INDEPENDENT AUDITOR'S REPORT

To the Employee Benefit Plans Committee of The Boeing Company

Opinion

We have audited the financial statements of The Boeing Company Employee Retirement Plan, Boeing North American Retirement Plan, BSS Retirement Plan, BSS Retirement Plan for Bargained Employees, Employee Retirement Income Plan - Hourly East, Employee Retirement Income Plan - Hourly West, Non-Contributory Retirement Plan, and The Pension Value Plan for Employees of The Boeing Company (collectively, the "Plans"), employee benefit plans subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plans as of December 31, 2024 and 2023, and the changes in their net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plans and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about each Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining current plan instruments, including all plan amendments, administering the Plans, and determining that the Plans' transactions that are presented and disclosed in the financial statements are in conformity with the Plans' provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audits.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audits in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plans' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plans' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits, significant audit findings, and certain internal control-related matters that we identified during the audits.

THE BOEING COMPANY EMPLOYEE RETIREMENT PLANS

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023

1. DESCRIPTION OF THE PLANS

The following is a brief description of the following plans (collectively, the “Plans”), and provides only general information:

The Boeing Company Employee Retirement Plan (“BCERP”)
Boeing North American Retirement Plan (“BNA Plan”)
BSS Retirement Plan (“BSS Plan”)
BSS Retirement Plan for Bargained Employees (“BSSB Plan”)
Employee Retirement Income Plan – Hourly East (“Hourly East Plan”)
Employee Retirement Income Plan – Hourly West (“Hourly West Plan”)
Non-Contributory Retirement Plan (“NCRP”)
The Pension Value Plan for Employees of The Boeing Company (“PVP”)

Each of the Plans is sponsored by The Boeing Company (the “Company”). Eligible participants as defined by the Plans (“Participants”) should refer to the plan documents for a more complete description of the Plans’ provisions.

General —

BCERP:

The BCERP is a noncontributory defined benefit pension plan covering certain bargained employees of the Company. The BCERP is closed to various unions. These closure dates range from January 1, 2009 through December 31, 2016. Effective January 1, 1999, the assets and liabilities under the BCERP attributable to accrued benefits of active nonunion salaried Participants were transferred to the PVP. Benefit accruals under the BCERP were also frozen to various unions with freeze dates ranging from December 31, 2015 to December 31, 2018. For certain Participants who are members of the Society of Professional Engineering Employees in Aerospace, their benefit service was frozen effective December 31, 2018, however, their benefit accruals continue to grow based on pay increases.

BNA Plan:

The BNA Plan is a noncontributory defined benefit pension plan covering certain employees formerly of Boeing North American, Inc. (formerly Rockwell International Corporation), a subsidiary merged into the Company effective December 1996. The BNA Plan is made up of various sub-plans with varying plan provisions. Since 2000, the only sub-plan with active employees is the BNA Sub-Plan R02/Aerospace Hourly Plan (“R02 Sub Plan”). Effective January 1, 2009, the R02 Sub Plan was closed to new entrants and all benefit accruals in the R02 Sub Plan were frozen effective December 31, 2016.

BSS Plan:

The BSS Plan is a contributory defined benefit pension plan covering certain nonbargained employees formerly of Boeing Satellite Systems, Inc. (“BSS”), a subsidiary merged into the Company effective October 2000. The BSS Plan was closed to new entrants for the contributory benefit structure effective January 1, 1991. Noncontributory benefits of the BSS Plan were transferred to the PVP on April 1, 2003. All benefit accruals under the BSS Plan were frozen as of December 31, 2015.

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023

1. DESCRIPTION OF THE PLANS (CONTINUED)

BSSB Plan:

The BSSB Plan is a defined benefit pension plan with both contributory and noncontributory benefit structures covering certain bargained employees formerly of BSS. Eligible active employees are located in Southern California represented by Cabinet Makers, Millmen and Industrial Carpenters, Local No. 721 (formerly Electronic and Space Technicians Local No. 1553). The contributory portion of the BSSB Plan has been closed to new Participants since 1992. Effective January 1, 2012, the noncontributory portion of the BSSB Plan was closed to new entrants. Benefit accruals under the BSSB Plan were frozen effective December 31, 2018.

Hourly East Plan and Hourly West Plan:

The Hourly East Plan and Hourly West Plan are noncontributory defined benefit pension plans covering certain employees formerly of McDonnell Douglas Corporation (“MDC”), which merged with the Company effective August 1997. The Hourly East Plan and Hourly West Plan are closed to all unions. These closure dates range from January 1, 2012 through January 1, 2014 for the Hourly East Plan and January 1, 2010 through February 1, 2014 for the Hourly West Plan. All benefit accruals under the Hourly East Plan and Hourly West Plan were frozen by December 31, 2018.

NCRP:

The NCRP is a noncontributory defined benefit pension plan covering certain bargained employees of the Company, represented by United Automobile, Aerospace and Agricultural Implement Workers of America, Local 1069, in Ridley Park, Pennsylvania. Effective January 1, 2014, the NCRP was closed to new entrants. All benefit accruals under the NCRP were frozen effective December 31, 2016.

PVP:

The PVP is a noncontributory defined benefit pension plan covering certain nonunion salaried employees of the Company. Effective January 1, 2009, the PVP was closed to new entrants. Benefit accruals under the PVP were frozen, other than interest credits applied to Participants’ cash balance hypothetical accounts to the extent required by law, effective December 31, 2015.

The assets of the Plans, along with two other plans sponsored by the Company and not included in the accompanying financial statements, are held in The Boeing Company Employee Retirement Plans Master Trust (the “Master Trust”). J.P. Morgan Chase, N.A. (“J.P. Morgan”) serves as the trustee for the Master Trust. The Employee Benefit Plans Committee has the overall responsibility for the operation and administration of the Plans. The Plans are subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”).

The “Total (Memorandum Only)” columns in the accompanying Statements of Net Assets Available for Benefits and Statements of Changes in Net Assets Available for Benefits represent the total activity for the Plans and are provided for information purposes only.

THE BOEING COMPANY EMPLOYEE RETIREMENT PLANS

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023

1. DESCRIPTION OF THE PLANS (CONTINUED)

Employee Contributions — Prior to January 1, 2019, for the BSSB Plan, and prior to January 1, 2016, for the BSS Plan, a Participant's current rate of contribution was 3% of eligible compensation. Participants could suspend contributions, but they did not accrue benefit service for periods when they did not contribute; however, contribution suspension did not interrupt their continuous service or years of vesting service. If contributions were suspended, Participants had to wait 12 calendar months before they could begin to contribute again, provided they were still eligible. Participants are always vested in their own contributions to the respective BSS Plan and BSSB Plan. Effective January 1, 2016, employee contributions were no longer allowed under the BSS Plan as all benefit accruals under the BSS Plan were frozen on December 31, 2015. Effective January 1, 2019, employee contributions were no longer allowed under the BSSB Plan as all benefit accruals under the BSSB Plan were frozen on December 31, 2018.

Employer Contributions — The funding policy of the Company is to contribute an amount at least equal to the minimum required contribution under ERISA to each of the Plans. The Plans have met the minimum funding requirements of ERISA, and no cash contributions were required under ERISA for the years ended December 31, 2024 and 2023. Although no contributions were required under ERISA, the Company may make discretionary contributions to the Plans. No discretionary contributions were made for the years ended December 31, 2024 and 2023.

Pension Benefits — Generally, except as noted for the specific Plans below, Participants with five or more years of vesting service are entitled to benefits under the Plans. The Plans generally provide for normal retirement benefits upon reaching age 65 and have provisions for early retirement benefits. Benefits are payable in the form of a joint and survivor annuity, a single life annuity, or other payment forms, as specified in the applicable plan document. Monthly pension benefits beginning at normal retirement age are generally determined as follows:

Plan	Determination of Benefit Payment Amount
BCERP	The greater of (1) a final average monthly earnings formula, or (2) a rate, based on union affiliation, multiplied by each year of credited service
BNA Plan	For the BNA R02 Sub Plan (the only sub-plan with Participants who were actively accruing benefits prior to the Plan freeze), benefits are based on a rate multiplied by each year of benefit service. Other benefits vary per applicable sub-plan.
BSS Plan	The contributory benefit is funded by the Company, as well as employee contributions. The contributory benefit is the greatest of three formulas: 1) a career average formula, 2) a final average monthly compensation formula, and 3) a minimum benefit formula. <i>Cost of Living Adjustment ("COLA")</i> — Monthly benefits under the contributory benefit may be adjusted annually to reflect changes in the cost of living. The adjustment is made every January 1 and is based on the change in the Consumer Price Index ("CPI") relative to the year before; however, if the BSS Plan is terminated, no COLA will be provided except to Participants who are already receiving retirement payments. To be eligible for a COLA, Participants must have retired on their early, normal, or late retirement date.

