Delta Information Systems, Inc. Employee Stock Ownership Plan
Horsham, Pennsylvania

Opinion

We have audited the financial statements of Delta Information Systems, Inc. Employee Stock Ownership Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statement of changes in net assets available for benefits for the year ended December 31, 2024, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of Delta Information Systems, Inc. Employee Stock Ownership Plan as of December 31, 2024 and 2023, and the changes in net assets available for benefits for the year ended December 31, 2024 in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits, significant audit findings, and certain internal control–related matters that we identified during the audits.

Supplemental Schedule Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of Schedule H, Line 4i – Schedule of Assets (Held at End of Year) as of December 31, 2024 is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedule, we evaluated whether the supplemental schedule, including its form and content, is presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedule is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Notes to Financial Statements

December 31, 2024 and 2023

(1) Description of Plan

The following brief description of the Delta Information Systems, Inc. (the Company) Employee Stock Ownership Plan (the Plan) is provided for general information purposes only. Participants should refer to the trust agreement for a complete description of the Plan's provisions.

General

The Company established the Plan effective January 1, 2000. The Plan is designed to comply with Section 4975(e)(7) and the regulations thereunder of the Internal Revenue Code (IRC) of 1986, as amended, and is subject to the applicable provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended. The Plan Trustees, appointed by the Company's Board of Directors, are responsible for oversight of the Plan.

Eligibility

All employees of the Company (except employees who are leased or for whom the terms of employment are determined by collective bargaining agreements) become eligible to participate in the Plan, retroactively to the first day of the plan year, upon completion of 1,000 hours of service and attaining age 21. Participants who do not have at least 1,000 hours of service during such plan year or are not employed on the last working day of a plan year are generally not eligible for an allocation of Company contributions for such year.

Payment of Benefits

Distribution of the participants' accounts due to death, disability or normal retirement will be made in five equal annual installments for those account balances exceeding \$100,000. Participant balances below \$100,000 at the date of distribution will be paid in a lump sum payment. Termination of employment for other reasons will result in lump sum distributions of balances under \$5,000. Participant account balances that exceed \$5,000 will begin distribution during the sixth plan year following the plan year in which the termination occurred in five equal annual installments.

Each participant who owns 5% or more of the Company shall begin receiving distributions of his or her account under the Plan, in accordance with the IRC, no later than April 1st of the year following the calendar year in which the participant attains age 70½, whether or not the participant is still employed by the Company. Each participant who does not own 5% or more of the Company shall begin receiving distributions of his or her account under the Plan, in accordance with the IRC, no later than April 1st of the year following the calendar year in which the participant attains age 70½.

(1) Description of Plan, Continued

Voting Rights

Each participant is entitled to exercise voting rights attributable to the shares allocated to his or her account with respect to certain matters and is notified by the trustee prior to the time that such rights are to be exercised. The trustee shall vote such allocated shares of Company stock as instructed by participants. Allocated shares for which no instruction is received shall be voted by the trustee at their discretion.

Plan Termination

Although it has not expressed any intent to do so, the Company reserves the right to terminate the Plan at any time, subject to plan provisions. Upon such termination of the Plan, the interest of each participant in the trust fund will be fully vested and will be distributed to such participant or his or her beneficiary at the time prescribed by the Plan and the IRC. Upon termination of the Plan, the trustee will pay all liabilities and expenses of the trust fund and sell shares of financed stock, if any, held in the loan suspense account to the extent it determines such sale to be necessary in order to repay the loan.

Participant Accounts

The Plan is a defined contribution plan under which a separate individual account is established for each participant. Each participant's account is credited with an allocation of plan earnings, the Company's contributions, and any forfeitures. Only those participants who are eligible employees of the Company as of the last day of the plan year will receive an allocation. Allocations of Company contributions and forfeitures are based on a participant's eligible compensation, relative to total eligible compensation, as defined. Plan earnings are allocated to each participant's account based on the ratio of the participant's beginning of the year account balance to the total Plan balance. The benefit to which a participant is entitled is the benefit that can be provided by the participant's vested account.

Put Option

Under federal income tax regulations, the employer stock that is held by the Plan and its participants and is not readily tradable on an established market, or is subject to trading limitations, includes a put option. The put option is a right to demand that the Company buy any shares of its stock distributed to participants for which there is no market. The put price is representative of the fair value of the stock. The Company can pay for the purchase with interest over a period of five years. The purpose of the put option is to ensure that the participant has the ability to ultimately obtain cash.

