Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

The following assumptions and methods are prescribed by ERISA, as currently amended.

Funding assumptions selection and rationale

Actuarial Standard of Practice No. 27 ("ASOP 27") provides guidance to actuaries on economic assumptions for measuring pension obligations. Actuarial Standard of Practice No. 35 ("ASOP 35") provides guidance to actuaries on demographic and other noneconomic assumptions for measuring pension obligations. Under these ASOPs, for each assumption that has a significant effect on the measurement and that the actuary has selected, the actuary should disclose the information and analysis used to support the actuary's determination that, in the actuary's professional judgement, it is reasonable for the purpose of the measurement. No information or analysis is needed for any assumption prescribed by law or regulation.

The interest rates and mortality assumption used for this measurement are prescribed by law. The economic assumption that has a significant effect on the measurement is the expected long term rate of return on plan assets. The expected long term rate of return on plan assets assumption is based on the plan's asset allocation (approximately 50% Fixed Income, 40% Equity and 10% Other) and forward-looking expected rates of return by asset category. Demographic and other non-economic assumptions having a significant impact on the measurement of the Funding Target are retirement rates. Retirement rates are based on the plan sponsor's anticipated experience and are reasonable given historic gain and loss experience of the plan. Actual experience is reviewed each year and compared to the assumption. Changes are then made, as appropriate, based on this review.

Use of Models

Actuarial Standard of Practice No. 56 ("ASOP 56") provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. Gallagher uses third-party software in the performance of annual actuarial valuations and projections. The model is intended to calculate the liabilities associated with the provisions of the plan using data and assumptions as of the measurement date under the funding rules and/or accounting standard specified in this report. Further, the model applies those funding rules and/or accounting standard to the liabilities derived and other inputs, such as plan assets and contributions, to generate many of the exhibits found in this report. Gallagher has an extensive review process whereby the results of the liability calculations are checked using detailed sample output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other funding and/or accounting outputs are similarly reviewed in detail and at a high level for accuracy, reasonability and consistency with prior results. Gallagher also reviews the model when significant changes are made to the software. The review is performed by experts within the company who are familiar with applicable funding and/or accounting rules as well as the manner in which the model generates its output.

Future actuarial measurements

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report. However, in accordance with ASOP 51, an assessment of risks for the plan was performed.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods (continued)

Prescribed Funding/PBGC Assumptions and Methods

The following assumptions and methods are prescribed by ERISA, as currently amended.

Interest rates

	2024 Plan Year	2023 Plan Year
Funding Rates – Constrained *		
First Segment Rate	4.75%	4.75%
Second Segment Rate	4.87%	5.00%
Third Segment Rate	5.59%	5.74%
Effective Interest Rate	5.01%	5.14%
Funding Rates – Unconstrained **		
First Segment Rate	3.62%	1.41%
Second Segment Rate	4.46%	3.09%
Third Segment Rate	4.52%	3.58%
Effective Interest Rate	4.39%	3.08%

* Used for minimum funding and benefit restriction purposes.

** Used for maximum tax-deduction, PBGC premium, ERISA 4010 reporting and low-default-risk obligation measure purposes.

The interest rates used for funding purposes are the Segment Rates with 4-month lookback, constrained in accordance with relevant legislation.

Mortality

Mortality tables mandated by applicable law and regulation as specified in IRS Regulation 1.430(h)(3)-1, as amended in the Federal Register on October 20, 2023, in TD 9983, 88 FR 72357, applied on a fully generational basis using the IRS 2024 Adjusted Scale MP-2021 Rates mortality improvement scale.

Actuarial cost method

The Funding Target is the present value of accrued benefits based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including plan related expenses expected to be paid from plan assets during the year.

EIN/PN: 95-2549713 / 002

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods (continued)

Non-Prescribed Funding Assumptions and Methods

The following assumptions were selected by the plan's enrolled actuary. The asset valuation method was selected by the plan sponsor with the actuary's advice and is an acceptable method under the applicable provisions of the Internal Revenue Code and associated regulations.

Expenses

The prior year's non-PBGC administrative expenses increased by 3.0%, plus the current year's PBGC premium. Expected plan expenses of \$670,401 were added to the Target Normal Cost for 2024. Expected plan expenses of \$983,739 were added to the Target Normal Cost for 2023.

Frequency of optional payment forms

Form of Payment	Probability
100% Joint and Survivor	30%
50% Joint and Survivor	20%
Single Life Annuity	50%

Terminated vested participants who formerly participated in the Contraves, Inc. Retirement Income Plan are assumed to elect payment of the cash balance portion of their benefits according to the optional payment form frequencies table above. The enrolled actuary does not consider this to be a material assumption given the remaining participant population.

Marital percentage

85% of male participants and 50% of female participants are assumed to be married at death. Husbands are assumed to be 3 years older than their wives. The enrolled actuary does not consider this to be a material assumption given the remaining participant population.

Retirement rates

Terminated vested participants are assumed to commence receiving benefits at age 65, or at current age with actuarial increases if older than 65.

Oerlikon USA Holding, Inc. Pension Plan

EIN/PN: 95-2549713 / 002

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods (continued)

Asset valuation method

The Actuarial Value of Assets is market value as of the valuation date, including the discounted value of accrued contributions, reduced by 2/3 of the gain/(loss) for the immediately preceding plan year and reduced by 1/3 of the gain/(loss) for the plan year before that. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by current law and regulation to be not greater than the applicable third Segment Rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

	Actuary's Assumption	Third Segment Rate	Reflecting Limit
Expected Return for 1/1/2024 – 12/31/2024	4.50%	5.59%	4.50%
Expected Return for 1/1/2023 – 12/31/2023	4.50%	5.74%	4.50%
Expected Return for 1/1/2022 – 12/31/2022	4.50%	5.92%	4.50%

Summary of Changes from the January 1, 2023 Valuation

- The mortality assumption was updated according to the projection as specified in IRS Regulation 1.430(h)(3)-1, as amended in the Federal Register on October 20, 2023, in TD 9983, 88 FR 72357, applied on a fully generational basis using the IRS 2024 Adjusted Scale MP-2021 Rates mortality improvement scale.
- The interest rate basis was updated to the current rates as specified in IRS Regulation 1.430(h)(2)-1. These rates are constrained in accordance with relevant legislation.

These changes decreased the Funding Target by approximately \$60,000.