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023

1. DESCRIPTION OF THE PLANS (CONTINUED)

BSSB Plan	Participants could accrue benefits in one of two benefit structures of the BSSB Plan (contributory and noncontributory); however, if they were accruing in the noncontributory structure, they may also have prior contributory accruals. The noncontributory benefit is funded solely by contributions made to the BSSB Plan by the Company, as defined by the plan document. Benefits are based on a formula, including final average monthly earnings, service, and covered compensation. The contributory benefit is funded by the Company, as well as employee contributions. The contributory benefit is the greatest of three formulas: 1) a career average formula, 2) a final average monthly compensation formula, and 3) a minimum benefit formula. <i>COLA</i> — Monthly benefits under the contributory benefit may be adjusted annually to reflect changes in the cost of living. The adjustment is made every January 1 and is based on the change in the CPI relative to the year before; however, if the BSSB Plan is terminated, no COLA will be provided except to Participants who are already receiving retirement payments. To be eligible for a COLA, Participants must have retired on their early, normal, or late retirement date and with a contributory benefit.
Hourly East Plan	A rate, based on union affiliation, multiplied by each year of benefit service while employed with a covered group
Hourly West Plan	A rate, based on union affiliation, multiplied by each year of benefit service while employed with a covered group
NCRP	A rate multiplied by each year of credited service

1. DESCRIPTION OF THE PLANS (CONTINUED)

PVP	Participants with three or more years of vesting service and Participants who are at least age 62 at termination with one or more years of service are entitled to benefits under the PVP. PVP features that are relevant to the benefit include, but are not limited to: • Participants in the PVP maintain a hypothetical separate account similar to a defined contribution plan, although the Company makes all contributions to the PVP. Participants are not permitted to make contributions. • Interest credits applied to Participants' hypothetical accounts are based on the yield of the 30-year U.S. Treasury bond (but not less than an interest credit minimum rate of 5% (5.25% prior to January 1, 2016) or greater than an interest credit maximum rate of 10%). The crediting rate was 5% as of December 31, 2024 and 2023. • Benefits relating to prior service and transferred to the PVP ("Heritage Benefits") were generally earned under the BCERP, BNA Plan, BSS Plan, and the former McDonnell Douglas Corporation — Salaried Plan ("MDC-Salaried"); Heritage Benefits increased in relation to growth in base pay but not for service earned after these benefits were transferred into the PVP. Monthly pension benefits beginning at normal retirement age (65) equal the greater of the combined benefits described in (1) plus (2) or the benefit described in (3) below: 1. The benefit credits, including a percentage of eligible pay based on the Participant's age for each year he or she works for the Company, plus interest credits divided by an annuity conversion factor of 11. This annual benefit is then divided by 12 to calculate a monthly benefit. 2. Heritage Benefits transferred to the PVP, plus growth due to increases in base pay after the transfer date. 3. A rate multiplied by each year of benefit service. Benefits for certain frozen plans have been merged into the PVP. Those benefits remain frozen and are payable based on the provisions of the specific related plans merged into the PVP.
-----	---

Death and Disability Benefits — Death benefits are payable from the Plans under certain circumstances. See plan documents for specific provisions.

There are no provisions for disability benefits from the BSS Plan and BSSB Plan. Since December 1, 2004, the PVP has not provided for disability benefits. Disability benefits for the other Plans are payable from the other Plans under certain circumstances. See plan documents for specific provisions.

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023

1. DESCRIPTION OF THE PLANS (CONTINUED)

Termination — Although it has not expressed any intention to do so, the Company has the right under each of the individual plans, in certain circumstances, to discontinue its contributions at any time and to terminate any of the Plans subject to the provisions set forth in ERISA. In the event a plan terminates, the net assets of the specific plan will be allocated for payment of plan benefits to Participants in an order of priority determined in accordance with ERISA and the applicable plan document.

Certain benefits under the Plans are insured by the PBGC if the Plans terminate. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions; however, the PBGC does not guarantee all types of benefits under the Plans, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plans are guaranteed at the level in effect on the date of the Plans' termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all Participants receive their benefits should a plan terminate at some future time will depend on the sufficiency, at that time, of the net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

Plan Amendments — For the Hourly West Plan, effective January 1, 2024, participants, spouses and designated domestic partners can elect a lump sum form of payment, as well as certain forms of annuity payments, including the 5-year period certain annuity, at any time after termination of employment, or if applicable, after the participant's death. This amendment had an increase of \$2,756,931 on the plan's actuarial PVAB as of December 31, 2023.

2. SUMMARY OF ACCOUNTING POLICIES

Basis of Accounting — The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

Present Value of Accumulated Plan Benefits — The actuarial present value of accumulated plan benefits ("PVAB") information in Note 3 is presented as of the beginning of the Plan year, as allowed by Accounting Standards Codification (ASC) 960, *Plan Accounting - Defined Benefit Pension Plans*.

Use of Estimates — The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial PVAB at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties — The Master Trust utilizes various investment instruments. Investment instruments, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Market risks include global events, such as a pandemic or international conflict, which could impact the value of investment securities. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term, and such changes could materially affect the values reported in the financial statements.

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023

2. SUMMARY OF ACCOUNTING POLICIES (CONTINUED)

Plan contributions are made and the actuarial PVAB is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term would be material to the financial statements.

Valuation of Investments — Investments in the Master Trust are stated at fair value. Fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. The Master Trust's investments stated at fair value are valued as follows:

- Corporate bonds, government bonds, mortgage-backed and asset-backed securities, and municipal bonds are primarily valued using a market approach using matrix pricing, which considers a security's relationship to other securities for which quoted prices in an active market may be available, or alternatively based on an income approach, which uses valuation techniques to convert future cash flows to a single present value amount. The valuation approach is designed to maximize the use of observable inputs, such as observable trade prices, multiple broker-dealer quotations, related yield curves, and other assumptions about the security (prepayment projections, cash flows, other security characteristics, etc.) and minimize unobservable inputs. The securities are valued as of the last trading day of the year.
- Common and preferred stock and certain other investments, including real-estate investment trusts, American depository receipts, global depository receipts, rights, and warrants traded in active markets on national and international exchanges are primarily valued using a market approach based on the closing market prices of identical instruments on the last trading day of the year.
- Mutual funds, which are registered investment companies, are valued using quoted market prices to represent the net asset value ("NAV") at year-end.
- Short-term investments include treasury bills, commercial paper and certificates of deposits with original maturities of up to one year. These investments are primarily valued using a market approach based on matrix pricing as referenced above. In the event that an instrument with an original maturity of less than three months does not have a market price, then those investments are valued at amortized cost, which approximates fair value.
- Other investments include physical commodities and over-the-counter ("OTC") derivatives, such as options and swap contracts. Physical commodities are valued on a market approach using spot prices for the specific commodity. OTC derivatives are valued based upon the expected amount that the Master Trust would receive or pay to exit the derivative at the reporting date. The valuation methodology uses the income approach and relies on inputs, including, but not limited to, benchmark yields, swap curves, cash flow analysis, ratings updates, and interdealer broker rates. Credit risk of the derivative counterparties is offset by collateralizing the expected amount that the Master Trust would receive or pay to terminate the derivative.

