, 2007, the Company has changed the eligibility requirements for both the pension and retiree medical benefit plans. Management-represented employees hired after December 31, 2006, will not be eligible to participate in any of the existing pension or post-retirement medical plans. They will instead be eligible to participate in an enhanced defined contribution plan.

Effective January 1, 2010, the Company decided to curtail the Plan. Management-represented employees will instead be eligible to participate in an enhanced defined contribution plan. As a result, each active participant will not accrue any additional benefits under the Plan.

Effective June 30, 2011, accruals of all future benefits for active employees except for certain participants that were disabled on June 30, 2011, as defined by the Plan, were ceased for participants that formerly participated in the Cognis Corporation Retirement Plan (the Cognis Plan). No Cognis Plan employees shall become a participant in the Plan after June 30, 2011.

b) Sponsor Contributions

The Plan is noncontributory on behalf of the employees. The Company makes contributions to the Plan for certain salaried and nonbargaining unit hourly employees as are necessary on an actuarial basis to provide the Plan with assets sufficient to meet the benefits to be paid to Plan participants. The Company contributes such amounts as are necessary to meet or exceed the minimum funding requirements as prescribed by any applicable law. The Company contributed \$33,834 and \$40,100 for the Plan years ended December 31, 2024 and 2023, respectively. The Sponsor met or exceeded the minimum funding requirements of ERISA.

c) Distributions

Payment of retirement benefits to participants generally commences at age 65 or an earlier date for participants electing early retirement or terminating with vested rights to a Plan benefit. The benefit is based upon the participants' years of credited service and average compensation in the highest 36 consecutive calendar months during the last 120 calendar months of service.

The Plan provides the option for participants, beginning on January 1, 2000, to continue with the traditional version of the Plan or take part in a new cash balance arrangement within the Plan. Effective January 1, 2000, all participants starting employment after June 30, 1999, take part in the cash balance arrangement.

Participants retiring after December 31, 1999, have the choice of receiving their accrued benefit in the form of a lump-sum payment. Previously, retirees could receive benefits only as a monthly annuity. Each individual account is credited with an annual contribution based on the participant's age and years of vested service as of the last day of each month. Interest is credited to each participant's account, on a monthly basis, based on an average 30-year Treasury bond rate, as defined in the Plan document. These amendments were recognized in 1999 in the development of pension cost and in 2000 for funding purposes.

Participants who are also BASF Catalysts employees are subject to the following distribution terms: Participants who have completed five years of credited service are eligible for a benefit. The benefit is based on an employee's years of credited service, average monthly pay, and covered compensation. Normal retirement is at age 65. Early retirement is available at age 55 for participants whose age and credited service total is at least 65. Early retirement benefits are computed based on normal retirement benefits except that they are reduced as described in the Plan depending on the period of time that the early retirement date preceded the normal retirement date and if the participant was an employee prior to January 1, 2003.

The normal form of retirement benefit payment is a life annuity. However, if an employee is married on the date his/her benefit payments commence, his/her retirement benefit is paid in the form of a joint and survivor annuity – unless the member elects not to receive it in this form and has obtained the spouse's written consent. There are also several optional forms of retirement benefit payments, all of which are actuarial equivalents to life annuity. These optional forms of payment include lump-sum, level income option, 5, 10, 15, or 20 years period certain, 100%, 75%, 50%, and 25% contingency annuities and joint and survivor annuity with restoration options. Further details on these optional payment methods can be found in the Plan document.

Participants who are also BASF Construction Chemicals employees are subject to the following distribution terms: Under the Plan's cash balance formula, retirement benefits are equal to the sum of any operating cash balance account, cash balance credits for each pay period and interest credits. The Plan includes a grandfathered traditional formula for prior participants in the SKW Plan, as defined in the Plan. Grandfathered participants receive the higher of the benefit calculated under the Plan's traditional formula over the cash balance formula. The Plan permits early retirement at ages 55 through 64 provided that the participant has completed a certain amount of years of service as described in the Plan. Early retirement benefits under the traditional formula are computed as described above for normal retirement benefits except that they are reduced as described in the Plan depending on the period of time that the early retirement date preceded the normal retirement date.

