Long-Term Rate of Return on Plan Assets

N/A

Hypothetical Interest Rate on Cash Balance Account

5.0% annual rate.

Employees Valued

Only participants as of the valuation date as reported by the plan sponsor were valued.

Salary Scale

Future salaries are projected using a 3.00% salary scale.

Assumptions Regarding Future Service Accruals

For active participants, hours worked in each future year are assumed to be equal to the number of hours worked in the previous plan year.

Mortality Rates

Pri-2012 Small Plan Mortality Table as described under Regulation §1.430(h)(3)-1 (static, not generational) projected by modified Scale MP-2021, sex-distinct, with the same blended rates pre- and post-commencement

Retirement Rates

Later of attainment of age 65, age at 3rd anniversary of plan participation, or age at valuation date.

Termination Rates

None assumed.

Disability Rates

None assumed.

Assumptions Made in Valuing Spousal Benefits

Male spouses are assumed to be the same age as their female spouses. It is assumed that none of the Participants are married.

Assumptions Made Regarding Payment Form

100% of active participant's and vested former participants or beneficiaries entitled to benefits are assumed to receive benefits in lump sum payment equal to their Hypothetical Account at the time of Termination or Retirement

Provisions Not Valued

Disability benefits for active participants and post-termination death benefits for both active and terminated vested participants have not been valued. Due to the small liability added by these benefits, they have been deemed to be immaterial for valuation purposes.

Accrued and Vested Benefit Measurements

Unless noted above or categorized as not to be valued as a vested benefit for purposes of measuring liability for the determination of premiums under the Pension Benefit Guaranty Corporation insurance program, all benefits under the plan have been valued.

Provision for Expenses

The administrative expenses expected to be paid from plan assets have been included in the Target Normal Cost for minimum contribution purposes. Expected expenses for the current plan year are assumed to be equal to the actual expenses for the previous plan year rounded to the nearest \$100.

Actuarial Cost Method

Funding: The actuarial cost method prescribed by applicable regulations is the Unit Credit cost method. Under this cost method, a liability is calculated for each participant as of the valuation date equal to the present value of the accrued benefit as of the valuation date. The liabilities are referred to as the Funding Target. The present value of benefits earned during the plan year following the valuation date is calculated for each active participant who has not reached normal retirement age and is expected to earn a benefit during the year. This present value is the individual participant's Target Normal Cost. The plan's total annual Funding Target and Target Normal Cost are the sums of the amounts for individual participants. Estimated plan administrative expenses expected to be paid from plan assets in the upcoming year are also included as part of the Target Normal Cost.

Low-Default-Risk Assessment: The actuarial cost method used to determine the Low-Default Risk liability is the Unit Credit cost method.

Attribution of Accrued Benefits: The accrual of benefits outlined in the plan document has been reflected in the attribution of benefits under the funding methods above.

Asset Method

Market value of all trust investments plus any discounted receivable contributions as of the valuation date.

At-Risk Assumptions

Since there are not more than 500 participants participating in defined benefit pension plans of the employer's controlled group, at-risk liabilities have not been valued.

Rationale for the Selection of Assumptions

Assumptions that in our judgement have a significant effect on the measurements contained in this report are categorized below, along with information and analyses that support the determination that the assumption is reasonable.

Assumptions Selected by the Actuary

Retirement decrement: This assumption has been selected due to the small size of the population and the lack of credible data to provide a more detailed assumption.

Expected return on plan assets: This rate is selected based on the outlook for returns within the main classes of investments (those being debt, equity, and cash), considering past experience as well as current market expectations over an appropriate timeframe. We confer with the plan's asset advisors, when possible, to gather input for the assumption and their opinion as to its reasonableness. We monitor asset gains and losses annually to assure that the assumption is reasonable.

Salary scale: The rate of future pay increases has been set considering recent relevant experience of the plan, and discussions with the plan sponsor regarding their expectations of future pay increases. We monitor gains and losses annually to ensure the assumption is reasonable.

Discount rate: For purposes of measuring the low-default-risk obligation, this assumption is set to reflect the return on low-default-risk securities and to reflect the incidence of future cash flows from the plan, appropriately.

Assumptions Selected by Other Parties (which are prescribed or set by law)

For assumptions prescribed or set by law, we offer no opinion or analysis on the reasonableness of the assumptions.

Changes in Assumptions since the Last Actuarial Valuation

The three-tiered segment interest rates used to determine the Funding Target Liability last year were 4.75%, 5.00%, and 5.74%. These rates were updated to the rates required for the current plan year and also reflect all applicable funding relief legislation. The mortality tables for the Funding Target Liability were updated as required under Regulation §1.430(h)(3)-1.

