## **Report of Independent Auditors**

The Advisory Committee  
ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan

### **Report on the Audit of the Financial Statements**

#### ***Scope and Nature of the ERISA Section 103(a)(3)(C) Audit***

We have performed audits of the financial statements of ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statement of changes in net assets available for benefits for the year ended December 31, 2024, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2024 and 2023 and for the year ended December 31, 2024, stating that the certified investment information, as described in Note 8 to the financial statements, is complete and accurate.

#### ***Opinion***

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section:

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (GAAP).
- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

### ***Basis for Opinion***

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

### ***Responsibilities of Management for the Financial Statements***

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

### ***Auditor's Responsibilities for the Audit of the Financial Statements***

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- exercise professional judgment and maintain professional skepticism throughout the audit.
- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan's internal control. Accordingly, no such opinion is expressed.
- evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of GAAP.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with GAAP.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

**Note 1 – Description of Plan**

The following description of ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan (the Plan) provides only general information. Participants should refer to the plan document, as amended, for a more complete description of the Plan's provisions.

**General** – The Plan was established January 1, 1981 by ABX Air, Inc. (the Company). The Plan is a trustee, noncontributory defined benefit pension plan and is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). Plan benefits are coordinated with benefits available from the ABX Air, Inc. Profit Sharing Plan (PSP) to ensure a meaningful level of retirement income to participants.

Effective April 6, 2010 (the Freeze Date), the Board of Directors of the Company elected to freeze all benefit and service accruals in the Plan. For participants who were employed on the Freeze Date, the calculation of retirement benefits does not include years of credited service, average monthly compensation, or changes in profit sharing account balances during employment after the Freeze Date. In addition, otherwise eligible employees are not allowed to enter the Plan on or after the Freeze Date.

**Eligibility** – Prior to the Freeze Date, each employee, who was covered by the collective bargaining agreement negotiated under Title II of the Railway Labor Act and who was not a leased employee or special project worker, was eligible to participate in the Plan subsequent to the completion of a consecutive 12-month period of service during which the employee worked at least 400 hours. No employees may become participants in the Plan on or following the Freeze Date.

**Vesting** – Participants' interests do not vest until the participant has five years of service, at which time they become 100% vested.

**Benefit payments** – The normal retirement date for pilots is the participant's 60th birthday. Normal retirement date for flight engineers is the participant's 65th birthday. The normal retirement benefit payable may be in the form of a single life annuity, qualified joint and survivor annuity, or any optional annuity form as described in the plan document.

Participants are eligible to receive a retirement benefit based on the highest five years of annual compensation received in the past ten years of employment, known as average monthly compensation. Average monthly compensation is multiplied by 2%, multiplied by the potential years of service up to a maximum of 25 years, and then multiplied by the actual years of service divided by the potential years of service. These benefits are reduced by the participant's profit sharing plan annuity benefit and any other retirement income plan to which the Company contributes on behalf of the employee, exclusive of 401(k) plan benefits. Each participant's accrued benefit was determined and frozen as of the Freeze Date.

No years of credited service or compensation earned after the Freeze Date is used in determining a participant's accrued benefit. A participant may continue in the employment of the Company beyond his or her normal retirement date. No payment of benefits is made until a participant retires, separates from service, or reaches the maximum age required by law.

**ABX Air, Inc.**  
**Pilots Minimum Monthly Retirement Income Plan**  
**Notes to Financial Statements**

---

A participant who has attained age 55 and completed at least ten years of service is eligible for early retirement. If an employee retires before his or her normal retirement date, the retirement benefit is reduced by 6% for each year of early retirement.

The Plan also provides for various levels of death benefits to spouses of participants. If a participant becomes disabled, his or her benefit is the same as if he had been able to elect to retire at that time. The benefit is reduced actuarially for early commencement.

**Funding** – Company contributions are funded in amounts actuarially determined to provide the defined benefits to participants. The contributions are subject to Internal Revenue Service (IRS) limitations. The Plan met the minimum funding requirements for the year ended December 31, 2024.

**Plan termination** – Although it has not expressed any intention to do so, the Company has the right to terminate the Plan and discontinue its contributions at any time subject to the collective bargaining process. In the event the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits to the participants in order of priority determined in accordance with ERISA, applicable regulations thereunder and the plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during 2024, that ceiling is \$4,831 per month for those pensioners who elect to receive their benefits in the form of a single-life annuity and are 60 years old at the time of retirement or plan termination (whichever comes later). For older annuitants or for those who elect to receive their benefits in some form other than a single-life annuity, the corresponding ceilings are actuarially adjusted upward or downward, as applicable.

Whether all participants receive their benefits, should the Plan be terminated at some future time, will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

**Interplan transfers** – Assets transferred to the Plan and reported on the financial statements as interplan transfers are attributable to employees who have changed employment status during the year and have transferred individual account balances from other plans sponsored by the Company.

## **Note 2 – Summary of Significant Accounting Policies**

**Basis of accounting** – The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America, using the accrual method of accounting.