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023

2. SUMMARY OF ACCOUNTING POLICIES (CONTINUED)

- Investments in funds that do not have a readily determinable fair value and meet the criteria of investment companies are valued using the NAV, as the practical expedient. The NAV or its equivalent, such as member units or membership units in partners' capital to which a proportionate share of net assets is attributed, is based on the value of underlying investments. The NAV measurement may be adjusted to estimate net asset value per share for the investment in a manner consistent with measurement principles for investment companies. There were no adjustments in 2024 or 2023.
 - Investments in commingled funds, which include common/collective trusts/pooled funds ("CCTs") are valued based on the year-end unit values. Unit values are determined by the issuer, investment manager or third-party administrator by dividing the fair values of the total net assets at year-end by the outstanding units.
 - Investments in partnerships are recorded based upon year-end valuations at NAV, which represent the unit of account, and are determined by the general partner and reflected in the audited financial statements of the partnerships. Where necessary, adjustments may be made to general partner valuations to reflect fair value when such valuations are inconsistent with NAV practical expedient criteria.
 - Investments in hedge funds consist of direct hedge funds. Direct hedge fund NAV is based on valuation of the underlying holdings including other assets and liabilities of the fund.
- Forward and spot currency contracts are valued using a market value approach based on spot foreign currency rates if the contract tenor is two days or less and interpolated forward rates for any contracts with a tenor greater than two days. Forward and spot currency contracts are included in other receivables and other liabilities on the Master Trust's statements of net assets.
- To-be-announced securities ("TBAs") and treasury forwards, which have a delayed future settlement, are valued similarly to securities in active markets. The unrealized market appreciation or depreciation is included in other receivables and other liabilities on the Master Trust's statements of net assets.

Cash and Cash Equivalents — Cash and cash equivalents include cash and cash collateral. Cash includes cash collateral received from counterparties on derivatives. Cash collateral is related to the collateral posted on derivatives.

Investment Income — Net investment income or loss reflected in the statements of changes in net assets includes the Master Trust's net appreciation/depreciation in fair value of investments, interest income, and dividend income, less administrative expenses. The net appreciation/depreciation in fair value of investments includes both realized and unrealized gains and losses and is calculated as the difference between the fair value of the investments as of the beginning of the year or the purchase date in the current year and either the sales price or the end-of-year fair value. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

2. SUMMARY OF ACCOUNTING POLICIES (CONTINUED)

Valuation Oversight — Management of the Plan has implemented processes that are designed to ensure that fair value measurements used by the Master Trust are appropriate and reliable, that they are based on observable inputs wherever possible, and that the valuation approaches are consistently applied and the assumptions used are reasonable. The valuation framework has a set of processes that provides for oversight and validation of the fair value methodologies, as well as valuations.

The Board of Directors of the Company has delegated the fiduciary oversight of plan assets over various retirement plans held within the Master Trust structures to the Employee Benefit Investment Committee (“EBIC”). The EBIC has sub-delegated this responsibility to the Chief Investment Officer (“CIO”), who manages Trust Investments and chairs the Valuation Committee. Trust Investments is responsible for the oversight of the Master Trust assets including selection and monitoring of investment managers, asset strategies, and risk management. The Valuation Committee is responsible for the oversight of the valuation practices of the Master Trust and is composed of the Managing Directors of Trust Investments, including Risk Management and Trust Operations and each of the Investment teams, along with the Director of Actuarial Services and Enterprise Benefits Accounting. The Valuation Committee meets periodically with the purpose of fulfilling the following responsibilities and provides an annual review to the EBIC of its findings and actions:

- Review and approve annually the Trust Investment valuation practices, and review valuation practices used by third parties
- Review and approve the year-end valuations, including the methods used to develop and substantiate the unobservable inputs used in the fair value measurement
- Review analysis and benchmarks used by the Company and the Master Trust to assess the reasonableness of the year-end valuations and changes in fair value measurements from period to period
- Review and approve annual financial statement disclosures of the investments held in the Master Trust

Investments in funds are generally valued using the NAV or its equivalent. This includes partnerships, hedge funds, and other commingled investments. Valuations provided by the funds are reviewed at least quarterly. The fund’s audited financial statements are used in the Master Trust’s annual financial reporting process, where applicable. Assessments of reasonableness include regular asset manager meetings and review of quarterly reports, third-party reviews and reconciliations, which includes escalation to Trust Investments for exceptions, quarterly CIO investment reviews, and reviews of manager valuation policies. Valuation policies are reviewed when a new mandate is entered into with an asset manager, or as changes to policies are provided by managers.

Corporate bonds, government bonds, mortgage-backed and asset-backed securities, municipal bonds, common and preferred stocks, mutual funds and derivative instruments are generally valued using valuations obtained from pricing vendors. Pricing vendor valuation methodologies and custodian pricing controls and related documentation are assessed for reasonableness on an annual basis. The pricing vendor due diligence process includes reviews of pricing controls and procedures, as well as discussions in order to maintain a current understanding of the valuation processes and related assumptions and inputs that may be used by the vendors to price instruments. The custodian due diligence process includes reviews of pricing controls and procedures that are carried out on the Master Trust’s behalf. This includes various levels of tolerance checks on price changes, review of stale or unchanged prices, multiprice source

comparisons, and vendor price challenges. Additionally, on a monthly basis, the custodian reconciles its valuations to valuations obtained from each investment manager and any exceptions are reported to Trust Investments for resolution, which may include escalation to the Valuation Committee.

Securities Purchased with an Agreement to Resell — Resale agreements are treated as financing arrangements in receivables and are carried at contract amounts reflective of the amounts at which the securities will be subsequently resold, as specified in the respective agreements. Resale agreements are collateralized by high-quality, fixed-income securities. The Master Trust's policy is to take physical possession or control of the securities purchased under agreements to resell and is permitted by contract to sell or repledge. The Master Trust monitors the market value of the underlying securities as compared to the related receivable, including accrued interest, and requires additional collateral where deemed appropriate. At December 31, 2024, the fair value of the securities received as collateral for resale agreements of \$337,500,000 was \$343,543,211. At December 31, 2023, there were no securities purchased with an agreement to resell.

Benefits — Benefits are recorded when paid.

Administrative Expenses — Necessary and proper expenses of the Plans are paid from plan assets, at both the Plan and Master Trust levels, except for those expenses the Company is required by law or chooses to pay.

Subsequent Events — Subsequent events were evaluated through October 13, 2025, the date the financial statements were available to be issued.

3. PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments and lump sum distributions attributable under the Plans' provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated vested employees or their beneficiaries, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. The PVAB has been determined by an independent actuary and is the sum of accumulated benefits adjusted to reflect the probability of payment (by means of decrements, such as death, disability, termination, or retirement) and the time value of money (through discounts for interest) between the valuation date and the expected date of payment. The actuarial present value of accumulated plan benefits presented in the accompanying financial statements are presented using the beginning of year benefit information date. The actuarial present value of accumulated plan benefits below is measured as of December 31, 2023 (as a proxy for January 1, 2024). The significant actuarial assumptions used in the December 31, 2023 valuation, the latest valuation, were as follows:

Actuarial cost method: Unit Credit

Assumed rate of return: 6.00%

Mortality: RP-2006 tables without collar or amount adjustments, projected to 2015 with scale MP-2017, but adjusted based on a study of annuitant mortality experience during the 2013-2017 plan years. Rates are projected generationally from 2015 using an adjustment to the MP-2021 scales based on the Social Security Administration's intermediate estimate long-term rate of mortality improvement.

3. PRESENT VALUE OF ACCUMULATED PLAN BENEFITS (CONTINUED)

Average retirement age range: 60 – 65

Cash balance interest indexing rate (applicable to the PVP only): 5.00%

The foregoing actuarial assumptions are based on the presumption that the Plans will continue in operation. If a plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial PVAB.

Assumption changes for the year ended December 31, 2023 were made to the following plans:

- The interest rate and mortality assumptions used to convert annuities to lump sums for the BCERP, PVP, HW Plan, NCRP, and BNA Plan.
- The interest rate used to convert annuities to 5-year certain only for the HE Plan, BSS Plan, and BSSB Plan. Additionally, for the HE Plan, the mortality assumption used to convert annuities to 5-year certain only changed.
- The rates of retirement age assumption changed for the HW Plan and HE Plan. Additionally, for the HW Plan, the assumed form of payment assumption changed based on plan experience.
- The assumed benefit commencement age for terminated vested participants changed for the BNA Plan.
- The employee contribution interest crediting rate changed for the BSS Plan and BSSB Plan.

For the BSS Plan and BSSB Plan, as of December 31, 2023, the accumulated contributions of active employees, including interest credited on those contributions, amounted to approximately \$7,964,812 and \$1,470,569, respectively. As of December 31, 2023, the rate for which interest was credited on the contributions was 4.06%.

4. MASTER TRUST

The Master Trust facilitates the commingling of employee benefit plan assets for investment and administrative purposes. Assets are invested in accordance with the Master Trust's investment policy and are diversified among various asset classes. These assets are invested in individual investment accounts, separately held assets, and investments held in various types of funds, all of which are managed in accordance with established investment guidelines and are valued based on the fair value.

