Schedule SB, Part V - Statement of Actuarial Assumptions and Methods

**Plan Name: JWM Environmental, Inc. Pension Plan EIN: 41-1875416 PN: 001**

### 3) Actuarial methods

#### Cost method

Minimum and maximum contribution                      Unit credit

#### Asset valuation

Actuarial value of asset (funding basis)                      Market value of assets plus discounted contributions receivable plus smoothed investment gains and losses over prior two plan years. The smoothed asset value is limited to no more than 110% and no less than 90% of the market value of assets plus discounted contributions receivable.

#### Models Used

The results in this report are based on an actuarial valuation model with three components as outlined in Actuarial Standard of Practice No. 56 - Modeling (ASOP 56):

1. Information inputs including the data, assumptions, methods, and plan provisions outlined in this report,
2. Processing by ProVal<sup>®</sup> actuarial software, and
3. Our report template which translates the ProVal<sup>®</sup> output into valuation results.

The model is intended to convert the information input above to usable actuarial valuation results. We have reviewed the software's output for reasonableness, and have independently checked sample one-person output where appropriate, but have otherwise relied on it.

### 4) Changes in assumptions and methods since last year

- The funding interest segment rates and mortality table were changed as required by law.

**Statement by Enrolled Actuary**

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Part V - Statement of Actuarial Assumptions and Methods

**Plan Name: JWM Environmental, Inc. Pension Plan EIN: 41-1875416 PN: 001**

### 3) Actuarial methods

#### Cost method

Minimum and maximum contribution                      Unit credit

#### Asset valuation

Actuarial value of asset (funding basis)                      Market value of assets plus discounted contributions receivable plus smoothed investment gains and losses over prior two plan years. The smoothed asset value is limited to no more than 110% and no less than 90% of the market value of assets plus discounted contributions receivable.

#### Models Used

The results in this report are based on an actuarial valuation model with three components as outlined in Actuarial Standard of Practice No. 56 - Modeling (ASOP 56):

1. Information inputs including the data, assumptions, methods, and plan provisions outlined in this report,
2. Processing by ProVal<sup>®</sup> actuarial software, and
3. Our report template which translates the ProVal<sup>®</sup> output into valuation results.

The model is intended to convert the information input above to usable actuarial valuation results. We have reviewed the software's output for reasonableness, and have independently checked sample one-person output where appropriate, but have otherwise relied on it.

### 4) Changes in assumptions and methods since last year

- The funding interest segment rates and mortality table were changed as required by law.