**ABX Air, Inc.**  
**Pilots Minimum Monthly Retirement Income Plan**  
**Notes to Financial Statements**

---

**Use of estimates** – The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

**Investment valuation** – Investments are reported at fair value. The Plan’s trustee, Northern Trust Company (the Trustee), certifies the fair value of all investments. If available, quoted market prices are used to value investments.

Fair value is the price that would be received to sell an asset or paid to transfer a liability (the “exit price”) in an orderly transaction between market participants at the measurement date. See Note 6 for discussion of fair value measurements.

**Income recognition** – Purchases and sales of securities are recorded on a trade-date basis. Plan interest in Master Trust investment income consists of both the realized gains or losses and unrealized appreciation and depreciation of those investments.

**Payment of benefits** – Benefits are recorded when paid.

**Administrative expenses** – Certain expenses of maintaining the Plan are paid directly by the Company and are excluded from these financial statements.

**Subsequent events** – The Plan has evaluated subsequent events through October 3, 2025, which is the date the financial statements were available to be issued.

**Note 3 – Actuarial Present Value of Accumulated Plan Benefits**

Accumulated plan benefits are those future periodic payments that are attributable under the Plan’s provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries; (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries. The accumulated plan benefits for active employees are based on their average compensation during the five highest years of compensation during the last ten years of employment as of the Freeze Date. Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included to the extent that they are deemed attributable to employee service rendered to the valuation date. Each participant’s accrued benefit was determined and frozen as of the Freeze Date. No years of credited service or compensation earned after the Freeze Date is used in determining a participant’s accrued benefit.

An independent actuary determines the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The unit credit cost method is used for funding purposes for the Plan.

**ABX Air, Inc.**  
**Pilots Minimum Monthly Retirement Income Plan**  
**Notes to Financial Statements**

The actuarial present value of accumulated plan benefits, as determined by the Plan's actuary, consists of the following:

	<u>2024</u>	<u>2023</u>
Vested benefits		
Retirees and beneficiaries currently receiving payments	\$ 302,736,694	\$ 303,797,538

Actuarial present value of accumulated plan benefits	<u>\$ 391,414,546</u>	<u>\$ 400,961,279</u>

The changes in actuarial present value of accumulated plan benefits consist of the following for the year ended December 31, 2024:

Actuarial present value of accumulated plan benefits at beginning of year	<u>\$ 400,961,279</u>
Increase (decrease) during the year attributable to	
Interest due to the decrease in the discount period	23,234,923
Changes in actuarial assumptions	(8,174,015)
Actuarial loss	3,222,876
Profit sharing transfers	1,269,843
Benefits paid	<u>(29,100,360)</u>
Net decrease	<u>(9,546,733)</u>
Actuarial present value of accumulated plan benefits at end of the year	<u>\$ 391,414,546</u>

Changes in actuarial assumptions represents the effect of the change in the discount rate from 6.00% as of December 31, 2023 to 6.25% as of December 31, 2024. Significant actuarial assumptions underlying the present value of accumulated plan benefits are as follows as of December 31, 2024 and 2023:

Participants who leave service under the Plan's early retirement provisions are eligible to receive a reduced pension (6% per year). Assumed rates of retirement are as follows as of December 31, 2024 and 2023:

Age	Pilots	Flight Engineers
55	1%	10%
56-58	1%	5%
59	5%	5%
60	20%	5%
61	10%	10%
62	10%	25%
63	10%	15%
64	33.3%	15%
65	100%	50%
66	100%	90%
67	100%	100%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

**Note 4 – Tax Status**

The IRS has determined and informed the Company by a letter dated March 14, 2016, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). The plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

In accordance with guidance on accounting for uncertainty in income taxes, the plan administrator has evaluated the Plan's tax positions and does not believe the Plan has any uncertain tax positions that require disclosure or adjustment to the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

**Note 5 – ABX Air, Inc. Defined Benefit Master Trust**

The ABX Air, Inc. Defined Benefit Master Trust (the Master Trust) holds the assets of the Plan, the PSP and the ABX Air, Inc. Retirement Income Plan (the RIP). The assets of the Master Trust are held by the Trustee.

The accompanying statements of net assets available for benefits reflect the Plan's apportioned share of the underlying plan assets and liabilities of the Master Trust. Allocations of net income from the Master Trust are based on the Plan's net assets at the beginning of the year with adjustments for contributions and benefit payments made during the year.

**Note 6 – Fair Value Measurements**

The framework for measuring fair value provides a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

The three levels of the fair value hierarchy are described as follows:

**Level 1** – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

**Level 2** – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

**Level 3** – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for the Master Trust's assets measured at fair value. There have been no changes in the methodologies used at December 31, 2024 and 2023.

*Mutual funds* – Shares of mutual funds are valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to public their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

*Collective trusts* – Units held in collective trusts (CT) are valued using the NAV practical expedient of the CT as reported by the CT managers. The NAV practical expedient is based on the fair value of the underlying assets owned by the CT, minus its liabilities, and then divided by the number of units outstanding. The NAV practical expedient of a CT is calculated based on compilation of primarily observable market information. Units in the CT can be redeemed daily, and there are no redemption restrictions or notice requirements.