The normal form of retirement benefit payment is a life annuity. However, if an employee is married on the date their benefit payments commence, their retirement benefit is paid in the form of a joint and survivor annuity – unless the member elects not to receive it in this form. Alternative forms of distribution may be elected, including a life annuity, 50%, 75%, 100% survivor options, 10-year period certain, and lump sum payment options.

Deferred retirement benefits under the traditional formula are computed as described above for normal retirement benefits except that they are reduced as described in the Plan depending on the period of time that the severance date preceded the participant's normal retirement or early retirement date. All benefit payments are limited by certain restrictions, as defined by the Plan. Participants may elect different payment options, as defined by the Plan.

Participants who were former Ciba Corporation employees are subject to the following distribution terms: Under the Plan's Pension Equity Plan (the PEP Plan) formula, which became effective January 1, 2001, the benefit is calculated as follows: for each year of a participant's pension service, the sum of Basic Credits based on age multiplied by the average compensation for the five consecutive years in which the employee has received the highest pay (average earnings) plus the sum of Excess Credits also based on age multiplied by the

**BASF CORPORATION SALARIED
EMPLOYEES' PENSION PLAN**

(Dollars in thousands)

average earnings. For grandfathered participants (eligible employees as of January 1, 2001), benefits accrue through December 31, 2006 under the pension formula in effect as of December 31, 2000. The greater of the PEP Plan lump sum and the actuarial equivalent of the grandfathered benefit shall be the participant's pension benefit. Under the PEP Plan, normal retirement benefits are based on the participant's credited years of service multiplied by the applicable benefit rate, less an adjustment for estimated Social Security benefits. The applicable benefit rate is a standard percentage multiplied by the average earnings.

Normal retirement age is the later of the participant's 65th birthday or the earlier date that the participant has completed five years of continuous service or the fifth anniversary of the participant's commencement of participation in the Plan. The normal form of retirement benefit payment is a life annuity. However, if an employee is married on the date their benefit payments commence, their retirement benefit is paid in the form of a joint and survivor annuity – unless the member elects not to receive it in this form and has obtained the spouse's written consent. There are also several optional forms of retirement benefit payments, all of which are actuarial equivalents to life annuity. These optional forms of payment include: 5, 10 or 15 years period certain, 100% and 50% contingency annuities, Social Security adjusted, lump sum, combination lump sum and annuity and survivor. Further details on these optional payment methods can be found in the Plan document.

Under the PEP Plan, if the participant's employment is terminated prior to normal retirement but after completing five years of continuous services, the participant will receive their accrued benefit commencing on their normal retirement date. If the participant elects to receive the benefit prior to their normal retirement, the benefit will be reduced to its actuarial equivalent for early commencement. Under the grandfathered pension plan, early retirement benefits are available to a participant who has completed five years of continuous services, attained age 50 and whose age and credited service total is at least 65. If the participant elects' benefits to commence on the early retirement date, benefits will be reduced by ¼% for each month prior to normal retirement date.

The Plan also provides permanent disability benefits and death benefits under certain circumstances.

Participants who were former Cognis Corporation employees are subject to the following distribution terms: Retirement benefits are equal to the participant's past service benefits plus their future service benefits, as defined by the Plan. Normal retirement is at age 65. Early retirement is available at age 55 for participants who have completed at least a five-year period of service. Early retirement benefits under the traditional formula are computed as described above for normal retirement benefits except that they are reduced as described in the Plan depending on the period of time that the early retirement date preceded age 62 for the past service benefits and age 65 for the future service benefits.

