2024 Schedule SB, Part V – Statement of Actuarial Assumptions / Methods

Summary of Actuarial Methods

Actuarial Funding Method

Unit Credit. The normal cost for each participant is the present value of the benefit earned during year. The Accrued Liability for each participant is the present value of the participant's accrued benefit as of the valuation date. The plan normal cost and accrued liability are the respective sums for all participants.

Actuarial Value of Assets

Adjusted Fair Market Value of Assets using a 24-month average of the Market Value of Assets.

Amortization Method

For the Plan's ERISA funding requirements, incremental Funding Shortfall amounts are amortized over a fifteen-year period, and the related shortfall amortization payment is determined on the first valuation date following the plan year in which it arises based on the segment rates used for ERISA minimum funding purposes on that date, as prescribed under IRC Section 430. All prior shortfall amortizations were eliminated effective with the 2021 valuation as the Plan Sponsor elected to apply the provisions of Section 9705 of the American Rescue Plan Act of 2021 for the 2021 plan year.