**ABX Air, Inc.**  
**Pilots Minimum Monthly Retirement Income Plan**  
**Notes to Financial Statements**

---

*Corporate and government obligations* – Quoted market prices are generally not available for corporate, municipal, government agency, and mortgage-backed securities. These investments are valued using pricing models maximizing the use of observable inputs for similar securities which includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, those corporate bonds are valued under a discounted cash flow approach that maximizes observable inputs such as current yields or similar instruments but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

*Private equity limited liability company* – Columbia Institutional High Yield Fixed Income Private Fund, LLC (Columbia LLC) is a limited liability company formed March 27, 2012 for the purpose of investing in high yield debt securities issued by domestic and international business entities, including corporate bonds, bank debts, and government bonds.

Units held in Columbia LLC are valued using the NAV practical expedient of the investment as reported by the fund's managers. The NAV practical expedient is based on the fair value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of units outstanding. The NAV practical expedient of the fund is calculated based on compilation of primarily observable market information. The investment in the Columbia LLC is allocated only to the PSP.

The Master Trust has no outstanding commitments to the Columbia LLC. A member may ordinarily withdraw all or part of its capital account at the end of any calendar month upon 30 days' notice, subject to the managing members' right to suspend withdrawals.

**Note 7 – Risks and Uncertainties**

Plan contributions and the actuarial present value of accumulated plan benefits are prepared based on assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term would be material to the financial statements.

Investment securities are exposed to various risks, such as interest rate, market volatility, and credit risks. It is reasonably possible, given the level of risk associated with investment securities, that changes in the values of the investments in the near term could materially affect the amounts reported in the financial statements.

## Appendix A – Summary of Actuarial Methods

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. The plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that the plan will be adequately and systematically funded and accounted for. Annual contributions and accounting expense are also affected by the "asset valuation method" (as well as the plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

### Actuarial Cost Method

The actuarial cost method used for determining the Plan's ERISA funding requirements and the FASB ASC Topic 960 values is the unit credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's normal cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's future benefits.

The actuarial cost method used for determining the Plan Sponsor's FASB ASC Topic 715 accounting requirements is the projected unit credit method. Under this method, a projected benefit is determined at each active participant's assumed retirement age assuming future compensation increases. The Plan's normal cost is the sum of the present value of the portion of each active participant's projected benefit attributable to the current year of service. The plan's accrued liability is the sum of (a) the present value of the portion of each active participant's projected benefit attributable to all prior years of service plus (b) the present value of each inactive participant's accrued benefits.

### Asset Valuation Method

The asset valuation method determines the asset value used to calculate the funding requirements of the Plan. The resulting asset value is referred to as **plan assets**.

Plan assets are equal to the **market value** of assets as of the valuation date, plus the discounted value of employer contributions made after the valuation date. These contributions are discounted to the valuation date using the effective interest rate for the prior plan year.

The Market-Related Value of Plan Assets used for determining the plan sponsor's FASB ASC Topic 715 accounting requirements is equal to the Fair Value of Plan Assets (without inclusion of any contributions receivable).

### PBGC Variable-Rate Premium Method

The alternative method is used for the PBGC variable-rate premium calculation (adopted January 1, 2020).

### Amortization Method

For the Plan's ERISA funding requirements, incremental Funding Shortfall amounts are amortized over a fifteen-year period, and the related shortfall amortization payment is determined on the first valuation date following the plan year in which it arises based on the segment rates used for ERISA minimum funding purposes on that date, as prescribed under IRC Section 430.

For FASB ASC Topic 715 accounting purposes, cumulative unrecognized gains or losses in excess of 10% of the greater of (i) the Fair Value of Plan Assets and (ii) the Projected Benefit Obligation are amortized over the expected working lifetime.

### **Changes in Actuarial Methods Since Prior Valuation**

None.

## Appendix B – Summary of Actuarial Assumptions

Many of the factors affecting the Plan’s costs are variables which cannot be predicted with certainty. The following actuarial assumptions have either been prescribed by statute and regulation or selected to reasonably anticipate future experience with respect to these variables. For non-prescribed assumptions, we monitor the economic and demographic experience of the Plan each year for material gains and losses arising from the assumptions and recommend adjustments accordingly. Other actuarial assumptions could be reasonable and would yield different results.

### ECONOMIC ASSUMPTIONS

#### Interest Rates

The current funding and PBGC interest rates are as follows. The funding interest rates are prescribed under IRS regulations based on the Plan Sponsor’s interest rate election. The PBGC interest rates are based on the Plan Sponsor’s elected method for determining the premium funding target.

	Minimum Funding	Maximum Deductible	PBGC Premium
Segment 1 (0–5 years)	4.75%	3.62%	3.62%
Segment 2 (5–20 years)	4.87%	4.46%	4.46%
Segment 3 (20+ years)	5.59%	4.52%	4.52%
Effective Interest Rate	5.04%	4.41%	4.41%

**ERISA minimum funding:** 24-month average segment rates, using a four-month lookback period from the valuation date (adopted January 1, 2008), adjusted to reflect the segment rate floor and applicable stabilization corridor consistent with IRS requirements.

