# Asset allocation (by investment)

This table lists the investments your plan offers with a balance and shows participant use of each investment. The data can help you determine how well your investment lineup meets your participants' needs. A low number of participants using an investment and/or a low average balance in an investment could indicate participants don't understand the investment and its potential place in their asset allocation or that the investment is inappropriate for the plan's demographics. Similarly, a high concentration of plan assets in a single option that's not a target date or a balanced investment could indicate that plan participants are not adequately diversifying their account assets or that the plan doesn't offer all the types of investments participants may need or are looking for to diversify their accounts.