(1) Description of Plan, Continued

Vesting

Subject to certain provisions as fully described in the plan document, the portion of the participant's account that is vested (non-forfeitable) on any specified date, shall be determined on the basis of his or her years of service in accordance with the following schedule:

Years of Service	Percentage
Less than 2	0%
2	20%
3	40%
4	60%
5	80%
6 or more	100%

A participant's account shall also become 100% vested and non-forfeitable upon the participant's attainment of his or her normal retirement age while employed by the Company, or upon the participant's death or disability while employed by the Company.

Diversification

Diversification is offered to participants close to retirement so that they may have the opportunity to move part of the value of their investment in Company common stock into investments which are more diversified. Participants who are at least age 55 and with at least 10 years of participation in the Plan may elect to diversify a portion of their account. Diversification is offered over a six-year period commencing in the year the participant qualifies to diversify. In each of the first five years, a participant may diversify up to 25% of the number of shares allocated to their account, less any shares previously diversified. In the sixth year, the percentage changes to 50%. Participants who elect to diversify receive a cash distribution.

Forfeited Accounts

Plan forfeitures are allocated to each participant's account based upon the relation of the participant's compensation to total compensation for the plan year. Forfeitures of terminated nonvested account balances allocated to remaining participants included approximately 79 shares of common stock.

(2) Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts of assets, liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The common stock of the Company is stated at estimated fair value. Estimated fair value is determined by an annual independent appraisal. Other plan assets are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for a discussion of fair value measurements.

Interest income is recorded on the accrual basis. Purchases and sales of securities are recorded on a trade-date basis. Realized gains and losses from security transactions are reported on the average cost method. Net appreciation in fair value of plan assets includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Administrative Expenses

The Plan Trustees control and manage the operations of the Plan. Certain administrative expenses of maintaining the Plan are paid by the Company.

Payment of Benefits

Benefits are recorded when paid.

Subsequent Events

The Plan has evaluated subsequent events through October 13, 2025, the date the financial statements were available to be issued.

(3) Fair Value Measurements

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

(3) Fair Value Measurements, Continued

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2024 and 2023.

Delta Information Systems, Inc. common stock: The Company's stock is not actively traded, and significant other observable inputs are not available. Thus, the fair value of the common stock is determined by an annual independent appraisal. This appraisal is based upon a combination of the market and income valuation techniques consistent with prior years. The valuation process involves the selection of an appraiser approved by the Board of Directors. Plan management accumulates the data for the appraiser from financial information of the Company, including historical and projected cash flows and net income, return on assets, return on equity, market comparables, and estimated fair value of Company assets and liabilities. The appraiser prepares a report of estimated per share value that a participant will receive upon distribution. Plan management and the Board of Directors review and approve the appraisal report before it is finalized. As of December 31, 2024 and 2023, the stock was valued at \$1,128.85 and \$807.78 per share, respectively.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2024 and 2023:

Description	Investments at Fair Value as of December 31, 2024			
	Level 1	Level 2	Level 3	Total
Delta Information Systems, Inc. common stock	\$ -	\$ -	\$ 26,434,133	\$ 26,434,133
Total investments at fair value	\$ -	\$ -	\$ 26,434,133	\$ 26,434,133

Description	Assets at fair Value as of December 31, 2023			
	Level 1	Level 2	Level 3	Total
Delta Information Systems, Inc. common stock	\$ -	\$ -	\$ 18,915,678	\$ 18,915,678
Total investments at fair value	\$ -	\$ -	\$ 18,915,678	\$ 18,915,678

The unrealized gain on the Company common stock is included in the net appreciation in fair value of investments in the statement of changes in net assets available for benefits.

Notes to Financial Statements

December 31, 2024 and 2023

(4) Related Party Transactions and Party-In-Interest Transactions

The Plan invests in Company stock. This is a related party and party-in-interest transaction. As discussed in Note 2, the Company pays certain expenses related to the Plan's operations directly. Menke and Associates, Inc. (Menke) serves as the Plan recordkeeper. Transactions with Menke qualify as party-in-interest transactions, which are exempt from the prohibited transaction rules of ERISA. Certain administrative functions of the Plan are performed by officers or employees of the Company. No officer or employee receives compensation from the Plan.

(5) Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company that the Plan is qualified, and the trust established under the Plan is tax exempt, under the appropriate sections of the IRC. Although the Plan has been amended since receiving the opinion letter, the plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

(6) Risks and Uncertainties

The Plan's investment in Company common stock is exposed to various risks such as interest rate, market, and credit risks, as well as valuation assumptions based on earnings, cash flows and other such techniques. Due to the level of risk associated with this investment, it is at least reasonably possible that changes in the value of Company common stock will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.