**Maximum deductible/PBGC premium:** 24-month average segment rates, using a four-month lookback period from the valuation date (adopted January 1, 2008), but not adjusted to reflect a segment rate floor or stabilization corridor consistent with IRS requirements. The PBGC Alternative Method was adopted for the 2020 plan year.

**FASB ASC Topic 715:** 5.25% per year (adopted December 31, 2023). This discount rate reflects the theoretical rate at which the liabilities could be settled in the bond market as of the measurement date consistent with FASB requirements. It is based on the December 31, 2023 Milliman Bond Model and the Plan’s projected benefit payments.

**FASB ASC Topic 960:** 6.00% per year (adopted January 1, 2024). This represents the expected long-term geometric mean return on assets based on the Plan’s investment policy, including target asset allocation, and the Milliman’s capital market expectations consistent with FASB requirements.

#### Asset Returns

**ERISA minimum funding and maximum deductible:** 6.00% per year (adopted January 1, 2024). This represents the expected long-term geometric mean return on assets based on the Plan’s investment policy, including target asset allocation, and the Milliman’s capital market expectations.

**FASB ASC Topic 715:** 6.40% per year (adopted December 31, 2023). This represents the expected long-term arithmetic mean return on assets based on the Plan’s investment policy, including target asset allocation, and the Plan Sponsor’s capital market expectations.

## Compensation Increases

Not applicable.

## Inflation (CPI)

No explicit assumption.

## Maximum Benefit and Annual Compensation Limitation Increases

Not applicable.

## Administrative Expenses

Expected administrative expenses payable from the trust are explicitly added to the normal cost. For the current valuation, the loading for administrative expenses (assumed to be payable at the beginning of the year) is \$700,000.

## DEMOGRAPHIC ASSUMPTIONS

We believe the demographic assumptions shown below are reasonable for the contingencies they are measuring and are not anticipated to produce significant cumulative actuarial gains and losses over the measurement period. For the rationale behind the choice of the demographic assumptions other than mortality, please refer to the Demographic Assumptions Study Report dated January 23, 2015 and the Active Retirement Rates Assumption Study dated February 2, 2023.

### Funding Mortality

Non-Annuitant and Annuitant Generational Mortality Tables, gender-distinct, as prescribed by IRC Section 430(h)(3)(A). The mortality assumption was updated to comply with the requirements of the IRS (adopted January 1, 2024 and updated annually).

### FASB Mortality

Pri-2012 Mortality Tables projected forward using MP-2021 on a generational basis, with gender-specific Employee rates before benefit commencement and Retiree and Contingent Annuitant rates after benefit commencement (adopted December 31, 2021). This represents the most current mortality experience published by the Society of Actuaries.

### Turnover

Vesting service accrual under the Plan is contingent upon continued employment. Participants who terminate their employment before becoming eligible to retire are entitled to receive the future pension benefits accrued and vested up to their termination.

We have included a discount for expected termination of employment, which is applied to non-vested future benefits in accordance with the following tables:

Pilots	
Service	Rates
0-10	4.0%
10+	4.0%

Flight Engineers	
Service	Rates
0-7	25.0%
8	17.5%
9	10.0%
10+	5.0%

### Retirement Rates for Active Participants

The Plan specifies a normal retirement age of 60 for pilots and 65 for flight engineers. Recent experience suggests that active participants are delaying retirement based on the Plan's normal retirement ages.

Participants who leave service under the Plan's early retirement provisions are eligible to receive a reduced pension (6% per year). The following table represents our assumed rates of retirement (adopted December 31, 2022):

Age	Flight Engineers	Pilots
55	10.0%	1.0%
56–58	5.0%	1.0%
59	5.0%	5.0%
60	5.0%	20.0%
61	10.0%	10.0%
62	25.0%	10.0%
63	15.0%	10.0%
64	15.0%	33.3%
65	50.0%	100.0%
66	90.0%	100.0%
67	100.0%	100.0%

## Retirement Rates for Inactive Participants

Vested terminated participants are assumed to retire at the following rates. Vested terminated participants age 65 or above are assumed to retire immediately.

Age	Flight Engineers	Pilots
55	20.0%	20.0%
56–58	10.0%	10.0%
59	10.0%	25.0%
60	15.0%	75.0%
61	15.0%	20.0%
62	20.0%	20.0%
63–64	10.0%	20.0%
65	100.0%	100.0%

## Disability

The Plan does not provide ancillary or subsidized disability benefits. If a participant became disabled, his benefit would be the same as if he had been able to elect to retire at that time. The benefit is reduced for early commencement, if applicable. Accordingly, no additional assumption has been made as to the probability of disability beyond the normal rates of turnover.

## Form of Payment

For participants who have not commenced: single life annuity.

## Marital Characteristics

**For participants not in pay status:** 80% of participants are assumed to be married, with males three years older than females.

**For participants in pay status:** Actual birth dates of spouses are included in the census data, where relevant.

## Decrement Timing

Decrements are assumed to occur mid-year.

## Benefits Not Valued

All benefits are valued.

## Special Data Adjustments

None.

