**Statement by Enrolled Actuary**

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

## Actuarial cost method

### Funding target and target normal cost

An actuarial cost method allocates the expected cost of a pension plan on a year-by-year basis. The primary objective is to accumulate enough assets prior to each participant's retirement to provide the promised pension benefits.

The Pension Protection Act of 2006 (PPA) requires plan sponsors to use the Traditional Unit Credit actuarial cost method in which the estimated accrued benefit is based on service and, if applicable, earnings as of the valuation date. The funding target is equal to the actuarial present value of all accrued benefits as of the valuation date. The target normal cost is the actuarial present value, as of the valuation date, of the expected increases in projected accrued benefits attributable to service expected to be completed during the plan year (i.e., if applicable, one year's salary growth is reflected in the determination of target normal cost).

For tax deduction purposes, the funding target may reflect the value of future pay increases on accrued benefits, if applicable.

### PPA discounting method

The plan sponsor must choose between full yield curve spot rates or a segmented yield curve of 24-month average corporate bond rates. If the segmented yield curve is selected, the plan sponsor can use either the rates as of the month of the valuation or as of a lookback month, up to 4 months prior to the valuation date. If the full yield curve is selected, the rates as of the month of valuation must be used.

For purposes of this valuation, the following discounting method was used and is assumed to be approved by the plan sponsor:

**Segment rates through the month of December preceding the valuation date, adjusted so each segment rate is no less than the applicable minimum percentage\* of the corresponding 25-year average segment rate for the calendar year that contains the first day of the plan year and no more than the applicable maximum percentage\*\* of that 25-year average segment rate. The 25-year average cannot be less than 5.0% prior to application of the corridor.**

### Asset valuation method

Plan assets for purposes of this actuarial valuation are valued under the Asset Averaging method, including, if applicable, discounted receivable contributions. The value is equal to the average of the fair market value of assets on the valuation date and the adjusted fair market value (including expected earnings) for the two earlier annual determination dates. Expected earnings are calculated using a rate no greater than the third segment rate of the segmented yield-curve in effect at the beginning of each valuation year. The resulting average value must fall between 90 and 110 percent of the fair market value of assets on the valuation date.

\* Minimum is 95% through 2030, decreasing 5% per year beginning in 2031 until 70% is reached in 2035

\*\* Maximum is 105% through 2030 and increasing 5% per year beginning in 2031 until 130% is reached in 2035

## Rationale for significant assumptions

### Economic assumptions

- **Expected return on plan assets:** The assumption was selected by the client with input from their investment advisor. We believe the assumption is reasonable as it falls within a reasonable range of expected returns for the plan's asset allocation based on capital market assumptions.
- **ASC 960 pre-retirement discount rate:** This assumption is based on the **expected return on plan assets** assumption.
- **ASC 960 post-retirement discount rate:** The lump sum conversion interest is based on the long-term expectation of lump sum rates based on yields on high quality corporate bonds. The lump sum conversion mortality is based on the IRS lump sum mortality table for the current plan year.

# Actuarial assumptions

## Demographic Assumptions

- **ASC 960 mortality:** The mortality base table and projection scale is based on the most recent mortality table and improvement scale published by the Society of Actuaries (SOA) and in our judgement, adequately reflects expected mortality rates as of the measurement date. The SOA elected not to release a new mortality scale for 2023 which would have included mortality data affected by the COVID-19 pandemic, but instead will continue to study emerging mortality experience and assess what mortality improvement scale options might be considered to be implemented in the future. As such, we have decided not to reflect any adjustments to the most recent mortality improvement scale. The plan's relatively small size would not support a credible mortality study.
- **Termination:** We believe that this assumption is representative of anticipated future experience. Historically, this assumption has not produced significant gains or losses for the plan. In addition, based on discussions with the plan sponsor, significant changes in termination patterns are not expected.
- **Retirement:** We believe that this assumption is representative of anticipated future experience. Historically, this assumption has not produced significant gains or losses for the plan. In addition, based on discussions with the plan sponsor, significant changes in retirement patterns are not expected.

