Independent Auditors' Report

To the Participants and Plan Administrator of
Duquesne Light Company Defined Benefit Retirement Plan

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of the Duquesne Light Company Defined Benefit Retirement Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the statement of accumulated plan benefits as of December 31, 2023, and the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of and for the years ended December 31, 2024 and 2023, stating that the certified investment information, as described in Note 6 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities for the Audit of the Financial Statements section:

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for at least one year following the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter - Supplemental Schedules Required by ERISA

The supplemental schedules, Schedule H, Line 4(i) - Schedule of Assets (Held at End of Year), and Schedule H, Line 4(j) - Schedule of Reportable Transactions as of or for the year ended December 31, 2024, are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion:

- The form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.
- The information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Duquesne Light Company Defined Benefit Retirement Plan

Notes to Financial Statements

December 31, 2024 and 2023

1. Description of Plan

The following description of the Duquesne Light Company Defined Benefit Retirement Plan (the Plan) provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory cash balance defined benefit plan established effective January 1, 1936, as restated January 1, 2020, and covers all eligible employees of Duquesne Light Company (DLC), Duquesne Light Holdings, Inc. (Holdings) and any other related company whose Board of Directors had adopted the Plan (collectively, the Company). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plan is administered by DLC, who is the named fiduciary and the plan administrator.

Certain participants of the Plan are subject to a collective bargaining agreement between DLC and the International Brotherhood of Electrical Workers Local 29 (IBEW). In October 2023, members of the IBEW ratified a new three year labor contract extension that commenced on October 1, 2023 and expires on September 30, 2026.

The agreement incorporated amendments to the Plan that included annual rolling of the earnings window for the purpose of calculating pension benefits.

Funding Policy

The Plan's funding policy is for the Company to contribute an amount which will meet or exceed the annual ERISA minimum funding requirement. The minimum funding requirements of ERISA were met or exceeded in 2024.

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA.

Vesting and Pension Benefits

Employees become fully vested in their accrued benefit after three years of vesting service, at age 65, or upon death as an active employee, as defined by the Plan. If employees terminated before rendering three years of service, they forfeit the right to receive the portion of their accumulated plan benefits attributable to the Company's contributions. IBEW represented employees hired on or after October 1, 2010, and non-IBEW represented employees hired on or after June 1, 2007, are excluded from participating in the Plan. The Plan provides for regular retirement benefits upon reaching age 65 or upon disability, and has provisions for early retirement, survivor and other benefits, each of which reduces the regular benefit by an amount stated in the Plan. Annual benefits at retirement are primarily based on years of credited service and compensation during the applicable period, as described by the plan document. Any forfeiture of unvested accrued benefits is applied to reduce the Company contributions to the Plan. The Plan includes a supplemental benefit component for certain participants, as well as a cash balance feature which provides for credit contributions for certain participants as a component of the base plan benefit.

2. Summary of Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's Board of Directors determines the Plan's valuation policies utilizing information provided by the investment advisers, custodians and insurance company, as applicable. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Derivatives

Derivative instruments, or financial contracts whose value is based on, or derived from, a traditional security, an asset or a market index, are utilized by certain common collective trust fund investments (the Funds) held by the Plan as of December 31, 2024 and 2023. Though the plan administrator cannot control specific investment transactions entered into by the Funds, the Plan's ownership of the Funds' derivatives was proportionate to the ownership of the respective Funds. Derivative instruments are also used by certain of the Plan's portfolio investment managers as part of their permitted investment strategies. These derivative investments, which may be used to gain market exposure, enhance liquidity or add value to total investment returns, include futures and swap contracts, as well as other derivatives.

The derivatives are recorded at fair value by the Plan, based on independent or recognized pricing services. Changes in fair value are accounted for as net appreciation in fair value of investments included in the net investment income of the investments on the Statements of Changes in Net Assets Available for Benefits. These derivative instruments involve market, hedging, liquidity, operational or legal risks greater than those of traditional investments. However, the Funds and investment managers attempt to minimize these risks through established policies and procedures to monitor the exposure and limits on the type and value of contracts which may be held or written. The creditworthiness of potential counterparties is evaluated and counterparty limits are established. All futures activities are conducted through regulated exchanges. Generally, the Funds and investment managers attempt to limit aforementioned risk exposure to the extent of the value of the Funds. In the use of derivative instruments by the Funds and investment managers, the plan administrator has established practices and guidelines intended to ensure adherence to the Plan's overall investment strategy.