## Changes in Actuarial Assumptions Since Prior Valuation

### Interest Rates:

**Interest rates for ERISA minimum funding:** Effective January 1, 2024, the interest rates used to determine the minimum funding requirements were updated based on the applicable 24-month average segment rates with a four-month lookback from the valuation date, adjusted to reflect the segment rate floor and applicable stabilization corridor. The interest rates were updated to comply with IRS requirements, and they reflect the amendments under Section 9706 of the American Plan Rescue Act of 2021.

**Interest rates for maximum deductible and PBGC premium:** Effective January 1, 2024, the interest rates used for maximum deductible and PBGC premium purposes were updated as noted above, but not adjusted to reflect segment rate stabilization. The interest rates were updated to comply with IRS and PBGC requirements.

**Interest rate for FASB ASC Topic 715:** Effective December 31, 2023, the FASB ASC Topic 715 discount rate was changed from 5.50% to 5.25% per year. The discount rate was changed to reflect interest rates currently available on high-quality fixed income investments.

**Interest rate for FASB ASC Topic 960:** Effective January 1, 2024, the FASB ASC Topic 960 interest rate was changed from 6.25% to 6.00% per year. The interest rate was changed to reflect the expected long-term return on assets based on the Plan's investment policy, asset allocation, and Milliman's capital market expectations.

### Asset Returns:

**IRS Funding:** Effective January 1, 2024, the asset return for IRS funding was changed from 6.25% to 6.00% per year. The asset return assumption was changed to reflect the expected long-term return on assets based on the Plan's investment policy, asset allocation, and Milliman's capital market expectations.

**FASB ASC Topic 715:** Effective December 31, 2023, the assumed rate of investment return was changed from 6.75% to 6.40%. The asset return assumption was changed to reflect expected long-term return on assets based on the Plan's investment policy, asset allocation, and the Plan Sponsors' capital market assumptions.

### Mortality:

**Funding, Maximum Deductible, and PBGC Premiums:** Effective January 1, 2024, the mortality table was updated as prescribed by IRC Section 430(h)(3)(A). The mortality assumption was updated to comply with the IRS and PBGC requirements.

### Expenses:

**Administrative Expenses:** Effective January 1, 2024, the administrative expense load for funding purposes was updated from \$780,000 to \$700,000 to reflect the expected administrative expenses to be paid from the Plan's trust during the upcoming year.

## Weighted Average Retirement Age

The weighted average retirement age for participants is 63. This equals the sum, over all retirement ages, of the retirement age multiplied by the probability of retiring at that age, as shown below.

<b>Pilots</b>

### Shortfall Amortization

The amount needed to amortize the Funding Shortfall to the Applicable Funding Target, in combination with prior Shortfall Amortizations, for the plan year beginning January 1, 2024 is determined below. The net Funding Shortfall for a plan year is amortized in fifteen level payments. The present value and amortization factors shown below are based on the interest rates for determining the Applicable Funding Target for the current plan year.

1. Present value of remaining prior Shortfall Amortizations

**Statement by Enrolled Actuary**  
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

## Weighted Average Retirement Age

The weighted average retirement age for participants is 63. This equals the sum, over all retirement ages, of the retirement age multiplied by the probability of retiring at that age, as shown below.

## Appendix A – Summary of Actuarial Methods

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. The plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that the plan will be adequately and systematically funded and accounted for. Annual contributions and accounting expense are also affected by the "asset valuation method" (as well as the plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

### Actuarial Cost Method

The actuarial cost method used for determining the Plan's ERISA funding requirements and the FASB ASC Topic 960 values is the unit credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's normal cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's future benefits.

The actuarial cost method used for determining the Plan Sponsor's FASB ASC Topic 715 accounting requirements is the projected unit credit method. Under this method, a projected benefit is determined at each active participant's assumed retirement age assuming future compensation increases. The Plan's normal cost is the sum of the present value of the portion of each active participant's projected benefit attributable to the current year of service. The plan's accrued liability is the sum of (a) the present value of the portion of each active participant's projected benefit attributable to all prior years of service plus (b) the present value of each inactive participant's accrued benefits.

### Asset Valuation Method

The asset valuation method determines the asset value used to calculate the funding requirements of the Plan. The resulting asset value is referred to as **plan assets**.

Plan assets are equal to the **market value** of assets as of the valuation date, plus the discounted value of employer contributions made after the valuation date. These contributions are discounted to the valuation date using the effective interest rate for the prior plan year.

The Market-Related Value of Plan Assets used for determining the plan sponsor's FASB ASC Topic 715 accounting requirements is equal to the Fair Value of Plan Assets (without inclusion of any contributions receivable).

### PBGC Variable-Rate Premium Method

The alternative method is used for the PBGC variable-rate premium calculation (adopted January 1, 2020).

### Amortization Method

For the Plan's ERISA funding requirements, incremental Funding Shortfall amounts are amortized over a fifteen-year period, and the related shortfall amortization payment is determined on the first valuation date following the plan year in which it arises based on the segment rates used for ERISA minimum funding purposes on that date, as prescribed under IRC Section 430.

For FASB ASC Topic 715 accounting purposes, cumulative unrecognized gains or losses in excess of 10% of the greater of (i) the Fair Value of Plan Assets and (ii) the Projected Benefit Obligation are amortized over the expected working lifetime.