## Miscellaneous assumptions

- **Expenses:** The assumption is based on the expectation of expenses to be paid out during the plan year [assuming expenses will be similar to the prior year.], based on actual PBGC expenses projected for the year, and assuming non-PBGC related expenses will be similar to the prior year.
- **Form of payment:** We believe that this assumption is representative of anticipated future experience. Historically, this assumption has not produced significant gains or losses for the plan.
- **Spouse's age and percent married:** The employer does not have enough credible data to analyze spousal demographics. These assumptions are based on the actuary's experience with similar plans.

## Actuarial cost method

### Funding target and target normal cost

An actuarial cost method allocates the expected cost of a pension plan on a year-by-year basis. The primary objective is to accumulate enough assets prior to each participant's retirement to provide the promised pension benefits.

The Pension Protection Act of 2006 (PPA) requires plan sponsors to use the Traditional Unit Credit actuarial cost method in which the estimated accrued benefit is based on service and, if applicable, earnings as of the valuation date. The funding target is equal to the actuarial present value of all accrued benefits as of the valuation date. The target normal cost is the actuarial present value, as of the valuation date, of the expected increases in projected accrued benefits attributable to service expected to be completed during the plan year (i.e., if applicable, one year's salary growth is reflected in the determination of target normal cost).

For tax deduction purposes, the funding target may reflect the value of future pay increases on accrued benefits, if applicable.

### PPA discounting method

The plan sponsor must choose between full yield curve spot rates or a segmented yield curve of 24-month average corporate bond rates. If the segmented yield curve is selected, the plan sponsor can use either the rates as of the month of the valuation or as of a lookback month, up to 4 months prior to the valuation date. If the full yield curve is selected, the rates as of the month of valuation must be used.

For purposes of this valuation, the following discounting method was used and is assumed to be approved by the plan sponsor:

**Segment rates through the month of December preceding the valuation date, adjusted so each segment rate is no less than the applicable minimum percentage\* of the corresponding 25-year average segment rate for the calendar year that contains the first day of the plan year and no more than the applicable maximum percentage\*\* of that 25-year average segment rate. The 25-year average cannot be less than 5.0% prior to application of the corridor.**

### Asset valuation method

Plan assets for purposes of this actuarial valuation are valued under the Asset Averaging method, including, if applicable, discounted receivable contributions. The value is equal to the average of the fair market value of assets on the valuation date and the adjusted fair market value (including expected earnings) for the two earlier annual determination dates. Expected earnings are calculated using a rate no greater than the third segment rate of the segmented yield-curve in effect at the beginning of each valuation year. The resulting average value must fall between 90 and 110 percent of the fair market value of assets on the valuation date.

\* Minimum is 95% through 2030, decreasing 5% per year beginning in 2031 until 70% is reached in 2035

\*\* Maximum is 105% through 2030 and increasing 5% per year beginning in 2031 until 130% is reached in 2035

## Summary of plan provisions

The following is a summary of the principal plan provisions upon which this actuarial valuation is based. This summary should not be relied on to provide benefit estimates or other information to participants.

|                                      |  |
|--------------------------------------|--|
| Effective Date of Plan               | January 1, 2008.   |
| Eligibility                          | <p>All employees except Leased Employees become Participants of this Plan after completion of one year of service, and attainment of age 21. Service with an organization in the health and social service field counts towards the service requirement for eligibility.</p> <p>The service requirement has been waived for any employee who has been a participant in any prior plan.</p> <p>Effective on or after March 15, 2005, no new Employees are eligible for the Plan.</p>  |
| Compensation                         | <p>Compensation includes all wages, salaries, fees and amounts received for personal service rendered in the course of employment prior to March 15, 2005. Compensation includes excludes contributions made to a salary reduction or deferred compensation plan. Prior to 2002, compensation for any plan year, for benefit purposes, is limited to \$150,000 adjusted for increases prescribed by the Secretary of the Treasury. For the 2002 plan year, EGTRRA increased prospectively the limit to \$200,000 annually. For prospective years after 2002, the \$200,000 limit will be indexed for inflation. For 2024, the compensation limit is \$345,000.</p> |
| Final Average Earnings               | <p>The highest average monthly compensation for 3 consecutive completed calendar years of employment within the last consecutive 10 completed calendar years of service, but shall not include any compensation earned after March 15, 2005.</p>   |
| Social Security Average Monthly Wage | <p>Monthly average of the Social Security Taxable Wage Bases for the 35 calendar years ending with the year the Participant attains Social Security Retirement Age.</p>  |
| Benefit Accrual Service              | <p>Years and months of participation under this Plan or any prior plan of this Employer.</p> <p>Effective March 15, 2005, Benefit Accrual Service shall cease to accrue under this plan for all participants.</p>  |
| Vesting                              | <p>100% upon completion of 3 years of service or upon attaining age 55</p>   |