Duquesne Light Company Defined Benefit Retirement Plan

Notes to Financial Statements

December 31, 2024 and 2023

The Plan's derivative instruments consist of futures and interest rate swaps. Futures represent commitments to purchase or sell securities, money market instruments, or foreign currencies at a future date and at a specified price. Interest rate swaps involve the exchange of commitments to pay or receive interest (for example, an exchange of floating-rate payments for fixed-rate payments). The fair values of the derivative instruments were not significant as of December 31, 2024 and 2023.

Payment of Benefits

Benefits payments to participants are recorded upon distribution.

Administrative Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the Statements of Changes in Net Assets Available for Benefits. In addition, certain investment related expenses are included in net appreciation in fair value of investments in the Statements of Changes in Net Assets Available for Benefits.

Subsequent Events

Subsequent events were evaluated through October 7, 2025, the date the financial statements were available to be issued.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during each year of credited service. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances, such as retirement, death, disability and termination of employment, are included, to the extent they are attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Duquesne Light Company Defined Benefit Retirement Plan

Notes to Financial Statements

December 31, 2024 and 2023

The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2024. Had the valuation been performed as of December 31, there would be no material differences. The significant actuarial assumptions used in the valuation were:

Assumption	December 31, 2023
Discount rate	6.14%
Mortality	Pri-2012 Mortality Table with Scale MP-2021
Retirement age	65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The change in actuarial assumptions associated with interest rates and life expectancy resulted in a decrease to the actuarial present value of accumulated plan benefits of approximately \$26.3 million.

Other changes that decreased the actuarial present value of accumulated plan benefits represent the normal operation of the Plan and consist primarily of ongoing benefit payments and those items of plan experience that are not associated with plan asset performance.

4. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under authoritative guidance are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Duquesne Light Company Defined Benefit Retirement Plan

Notes to Financial Statements

December 31, 2024 and 2023

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observables and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2024 and 2023.

Cash and cash equivalents: Valued at the quoted net asset value (NAV) of shares held by the Plan at year-end.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily NAV and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Preferred stock: Valued at the closing price reported on the active market on which the individual securities are traded.

U.S. government securities: Valued using pricing models maximizing the use of observable inputs for similar securities.

Corporate debt instruments: Valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks or a broker quote if available.

Private equity investments: Considered alternative investments. The fair value of the investments in these investments have been estimated based on partner pricing, appraisals, or by investment managers with whom the portfolio resides. Because these investments are alternative investments and cannot be measured with observable inputs, they represent a Level 3 fair value hierarchy.

Investments measured at net asset value: Consisting of common/collective trusts, valued at the NAV of units of a bank collective trust. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Participant transactions (purchases and sales) may occur daily. Were the Plan to initiate a full redemption of the collective trust, the investment adviser reserves the right to temporarily delay withdrawal from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner.

Duquesne Light Company Defined Benefit Retirement Plan

Notes to Financial Statements

December 31, 2024 and 2023

Changes in Fair Value of Level 3 Assets

There have been no transfers between levels within the fair value hierarchy during 2024 or 2023.

There were no purchases, issuances or transfers in or out of Level 3 for the years ended December 31, 2024 and 2023.

The private equity investment category is composed of alternative investments in private equity, venture capital, and other assets. The objectives of the alternative investments of the Plan are to provide incremental or risk adjusted returns above those available in more traditional classes as well as to provide diversification benefits. Alternative investments in the form of partnerships make periodic calls for capital contributions which have generally amounted to between 50% and 100% of total capital commitments of the Plan's interests. Alternative investments are less liquid relative to public securities and cannot be redeemed through a withdrawal of any portion of capital contributions. Instead, the nature of the private equity investments is that distributions are received through the liquidation of the underlying assets of the fund. Distributions are made subject to the terms and conditions of their respective operating agreements and offering memoranda, as appropriate. The initial term of a private equity partnership is typically 10 years; however, the term may generally be extended with the consent of the partners. Other investments do not have scheduled exit dates due to their organizational requirements under applicable tax code or life cycle of underlying assets.

