Schedule SB, line 22 - Description of Weighted Average Retirement Age

The age reported is the weighted average of the Normal Retirement Ages for all active employees as of the valuation date, rounded to the nearest whole age. The weighting is based on the total IRC 430 funding liability for the employee compared to the total liability for all active employees. For an active late retiree, the assumed retirement age may be later than the Plan's Normal Retirement Age. Each participant's rate of retirement is assumed to be 100% at his or her assumed retirement age.

Actuarial Communication Disclosure

The Schedule SB is intended to report the actuarial position of the plan as of the valuation date for purposes of complying with sections 412, 430, and 436 of the Internal Revenue Code.

Calculations have been prepared using generally accepted actuarial practices and methods. The actuarial assumptions used in the calculations are individually reasonable and reasonable in aggregate.

CBIZ did not audit the employee data and financial information used in this valuation. On the basis of our review of this data, we believe that the information is sufficiently complete and reliable, and that it is appropriate for the purposes intended.

Actuarial computations involve a number of assumptions and those assumptions come with a level of uncertainty and risk. Those uncertainties include, but are not limited to investment risk, mortality risk, changes in the employee group, and changes in the laws and regulations.

Schedule SB, line 25 – Change in Method

There is a change in the actuarial method for the plan year that qualifies for automatic approval under Revenue Procedure 2017-56, Section 4.02 (“Approval for change in funding method due to change in valuation software”). Both the enrolled actuary for the plan and the business organization providing actuarial services to the plan are the same as in the prior plan year. The funding target, target normal cost (without regard to any adjustments for employee contributions and plan-related expenses) and actuarial value of assets, as determined by the new valuation software as of the valuation date for the prior plan year, are both within 2% of those values as determined by the prior valuation software, and approval under Section 4.02 was not used in the prior plan year. The other requirements of Section 4.02 are also satisfied.