The normal form of retirement benefit payment is a single life annuity. However, if an employee is married on the date their benefit payments commence, their retirement benefit is paid in the form of a qualified joint and survivor annuity – unless the member elects not to receive it in this form. Alternative forms of distribution may be elected: 50%, 75%, 100% survivor options and 10-year period certain.

The Plan also provides for disability benefits and death benefits under certain circumstances.

Participants who are also Chemetall Corporation employees are subject to the following distribution terms: Participants with five or more years of service are entitled to annual pension benefits beginning at the normal retirement age of 65. The annual benefit is equal to approximately 1.067% of such Member's Average Compensation plus .533% of the Member's Covered Compensation, multiplied by the Credited service. Average Compensation is defined as the compensation of a member averaged over the five consecutive completed calendar years, which produces the highest average of the 10 prior completed calendar years. Covered Compensation is defined as the average of the Social Security Taxable Wages Base over the 35-year period ending with the calendar year in which the Participant attains his/her Social Security retirement age. Credited service is up to a maximum of 30 years.

Generally, payment of benefits will be in the form of straight life annuity for unmarried participants and a joint and survivor annuity for married participants, unless the employee, with spousal consent, elects another form of benefit permitted by the Plan. Other optional forms of pension benefit are available at the participant's option.

The Plan permits early retirement at age 55 if a participant completes 10 years of credited service. The employee may choose to receive a reduced benefit at early retirement. In addition, there are other provisions in the Plan that limit the benefits paid. Disability benefits are provided to the participants after completing two years of service to receive 100% of their accrued pension benefit to begin their normal retirement date.

Upon the death of an active or inactive participant after becoming a vested member but before the normal retirement date, a 50% survivor annuity shall be provided to the protected spouse commencing as of the earliest commencement date. If the participant is not survived by a protected spouse, there shall be no benefits payable under the Plan.

d) Vesting

Generally, benefits become vested after five years of service to the Sponsor.

(2) Summary of Significant Accounting Policies

a) Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with generally accepted accounting principles in the United States of America (GAAP).

b) Valuation of Investments

The Plan's investment in the Master Trust has been presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See "Note 6: Fair Value Measurements" for discussion of fair value measurement.

c) Security Transactions

Purchases and sales of securities are recorded on a trade date basis. Net investment income includes the Plan's gains and losses on investments bought and sold as well as held during the year.

d) Investment Income

Dividend income is recorded on the ex-dividend date; interest is recorded as earned on the accrual basis.

e) Use of Estimates

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

f) Payment of Benefits

Benefit payments to participants are recorded upon distribution.

**BASF CORPORATION SALARIED
EMPLOYEES' PENSION PLAN**

Notes to Financial Statements
December 31, 2024 and 2023
(Dollars in thousands)

g) Administrative Costs

All administrative expenses of the Master Trust, such as trustee, custodian and accounting services, are paid by the Master Trust and then allocated to the participating plans.

h) Risk and Uncertainties

The Plan utilizes various investment securities. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and those changes could materially affect the amounts reported in the financial statements.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

i) Subsequent Events

The Plan has evaluated events through October 1, 2025, the date the financial statements were available to be issued.

(3) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The accumulated plan benefits for active employees are based on the number of credited service years ending on the date the benefit information is presented (the valuation date).

Benefits payable under all circumstances (retirement, death, disability and termination of employment) are included to the extent they are deemed attributable to employee service rendered to the valuation date.

**BASF CORPORATION SALARIED
EMPLOYEES' PENSION PLAN**

Notes to Financial Statements
December 31, 2024 and 2023
(Dollars in thousands)

The significant actuarial assumptions used in determining the present value of accumulated plan benefits as of December 31, 2023 were as follows:

| | |
|------------------------|--|
| Discount rate | 6.30% |
| Mortality rate | Pri-2012 mortality table using scale MP-2021 |
| Average retirement age | 62 |

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of the accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2024. Had the valuations been performed as of December 31, there would be no material differences.