Due to the long-term nature of these investments, valuations as of December 31, 2024, and December 31, 2023, will not necessarily represent the amounts that could ultimately be realized from sales or other dispositions of investments, and the differences may be significant.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the end of the reporting period.

Quantitative Information About Significant Unobservable Inputs Used in Level 3 Fair Value Measurements

The following table presents the Plan's Level 3 financial instruments, the valuation techniques used to measure the fair value of those financial instruments as of December 31, 2024 and 2023, the significant unobservable inputs and the quantitative information about those inputs.

Fair Value of Investments That Calculate NAV

The following table summarizes investments measured at fair value based on NAV per share as of December 31, 2024 and 2023. There are no participant redemption restrictions for these investments; the redemption notice period is applicable only to the Plan.

December 31, 2024	Fair Value	Unfunded Commitments	Redemption Frequency (if Currently Eligible)	Redemption Notice Period
Common collective trusts	\$ 441,293,128	N/A	Daily	None

5. Concentrations

As of December 31, 2024 and 2023, the Plan had investments of \$315.0 million and \$329.7 million, respectively, that were concentrated in two diversified funds.

6. Information Certified by Trustee

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA for 2024 and 2023. Accordingly, The Bank of New York Mellon, the Trustee of the Plan, has certified to the completeness and accuracy of all investments reported in the accompanying Statements of Net Assets Available for Benefits as of December 31, 2024 and 2023, and the supplemental Schedule H, Line 4(i) - Schedule of Assets (Held at End of Year) as of December 31, 2024, and the related investment activity reported in the Statements of Changes in Net Assets Available for Benefits for the years ended December 31, 2024 and 2023, and the information reported in the supplemental Schedule H, Line 4(j) - Schedule of Reportable Transactions for the year ended December 31, 2024. Such information was obtained by management and agreed to or derived from information certified as complete and accurate by a qualified institution.

7. Related-Party and Party in Interest Transactions

The Plan's investments are administered under a contract with the Trustee of the Plan. Contributions are held and managed by the Trustee, who invests cash received, interest and dividend income and makes distributions to participants. These transactions are party in interest transactions under ERISA.

As described in Note 2, the Plan paid certain expenses related to plan operations and investment activity to various service providers. Additionally, certain administrative functions of the Plan are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan. These transactions are party in interest transactions under ERISA.

Fees incurred by the Plan for the investment management services are included in net appreciation in the fair value of the investment, as they are paid through revenue sharing, rather than a direct payment. The Trustee receives revenue from investment fund service providers for services the Trustee provides to the funds. This revenue is used to offset certain amounts owed to the Trustee for its administrative services to the Plan. If the revenue received by the Trustee from such investment fund service providers exceeds the amount owed for its services, the Trustee remits the excess to the Plan's trust on a quarterly basis. The Plan or plan sponsor may make a payment to the Trustee for administrative expenses not covered by revenue sharing.

8. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations.
3. All other vested benefits (that is, vested benefits not insured by the PBGC).
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

9. Tax Status

The Internal Revenue Services (IRS) has determined and informed the Company by a letter dated March 8, 2021, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed, and is currently being operated, in compliance with the applicable requirements of the IRC.

Plan management is required to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

10. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

SCHEDULE SB ATTACHMENTS

Schedule SB, Line 22 Description of Weighted Average Retirement Age as of January 1, 2024

The retirement assumption varies by age. The average retirement age was determined, as illustrated below, as a weighted average of the age at retirement, with weights equal to the number of a hypothetical 1,000 employee group assumed to retire at such age, according to the retirement assumption. The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation.

Age	Number of employees not yet retired	Percent assumed to retire	Number retiring	Product of age and number retiring
55	1,000	4.00%	40	2,200

Cash Balance Pension

An active employee employed on October 1, 1987 and is entitled to a pension from the result of retirement, death, disablement, or termination with a vested benefit will have an additional benefit equal to 5% of the employee's straight-time earnings between October 1, 1986 and September 30, 1987 increased with interest. Each active employee as of the deposit date will have a dollar amount added to their account as follows:

Deposit Date	Addition to Account
1/1/2006	\$2,000
1/1/2007	\$1,000
1/1/2008	\$500
1/1/2009	\$500

The benefit is payable in monthly instalments for life or in a lump sum.