Each of the Plans have an undivided interest in the Master Trust. On a daily basis, the Plans may have contributions, withdrawals, asset transfers (in combination with a liability transfer), and/or expense charges. The trustee calculates a market value for each plan for each day of the month. At month-end, these "dollar days" are aggregated to determine a daily dollar-weighted-average market value for each participating plan in the Master Trust. This average is then used to allocate to each participating plan its share of realized gains/losses, unrealized appreciation/depreciation, income, and expenses in order to arrive at each plan's ending beneficial interest in the Master Trust. All expenses that are plan specific are recorded on that basis.

The Plans' ownership interest percentages in the Master Trust were as follows as of December 31, 2024 and 2023:

Plan	2024	2023
BCERP	34.0%	33.7%
BNA Plan	5.1%	5.1%

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

Accounting Standards Codification (“ASC”) 820, *Fair Value Measurement*, establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 for financial assets and financial liabilities are described below:

Level 1 — Values are based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical and unrestricted assets or liabilities. An active market is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 — Values are based on (a) quoted prices for similar assets or liabilities in active markets; (b) quoted prices for identical or similar assets or liabilities in markets that are not active; or (c) valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3 — Values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement.

Fair value is a market-based measure considered from the perspective of a market participant who owns an asset or owes a liability. Accordingly, when market observable data is not readily available, assumptions are set to reflect those that market participants would be presumed to use in pricing the asset or liability at the measurement date. Prices and inputs are used that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2, Level 1 to Level 3, or Level 2 to Level 3.

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

The following tables set forth by level within the fair value hierarchy a summary of the Master Trust investments by general types of assets and liabilities measured at fair value on a recurring basis as of December 31, 2024 and 2023. As required by ASC 820, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

*The amounts not leveled are related to investments using NAV as a practical expedient to estimate fair value, and non-investment assets and liabilities.

The amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Master Trust's statements of net assets.

Master Trust net assets at fair value classified within Level 3 primarily consisted of investments in corporate bonds, mortgage-backed and asset-backed securities and municipal bonds as of December 31, 2024 and 2023. Such amounts were 0.47% of net assets as of December 31, 2024 and 2023.

Transfers Between Levels — The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another.

During 2024, \$28,607,386 of mortgage-backed and asset-backed securities were reclassified from Level 2 to Level 3, as valuation used significant unobservable inputs. In addition, \$23,407,400 of mortgage-backed and asset-backed securities were reclassified from Level 3 to Level 2 as valuation used significant other observable inputs.

During 2023, \$19,923,842 of mortgage-backed and asset-backed securities were reclassified from Level 2 to Level 3, as valuation used significant unobservable inputs. In addition, \$37,605,743 of mortgage-backed and asset-backed securities and \$26,814,579 of municipal bonds were reclassified from Level 3 to Level 2 as valuation used significant other observable inputs.

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

Other Financial Instruments — The Master Trust and the Plans hold other assets and liabilities not measured at fair value on a recurring basis, including cash and cash equivalents, receivables and liabilities. The fair value of these assets and liabilities approximates the carrying amounts in the Master Trust's and the Plans' accompanying financial statements due to the short maturity of the instruments.

6. INVESTMENTS MEASURED AT NET ASSET VALUE

In accordance with ASC 820, the following is a summary of the Master Trust investments in which the NAV per share of the investment is used to estimate its fair value. The summaries below are categorized by general types of assets as disclosed in the Master Trust's statements of net assets. For each general type of assets utilizing the NAV, the fair value, redemption frequency, and redemption notice period as of December 31, 2024 and 2023 are disclosed.

Commingled Funds — This category includes investments in U.S. and non-U.S. securities held by a CCT, real estate and real asset investments via commingled funds and insurance company pooled separate accounts. Generally, redemptions may occur daily, monthly or quarterly depending upon the fund. For a majority of the funds, redemption notices may be given daily or up to five business days in advance, with redemption notices of up to 30 to 90 days in advance for certain funds. If the fund determines that it would be detrimental to the interests of remaining fund investors to pay wholly or in part with cash based on availability of cash for distributions, distributions may also include securities in kind. Additionally, for large withdrawals, the portfolio manager of the fund may require additional time (up to several weeks) to liquidate assets to satisfy the withdrawal requests. Under extraordinary circumstances, some of the funds may temporarily delay distributions or make distributions of securities in kind. For the CCTs with a quarterly redemption frequency, the notice period ranges from 30 to 90 days in advance of quarter-end. These funds are restricted to a redemption queue. A redemption queue is a restriction on withdrawals from a fund due to liquidity restrictions. The fund manager restricts the percentage of the fund that is available for redemption during each redemption period. All investors in the queue receive an equal portion of the available liquidity. The queue continues until all investor redemption requests are satisfied or the queue is lifted in its entirety.

Redemption Frequency	Redemption Notice Period	As of December 31, 2024		As of December 31, 2023

6. INVESTMENTS MEASURED AT NET ASSET VALUE (CONTINUED)

Partnerships — This category includes investments in private equities held by limited partnerships that may include buyout, venture, special situations, distressed debt, or fund-of-fund strategies. This category also includes investments in private real estate (such as office, retail, apartment, and industrial properties) and real assets (such as infrastructure, energy, farmland, and timber) made through limited partnerships. Generally, limited partnerships require investors to commit to contribute additional capital during an investment period and do not provide redemption rights. As such, the Master Trust may receive distributions from the proceeds as the underlying assets are sold or income is distributed. The Master Trust maintains an active portfolio of private equity and real estate/real asset limited partnership investments that are in various stages of investment. The current portfolio of investments is expected to liquidate over a period of up to ten years. For the limited partnerships that were in liquidation as of December 31, 2024, the timing of liquidation has not been communicated by the funds.

Hedge Funds — This category includes investments in direct hedge funds. Common hedge fund strategies include event-driven, relative value, long-short, and market neutral. Each hedge fund has its own redemption rights and distribution process specified in the fund prospectus. Redemption is generally allowed subject to liquidity and certain restrictions. These restrictions generally include fund-level gates and lockup periods. A “gate” provision allows a hedge fund manager to limit the amount of withdrawals on any withdrawal date to not more than a stated percentage of a fund’s net assets — often 10% to 25%, depending on how frequently investors have a right to withdraw capital. A “lock-up” provision restricts an investor’s ability to withdraw capital from a hedge fund for some stated period of time. It is common for hedge funds to lock-up an investor’s investments for one or two years. As of December 31, 2024, the lock-up restrictions had expired based on each individual fund’s contractual terms, except for one new fund in 2024 with a lockup provision expiring in June 2025. For the funds in liquidation, \$23,376,475 will be fully liquidated in September 2025. For the remaining funds in liquidation, the timing of liquidation has not been communicated by the funds.

7. DERIVATIVE FINANCIAL INSTRUMENTS

ASC 815, *Derivatives and Hedging*, requires disclosures on how and why derivatives are used, accounted for, and affect the results of operations and financial position. Derivative instruments held by the Master Trust are not designated as hedging instruments under ASC 815. The Master Trust investments are exposed to the following financial instrument risks:

Interest Rate Risk — Interest rate risk is the risk of change in the market value of the assets due to a change in interest rates. Bond futures, interest rate swaps, and interest rate swaptions are generally used to manage interest rate risk or adjust portfolio duration. A futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. Interest rate swap agreements involve the exchange by the Master Trust, with a counterparty, of respective commitments to pay or receive interest, e.g., an exchange of floating rate payments for fixed rate payments, with respect to the notional amount of principal. Interest rate swaptions are options to enter into an interest rate swap based on predetermined conditions.

Credit Risk — Credit risk is the risk of change in the market value of assets due to the change in creditworthiness of the underlying issuer. Credit default swaps are used to manage the credit exposure of a security or basket of securities. Credit default swap agreements involve one party (referred to as the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation, or index. Credit default options (also known as credit default swaptions) are options on credit default swaps. A credit default option gives its holder the right, but not the obligation, to buy (call) or sell (put) protection on a specified reference entity for a specified future time period for a certain spread.

Foreign Currency Risk — Currency risk is the risk of a change in market value due to the change in foreign currency exchange rates. Generally, currency futures and forward contracts are used to achieve the desired currency exposure or generate value-added performance. Foreign currency futures and forwards are agreements between two parties to buy and sell a set of currencies at a set exchange rate on a specified future date. A currency option gives the buyer the right, but not the obligation, to buy one currency or sell another currency at a set exchange rate on or before a given date.