The actuarial present value of accumulated plan benefits, determined by Willis Towers Watson for 2023, is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, withdrawal, or retirement) between the valuation date and the expected date of payment.

The status of the estimated actuarially determined present value of the accumulated benefits under the Plan as of December 31, 2023 is:

| | |
|--|--|
| Vested benefits: | |
| Participants / beneficiaries currently receiving payments | \$ 1,250,128 |
| Other participants | <u>668,140</u> |
| | 1,918,268 |
| Nonvested benefits | |
| Total actuarial present value of accumulated plan benefits | \$ <u><u>5,115</u></u> <u>1,923,383</u> |

**BASF CORPORATION SALARIED
EMPLOYEES' PENSION PLAN**

Notes to Financial Statements
December 31, 2024 and 2023
(Dollars in thousands)

The changes in the actuarial present value of accumulated plan benefits for the year ended December 31, 2023 were:

| | | |
|--|----|------------------|
| Actuarial present value of accumulated plan benefits as of January 1, 2023 | \$ | 1,914,100 |
| Increase (decrease) attributable to: | | |
| Benefits accumulated | | 1 |
| Decrease in the discount period | | 128,830 |
| Benefits paid | | (202,640) |
| Assumption changes actuarial (gain)/losses | | 83,092 |
| Actuarial present value of accumulated plan benefits as of December 31, 2023 | \$ | <u>1,923,383</u> |

(4) Federal Income Tax Status

The Internal Revenue Service (the Service) has determined, and informed the Sponsor by a letter dated November 4, 2016, that the Plan and the related trust are designed in accordance with applicable sections of the Internal Revenue Code (the Code). The Plan has been amended since receiving the determination letter. The Plan Administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code. Accordingly, the Plan's financial statements do not include a provision for income taxes.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions and underwent an examination by the Service for the plan year ended December 31, 2019. The examination was completed earlier in 2024 with no concerns.

(5) Interest in the Master Trust

The Plan has an agreement with the Trustee whereby substantially all the assets of the Plan are held in the Master Trust. As of December 31, 2024 and 2023, the following benefit plans participated in the Master Trust:

BASF Corporation Consolidated Bargaining Unit Employees' Pension Plan
BASF Corporation Salaried Employees' Pension Plan

Each participating plan has its own separate account in the Master Trust as of December 31, 2024 but they had undivided interest in the Master Trust as of December 31, 2023. The value of the Plan's interest in the Master Trust is based on the beginning of the period value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses. Investment income and

BASF CORPORATION SALARIED EMPLOYEES' PENSION PLAN

Notes to Financial Statements

(Dollars in thousands)

administrative expenses relating to the Master Trust are allocated to the individual plans based upon average monthly balances invested by each plan. The Plan had a percentage interest in the Master Trust of approximately 82% and 81% as of December 31, 2024 and 2023, respectively.

(6) Fair Value Measurements

The Financial Accounting Standards Board (FASB) issued Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

- Level 1 Quoted prices (unadjusted) in active markets that are accessible at the measurement date for identical assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs.

- Level 2 Observable prices that are based on inputs not quoted in active markets but corroborated by market data.

- Level 3 Unobservable inputs are used when little or no market data is available which are significant to the fair value measurements. The fair value hierarchy gives the lowest priority to Level 3 inputs.

In determining fair value, the Master Trust utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible, as well as considering counterparty credit risk in its assessment of fair value.

The following is a description of the valuation methodologies used for assets at fair value. There have been no changes in the methodologies used on December 31, 2024 and 2023.

Corporate Stocks: Valued at the closing price reported on the active market in which the individual securities are traded.

Money Market: Valued at amortized cost, which approximates fair value.

U.S. Government Securities: Valued using pricing models maximizing the use of observable inputs for similar securities.