### **Changes in Actuarial Methods Since Prior Valuation**

None.

## Appendix B – Summary of Actuarial Assumptions

Many of the factors affecting the Plan’s costs are variables which cannot be predicted with certainty. The following actuarial assumptions have either been prescribed by statute and regulation or selected to reasonably anticipate future experience with respect to these variables. For non-prescribed assumptions, we monitor the economic and demographic experience of the Plan each year for material gains and losses arising from the assumptions and recommend adjustments accordingly. Other actuarial assumptions could be reasonable and would yield different results.

### ECONOMIC ASSUMPTIONS

#### Interest Rates

The current funding and PBGC interest rates are as follows. The funding interest rates are prescribed under IRS regulations based on the Plan Sponsor’s interest rate election. The PBGC interest rates are based on the Plan Sponsor’s elected method for determining the premium funding target.

	Minimum Funding	Maximum Deductible	PBGC Premium
Segment 1 (0–5 years)	4.75%	3.62%	3.62%
Segment 2 (5–20 years)	4.87%	4.46%	4.46%
Segment 3 (20+ years)	5.59%	4.52%	4.52%
Effective Interest Rate	5.04%	4.41%	4.41%

**ERISA minimum funding:** 24-month average segment rates, using a four-month lookback period from the valuation date (adopted January 1, 2008), adjusted to reflect the segment rate floor and applicable stabilization corridor consistent with IRS requirements.

**Maximum deductible/PBGC premium:** 24-month average segment rates, using a four-month lookback period from the valuation date (adopted January 1, 2008), but not adjusted to reflect a segment rate floor or stabilization corridor consistent with IRS requirements. The PBGC Alternative Method was adopted for the 2020 plan year.

**FASB ASC Topic 715:** 5.25% per year (adopted December 31, 2023). This discount rate reflects the theoretical rate at which the liabilities could be settled in the bond market as of the measurement date consistent with FASB requirements. It is based on the December 31, 2023 Milliman Bond Model and the Plan’s projected benefit payments.

**FASB ASC Topic 960:** 6.00% per year (adopted January 1, 2024). This represents the expected long-term geometric mean return on assets based on the Plan’s investment policy, including target asset allocation, and the Milliman’s capital market expectations consistent with FASB requirements.

#### Asset Returns

**ERISA minimum funding and maximum deductible:** 6.00% per year (adopted January 1, 2024). This represents the expected long-term geometric mean return on assets based on the Plan’s investment policy, including target asset allocation, and the Milliman’s capital market expectations.

**FASB ASC Topic 715:** 6.40% per year (adopted December 31, 2023). This represents the expected long-term arithmetic mean return on assets based on the Plan’s investment policy, including target asset allocation, and the Plan Sponsor’s capital market expectations.

## Compensation Increases

Not applicable.

## Inflation (CPI)

No explicit assumption.

## Maximum Benefit and Annual Compensation Limitation Increases

Not applicable.

## Administrative Expenses

Expected administrative expenses payable from the trust are explicitly added to the normal cost. For the current valuation, the loading for administrative expenses (assumed to be payable at the beginning of the year) is \$700,000.

## DEMOGRAPHIC ASSUMPTIONS

We believe the demographic assumptions shown below are reasonable for the contingencies they are measuring and are not anticipated to produce significant cumulative actuarial gains and losses over the measurement period. For the rationale behind the choice of the demographic assumptions other than mortality, please refer to the Demographic Assumptions Study Report dated January 23, 2015 and the Active Retirement Rates Assumption Study dated February 2, 2023.

### Funding Mortality

Non-Annuitant and Annuitant Generational Mortality Tables, gender-distinct, as prescribed by IRC Section 430(h)(3)(A). The mortality assumption was updated to comply with the requirements of the IRS (adopted January 1, 2024 and updated annually).

### FASB Mortality

Pri-2012 Mortality Tables projected forward using MP-2021 on a generational basis, with gender-specific Employee rates before benefit commencement and Retiree and Contingent Annuitant rates after benefit commencement (adopted December 31, 2021). This represents the most current mortality experience published by the Society of Actuaries.

### Turnover

Vesting service accrual under the Plan is contingent upon continued employment. Participants who terminate their employment before becoming eligible to retire are entitled to receive the future pension benefits accrued and vested up to their termination.

We have included a discount for expected termination of employment, which is applied to non-vested future benefits in accordance with the following tables:

Pilots	
Service	Rates
0-10	4.0%
10+	4.0%

Flight Engineers	
Service	Rates
0-7	25.0%
8	17.5%
9	10.0%
10+	5.0%

### Retirement Rates for Active Participants

The Plan specifies a normal retirement age of 60 for pilots and 65 for flight engineers. Recent experience suggests that active participants are delaying retirement based on the Plan's normal retirement ages.