Equity Risk — Equity risk is the risk of a change in market value of assets due to the change in equity or equity index prices. Equity futures, contracts for difference, and equity swaps are generally used to manage the market exposure of a security, or index, or rebalance the total portfolio to the target asset allocation. An equity futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. A contract for difference is an agreement between two parties in which the seller will pay to the buyer the difference between the current value of an asset and its value at contract time (if the difference is negative, then the buyer will pay the seller). Equity swaps generally exchange the return on a stock or stock index for the return of another financial instrument such as a different stock or equity index or SOFR (Secured Overnight Financing Rate) or other similar alternative reference rates.

Commodity Risk — Commodity risk is the risk of change in the market value of the underlying commodity due to a change in the price of the commodity. Commodity futures, swaps, and options are generally used to achieve the desired market exposure to commodities. A futures contract is an agreement between two parties to buy and sell a commodity at a set price on a future date. Commodity swaps are agreements involving the exchange by the Master Trust, with a counterparty, of respective commitments to pay or receive cash flows, e.g., an exchange of payments based on the price

movement for the commodity, with respect to the notional amount of principal. Commodity options give the buyer the right, but not the obligation, to buy one commodity or sell another commodity at a set price on or before a given date.

Future Settlement Risk — Future settlement risk is the risk of counterparty nonperformance resulting in not receiving the asset or associated gains specified in the contract. Gains are derived from the change in market value of the contract due to a change in price of the underlying security. Mortgage TBAs are used to manage the market exposure of a security or asset class. A TBA is a contract for the purchase or sale of agency mortgage-backed securities to be delivered at a future agreed-upon date.

7. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

The following tables summarize the gross notional value of derivative contracts outstanding as of December 31, 2024 and 2023. The gross notional amounts give an indication of the volume of the Master Trust's derivative activities and significantly exceed the fair value of the derivative investments, which is more representative of the theoretical economic exposure associated with derivatives in the Master Trust.

Derivatives are generally used to manage the market exposure of a security, index or currency, interest rate risk, or adjust the portfolio duration. Derivative contracts are instruments that derive their value from underlying assets, indices, reference interest rates, or a combination of these factors. Refer to Note 2 for further description of how derivative instruments are valued. Certain cash instruments, such as mortgage-backed TBAs, meet the definition of a derivative instrument under U.S. GAAP.

The nature of the counterparty and the settlement mechanism of the derivative affect the credit risk to which the Master Trust is exposed. For OTC derivatives such as swaps, forwards, options and TBAs, the Master Trust is exposed to the credit risk of the derivative counterparty. The counterparty credit risk for those contracts is managed through an ISDA Master Agreement (or similar agreements). For exchange-traded derivatives, such as futures, options, and cleared swaps, the Master Trust is exposed to the credit risk of the relevant exchange or clearinghouse in the event the clearinghouse failed and went bankrupt.

The Master Trust is also exposed to liquidity risk in the following situations:

- 1) When the derivative contracts require the Master Trust to post additional cash or securities collateral with counterparties as the fair value of the contracts moves in the counterparties' favor and the Master Trust's receivables under related contracts are unavailable for offset or insufficient in value to offset the payment obligation to the counterparty.

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2024 AND 2023

7. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

- 2) When certain derivative contracts have credit-related contingent features under the International Swaps and Derivatives Association Master Agreement (generally swaps) with counterparties for contracts in a net liability position.

The Master Trust has liquidity risk if its assets decline by various, pre-specified rates over predetermined time periods. If this occurs, the Master Trust is required to post more collateral or may be required to pay off the open liability contracts given the counterparty's right to terminate the contract. At December 31, 2024 and 2023, the Master Trust had a fair value of \$80,486,532 and \$9,524,573, respectively, in contracts in a net liability position with contingent features. \$78,888,633 and \$230,000, respectively, were posted in collateral against derivative contracts. There was no additional collateral required to be posted in the event that a contingent event had occurred at December 31, 2024 and December 31, 2023. Certain derivatives contracts also provide for the right to terminate the contract if a contingent event occurs. At December 31, 2024 and 2023, these terminations would have required the Master Trust to settle trades with a fair value of \$85,666,195 and \$14,882,210, respectively.

The Master Trust holds credit derivatives which are included in other investments and other liabilities on the Master Trust's statements of net assets. The fair value of credit derivatives where the Master Trust is the seller of the credit derivatives is \$5,833,391 and \$4,434,017 as of December 31, 2024 and 2023, respectively. The total gross notional value of credit derivatives where the Master Trust is the seller is \$259,994,963 and \$278,232,117 (0.57% of net assets) as of December 31, 2024 and 2023, respectively.

8. PARTY-IN-INTEREST TRANSACTIONS

Certain Master Trust investments are managed by J.P. Morgan Asset Management. J.P. Morgan Asset Management is an affiliate of J.P. Morgan, the trustee for the Master Trust and the Plans; therefore, these transactions qualify as party-in-interest transactions. The investment management fees to J.P. Morgan Asset Management are paid at the Master Trust level.

9. TAX STATUS

The Internal Revenue Service ("IRS") determined and informed the Company by letters dated March 6, 2015 (for the BCERP, BNA Plan, BSSB Plan, Hourly East Plan, and Hourly West Plan), May 7, 2015 (for the NCRP), June 9, 2015 (for the BSS Plan) and July 8, 2021 (for the PVP) that the Plans and related trust are designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plans have been amended since receiving their determination letters. The Plans' administrator believes that the Plans are designed and are currently being operated in compliance with the applicable requirements of the IRC. Therefore, the Plans' administrator believes the Plans' tax-exempt status has not been affected, and no provision for income taxes has been included in the Plans' financial statements. The Plans are subject to routine audits by taxing jurisdictions. The BCERP was under examination by the IRS during 2023. The examination was closed without consequence or required action as of March 1, 2024.

10. PLAN MERGER

On May 23, 2024, the Employee Benefit Plans Committee approved the merger of the PVP, BNA Plan, NCRP, Hourly East Plan, Hourly West Plan, BSS Plan and BSSB Plan on December 31, 2025, or such earlier or later date as is determined necessary and appropriate. The Employee Benefit Plans Committee also directed and authorized the Senior Director, Global Benefits (or their equivalent but for title) to make all determination and take all actions he deems necessary or appropriate to effectuate the merger of these plans. The plans listed herein (all of which are frozen) will be merged with and into the PVP, which will be the surviving pension plan and will be renamed *The Boeing Company Consolidated Pension Plan*. Any benefits, rights and features of each plan that differ from the master plan document will be maintained and set out in an exhibit specific to each of the plans included in this plan merger. The effective time and date is expected to be 11:59 PM on December 31, 2025.

11. SUBSEQUENT EVENTS

For the BCERP, effective January 1, 2025, the benefit multiplier rate increased from \$95 to \$105 for eligible employees represented by the International Association of Machinists and Aerospace Workers, District Lodge N. 751 and W24, who are on the active payroll, or those on an authorized period of absence, on or after January 1, 2025 (including those who retire from the employ of the Company on January 1, 2025). In addition, the availability of an ongoing lump sum optional form of payment for commencement dates on or after January 1, 2025 was added. These amendments will have an increase of approximately \$194,000,000 on the plan's actuarial PVAB.

Administrative expense

Plan-related expenses are assumed to be the actual prior year administrative expenses, adjusted for the expected change in PBGC premium, rounded up to two significant digits. The assumed administrative expense is \$54,000,000 for 2024 and was \$110,000,000 for 2023. The plan sponsor pays administrative expenses directly from the trust.

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Demographic Assumptions

Mortality

- **Healthy**
For all participants: The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using separate mortality rates for annuitants ("Healthy Annuitants" table) and non-annuitants (based on "Employees" table) without collar or amount adjustments with generational projection using the capped and adjusted Scale MP-2021, as prescribed in final regulations published October 20, 2023.
- **Disabled**
Alternative disabled life mortality table after 1994, as defined under IRS Revenue Ruling 96-7.
- **Lump Sum Conversion**
The applicable 417(e) mortality table.

Termination

Rates varying by service:

Years of service	Rate
0-3	8.5%
4-12	3.0%
13-22	2.0%
23+	1.0%

Rates are 0.00% when eligible to retire

Included in the termination rate above is the bridge eligible layoff decrement rate. For participants not yet retirement eligible but meeting the age and service requirements to bridge into early retirement after layoff, 50% are assumed to be offered a bridge eligible layoff.