## Summary of plan provisions

|                             |   |
|-----------------------------|---|
| Retirement Dates            |   |
| Normal                      | The first of the month coincident with or next following the Participant's 65th birthday.   |
| Early                       | The first of the month on or after attainment of age 55 (but before age 65), on which the Participant elects to retire.   |
| Deferred                    | The first of any month following Normal Retirement Date on which the Participant elects to retire.  |
| Benefit Formula             | <p>The monthly Normal Retirement benefit is determined as follows:</p> <p>The sum of 1.625% of Final Average Earnings multiplied by Benefit Accrual Service completed, and 0.5% of Final Average Earnings in excess of the Social Security Average Monthly Wage multiplied by Benefit Accrual Service not greater than 35 years.</p>  |
| Accrued Benefit             | <p>The Accrued Benefit is computed under the Benefit Formula above using Final Average Earnings and Social Security Average Monthly Wage at date of determination assuming the Participant continues to earn Benefit Accrual Service until his Normal Retirement Age or date of determination, if later, and adjusted as follows:</p> <p>The portion of the retirement benefit based on total Benefit Accrual Service is multiplied by a fraction (not to exceed one) equal to actual Benefit Accrual Service at Normal Retirement Age.</p> |
| Early Retirement Benefit    | <p>The Accrued Benefit reduced by 1/15 for each of the first 5 years and 1/30 for each of the next 5 years by which the Early Retirement Date precedes the Normal Retirement Date.</p> <p>A Participant with 25 "years of service" may retire early at age 62 with no reduction in Accrued Benefit, or reductions of 1/15 for each of the first 5 years and 1/30 for each of the next 2 years by which the Early Retirement Date precedes age 62. For this purpose "years of service" means years of employment with the Employer.</p>      |
| Deferred Retirement Benefit | The Accrued Benefit reflecting Final Average Earnings and Benefit Accrual Service to the Deferred Retirement Date.  |

## Summary of plan provisions

|                            |  |
|----------------------------|--|
| Maximum Benefit            | The annual benefit shall not exceed the lesser of (i) \$160,000 indexed after 2002 for inflation adjustments and (ii) 100% of the average compensation for the 3 consecutive years producing the highest average. For 2024, the dollar amount of \$275,000 is in the form of a non-refund life annuity. This amount is adjusted to reflect commencement before age 62 or after age 65 or for forms of payment other than a non-refund life annuity and Cost of Living Supplements, if any. It is prorated for less than 10 years of participation in the Plan. |
| Minimum Accrued Benefit    | The Accrued Benefit computed under the provisions of the plan as of the latest amendment adoption date.  |
| Normal Form of Payment     | A non-refund monthly life annuity.   |
| Automatic Form of Payment  | For a married Participant, a monthly Joint and 66 2/3% Survivor with 120 months certain and continuous annuity actuarially equivalent to the monthly benefit in the normal form.   |
| Optional Forms of Payment  | The Plan provides other possible forms of annuity, all actuarially equivalent to the normal form of payment.   |
| Lump Sum                   | <p>The Plan allows Participants to receive a single lump sum in lieu of a monthly annuity at retirement. The actuarial basis for determining the lump sum is different than for other optional forms.</p> <p>For the 2024 plan year, the interest rate is 100% of the monthly spot segment rates based on high quality corporate bonds and mortality using the 2024 Unisex Mortality Table specified in IRS Notice 2023-73.</p>  |
| Cost of Living Supplements | None.  |

**Statement by Enrolled Actuary**

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