**BASF CORPORATION SALARIED
EMPLOYEES' PENSION PLAN**

Notes to Financial Statements
December 31, 2024 and 2023
(Dollars in thousands)

Corporate Debt Instruments: Corporate bond securities traded on national securities exchanges are valued at the last reported sales price on the last business day of the year. Securities traded in the over-the-counter market and listed securities for which no sales were reported on that date are valued at the last reported bid price.

Common/collective Trusts and 103-12 Investments: The Plan's interests in the common/collective trusts and 103-12 investments are valued at the Net Asset Value (NAV). The NAV, as provided by the Trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities.

Partnerships/Joint Ventures: The Plan's interest in partnerships/joint venture funds are valued at the NAV. The NAV, as provided by the investment advisor, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities.

Futures Contracts: Valued at the last sale price (or, if there is no sale on the valuation day, bid price) in the market where such contracts are principally traded.

Swap Agreements: Valued based on the present net value of all estimated future cash flows. Swaps may be valued in terms of bond prices or a portfolio of forwards contracts.

(Dollars in thousands)

Ares Global Multi-Asset Credit Fund - The fund is an open-ended limited partnership that invests in a variety of sub-investment grade (high yield) fixed income securities. Investments include among other things, high yield bonds, syndicated loans as well as debt and equity tranches of collateralized loan obligations. Although the nature of the underlying investments is generally tradable and therefore liquid, certain liquidity limitations exist. If these investments were held, it is estimated that the underlying assets of the fund would be liquidated within a couple of months.

Barings Emerging Markets - Barings' Emerging Market Debt Blended Total Return strategy is diversified and invests primarily in debt instruments of Sovereign, Quasi-Sovereign, and corporate issuers, which may be denominated in any currency. They seek maximum total return, consistent with the preservation of capital and prudent investment management, through high current income generation and, where appropriate, capital appreciation. The strategy is benchmark agnostic and designed to be dynamic in its ability to invest across emerging markets strategies in an unconstrained way.

Blackstone Global Multi-Asset Credit Fund - The fund is an open-ended limited partnership that invests in a variety of sub-investment grade (high yield) fixed income securities. Investments include among other things, high yield bonds, syndicated loans as well as debt and equity tranches of collateralized loan obligations. The majority of underlying investments are expected to be tradable and therefore liquid, but a minority will intentionally be invested in illiquid investments, like direct lending, real estate loans etc. If these investments were held, it is estimated that the underlying assets of the fund would be liquidated within a couple of years.

Cerberus Institutional Real Estate Partners III, L.P. - A real estate limited partnership that invests in commercial real estate. The strategy is to buy properties that need some "value add," such as increasing occupancy, making enhancements to reposition buildings, etc. This investment can never be redeemed. Instead, the nature of the investment is that distributions are received through the liquidation of the underlying assets of the fund. If these investments were held, it is estimated that the underlying assets of the fund would be liquidated within 6 years.

Cerberus Institutional Real Estate Partners V, L.P. - A real estate limited partnership that invests in commercial real estate. The strategy is to buy properties that need some "value add," such as increasing occupancy, making enhancements to reposition buildings, etc. This investment can never be redeemed. Instead, the nature of the investment is that distributions are received through the liquidation of the underlying assets of the fund. If these investments were held, it is estimated that the underlying assets of the fund would be liquidated within 6 years.

If these investments were held, it is estimated that the underlying assets of the fund would be liquidated within 1 year.

Hildene Opportunities Fund - The fund invests in collateralized debt obligations (CDOs) of Trust Preferred Securities (TruPS), a form of legacy bank capital common among US regional banks. The fund has quarterly liquidity subject to 12 months' notice.

Invictus Opportunity Fund II - The fund is structured as a limited partnership and invests in mortgage pools in which the underlying loans do not contain a guaranty by one of the Government Sponsored Enterprises (GSEs). This investment can never be redeemed. Instead, the nature of the investment is that distributions are received through the liquidation of the underlying assets of the fund. It is estimated that the underlying assets of the fund could be liquidated within 1 year.

