Report of Independent Auditors

The Retirement Plan Investment Board of FedEx Corporation
The Flying Tiger Line Inc.
Variable Annuity Pension Plan for Pilots

Opinion

We have audited the financial statements of The Flying Tiger Line Inc. Variable Annuity Pension Plan for Pilots (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statement of changes in net assets available for benefits for the year ended December 31, 2024, and the related notes (collectively referred to as the “financial statements”).

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan at December 31, 2024 and 2023, and the changes in its net assets available for benefits for the year ended December 31, 2024, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

**Shape the future
with confidence**

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.

**Shape the future
with confidence**

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

1. Description of Plan

The following description of The Flying Tiger Line Inc. Variable Annuity Pension Plan for Pilots (the Plan) is provided for general information purposes only. More complete information regarding the Plan's provisions may be found in the plan document.

General

The Plan is a defined contribution money purchase pension plan sponsored by Federal Express Corporation and administered by FedEx Corporation (FedEx) under the provisions of Section 401(a) of the Internal Revenue Code (IRC). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended. Effective June 30, 1982, employer contributions to the Plan ceased, the Plan was frozen, and no new participants could enter the Plan. Participant contributions were not permitted after December 31, 1989.

Plan Administration

Overall responsibility for administering the Plan rests with the Retirement Plan Investment Board (Investment Board), which was appointed by the Compensation Committee of the Board of Directors of FedEx. Effective June 1, 2024, the Investment Board delegated responsibility for day-to-day administrative activities and vendor management to the Retirement Services Department of Federal Express Corporation; prior to this date, these responsibilities were handled by the Retirement Services Department of FedEx Services, Inc.

Under a trust agreement, effective October 1, 2010, State Street Corporation (the Trustee) was appointed trustee for the Plan. The trust agreement authorizes the Trustee to invest and reinvest all or part of the Plan's assets in accordance with the investment funds selected by the Investment Board. The Trustee has been granted authority to make payments from the Plan assets as directed by the Investment Board.

Benefits

The Plan uses a unit accounting methodology to determine the retirement benefit. Prior to the Plan being frozen, the number of units for each participant was based on compensation for that participant and the unit value as of the contribution date. Each year, a valuation is performed as of December 31 to determine a new unit value. The unit value at December 31, 2024 and 2023, was \$829 and \$827, respectively.

The Flying Tiger Line Inc.
Variable Annuity Pension Plan for Pilots

Notes to Financial Statements (continued)

1. Description of Plan (continued)

When a benefit is paid from the Plan, the number of units is converted to an account balance at the unit value, as defined, and either paid out as a lump sum or converted to an annuity. Each participant has a full and immediate vested interest in the value of the contributions made into the Plan.

Other significant features of the Plan include an early retirement option at age 45, a special early retirement option at age 50 with 25 years of service, a disability retirement benefit that is the actuarial equivalent of the normal retirement benefit, a death benefit payment, and optional forms of retirement benefit payments. Normal retirement age is 60.

Benefits are generally paid upon termination of service due to death, disability, or retirement. Participants can elect to receive the value of their account balance in the form of a lump-sum distribution or installments to be paid over no longer than the life expectancy of the participant or the life expectancy of the participant and his or her beneficiaries. A participant may request that all or any portion of his or her distribution be paid directly to an eligible retirement plan.

Administrative Expenses

Certain administrative functions are performed by employees of FedEx. No such employee receives compensation from the Plan. Administrative expenses, including actuary and Trustee fees, are paid from the assets of the FedEx Corporation Employees' Pension Master Trust (Master Trust).

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are presented on the accrual basis of accounting.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Investment Valuation and Income Recognition

The investments of the Plan reside in the Master Trust. The Master Trust invests in a variety of investments and was established for the investment of assets of the Plan and several other FedEx-sponsored plans. All participating plans have an undivided interest in all the investments held in the Master Trust. Investments in the Master Trust are recorded at fair value. The fair value of the Plan's interest in the Master Trust is based on information reported by the issuer of the trust at year-end of the underlying assets. See Note 3 for further discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded when earned. Dividend income is recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held by the Master Trust during the year.

Plan Termination

Although it has not expressed any intent to do so, FedEx has the right under the Plan to terminate the Plan subject to the provisions of ERISA. In the event of termination, each participant will receive his or her vested account balance.

Derivative Financial Instruments

The Master Trust, through activities of certain of its investment managers, uses derivative financial instruments on a discretionary basis to improve investment returns and manage exposure to market risk. In all cases, investment managers are prohibited from using derivatives for speculative purposes. Futures, options, and swaps used to mitigate interest rate exposure are the most common derivatives used in the Master Trust. Changes in the fair value of the derivative financial instruments are recorded separately from the related investment. See Note 4 for additional derivative disclosures.

New Accounting Pronouncements

There are no new accounting pronouncements applicable.

Notes to Financial Statements (continued)

3. Master Trust Investment Accounts

At December 31, 2024 and 2023, the Plan's interest in the net assets of the Master Trust was approximately 0.12% and 0.14%, respectively. Investment income and expenses relating to the Master Trust are allocated pro rata, based on the relative fair values of the assets of each of the plans participating in the Master Trust.