Participants who leave service under the Plan's early retirement provisions are eligible to receive a reduced pension (6% per year). The following table represents our assumed rates of retirement (adopted December 31, 2022):

Age	Flight Engineers	Pilots
55	10.0%	1.0%
56–58	5.0%	1.0%
59	5.0%	5.0%
60	5.0%	20.0%
61	10.0%	10.0%
62	25.0%	10.0%
63	15.0%	10.0%
64	15.0%	33.3%
65	50.0%	100.0%
66	90.0%	100.0%
67	100.0%	100.0%

## Retirement Rates for Inactive Participants

Vested terminated participants are assumed to retire at the following rates. Vested terminated participants age 65 or above are assumed to retire immediately.

Age	Flight Engineers	Pilots
55	20.0%	20.0%
56–58	10.0%	10.0%
59	10.0%	25.0%
60	15.0%	75.0%
61	15.0%	20.0%
62	20.0%	20.0%
63–64	10.0%	20.0%
65	100.0%	100.0%

## Disability

The Plan does not provide ancillary or subsidized disability benefits. If a participant became disabled, his benefit would be the same as if he had been able to elect to retire at that time. The benefit is reduced for early commencement, if applicable. Accordingly, no additional assumption has been made as to the probability of disability beyond the normal rates of turnover.

## Form of Payment

For participants who have not commenced: single life annuity.

## Marital Characteristics

**For participants not in pay status:** 80% of participants are assumed to be married, with males three years older than females.

**For participants in pay status:** Actual birth dates of spouses are included in the census data, where relevant.

## Decrement Timing

Decrements are assumed to occur mid-year.

## Benefits Not Valued

All benefits are valued.

## Special Data Adjustments

None.

## Changes in Actuarial Assumptions Since Prior Valuation

### Interest Rates:

**Interest rates for ERISA minimum funding:** Effective January 1, 2024, the interest rates used to determine the minimum funding requirements were updated based on the applicable 24-month average segment rates with a four-month lookback from the valuation date, adjusted to reflect the segment rate floor and applicable stabilization corridor. The interest rates were updated to comply with IRS requirements, and they reflect the amendments under Section 9706 of the American Plan Rescue Act of 2021.

**Interest rates for maximum deductible and PBGC premium:** Effective January 1, 2024, the interest rates used for maximum deductible and PBGC premium purposes were updated as noted above, but not adjusted to reflect segment rate stabilization. The interest rates were updated to comply with IRS and PBGC requirements.

**Interest rate for FASB ASC Topic 715:** Effective December 31, 2023, the FASB ASC Topic 715 discount rate was changed from 5.50% to 5.25% per year. The discount rate was changed to reflect interest rates currently available on high-quality fixed income investments.

**Interest rate for FASB ASC Topic 960:** Effective January 1, 2024, the FASB ASC Topic 960 interest rate was changed from 6.25% to 6.00% per year. The interest rate was changed to reflect the expected long-term return on assets based on the Plan's investment policy, asset allocation, and Milliman's capital market expectations.

### Asset Returns:

**IRS Funding:** Effective January 1, 2024, the asset return for IRS funding was changed from 6.25% to 6.00% per year. The asset return assumption was changed to reflect the expected long-term return on assets based on the Plan's investment policy, asset allocation, and Milliman's capital market expectations.

**FASB ASC Topic 715:** Effective December 31, 2023, the assumed rate of investment return was changed from 6.75% to 6.40%. The asset return assumption was changed to reflect expected long-term return on assets based on the Plan's investment policy, asset allocation, and the Plan Sponsors' capital market assumptions.

### Mortality:

**Funding, Maximum Deductible, and PBGC Premiums:** Effective January 1, 2024, the mortality table was updated as prescribed by IRC Section 430(h)(3)(A). The mortality assumption was updated to comply with the IRS and PBGC requirements.

### Expenses:

**Administrative Expenses:** Effective January 1, 2024, the administrative expense load for funding purposes was updated from \$780,000 to \$700,000 to reflect the expected administrative expenses to be paid from the Plan's trust during the upcoming year.

## Appendix C – Summary of Principal Plan Provisions

This summary of plan provisions is intended to only describe the essential features of the Plan. All eligibility requirements and benefit amounts shall be determined in strict accordance with the plan document itself.

### Effective Date

The effective date of this Plan is January 1, 1981. The Plan was completely restated effective January 1, 1994 to incorporate all prior amendments and plan design changes. The Plan was amended effective January 1, 1996 to incorporate GATT and certain benefit payment options. The Plan was amended effective January 1, 1997 to be a flat 2.0% formula. Also, the Plan was completely restated to incorporate all prior amendments and plan design changes and to conform to GUST.

Effective January 1, 2002, the Plan was amended to be in good faith compliance with the requirements of EGTRRA. Most notably, the mortality for actuarial equivalence was updated to be 1994 Group Annuity Reserving Unisex Mortality Table and an annual interest rate of 8.0%.

Effective March 28, 2005, the Plan was amended so that forced cashouts do not exceed \$1,000.

Effective May 26, 2006, the Plan was amended to offer an early retirement program to certain pilots.

Effective June 2007, the Plan was amended to offer an early retirement program to certain pilots.

The Plan was amended effective December 19, 2008 to conform to final regulations under Code Section 415 of the Internal Revenue Code and for certain other administrative reasons.

Effective December 30, 2009, the Plan was amended to remove the “project and prorate” feature from the benefit formula.