Disability

0.25% at each eligible age.

Rates are 0.0% if not eligible to retire.

Benefit commencement date:

- Survivor benefits
Surviving spouse benefits commence at the later of the death of the active participant or the date the participant would have attained age 55 or early retirement eligibility.
- Termination
The later of age 62 or termination of employment.
- Disability
Immediately if participant is age 50 with at least 10 years of vesting service, otherwise age 65.
- Retirement benefit
Upon termination of employment.

Benefit commencement for terminated vested participants

Terminated vested participants are assumed to commence benefits at age 62, or immediately if between age 62 and 65. Terminated vested participants over age 65 are assumed to commence benefits immediately and collect a retroactive payment equal to the sum of their missed payments plus interest.

Missing participants

Deferred vested participants identified by the Plan Administrator as missing, as indicated by a forfeiture flag in the data, are included in the participant counts and demographic information, but have zero liability. It is assumed that no claim for these benefits will be made.

Form of payment

50% of participants in labor groups where lump sums are offered who are active and not yet age 70 as of the valuation date are assumed to elect an immediate voluntary single lump sum payment at decrement. The remaining active participants are assumed to elect the following forms if retiring from active status:

- Single participants: single life annuity;
- Male married participants: single life annuity 10% of the time, a joint and 50% survivor annuity 45% of the time, and a joint and 100% survivor annuity 45% of the time.
- Female married participants: single life annuity 25% of the time, a joint and 50% survivor annuity 37.5% of the time, and a joint and 100% survivor annuity 37.5% of the time.

75% of participants in labor groups where lump sums are offered who are terminated vested and not yet age 62 as of the valuation date are assumed to elect a lump sum. The remaining terminated vested participants are assumed to elect the following forms:

- Single participants: single life annuity.
- Male married participants: single life annuity 40% of the time, a joint and 50% survivor annuity 30% of the time, and a joint and 100% survivor annuity 30% of the time.
- Female married participants: single life annuity 50% of the time, a joint and 50% survivor annuity 25% of the time, and a joint and 100% survivor annuity 25% of the time.

The joint and survivor forms include a “pop-up” feature and are actuarially reduced from the life annuity.

Percent married

80% of males and 60% of females

Spouse age

Spouse of male employees assumed to be two years younger, spouse of female employees assumed to be two years older. Assume opposite gender for spouse.

Pensionable pay	Pensionable pay for prior years provided by Boeing's third party administrator. Pensionable pay for current year is sum of the following: (1) Base pay rate at beginning of current year. (2) Assumed pay increase on March 1 based on valuation assumption (Exhibit A) (3) Load of 4% applied to the base pay rate to estimate bonuses received by unions.
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.
Western Metals Industry Pension Fund - Participation	Active participants in Labor Group Code 216, Portland IAM Unit 24, are assumed to be participants of the Western Metals Industry Pension Fund, a multiemployer plan. Their Western Metals Industry Pension Fund service is assumed to be consistent with the service under the BCERP. Deferred participants eligible for a Western Metals benefit are assumed to have a percent of their benefit paid by Western Metals. This percent has been estimated to be 15%, consistent with the active population that is also eligible for the Western Metals benefits.
Western Metal Industry Pension Fund – Hours Worked	For each year of service before November 1, 2016, 2080 hours are assumed, and prorated for partial years of service.

Decrement timing

The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets

Average of the market value of assets on the valuation date and the preceding two valuation dates, adjusted for contributions, benefits, administrative expenses and expected return (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of the market value on the valuation date, including contributions receivable (discounted using the effective interest rate for the prior plan year).

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with Boeing regarding the likelihood that these benefits will be paid. Willis Towers Watson has reviewed the plan provisions with Boeing and, based on that review, is not aware of any significant benefits required to be valued that were not.

Funding policy

The funding policy of the Plan is to contribute an amount each year that is at least equal to the minimum required contribution under federal law and that is tax-deductible under the Internal Revenue Code.

Sources of Data and Other Information

Willis Towers Watson used asset data supplied by Boeing. Boeing furnished the dates and amounts of the plan contributions. Boeing, through its third-party administrator, furnished participant data as of January 1, 2024. Data for active plan participants as of January 1, 2024 includes accrued benefits for frozen participants determined by the plan administrator. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available. Data estimates and assumptions are documented in a data assumptions memo sent to Boeing on July 1, 2024. In addition to the data assumptions and estimates provided on July 1, 2024, the Western Metals Industry Pension Fund offset to the accrued benefit was estimated as described above for participants of Labor Group Code 216.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Considerations due to COVID-19

The COVID-19 pandemic has disrupted Boeing's business operations as well as the economic outlook. Accordingly, Willis Towers Watson has reviewed and evaluated the non-prescribed economic and demographic assumptions to determine whether adjustments may be warranted. Below is a summary of this review for applicable significant assumptions:

Termination and retirement from active status - Decrements beyond 2023 have not been changed given the expectation that experience will revert to the long-term assumption.

Rates of increase in compensation (SPEEA only) - Boeing has reviewed the current salary increase assumption for BCERP and does not anticipate the current pandemic will materially impact this assumption.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen by the plan sponsor is among the choices prescribed by law, all of which are based on observed market data over certain periods of time, and for this reason we believe this assumption does not significantly conflict with what would be reasonable.
Pay load assumption	The BCERP pay load assumption is based on our understanding of the target EIP for SPEEA participants of 4%.
Rates of increase in compensation	Assumed compensation increases are based on actual compensation increases received by the participant population over the period 2015 – 2019, adjusted for future expectations of pay increases. The analysis of historical pay increases was presented in the experience study delivered to Boeing on September 23, 2020. The assumption was reviewed in September, 2023 based on experience through 2022, but not updated.
Lump sum conversion rate	As required by IRC §430, lump sum benefits are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate.
Pension Plan administrative expenses	Administrative expenses are based on the prior year's actual administrative expenses and expected changes in PBGC premiums rounded up to two significant figures.

Assumed Earnings Rate on Investments for Asset Smoothing

The assumed return of 5.74% used for asset smoothing is the third segment rate. Although we have not explicitly determined an expected return on assets, the expected return on assets assumption chosen by Boeing with the help of their investment advisers under U.S. GAAP for 2023 is 6.00%. It is the client's best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation. Our determination that this assumption does not significantly conflict with what would be reasonable is informed by Willis Towers Watson's Expected Return Estimator model and by analysis of recent and historical data, including the variability thereof, for CPI, GDP growth, and real returns on the various classes of assets held by the trust.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality

Assumptions used for funding purposes are among the choices prescribed by IRC §430(h).

Disabled Mortality

IRC §430(h)(3)(D) provides for the use of separate mortality tables with respect to certain individuals who are entitled to benefits on account of disability. Disabled mortality tables from IRS Revenue Ruling 96-7 have been selected. These separate mortality tables are permitted to be used with respect to disabled individuals in lieu of the generally applicable mortality tables provided pursuant to IRC §430(h)(3)(A) or the substitute mortality tables under IRC §430(h)(3)(C). Disabled mortality improvement is not assumed beyond the valuation date because the assumption is considered to be immaterial.

Termination

The assumed termination rates are based on actual termination experience by the plan over the period 2015 – 2019 for SPEEA participants and 2014 – 2015 and 2017 – 2019 for non-SPEEA participants, with consideration for future conditions that might be expected to produce different results in the future. 2016 experience for non-SPEEA participants was not incorporated because it was a year of atypical turn-over experience due to layoffs. The analysis of historical termination rates was presented in the experience study delivered to Boeing on September 23, 2020. The assumption was reviewed in September, 2023 based on experience through 2022, but not updated.

Retirement

The assumed rates of retirement from active employment are based on actual retirement experience by the plan over the period 2014 – 2018, for SPEEA participants and 2013 – 2015 and 2017 – 2018 for non-SPEEA participants, with consideration for future conditions that might be expected to produce different results in the future. 2016 experience for non-SPEEA participants was not incorporated because it was a year of atypical retirement experience due to layoffs. The analysis of historical rates of retirement from active employment was presented in the experience study delivered to Boeing on October 31, 2019. The assumption was reviewed in September, 2023 based on experience through 2022, but not updated.

Deferred Vested Benefit Commencement Date

Deferred vested participants' assumed commencement age is a single age intended to capture the average age at commencement, based on plan experience. The analysis of historical ages of benefit commencement for deferred vested participants was presented in the experience study delivered to Boeing on September 2, 2021. The assumption was reviewed in September, 2023 based on experience through 2022, but not updated.

