Suderman & Young Towing Company Employees Retirement Plan
Attachment to 2024 Form 5500
Schedule SB, Part V - Summary of Actuarial Methods and Assumptions
EIN: 74-0927940 Plan Number: 001

Valuation Date January 1, 2024

Actuarial Cost Method

Funding Target Liability

The Funding Target Liability is determined using the Unit Credit Actuarial Cost Method. Under this method, an accrued benefit is determined for each individual based upon service and compensation / benefit components as of the beginning of the plan year; a present value of this amount is then determined based upon each individual's anticipated future date(s) of decrement (allowing for anticipated future eligibility for benefits).

Target Normal Cost

Target Normal Cost is determined as the increase in a participant's accrued benefit (inherent in the determination of the Target Liability) for an additional year of service earned during the plan year. Target Normal Cost also includes the assumed value of any administrative expenses payable from the plan trust for the plan year.

Actuarial Value of Assets Method

Fair value of assets, including the discounted value of any receivable contributions and excluding the accumulated value of any advance contributions.

Funding Shortfall

The excess of the Plan's Funding Target Liability over the Plan's Actuarial Value of Assets (reduced for any Carryover Balance / Prefunding Balance), if any.

Amortization of Funding Shortfall

The Plan's Funding Shortfall is amortized using a 15-year closed amortization method.

Under this method, the Plan's Funding Shortfall is determined each year and a new shortfall amortization charge is established (if applicable). The new shortfall amortization charge is determined as the amortization of the difference in the Funding Shortfall and the present value of all remaining shortfall amortizations. Once established, a shortfall amortization is maintained and amortized over a 15-year period (unless and until the Plan no longer has a Funding Shortfall).

A new shortfall amortization charge is not established for a plan year if the Funding Shortfall (determined without reduction for any Carryover Balance) is less than zero.

Excess Assets

The excess of the Plan's Actuarial Value of Assets (reduced for any Carryover Balance / Prefunding Balance) over the Plan's Funding Target Liability, if any.