Effective December 30, 2009, the Plan was amended to freeze benefits as of April 6, 2010.

The Plan was amended December 13, 2010 to conform to the Heroes Earnings Assistance and Relief Act of 2008 (HEART).

The Plan was amended and restated effective January 1, 2015 to comply with applicable law and other requirements set forth in IRS Notice 2013-84 with regard to a Cycle D determination letter filing.

The Plan was amended January 1, 2018 to incorporate by reference and clarify Internal Revenue Code Section 436 and related Treasury Regulations.

### Plan Year and Fiscal Year

The Plan Year ends December 31 and the company’s fiscal year ends December 31.

### Eligible Employees

Every employee belonging to the pilots’ union who works 400 or more hours per year is eligible to participate in this Plan following twelve (12) months of employment, provided that such employee does not participate in another retirement plan to which the company, as a result of collective bargaining, is required to contribute.

### Employee Census

The employee data used as a basis for the valuation in this report was submitted to us by ABX Air as of January 1, 2024.

## Considered Earnings

All payments to an employee for services rendered, including wages, commissions, sick pay, vacation pay, overtime pay, and incentive bonuses are considered compensation under this Plan. Other bonuses, severance pay, cost of living differential payments and employer contributions to this or any other employee benefit plan are not considered.

## Credited Service

Credited service for benefit purposes is limited to a total of 25 years for all employees.

## Amount of Retirement Income

This Plan may be coordinated with the benefit available from the ABX Air, Inc. Profit Sharing Plan.

The Plan provides a benefit at normal retirement for each participant equal to:

1. 2.00% of his or her final five-year average monthly compensation multiplied by his or her years of credited service, reduced by:
2. His or her Profit Sharing Plan Annuity Benefit; and
3. Any additional retirement income benefit payable to the employee from any plan to which the employer contributes on behalf of said employee, other than the Pilots Investment Plan (PIP).

Benefit accruals were frozen as of April 6, 2010.

## Employee Contributions

Contributions by employees are neither required nor allowed under this Plan.

## Company Contributions

The employer contributes annually, the entire amount actuarially determined to be necessary to provide the benefits of the Plan.

## Normal Retirement

Normal retirement is age 60 for pilots and age 65 for flight engineers.

## Late Retirement

**Late Retirement Date:** The first day of the month following the date of termination of service if it occurs after the Normal Retirement Date.

**Late Retirement Benefit:** The greater of (a) the Accrued Benefit determined as of the Late Retirement Date, or (b) the Accrued Benefit determined as of the Normal Retirement Date increased to the Late Retirement Date with the Plan's actuarial equivalence of 1994 Group Annuity Reserving Unisex Mortality table, and an annual interest rate of 8.00%.

## Early Retirement

Employees may retire at age 55 with 10 years of employment. Participants who leave service under the Plan's early retirement provisions are eligible to receive a reduced pension (6% per year from normal retirement) offset by his or her Profit Sharing Plan Annuity Benefit commencing at the early retirement date.

## Vested Benefits

Each participant's accrued benefits vest in accordance with the following schedule:

Years of Service	Percentage of Accrued Benefit
Less than five years	0%
Five or more years	100%

## Investment of Assets

The assets of this Plan are held in trust and managed by the trustee, Northern Trust.

## Plan Administrator

The named plan administrator is the retirement Committee appointed by the corporation's Board of Directors.

## Changes in Principal Plan Provisions Since Prior Valuation

### Shortfall Amortization

The amount needed to amortize the Funding Shortfall to the Applicable Funding Target, in combination with prior Shortfall Amortizations, for the plan year beginning January 1, 2024 is determined below. The net Funding Shortfall for a plan year is amortized in fifteen level payments. The present value and amortization factors shown below are based on the interest rates for determining the Applicable Funding Target for the current plan year.

1. Present value of remaining prior Shortfall Amortizations					
	<u>Date</u> <u>Established</u>	<u>Amortization</u> <u>Amount</u>	<u>Years</u> <u>Remaining</u>	<u>Present Value</u> <u>Factor</u>	<u>Present</u> <u>Value</u>
a.	1/1/2023	<u>\$7,935,106</u>	14	10.477482	<u>\$83,139,933</u>
b.	Total	7,935,106			83,139,933
2. Shortfall Amortization for current plan year					
a.	Applicable Funding Target				432,875,915
b.	Actuarial Value of Assets less Carryover and Prefunding Balances				374,247,520
c.	Is the plan exempt from establishing a Shortfall Amortization for the current year?				No
d.	Funding Shortfall [(a) - (b), but not < \$0]				58,628,395
e.	Net Funding Shortfall [If (d) > \$0, (d) - (1b), otherwise n/a]				(24,511,538)
f.	Amortization factor				10.991387
g.	Shortfall Amortization for current plan year [(e) ÷ (f)]				(\$2,230,068)
3. Total Shortfall Amortizations [(1b) + (2g), but not < \$0]					5,705,038

## Appendix C – Summary of Principal Plan Provisions

This summary of plan provisions is intended to only describe the essential features of the Plan. All eligibility requirements and benefit amounts shall be determined in strict accordance with the plan document itself.

### Effective Date