Bridge Eligible Layoff Assumption

Bridge eligible layoff rates are based on recent historical experience and the plan sponsor's best estimate for occurrence of bridge eligible layoffs. The analysis of bridge eligible layoffs during 2018 for active participants was presented in the experience study delivered to Boeing on October 31, 2019.

Lump Sum Election Rate From Active Status

The lump sum election assumption is based on the plan's 2017 – 2020 lump sum experience for this population and reflects expected future experience. This assumption only applies to labor groups within BCERP who are offered an ongoing lump sum option. The analysis of historical lump sum elections for active participants was presented in the experience study delivered to Boeing on September 2, 2021. The assumption was reviewed in September, 2023 based on experience through 2022, but not updated.

Vested Terminated Lump Sum Election Rate

The lump sum election assumption is based on the plan's 2017 - 2021 lump sum experience for this population and reflects expected future experience. This assumption only applies to labor groups within BCERP who are offered an ongoing lump sum option. The analysis of historical lump sum elections for vested terminated participants was presented in the experience study delivered to Boeing in September, 2022. The assumption was reviewed in September, 2023 based on experience through 2022, but not updated.

Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

- The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2022 to September 2023 before application of interest rate stabilization corridors. In addition, the segment interest rates were updated from reflecting interest rate corridors applicable for a January 1, 2023 valuation to those applicable for a January 1, 2024 valuation.
- The mortality assumption used to calculate the funding target and target normal cost was updated based on final regulations issued in October 2023. The base table was updated from the RP-2014 tables to the Pri-2012 tables. The mortality improvement scale was updated to an adjusted version of the MP-2021 scale, including caps on future improvement. The mortality projection methodology was changed from static to generational, as required by the final regulations.
- The mortality used to convert annuities to lump sums was changed to the applicable table required for the 2024 plan year.
- The PBGC variable premium method was changed from Alternative to Standard for the 2024 plan year.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Summary of Plan Provisions

Plan Provisions

Effective Date January 1, 1955. The plan was restated as of January 1, 2015. The most recent plan amendments included in these provisions are as follows:

- Amendment No. 1, adopted December 21, 2015 and various effective dates in 2015 and 2016 starting on December 31, 2015 (IUOE Local 302PP (formerly 286PP) freeze, and IAM 751, 70 & W24 freeze, flat dollar increase, and reduction in unreduced age).
- Amendment No. 2, adopted December 7, 2015 and effective during the 2015 plan year, (terminated vested lump sum window)
- Amendment No 3, effective January 28, 2016,(IAM 751 & W24 voluntary layoff benefit program)
- Amendment No. 4, adopted October 31, 2016 and various effective dates in 2015 and 2016 starting on December 31, 2015 (clean-up amendment for Amendment 1, to specifically include former employees)
- Amendment No. 5, adopted December 9, 2016 and effective January 1, 2017 (to remove redundancy with respect to benefits for Designated Domestic Partners)
- Amendment No. 6, effective January 1, 2016 (SPEEA Miami exclusion)
- Amendment No. 7, adopted December 9, 2016, effective January 1, 2017 (SPEEA flat dollar increase and unrestricted lump sum form of benefit added and reflected in this valuation) and effective December 31, 2018 (SPEEA service freeze and full vesting).
- Amendment No. 8, adopted December 9, 2016 and effective during the 2016 plan year and January 1, 2017 (IUOE 302W (formerly 286W) flat dollar increase, additional credited service, enhanced ERF, full vesting, lump sum and accrual freeze).
- Amendment No. 9, adopted December 9, 2016 and effective January 1, 2016 (\$5,000 automatic lump sum provisions).
- Amendment No. 10, effective October 15, 2017, the suspension of benefit rules for rehired participants from IAM 751 has been eliminated.
- Amendment No. 11, SPFPA Local 5 & Local 2 (LGC 202 &210) -100% vesting on December 31, 2017, basic benefit increase to \$85 on April 1, 2017, lump sum optional form of payment effective on July 1, 2017,

freeze accruals as of December 31, 2017, and suspension of benefit rules has been eliminated for participants rehired after December 31, 2017.

- Amendment No. 12, SPIU (LGC 223 & 229) – Accruals cease December 31, 2018, lump sum feature added as an optional form of payment as of January 1, 2018, and the suspension of benefit rules are eliminated for participants rehired after December 31, 2018.
- Amendment No. 13, IAFF Local I-17 (Firefighters, Philadelphia, PA, LGC 215) – Basic benefit increases to \$85 on July 1, 2017, freeze accruals, 100% vesting, lump sum optional form of payment effective on December 31, 2017, and the suspension of benefit rules are eliminated for participants rehired after December 31, 2017.
- Amendment No. 14, IAM&AW Local 2766 (Huntsville, AL, LGC 219) – 100% vesting on January 21, 2017, basic benefit increases to \$85 on February 1, 2017, lump sum optional form of payment effective on July 1, 2017, freeze accruals as of January 31, 2018, and the suspension of benefit rules are eliminated for participants rehired after January 31, 2018.
- Amendment No. 15, adopted December 1, 2017, restricts benefits in the case of bankruptcy.
- Amendment No. 16, adopted September 17, 2018, freeze accruals for all union groups, including SPIU, except for the SPEEA Professional and Technical Units effective December 31, 2018. Accruals cease December 31, 2018 for any SPEEA Professional and Technical Units participants who transfer within Boeing, but are no longer covered by SPEEA Professional and Technical Units. If any former SPEEA Professional and Technical Units participants transfer back into SPEEA Professional and Technical Units, earnings benefit accrued for the period that they were employed in a non-SPEEA Professional and Technical position would be counted under the BCERP upon the date they return.
- Amendment No. 17, IAFF Local I-66 (Firefighters, Seattle, WA, LGC 224) – Basic benefit increases to \$85 on May 1, 2018, freeze accruals, 100% vesting, and lump sum optional form of payment effective on December 31, 2018.
- Amendment No. 18, effective in 2020, reflects the 2019 settlement agreements related to SPEEA et. al. V. Boeing, NOS 05-1251-JWB and 07-1043-JWB, for fourteen inactive participants.
- Amendment No. 19, effective in 2020, awards vesting and eligibility service to participants while on approved unpaid leave of absence and reflects

Definitions

Actuarial equivalence for annuity conversion	For the accelerated income annuity, the monthly benefit is actuarially adjusted based on the applicable 417(e)(3) interest rate for November of the prior plan year, and the applicable 417(e)(3) mortality table. For the joint and survivor and 10 year certain payment forms, the monthly benefit is actuarially adjusted based on an interest rate of 6% and the RP 2000 mortality table, mixed collar, projected to 2015 using Scale AA, with a 50/50 male/female blend. In no event will the adjustment using the above factors be less than that using the simplified factors in effect prior to January 1, 2009 and in no event will the normal form factor be greater than one.
Basic benefit	Complement benefit plus amount per year of credited service. (See Exhibit A)
Credited service	One year for each calendar year in which the participant completes 2,000 or more hours of service after becoming an employee. Pro rata credit is granted for years in which a participant works less than 2,000 hours. For plan participants who are members of the IUOE 286PP (Seattle, WA) labor group, credited service will freeze as of December 31, 2015. For plan participants who are members of IAM 751 (Seattle), IAM&AW 24 (Portland), or IAM&AW 70 (Wichita) labor groups, credited service will freeze as of October 31, 2016. For participants who are members of IUOE 302 W (formerly 286W) (Welders) and on the active payroll or on approved leave of absence of six months or less on December 1, 2016 credited service will be increased by two years and then freeze as of December 31, 2016. For participants who are members of IAFF Local I-17 (Firefighters), SPFPA Local 5 or SPFPA Local 2 credited service will freeze as of December 31, 2017. For participants who are members of IAM&AW Local 2766 (Huntsville, AL) credited service will freeze as of January 31, 2018.

For participants who are members of SPEEA Engineers (Seattle, WA), SPEEA Technical Unit (Seattle, WA), SPIU or IAFF

Local I-66 (Firefighters, Seattle, WA), credited service will freeze as of December 31, 2018.

By December 31, 2018, credited service for all labor groups has been frozen.