Supplemental Pension

All employees not in a bargaining unit become eligible for a supplemental pension on the first day of the month coincident with or following the date of hire. The annual amount of a participant's supplemental pension shall be the sum of (1) and (2):

1. 1.0% of the participant's highest five-year average compensation, multiplied by the years of Credited Service.
2. 0.8% of the participant's highest five-year average compensation in excess of Social Security Covered Compensation, multiplied by the years of Credited Service (up to a maximum of 27 years).

Eligibility for Benefits

Normal retirement	Retirement on NRD
Early retirement	Retirement before NRD and on or after both attaining age 55 and completing three years of vesting service
Postponed retirement	Retirement after NRD
Deferred vested termination	Employees with three or more years of vesting service are entitled to either a normal or early retirement benefit based on service to date of termination

Preretirement death benefit Death while eligible for normal, early, postponed or deferred vested

Disability Participants must be eligible for benefits under employer's disability income plan

Benefits Paid Upon the Following Events

Normal retirement The annual amount of a participant's normal retirement pension shall be the greater of (1) and (2); plus (3); plus (4):

1. a. 1.4% of the participant's Annual Rate of Past Service Compensation, multiplied by the number of years of Credited Past Service, plus
 b. 1.4% of the participant's Future Service Compensation, less
 c. The annual amount of deferred normal life annuity, if any, purchased as to such employee under the Group Annuity Contract.
2. \$51 multiplied by the number of years of Credited Service (up to a maximum 20 years).
3. The excess of the Supplemental Pension, if any, over the greater of (1) and (2).
4. The Cash Balance Pension, if any.

Early retirement The annual amount of an early retirement pension shall be either (1) or (2) elected by the participant:

1. Upon attainment of age 60: The amount of the accrued pension benefit commencing at normal retirement date.
2. Prior to age 60: The amount of the accrued pension benefit reduced by 5/12% for each month (5% per year) the benefit commences prior to the age of 60.

Postponed retirement The annual amount of the late retirement pension payable to a participant shall be:

1. If a participant is employed at a rate of 40 or more hours per month, the amount determined is the normal retirement accrued pension calculated at the employee's late retirement date.
2. If a participant is employed at a rate less than 40 hours per month, the greater of (a) and (b):
 - a. The normal retirement accrued pension calculated at the employee's late retirement date; or

- b. The normal retirement accrued pension calculated at the employee's normal retirement date, adjusted so the amount payable to the participant after the late retirement date is the actuarial equivalent of the amount that would have been payable to the participant if the benefit payments commenced at normal retirement date.

Preretirement death

A preretirement 100% joint and survivor spouse option will automatically apply unless revoked in writing by both the employee and spouse. All active married employees are covered upon completion of three years of service or attainment of age 55, if earlier, and all married vested and retired employees who have not commenced receiving benefits. The benefit to the spouse under the automatic 100% preretirement spouse option commences at the later of the employee's death and the early retirement date, unless the employee had 25 or more years of service in which case benefits would commence immediately.

An active employee, upon one year's written notice, may elect an alternative preretirement option to take effect after age 55 or, if earlier, after 25 years of service. If the employee dies with the option in effect, benefits become payable as if the employee had retired on the date of death with no reduction of early retirement if the spouse is the joint pensioner or beneficiary. To elect such an option, a married employee must receive spousal consent.

Other Plan Provisions

Forms of payment

Single participant: Immediate straight life annuity.

Married participant: Immediate 50% joint-and-survivor annuity equal to the life annuity benefit reduced for joint-and-survivor coverage.

Lump sum pension benefit

Participants can elect to take their Cash Balance pension as a lump sum

Optional forms of payment

Life annuity, 50% to 100% joint-and-survivor annuity, or life annuity with ten years of payments certain. Effective October 1, 2003, any of the optional forms of payment can also include a pop-up survivor benefit.

Actuarial equivalence factors for annuities are tabular (for terminations beginning January 1, 1983) and not determined by reference to a specific interest rate and mortality table. Lump sums

are based on applicable interest rates and mortality pursuant to Code section 417(e).