KKR Global Credit - KKR's Global Credit Opportunities Fund provides investors access to a diversified portfolio of opportunistic and private credit investments. The fund primarily invests in high yield, bank loans and structured credit, often focusing on mispriced or stressed opportunities across public and private markets to generate attractive risk-adjusted returns and current income. KKR's investment strategy is based on: Fundamental credit analysis, capital preservation and active portfolio management.

Magnitude Institutional Shares - The fund is a fund of hedge funds. It invests in a diversified portfolio of different hedge funds. The fund has quarterly liquidity subject to a 12-month notice period and a 20% gating provision.

Oak Street Real Estate Capital Net Lease Property Fund, LP - The fund is a limited partnership that invests in real estate that is let out to tenants using triple net leases. (8) Party-in-Interest Transactions

Certain Plan investments are shares or units of funds managed by J.P. Morgan Chase Bank, N.A., the Plan's Trustee, as of December 31, 2024 and 2023. Transactions in these funds qualify as permitted party-in-interest transactions.

(9) Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed

by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

Plan-related expenses

Noninvestment expenses paid from the Trust are assumed to be 0.80% of the Fair Value of Assets

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

¹ Service and pay accruals are frozen.

Form of payment:

- BASF Corporation Either annuity or single lump sum based on age and type of benefit.

For death and termination benefits: 85% of participants in the cash balance plan are assumed to elect a lump sum payable upon the later of the attainment of age 59 and decrement and 15% are assumed to elect an annuity payable at age 59.

For terminated employees with deferred vested benefits: it is assumed that they will elect a form of payment consistent with the preceding but defer payment until age 65.

Participants in the traditional plan are assumed to commence benefits upon the later of decrement and attainment of age 63 with 40% electing a lump sum and 60% electing an annuity.

For retirement benefits and disabled benefits for employees over age 55, participants in the traditional plan are assumed to elect lump sums based on age at decrement as follows:

| <i>Age</i> | <i>Lump Sum</i> | <i>Annuity*</i> |
|------------|-----------------|-----------------|
| 55+ | 40% | 60% |

Valuation earnings Valuation earnings are not applicable as there are no benefit accruals after 2011 for any plan participants.

Methods

Valuation date First day of plan year

Funding target Present value of accrued benefits as required by regulations under IRC §430.

Target normal cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Decrement timing The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year,

to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements, the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets Actuarial value of assets is equal to the market value of assets on the valuation date (including any receivables).

Benefits not valued All benefits described in the summary of plan provisions were valued.

Sources of Data and Other Information

BASF and its third party administrator furnished participant census data as of January 1, 2024. Information on assets, contributions and plan provisions was supplied by BASF. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with BASF, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with BASF, assumptions were made for missing or apparently inconsistent data elements as described in the Data Action Plan provided on July 18, 2024.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

| | |
|---|--|
| Discount rate | The basis chosen was selected by BASF from among choices prescribed by law, all of which are based on observed market data over certain periods of time. |
| Cash Balance Interest crediting rate | It is only applicable for cash balance accounts and represents a best estimate of long-term yield on 30 year treasury bonds reflecting current and historical yields, historical variability and the expected impact of US monetary policy. |
| Lump sum conversion rate | No explicit assumption. As required by IRC§430, lump sum benefits are valued using “annuity substitution”, so that the valuation interest rates structure is used to value both annuities and lump sums. |
| Annuity conversion rate | As required by IRC§430, annuity benefits paid under cash balance formulas are valued by converting accounts to annuities using the current IRC§430 interest rates, adjusted as required to account for the fact that the plan’s annuity conversion rate is the average annual effective interest rate on 30-Year US Treasury securities for the third full calendar month preceding the month which contains the annuity starting date for such distribution, rather than IRC§417(e) rates. To reflect this adjustment, conversion of cash balances to annuity forms use a fixed assumption, consistent with a best estimate of long-term yield on 30-year US Treasury bonds reflecting current and historical yields, historical variability and the expected impact of US monetary policy. |
| Rates of increase in: | |
| Compensation | Not applicable. |
| National average wages (NAW) (e.g., Social Security wage bases) | Consistent with a modest premium for assumed real wage growth in excess of long term price inflation assumption. |
| Increases in statutory limits (CPI) | The assumed CPI is based on a combination of current conditions and future forecasts by economists. |
| Plan-related expenses | As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust). |