The Plan's fair value measurements are based on the following three levels of inputs used to measure fair value:

Level 1 – Inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 – Inputs are quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 – Valuations are derived from unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Investments are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The following is a description of the valuation methodologies used for investments measured at fair value:

Cash, cash equivalents, foreign currency, and collective trust funds: cash and cash equivalents. Level 1 investments include cash, cash equivalents, and foreign currency valued using exchange rates. Level 2 investments include short-term investment funds, which are collective trust funds priced at a constant value by the administrator of the funds.

Common stock, preferred stock, and mutual funds. Level 1 investments are valued at the closing price or last trade reported on the major market on which the individual securities are traded.

Corporate bonds, U.S. government securities, and other bonds. The Plan determines the fair value of Level 2 corporate bonds, U.S. and non-U.S. government securities, and other fixed-income securities by using bid evaluation pricing models or quoted prices of securities with similar characteristics.

3. Master Trust Investment Accounts (continued)

Swaps, options, and futures. The derivative instruments include futures contracts, interest rate swaps, credit default swaps, and option contracts. All derivatives are recorded at fair value based on observable inputs and represent less than 1% of the Master Trust at December 31, 2024 and 2023.

Limited partnerships. Limited partnership in Level 3 is valued at net asset value. The valuation of Level 3 investments requires significant judgment due to the absence of quoted market prices, the inherent lack of liquidity, and the long-term nature of such assets. Investments in private equity, debt, real estate, hedge funds, and other private investments are valued at estimated fair value based on quarterly financial information received from the investment advisor and/or general partner. These estimates incorporate factors such as contributions and distributions, market transactions, market comparables, and performance multiples.

Collective trust funds (excluding collective trust funds: cash and cash equivalents), commingled funds, and limited partnerships. Investments are valued using net asset value as the practical expedient.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The other investments measured at net asset value, practical expedient caption below, include investments in various collective trust funds and commingled funds totaling \$10.5 billion and \$9.7 billion at December 31, 2024 and 2023, respectively. The primary strategies are described below:

- Equity funds seek to match or exceed the investment return over the long term of various equity benchmarks, including the S&P 500, MSCI ACWI, MSCI EFEA, and MSCI EM. Actively managed funds will have greater tracking errors to the benchmarks as compared with index funds (\$4.5 billion and \$4.3 billion at December 31, 2024 and 2023, respectively). Redemption requirements range from no restrictions on index funds to 90 days on certain international strategies.

3. Master Trust Investment Accounts (continued)

- Government bond funds will seek to closely replicate the performance of the U.S. Treasury Long Government Bond Index and the ICE Leveraged U.S. Treasury Indices (\$1.8 billion and \$1.7 billion at December 31, 2024 and 2023, respectively). There are no redemption requirements.
- Funds in the opportunistic credit category will consist largely of higher yield fixed-income investments, including global high yield, emerging market debt, private credit, and other securitized debt. Benchmarks for these funds will vary but can include the Bloomberg Barclay's High Yield Index, Credit Suisse Leveraged Loan Index, JP Morgan EMBI Global Diversified Index, and JP Morgan CEMBI Broad Diversified Index. These funds are actively managed and, returns display tracking errors from their respective benchmarks (\$1.6 billion and \$1.5 billion at December 31, 2024 and 2023, respectively). There is a range from monthly to quarterly notices for redemptions.
- Funds categorized as hedge funds will seek to provide diversified investment returns over the long term that are not correlated with equity or bond funds and have an absolute return objective. These funds typically have restricted liquidity terms ranging from monthly to annual redemption dates. Some of these vehicles have initial lockup periods ranging from one to two years (\$1.9 billion and \$1.7 billion at December 31, 2024 and 2023, respectively). Initial lockup term is zero to two years (one year typical); redemptions thereafter range from monthly to annually (quarterly most typical).
- Infrastructure investments – a form of “real assets,” which contain physical assets like bridges, roads, sewage systems, utilities, and energy (\$684 million and \$547 million at December 31, 2024 and 2023, respectively). These funds have lockup periods of three to four years (can be redeemed sooner but must pay a penalty). Redemptions thereafter are either quarterly or semiannually with 90 days' notice. These funds are open-ended, meaning there is no fixed investment or disposition period.

The other investments measured at net asset value, practical expedient caption below, also include investments in limited partnerships with broad and varied portfolios of private equity, private real estate, and private credit investments totaling \$1 billion and \$972 million at December 31, 2024 and 2023, respectively. The expected remaining life of these investments is in excess of five years.

4. Derivatives

As discussed in Note 2, the Master Trust, through the activities of certain of its investment managers, uses derivative financial instruments on a discretionary basis to improve investment returns and manage exposure to market risk.

The intent is to use derivative financial instruments as economic hedges to manage interest rate risk associated with certain of the Plan's investment assets. The Plan's fiduciaries do not anticipate any material adverse effect on the Plan's financial position resulting from its involvement in these instruments.

