Actuarial cost method

Funding target and target normal cost

An actuarial cost method allocates the expected cost of a pension plan on a year-by-year basis. The primary objective is to accumulate enough assets prior to each participant's retirement to provide the promised pension benefits.

The Pension Protection Act of 2006 (PPA) requires plan sponsors to use the Traditional Unit Credit actuarial cost method in which the estimated accrued benefit is based on service and, if applicable, earnings as of the valuation date. The funding target is equal to the actuarial present value of all accrued benefits as of the valuation date. The target normal cost is the actuarial present value, as of the valuation date, of the expected increases in projected accrued benefits attributable to service expected to be completed during the plan year (i.e., if applicable, one year's salary growth is reflected in the determination of target normal cost).

For tax deduction purposes, the funding target may reflect the value of future pay increases on accrued benefits, if applicable.

PPA discounting method

The plan sponsor must choose between full yield curve spot rates or a segmented yield curve of 24-month average corporate bond rates. If the segmented yield curve is selected, the plan sponsor can use either the rates as of the month of the valuation or as of a lookback month, up to 4 months prior to the valuation date. If the full yield curve is selected, the rates as of the month of valuation must be used.

For purposes of this valuation, the following discounting method was used and is assumed to be approved by the plan sponsor:

Segment rates through the month of December preceding the valuation date, adjusted so each segment rate is no less than the applicable minimum percentage* of the corresponding 25-year average segment rate for the calendar year that contains the first day of the plan year and no more than the applicable maximum percentage of that 25-year average segment rate. The 25-year average cannot be less than 5.0% prior to application of the corridor.**

Asset valuation method

Plan assets for purposes of this actuarial valuation are valued under the Asset Averaging method, including, if applicable, discounted receivable contributions. The value is equal to the average of the fair market value of assets on the valuation date and the adjusted fair market value (including expected earnings) for the two earlier annual determination dates. Expected earnings are calculated using a rate no greater than the third segment rate of the segmented yield-curve in effect at the beginning of each valuation year. The resulting average value must fall between 90 and 110 percent of the fair market value of assets on the valuation date.

* Minimum is 95% through 2030, decreasing 5% per year beginning in 2031 until 70% is reached in 2035

** Maximum is 105% through 2030 and increasing 5% per year beginning in 2031 until 130% is reached in 2035

Rationale for significant assumptions

Economic assumptions

- **Expected return on plan assets:** The assumption was selected by the client with input from their investment advisor. We believe the assumption is reasonable as it falls within a reasonable range of expected returns for the plan's asset allocation based on capital market assumptions.
- **ASC 960 pre-retirement discount rate:** This assumption is based on the **expected return on plan assets** assumption.
- **ASC 960 post-retirement discount rate:** The lump sum conversion interest is based on the long-term expectation of lump sum rates based on yields on high quality corporate bonds. The lump sum conversion mortality is based on the IRS lump sum mortality table for the current plan year.
- **Salary increase:** This assumption is based on the plan sponsor's long-term expectation of salary increases. We believe that this is representative of anticipated future experience. In addition, based on discussions with the plan sponsor, significant changes in future salary growth or compensation practices are not expected.

Actuarial assumptions

Demographic Assumptions

- **ASC 960 mortality:** The mortality base table and projection scale is based on the most recent mortality table and improvement scale published by the Society of Actuaries (SOA) and in our judgement, adequately reflects expected mortality rates as of the measurement date. The SOA elected not to release a new mortality scale for 2023 which would have included mortality data affected by the COVID-19 pandemic, but instead will continue to study emerging mortality experience and assess what mortality improvement scale options might be considered to be implemented in the future. As such, we have decided not to reflect any adjustments to the most recent mortality improvement scale. The plan's relatively small size would not support a credible mortality study.
- **Termination:** We believe that this assumption is representative of anticipated future experience. Historically, this assumption has not produced significant gains or losses for the plan. In addition, based on discussions with the plan sponsor, significant changes in termination patterns are not expected.
- **Retirement:** We believe that this assumption is representative of anticipated future experience. Historically, this assumption has not produced significant gains or losses for the plan. In addition, based on discussions with the plan sponsor, significant changes in retirement patterns are not expected.

Miscellaneous assumptions

- **Expenses:** The assumption is based on the expectation of expenses to be paid out during the plan year.
- **Form of payment:** We believe that this assumption is representative of anticipated future experience. Historically, this assumption has not produced significant gains or losses for the plan.
- **Spouse's age and percent married:** The employer does not have enough credible data to analyze spousal demographics. These assumptions are based on the actuary's experience with similar plans.

PN: 003

Summary of plan provisions

The following is a summary of the principal plan provisions upon which this actuarial valuation is based. This summary should not be relied on to provide benefit estimates or other information to participants.