Source of Prescribed Methods

Funding methods The methods used for funding purposes as described in Statement of Actuarial Assumption/Methods, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by BASF from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.

The required mortality table used to calculate the funding target and target normal cost was as required by guidance issued by IRS under IRC §430.

The cash balance interest crediting rate was updated from 3.25% to 3.75% to reflect the continued rise in interest rates during 2023 while considering the long-term nature of the assumption, recent historical levels, and expected normative conditions.

The annuity conversion rate for cash balance accounts was updated from 3.25% to 3.75% to reflect the continued rise in interest rates during 2023 while considering the long-term nature of the assumption, recent historical levels, and expected normative conditions.

Change in methods since prior valuation There have been no change in methods since the prior valuation.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

There is no allocation after 40 years of Vesting Service. In addition, the cash balance is increased monthly with interest credits based on the cash balance account value at the end of the prior month using a monthly interest rate equal to the average 30-year Treasury rate during the month three months prior to the crediting month.

Participants who converted to the cash balance formula have an initial cash balance account value as of January 1, 2000 equal to the present value of the December 31, 1999 accrued benefit payable at age 65 calculated as of January 1, 2000 using the GATT interest rate for October 1999 and 1983 GAM unisex mortality.

As of January 1, 2010, BASF prospectively eliminated benefit accruals. There will be no credits to a participant's cash balance account based on the above table. The accounts will continue to earn interest credits as defined above.

² The monthly credit for participants hired after December 31, 2003 is capped at 9.00%.

Accrued Benefit

- Grandfathered The greater of (1) or (2) (as defined for Grandfathered and Non-Grandfathered employees) with a minimum of (3) for participants in the traditional plan, or (4) for participants in the cash balance plan.
 - (1) 1.50% of Final Average Earnings for each year of Credited Service less
 1.67% of Primary Social Security Benefit for each year of Credited Service, up to a maximum of 30 years.
 - (2) 1.25% of Final Average Earnings up to the social security wage base in the year of retirement for each year of Credited Service.
 Paragraph (2) shall not apply to employees of Fritzsche, Dodge & Olcott or the Clemson, South Carolina location of the Fibers Division.

As of January 1, 2010, BASF prospectively eliminated all benefit accruals after December 31, 2009.

- Non-Grandfathered (1) 1.20% of Final Average Earnings for each year of Credited Service less
 1.33% of Primary Social Security Benefit for each year of Credited Service, up to a maximum of 30 years.
 - (2) 1.00% of Final Average Earnings up to the social security wage base in the year of retirement for each year of Credited Service.
 Paragraph (2) shall not apply to employees of Fritzsche, Dodge & Olcott or the Clemson, South Carolina location of the Fibers Division.

In the event of termination prior to Normal Retirement Date, the accrued benefit will be calculated by multiplying (a) the greater of (1) or (2), assuming service continues until Normal Retirement Date, based on Final Average Earnings and social security at termination, by (b) the ratio, not to exceed 1.00, of Credited Service at termination divided by Credited Service at Normal Retirement Date.

- (1) Benefits accrued under prior plans. For all participants in the Badische Corporation Employees' Retirement Plan who attain age 50 and complete 10 years of service by 12/31/88, no benefit payable on retirement or death shall be smaller than the benefit that would be paid if the prior plan had continued unchanged and Final Average Earnings had been calculated at the earlier of 12/31/88 or that date of separation.