Complement benefit Fixed dollar benefit established on January 1, 1996, to replace the supplemental past service benefit and the supplemental future benefit as of December 31, 1995

Core benefit 1.025% times final average earnings times credited service

Excess benefit 0.450% times final average earnings in excess of Social Security covered compensation times credited service

Final average benefit Core benefit plus excess benefit. For participants hired prior to January 1, 1993, a minimum of 1.5% times final average earnings minus 1.25% times the Social Security amount, all multiplied by credited service, is used if it results in a greater benefit. This applies after adjustment for early retirement factors.

Final monthly average earnings Monthly average of the highest 60 consecutive calendar months of pensionable pay during the 10-year period ending on termination plus applicable ratification bonuses divided by 60 plus total amount of Employee Incentive Plan ("EIP") payments where appropriate.

For plan participants who are members of IUOE 302 PP (formerly 286PP) (Seattle, WA) labor group, final monthly average earnings will freeze as of December 31, 2015.

For plan participants who are members of IAM 751 (Seattle), IAM&AW 24 (Portland), or IAM&AW 70 (Wichita) labor groups, final monthly average earnings will freeze as of October 31, 2016.

For participants who are members of IUOE 302 W (formerly 286W) (Welders), final monthly average earnings will freeze as of December 31, 2016.

For participants who are members of IAFF Local I-17 (Firefighters), SPFPA Local 5 or SPFPA Local 2, final monthly average earnings will freeze as of December 31, 2017.

For participants who are members of IAM&AW Local 2766 (Huntsville, AL) final monthly average earnings will freeze as of January 31, 2018.

For participants who are members of SPIU or IAFF Local I-66 (Firefighters, Seattle, WA), final monthly average earnings will freeze as of December 31, 2018.

For BCERP participants working at Boeing in a non-union position, in a position in a bargaining unit that does not participate in BCERP, or participants who were formerly represented by a now-defunct bargaining unit, effective December 31, 2018, the BCERP freezes these participants' earnings.

For participants who transferred out of SPEEA Engineers (Seattle, WA), SPEEA Technical Unit (Seattle, WA), SPEEA Engineering Unit (Florida), final monthly average earnings will freeze as of December 31, 2018. If participants are rehired into the aforementioned SPEEA bargaining units, non-SPEEA Boeing earnings and SPEEA earnings will be included in the benefit earned.

By December 31, 2018, with the exception of SPEEA Engineers (Seattle, WA), SPEEA Technical Unit (Seattle, WA), and SPEEA Engineering Unit (Florida), final monthly average earnings for all labor groups has been frozen.

Monthly Pension benefit	The greater of the basic benefit and the final average benefit less Western Metals Offset.
Monthly Preretirement death benefit	For those not eligible to retire the benefit is a 50% J&S as if the participant had survived to the earliest retirement date, retired and taken a 50% J&S. For those eligible to retire, but who had not, the benefit is a 100% J&S as if the participant had retired.
Normal retirement date (NRD)	First of month coinciding with or next following the attainment of age 65 and five years of vesting service
Pensionable pay	Annual base pay plus EIP bonus plus certain ratification bonuses
Postretirement death benefit	\$2,000 payable on death of an eligible employee who retires from active service
Social Security amount	Estimated primary insurance amount payable to the participant at the earliest age under the Social Security Act, as amended, in effect on the earlier of normal retirement date or the date of termination. No future earnings are assumed after termination.
Social Security Covered Compensation	35-year average of Social Security taxable wage bases ending in the year of termination or freeze.
Vesting service	One year for each calendar year in which the participant completes at least 1,000 hours of service

Monthly Benefits Paid Upon the Following Events

Normal retirement	Monthly pension benefit determined as of NRD
Early retirement	The basic benefit and the core benefit are reduced 2% for each year that payment begins prior to age 60. The excess benefit is reduced 5% for each year that payment begins prior to age 60. The pre-93 formula is reduced 3% for each year that payment begins prior to 60. The Western Metals Offset is reduced 8% for each year prior to 65 and after 60 and 5% for each year prior to 60. Effective October 1, 2016, for participants who are members of IAM 751 (Seattle), IAM&AW 24 (Portland) and IAM&AW 70 (Wichita) labor groups on the active payroll, or an authorized leave of absence on October 1, 2016, BCERP and effective December 1, 2016 for members of IUOE 302W (formerly 286W) (Welders) who are active or on leave [of any duration] on or after December 1, 2016 benefits payable at an Early Retirement Date will be unreduced for employees age 58 or older at their Early Retirement Date. Additionally, early retirement reductions stated in the above paragraph (2% for core, 5% for excess and 3% for pre-93) will be reduced from age 58. Effective January 28, 2016, for participants who are members of IAM 751 (Seattle), IAM&AW 24 (Portland) and IAM&AW 70 (Wichita) labor groups on the active payroll, or an authorized leave of absence of 90 days or less on or after January 28, 2016, any participant that terminates prior to October 1, 2016 shall be eligible for early retirement reductions stated in the above paragraph (2% for core, 5% for excess and 3% for pre-93 from age 58) by entering the Voluntary Layoff Benefits Program.
Postponed retirement	Monthly pension benefit determined as of actual retirement date
Vested termination	Monthly pension benefit determined as of termination date, reduced 6.0% for each year of payment before the participant's NRD down to age 55 and reduced using 417 assumptions prior to age 55 for those who can elect an annuity prior to 55. The Western Metals Offset is reduced 8% for each year prior to 65 and after 60 and 5% for each year prior to 60.
Employees transferred to another plan	Monthly pension benefit determined using credited service as of the transfer date. Minimum benefit provisions and pay are determined as of retirement, termination date or freeze.
Layoffs	Monthly benefit determined using credited service and vesting service as of layoff date and minimum benefit provisions as of the end of the layoff recall period (6 years after date of layoff) or freeze date, if earlier. A laid-off participant may elect early retirement and receive early retirement subsidized reduction

factors if otherwise eligible for early retirement within the layoff recall period, or if age 55 at the time of layoff.

Disablement	Monthly pension benefit unreduced for early commencement
Preretirement death	Monthly preretirement death benefit determined as of the date of death, actuarially reduced for early commencement
Missing Participants	Terminated vested participants past normal retirement age who have not been located after reasonable attempts are deemed to have forfeited their benefits. Such benefits will be reinstated after verification of a claim for the benefit.
Forms of payment	Monthly preretirement death benefits are payable as a single life annuity. Monthly pension benefits are paid as a life annuity, if the participant has no spouse as of the date payments begin, or if the participant so elects. Otherwise, benefits are paid in the form of the 50% joint and survivor annuity option with "pop-up" (where annuity will "pop-up" to the benefit amount before the joint and survivor option election if the spouse predeceases the retired participant) or, if the participant elects and the spouse consents, another optional form offered by the plan. Certain surviving spouses may elect a lump sum if the participant would have been eligible to elect a lump sum. For the purposes of the previous paragraph, spouse includes same-sex spouse for SPEEA Professional and Technical unit participants, as applicable. Optional forms are 10-year certain and life annuity, accelerated income annuity (except for disabled retirement), 75% or 100% joint and survivor annuity with "pop-up" or a life annuity (for married participants). Single sum payments elected during the 2014 lump sum window for certain terminated vested participant, will be calculated as the present value of the participant's accrued benefit payable at NRD. For participants who are members of SPEEA Professional Unit (Seattle, WA), SPEEA Technical Unit (Seattle, WA), SPEEA Engineering Unit (Wichita, KS) or IUOE 286W (Welders) a lump sum distribution option is available upon separation from service effective January 1, 2017. For participants who are members of IAM&AW Local 2766 (Huntsville, AL), SPFPA Local 5 or SPFPA Local 2 a lump sum distribution option is available upon separation from service effective July 1, 2017. For participants who are members of IAFF Local I-17 (Firefighters), a lump sum distribution option is available upon separation from service effective December 31, 2017.

**Maximum on
benefits and pay**

All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective.

Changes in Benefits Since Prior Year

These plan provisions reflect all amendments to the BCERP adopted as of January 1, 2024 and effective during the 2024 plan year.

- The pay and dollar limits were updated in accordance with legislative changes effective for 2024 as follows:
- The IRC Section 401(a)(17) pay limit increased from \$330,000 for the 2023 plan year to \$345,000 for the 2024 plan year.
- The IRC Section 415 dollar limit increased from \$265,000 for 2023 to \$275,000 for 2024.
- Amendment No. 23, effective in 2023, clarifies provisions in the plan. This amendment has no impact on the valuation.

There have been no other changes in plan provisions since the prior valuation, and to our knowledge, no plan amendments are pending.