Justification for Changes in Funding Actuarial Assumptions

For funding calculation purposes, no assumption changes, other than those prescribed by law, were made, therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions" on the 2023 Schedule SB.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Description of Weighted Average Retirement Age

The weighted average retirement age for the Plan is 65.

Summary of Plan Provisions

Plan Sponsor

The Impact Group, Inc.

EIN/PN

54-1766645 / 002

Effective Date

January 1, 2015. Last amended on January 1, 2023.

Plan Year

The 12-consecutive month period beginning each January 1.

Participation

Each Employee becomes a Participant on the Plan Entry Date on or next following the attainment of age 21 years and completion of one (1) Year of Service. An Eligible Employee will participate in the Plan on the January 1 or July 1 on or next following completion of the eligibility requirements.

Compensation

Compensation is the IRS W-2 Form amount for the Plan Year paid as a participant, including any amount deferred under a qualified 401(k) or 125 plan or any other qualified cash or deferred arrangement. Limited to the maximum permitted under the IRC.

Vesting Service

Participants shall vest on the following schedule:

Years of Service	Percent Vested
< 3	0%
3	100%

All Participants shall be 100% vested upon attainment of their Normal Retirement Age.

Vested Benefit

The vested benefit shall be the vested portion of the theoretical account balance as of the date of determination.

Accrued Benefit

Actuarial Equivalent of the Participant's theoretical Account Balance projected to Normal Retirement Date and converted into an Actuarially Equivalent life only benefit.

Normal Retirement

Eligibility

The Normal Retirement Date for each Participant is the first of the month coincident with or next following the attainment of age 65 and 3 years of participation.

Benefit

The amount of annual retirement benefit is calculated as follows:

A Participant's theoretical Account Balance shall be increased by the Participant's Hypothetical Account for that Plan Year and Interest Credit, and decreased by any Distribution Debit:

Hypothetical Allocation by employee group:

- | | |
|-----------|----------------------|
| • Group A | \$130,000 |
| • Group B | \$5,000 |
| • Group C | 2.0% of Compensation |
| • Group D | \$25,000 |

Only Participants who complete one (1) Year of Service during the Plan Year shall be eligible to receive the Hypothetical Allocation for that year.

Interest Credit is the beginning balance times 5.0%. Interest is credited as of the last day of the Plan Year.

Delayed Retirement

Eligibility is the first of the month on or next following the actual date the Participant terminates employment after Normal Retirement Date. The Benefit is based on the Actuarial Equivalent of the Theoretical Account Balance at the Delayed Retirement Date.

Early Retirement

Non-owner Participants may commence vested benefits once terminating employment at any age with 3 years of service.

Disability Retirement

If a Participant becomes totally and permanently disabled while in service to the employer, and is unable to continue in service after six months of being disabled, the Participant shall receive the Actuarial Equivalent of their accrued benefit.

If a Participant becomes totally and permanently disabled after terminating employment, the Participant shall receive the Actuarial Equivalent of their vested accrued benefit.

Death Benefit

Eligibility

Eligibility is contingent upon participation in the Plan with a Hypothetical account balance. The participant will be immediately vested upon death.

Benefit

Actuarial Equivalent of the accrued benefit.

Date of Payment: As soon as administratively feasible following death.

Optional Forms of Payment

A life only annuity to the survivor which is the Actuarial Equivalent to the Hypothetical Cash Balance Account or a lump sum of the Hypothetical Cash Balance Account.

Post-retirement Death Benefits

Post-retirement Death Benefits are dependent upon the form of payment selected.

Methods of Payments

Under the Normal Form of payment, a Participant's retirement annuity is payable monthly for life, without further payments after death.

A Participant may elect to receive the annuity under one of the following Actuarially Equivalent optional modes:

- A lump sum payment of the Cash Balance Account.
- An Actuarially Equivalent benefit paid to the Participant in the form of a life annuity.
- An Actuarially Equivalent benefit paid to the Participant for life, with 50%, 75% or 100% continued after death for the subsequent lifetime of the designated contingent annuitant.

If the value of the Participant's benefit does not exceed \$5,000, the distribution may only be made as an immediate lump-sum.

Contributions

The entire cost of the Plan is borne by the Employer.

Top Heavy

Minimum benefit would be satisfied by the profit sharing contribution made to the 401(k) profit sharing plan.

Amendments

The Employer reserves the right to amend the Plan at any time. Generally, the Pension Benefit Guaranty Corporation reserves the right to terminate the Plan if the Employer fails to meet the minimum funding standards, or is unable to pay benefits when due. If the Plan is terminated, the plan assets will be distributed among the plan participants based upon a priority allocation procedure and the Employer shall be liable for any unfunded vested benefits to the extent required by law.

Changes in Plan Provisions since the Last Actuarial Valuation

None.