Effective Date of Plan	November 1, 1987.
Effective Date of Latest Amendment & Restatement	January 1, 2019.
Amendment for Name Change	March 1, 2020
Board Resolution	September 13, 2021 Board Meeting – The Board resolved to begin the Plan termination process
Fresh Start Date	March 31, 1993.
Eligibility	All employees except those covered under a collective bargaining agreement become Participants of this Plan after completion of one year of service, and attainment of age 21.
Compensation	Compensation includes all wages, salaries, fees and amounts received for personal service rendered in the course of employment. Compensation includes excludes contributions made to a salary reduction or deferred compensation plan. Prior to 2002, compensation for any plan year, for benefit purposes, is limited to \$150,000 adjusted for increases prescribed by the Secretary of the Treasury. For the 2002 plan year, EGTRRA increased prospectively the limit to \$200,000 annually. For prospective years after 2002, the \$200,000 limit will be indexed for inflation. For 2024, the compensation limit is \$345,000.
Final Average Earnings	The highest average monthly compensation for 36 consecutive months within the last consecutive 120 months of service but shall not include any compensation earned after December 31, 2001.
Social Security Average Monthly Wage	Monthly average of the Social Security Taxable Wage Bases for the 35 calendar years ending with the year the Participant attains Social Security Retirement Age.
Benefit Accrual Service	Years and months of employment after completing the eligibility requirements. Effective January 1, 2002, Benefit Accrual Service shall cease to accrue under this plan.
Vesting	Effective 1/1/2002, 100% immediately.

Summary of plan provisions

Retirement Dates

Normal The first of the month coincident with or next following the Participant's 65th birthday.

Early The first of the month on or after attainment of age 55 (but before age 65), on which the Participant elects to retire.

Deferred The first of any month following Normal Retirement Date on which the Participant elects to retire.

Frozen Accrued Benefit The Accrued Benefit as of the Fresh Start Date determined under the provisions of the Plan then in effect.

Benefit Formula The monthly Normal Retirement benefit is determined as follows:

The sum of (A) and (B):

(A) The Frozen Accrued Benefit multiplied by the ratio of Final Average Earnings as of the Normal Retirement Date to Final Average Earnings as of the Fresh Start Date;

(B) The sum of 1.5% of Final Average Earnings multiplied by Benefit Accrual Service completed after the Fresh Start Date, and 0.5% of Final Average Earnings in excess of the Social Security Average Monthly Wage multiplied by the lesser of: (1) Benefit Accrual Service completed after the Fresh Start Date; (2) 35 reduced by Benefit Accrual Service completed before the Fresh Start Date.

Accrued Benefit The Accrued Benefit is computed under the Benefit Formula above using Final Average Earnings and Social Security Average Monthly Wage at date of determination assuming the Participant continues to earn Benefit Accrual Service until his Normal Retirement Age or date of determination, if later, and adjusted as follows:

The portion of the retirement benefit based on Benefit Accrual Service after the Fresh Start date (item (B) in the Benefit Formula above) is multiplied by a fraction (not to exceed one) equal to Benefit Accrual Service after the Fresh Start Date, divided by projected Benefit Accrual Service after the Fresh Start Date to Normal Retirement Age.

Early Retirement Benefit The Accrued Benefit reduced by $\frac{1}{15}$ for each of the first 5 years and $\frac{1}{30}$ for each of the next 5 years by which the Early Retirement Date precedes the Normal Retirement Date.

Deferred Retirement Benefit The Accrued Benefit reflecting Final Average Earnings and Benefit Accrual Service to the Deferred Retirement Date.

Summary of plan provisions

Maximum Benefit	The annual benefit shall not exceed the lesser of (i) \$160,000 indexed after 2002 for inflation adjustments and (ii) 100% of the average compensation for the 3 consecutive years producing the highest average. For 2024, the dollar amount of \$275,000 is in the form of a non-refund life annuity. This amount is adjusted to reflect commencement before age 62 or after age 65 or for forms of payment other than a non-refund life annuity and Cost of Living Supplements, if any. It is prorated for less than 10 years of participation in the Plan.
Minimum Accrued Benefit	The Accrued Benefit computed under the provisions of the plan as of the latest amendment adoption date.
Normal Form of Payment	A non-refund monthly life annuity.
Automatic Form of Payment	For a married Participant, a monthly Joint and 66 2/3% Survivor with 120 months certain and continuous annuity actuarially equivalent to the monthly benefit in the normal form.
Optional Forms of Payment	The Plan provides other possible forms of annuity, all actuarially equivalent to the normal form of payment.
Lump Sum	<p>The Plan allows Participants to receive a single lump sum in lieu of a monthly annuity at retirement. The actuarial basis for determining the lump sum is different than for other optional forms.</p> <p>For the 2024 plan year, interest rate is 100% of monthly spot segment rates based on high quality corporate bonds in effect the second month prior to the quarter of benefit commencement. Mortality is the 2024 Unisex Mortality Table specified in IRS Notice 2023-73.</p>
Cost of Living Supplements	Under provisions of the plan prior to April 1, 1993, Cost of Living Supplements are applicable to benefits accrued through that date, subject to a maximum increase of 3% annually.
Death Benefit Before Retirement	If a partially or fully vested participant dies before retirement benefits have begun, the annual death benefit payable to the beneficiary is equal to 100% of the lump sum value of the retirement benefit that would have been payable to the participant had no death occurred.
Disability Annuity Credit	<p>Periods of disability while a participant receives a Social Security Disability Income are also counted as Benefit Accrual Service excluding the first six months of disability and ending on Normal or Early Retirement Date.</p> <p>The compensation rate in effect immediately prior to disability is assumed to continue while disabled. Such compensation rate shall not exceed 120% of the compensation rate in effect one year prior to disability.</p>
