## **Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**

### **Rationale for Assumptions - funding**

- The expected rate of return on plan assets for funding purposes is based on the median simulated investment return using capital market assumptions published in Mercer Investment Consulting's Capital Markets Outlook for the plan's target asset mix, net of an adjustment of 12 bps for expenses assumed to be paid from plan assets.
- Expected administrative and investment expenses to be paid from plan assets are based on prior year actual expenses adjusted to reflect expected changes for the current year.

### **Actuarial methods for funding**

#### **Asset methods**

The asset valuation method is an average of the adjusted market value for each year during the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value

#### **Participant methods**

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all plan participants as of the valuation date.
- **Participants excluded:** No actuarial liability is included for non-vested participants who terminated prior to the valuation date.
- **Insurance contracts:** The plan does not have any insurance contracts.

#### **Minimum funding methods**

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used,

***Schedule SB, Part V — Statement of Actuarial Assumptions/Methods***

the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.

- The plan's **target normal cost** is the sum of the individual target normal costs and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

## Schedule SB, Part V — Summary of Plan Provisions

### Benefits included or excluded

Unless noted below, all benefits provided by the plan, as restated and amended through the valuation date, are included in this valuation:

- **Most recent plan amendments included:** No amendments to current restatement. Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **Plan amendments excluded:** None.
- **Late retirement increases:** The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation does not include increases since no active or deferred participants are over age 70½.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
- **IRC Section 436 benefit restrictions:**
  - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
  - *Plan amendments:* See above.
  - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
  - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

### Plan Provision Changes Since Prior Valuation

Maximum compensation and benefit limits were updated from 2023 to 2024.

**Schedule SB, line 32 — Schedule of Amortization Bases**

The total shortfall amortization charge is the sum of the individual shortfall amortization installments for each plan year since the IRC Section 430 changes made by American Rescue Plan Act of 2021 (ARPA) took effect for the plan. Although an individual shortfall amortization installment can be negative, the combined shortfall amortization charge cannot be less than \$0.

Shortfall bases					
Year established		Outstanding balance	Years remaining		2023 installment
2023	\$	395,409	14	\$	37,739
2024		(153,876)	15		(14,000)
Total	\$	241,533		\$	23,739

***Schedule SB, line 24 — Change in Actuarial Assumptions***

- The expected investment return was changed from 4.60% to 4.90% to reflect anticipated experience.
- The expense component of normal cost changed from \$86,000 to \$80,000 to reflect our expectations for the current plan year.