For retirements after January 1, 2019, the joint and 50% survivor optional form factors are based on the greater of the above basis and the 417(e) basis.

Maximum limits on benefits and pay

All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Future Plan Changes

WTW is not aware of any future plan changes which are required to be reflected.

Plan Name	Duquesne Light Company Defined Benefit Retirement Plan
Valuation Date	January 1, 2024
Enrolled Actuary	Thomas A. DeFilippo
Enrollment Number	23-06419

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

SCHEDULE SB ATTACHMENTS

Schedule SB, Line 22 Description of Weighted Average Retirement Age as of January 1, 2024

The retirement assumption varies by age. The average retirement age was determined, as illustrated below, as a weighted average of the age at retirement, with weights equal to the number of a hypothetical 1,000 employee group assumed to retire at such age, according to the retirement assumption. The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation.

Age	Number of employees not yet retired	Percent assumed to retire	Number retiring	Product of age and number retiring

Segment rates

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP and the PBGC 4010 FS.

Demographic Assumptions

Inclusion date

The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees

It was assumed there will be no new or rehired employees.

Mortality

Separate rates for non-annuitants (based on Pri-2012 "Employees" table without collar or amount adjustments and then projected forward with generational projection using adjusted Scale MP-2021) and annuitants (based on Pri-2012 "Healthy Annuitants" table (participants and beneficiaries combined) without collar or amount adjustments, projected forward with generational projection using adjusted Scale MP-2021. The rate of future mortality improvement at any age for any year beginning on or after the valuation date is capped at 0.78%.

Methods

Valuation date	First day of plan year.
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings limited as described in IRS Notice 2009-22. The average asset value must be within 10% of market value, including

discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with Duquesne Light Company. WTW has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any significant benefits required to be valued that were not.

The plan pays small benefits in a single lump sum payment. Such lumps sums are not explicitly valued as such; rather such participants benefits are valued using the benefit choice assumptions described above.

Sources of Data and Other Information

The plan sponsor furnished participant data as of 1/1/2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Plan-related expenses

As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming

year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates were based on an experience study conducted in 2018, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Retirement	Retirement rates were based on an experience study conducted in 2018, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation	• The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430. • The mortality table used to calculate the funding target and target normal cost was updated, reflects the latest mortality improvement scale and was changed from using a static projection of mortality improvement to a generational projection as required by guidance issued by IRS under IRC §430.

Cash Balance Pension

An active employee employed on October 1, 1987 and is entitled to a pension from the result of retirement, death, disablement, or termination with a vested benefit will have an additional benefit equal to 5% of the employee's straight-time earnings between October 1, 1986 and September 30, 1987 increased with interest. Each active employee as of the deposit date will have a dollar amount added to their account as follows:

Deposit Date	Addition to Account
1/1/2006	\$2,000
1/1/2007	\$1,000
1/1/2008	\$500
1/1/2009	\$500

The benefit is payable in monthly instalments for life or in a lump sum.

Supplemental Pension

All employees not in a bargaining unit become eligible for a supplemental pension on the first day of the month coincident with or following the date of hire. The annual amount of a participant's supplemental pension shall be the sum of (1) and (2):

1. 1.0% of the participant's highest five-year average compensation, multiplied by the years of Credited Service.
2. 0.8% of the participant's highest five-year average compensation in excess of Social Security Covered Compensation, multiplied by the years of Credited Service (up to a maximum of 27 years).

Eligibility for Benefits

Normal retirement	Retirement on NRD
Early retirement	Retirement before NRD and on or after both attaining age 55 and completing three years of vesting service
Postponed retirement	Retirement after NRD
Deferred vested termination	Employees with three or more years of vesting service are entitled to either a normal or early retirement benefit based on service to date of termination

1. a. 1.4% of the participant's Annual Rate of Past Service Compensation, multiplied by the number of years of Credited Past Service, plus
- b. 1.4% of the participant's Future Service Compensation, less
- c. The annual amount of deferred normal life annuity, if any, purchased as to such employee under the Group Annuity Contract.
2. \$51 multiplied by the number of years of Credited Service (up to a maximum 20 years).
3. The excess of the Supplemental Pension, if any, over the greater of (1) and (2).
4. The Cash Balance Pension, if any.