At December 31, 2024 and 2023, the Master Trust's investments in derivatives include money market fund futures, treasury note/treasury bond futures, interest rate swaps and options, and credit default swaps. The 2024 plan year derivative activity consisted of \$16.1 billion and \$23.3 billion in purchases and sales, respectively. The 2023 plan year derivative activity consisted of \$12.9 billion and \$15.1 billion in purchases and sales, respectively. Gains (losses) are included on the Master Trust's statements of changes in net assets available for benefits as net appreciation in fair value of investments.

The following table presents the effect of (losses) gains with respect to these derivative instruments (in millions):

	December 31	
	2024	2023
Futures	\$ (27)	\$ 15
Swaps	5	(8)
Options	–	8

Futures contracts within the Master Trust consist of Fed fund futures and Treasury bond and note futures that are used to manage interest rate exposures. These contracts are agreements between two parties to buy or sell a security at a set price on a future date and are standardized and exchange traded. The parties settle the futures on a daily basis in cash. The futures are based on short-term interest rates and do not require cash collateral because they do not require the delivery of an asset at expiration. The notional amount related to futures contracts outstanding at December 31, 2024 and 2023, was \$494 million and \$36 million, respectively.

4. Derivatives (continued)

The Master Trust's investments in interest rate swaps are instruments in which each counterparty agrees to pay either a fixed or floating rate denominated in a particular currency to the other counterparty based on the notional amount of the interest rate swap. The notional amount is generally not exchanged between counterparties but is used for calculating the size of cash flows to be exchanged. Interest rate swaps are not settled daily, and the fair value and exposure to gain or loss at any point in time is based on the daily price movement. The notional amount of interest rate swaps outstanding at December 31, 2024 and 2023, is \$(2) million and \$2.8 million, respectively. The interest rate swaps are backed by their own collateral and the amount of collateral required and recorded at December 31, 2024 and 2023, was not significant to the Master Trust investments.

The Master Trust's investments in credit default swaps are instruments in which, for a fee, a protection seller agrees to reimburse a protection buyer for any losses that occur due to a credit event on a reference entity. If there is no credit default event or settlement trigger, as defined by the specific derivative contract, then the protection seller makes no payments to the protection buyer and receives only the contractually specified fee. However, if a credit event occurs as defined in the specific derivative contract sold, the protection seller will be required to make a payment to the protection buyer. The notional amount related to credit default swaps outstanding at December 31, 2024 and 2023, is \$1.4 million and \$115 thousand, respectively.

The Master Trust's investments in option contracts consist of options to purchase or write interest rate swaps. These instruments are agreements between two parties giving the owner, under a purchased option, the right, but not the obligation, to buy or sell a specified item at a fixed price during a specified period, and under a written option the obligation to sell or buy a specified item at a fixed price. Options may be written or purchased to help manage exposure to the securities markets. An option writer bears the market risk of an unfavorable change in the price of the underlying instrument. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid or received from purchasing or writing options are recorded as realized gains or losses when the options expire. The difference between the premium and the amount paid or received on effecting a closing purchase or sale transaction is also treated as a realized gain or loss. If an option is exercised, the premium paid or received is recorded as a realized gain or loss if sold or an adjustment to cost of the underlying if acquired upon exercise. The notional amount related to the option contracts outstanding at December 31, 2024 and 2023, was \$512 thousand and \$(4.7) million, respectively.

Total net derivatives	<u>\$ 12,642</u>	<u>\$ 14,962</u>

5. Risks and Uncertainties

The Master Trust invests in various investment securities. Investment securities are exposed to various risks, such as market, interest rate, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported on the statements of net assets available for benefits. Additionally, the Master Trust is exposed to risks from unfavorable changes in interest rates or market values of the securities underlying derivative financial instruments and credit risk in the event of nonperformance by the counterparties to such derivative instruments. Exposure to credit risk is partially mitigated by requiring settlement with counterparties as frequently as daily and/or requiring settlement based upon preestablished dollar amount limits with those counterparties. The Master Trust does not anticipate nonperformance by the counterparties and generally does not require counterparty collateral. At December 31, 2024 and 2023, FedEx has future investment commitments of approximately \$1.1 billion and \$963 million, respectively, related to limited partnerships and venture capital investments held by the Master Trust.

6. Income Tax Status

The Plan has received a favorable determination letter from the Internal Revenue Service (IRS) dated August 27, 2014, stating that the Plan is qualified under Section 401(a) of the IRC, and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualified status. The plan administrator believes the Plan is operated in substantial compliance with the applicable requirements of the IRC and has indicated that it will take the necessary steps, if any, to bring the Plan's operations into full compliance with the Code. The plan administrator believes that the Plan, as amended, is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. Plan management has analyzed the tax positions taken by the Plan and has concluded that there are no uncertain positions taken or expected to be taken. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

7. Subsequent Events

Management evaluated subsequent events for the Plan through October 9, 2025, the date the accompanying financial statements were available to be issued.