Early retirement The annual amount of an early retirement pension shall be either (1) or (2) elected by the participant:

1. Upon attainment of age 60: The amount of the accrued pension benefit commencing at normal retirement date.
2. Prior to age 60: The amount of the accrued pension benefit reduced by 5/12% for each month (5% per year) the benefit commences prior to the age of 60.

Postponed retirement The annual amount of the late retirement pension payable to a participant shall be:

1. If a participant is employed at a rate of 40 or more hours per month, the amount determined is the normal retirement accrued pension calculated at the employee's late retirement date.
2. If a participant is employed at a rate less than 40 hours per month, the greater of (a) and (b):
 - a. The normal retirement accrued pension calculated at the employee's late retirement date; or

- b. The normal retirement accrued pension calculated at the employee's normal retirement date, adjusted so the amount payable to the participant after the late retirement date is the actuarial equivalent of the amount that would have been payable to the participant if the benefit payments commenced at normal retirement date.

Preretirement death

A preretirement 100% joint and survivor spouse option will automatically apply unless revoked in writing by both the employee and spouse. All active married employees are covered upon completion of three years of service or attainment of age 55, if earlier, and all married vested and retired employees who have not commenced receiving benefits. The benefit to the spouse under the automatic 100% preretirement spouse option commences at the later of the employee's death and the early retirement date, unless the employee had 25 or more years of service in which case benefits would commence immediately.

An active employee, upon one year's written notice, may elect an alternative preretirement option to take effect after age 55 or, if earlier, after 25 years of service. If the employee dies with the option in effect, benefits become payable as if the employee had retired on the date of death with no reduction of early retirement if the spouse is the joint pensioner or beneficiary. To elect such an option, a married employee must receive spousal consent.

Other Plan Provisions

Forms of payment

Single participant: Immediate straight life annuity.

Married participant: Immediate 50% joint-and-survivor annuity equal to the life annuity benefit reduced for joint-and-survivor coverage.

Lump sum pension benefit

Participants can elect to take their Cash Balance pension as a lump sum

Optional forms of payment

Life annuity, 50% to 100% joint-and-survivor annuity, or life annuity with ten years of payments certain. Effective October 1, 2003, any of the optional forms of payment can also include a pop-up survivor benefit.

Actuarial equivalence factors for annuities are tabular (for terminations beginning January 1, 1983) and not determined by reference to a specific interest rate and mortality table. Lump sums

Maximum limits on benefits and pay

All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Future Plan Changes

Plan Name	Duquesne Light Company Defined Benefit Retirement Plan
Valuation Date	January 1, 2024
Enrolled Actuary	Thomas A. DeFilippo
Enrollment Number	23-06419

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Segment rates

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP and the PBGC 4010 FS.

Demographic Assumptions

Inclusion date

The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees

It was assumed there will be no new or rehired employees.

Mortality

Separate rates for non-annuitants (based on Pri-2012 "Employees" table without collar or amount adjustments and then projected forward with generational projection using adjusted Scale MP-2021) and annuitants (based on Pri-2012 "Healthy Annuitants" table (participants and beneficiaries combined) without collar or amount adjustments, projected forward with generational projection using adjusted Scale MP-2021. The rate of future mortality improvement at any age for any year beginning on or after the valuation date is capped at 0.78%.

Spouse age	Wife three years younger than husband
Covered pay	2023 pensionable earnings rolled forward one year with the salary scale increase assumption.

Methods

Valuation date	First day of plan year.
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings limited as described in IRS Notice 2009-22. The average asset value must be within 10% of market value, including

discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with Duquesne Light Company. WTW has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any significant benefits required to be valued that were not.

The plan pays small benefits in a single lump sum payment. Such lumps sums are not explicitly valued as such; rather such participants benefits are valued using the benefit choice assumptions described above.

Sources of Data and Other Information

The plan sponsor furnished participant data as of 1/1/2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Plan-related expenses

As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming

year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates were based on an experience study conducted in 2018, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Retirement	Retirement rates were based on an experience study conducted in 2018, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation	• The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430. • The mortality table used to calculate the funding target and target normal cost was updated, reflects the latest mortality improvement scale and was changed from using a static projection of mortality improvement to a generational projection as required by guidance issued by IRS under IRC §430.
