# HRL Pension Plan For Bargained Employees

EIN/PN: 95-4663143 / 002

## Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

### Funding assumptions selection and rationale

The assumptions for funding purposes were selected by the plan's enrolled actuary. The asset valuation method was selected by the plan sponsor with the actuary's advice and is an acceptable method under the applicable provisions of the Internal Revenue Code and associated regulations.

Actuarial Standards of Practice No. 27 ("ASOP 27") provides guidance to actuaries on economic assumptions for measuring pension obligations. Actuarial Standards of Practice No. 35 ("ASOP 35") provides guidance to actuaries on demographic and other on economic assumptions for measuring pension obligations. Under these ASOPs, for each assumption that has a significant effect on the measurement and that the actuary has selected, the actuary should disclose the information and analysis used to support the actuary's determination that, in the actuary's professional judgement, it is reasonable for the purpose of the measurement. No information or analysis is needed for any assumption prescribed by law or regulation.

The mortality assumption used for funding in this valuation reflects mortality tables mandated by PPA as specified in IRS Regulation 1.430(h)(3)-1, as amended in the Federal Register on October 20, 2023, in TD 9983, 88 FR 72357, applied on a static basis.

The significant economic assumptions that are used for this measurement are the funding interest rates, the salary increases, cost-of-living and expected rate of return on assets (EROA). The funding interest rates assumptions were updated in accordance with PPA. These rates are constrained in accordance with ARP. The salary increase assumption is based on an experience study from 2022. The cost-of-living assumption was updated to 2023 to better reflect anticipated inflation experience. The EROA was provided by plan sponsor and checked for reasonability with tools provided by Gallagher's Financial Risk Management ("FRM") team. A spreadsheet tool created by the FRM team converts averages, standard deviations, and correlations from Gallagher's Capital Market Assumptions ("CMA") that are used for stochastic forecasting into approximate percentile ranges for the arithmetic and geometric average returns. It is intended to suggest possible reasonable ranges for EROA without attempting to predict or select a best estimate rate of return. Based on our analysis for each of the assumptions, we believe these assumptions are reasonable for the purpose of the measurement.

The demographic and other noneconomic assumptions that have a significant effect on this measurement, and are chosen by the enrolled actuary, are the retirement rates, withdrawal rates, and frequency of optional payment forms. We perform periodic experience studies to assess the reasonableness of these assumptions and set those rates based on analysis and discussions with the plan sponsor. We also monitor these assumptions annually through gain/loss analysis. Based on the actuary's gain-loss analysis, including consistency with other assumptions used in the valuation, the actuary believes that these assumptions are reasonable for the purpose of the measurement. The remaining assumptions do not have a significant impact on the plan's Funding Target.

### **Use of Models**

Actuarial Standard of Practice No. 56 ("ASOP 56") provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. Gallagher uses third-party software in the performance of annual actuarial valuations and projections. The model is intended to calculate the liabilities associated with the provisions of the plan using data and assumptions as of the measurement date under the funding rules specified in this report. Further, the model applies those funding rules to the liabilities derived and other inputs, such as plan assets and contributions, to generate many of the exhibits found in this report. Gallagher has an extensive review process whereby the results of the liability calculations are checked using detailed sample output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other funding outputs are similarly reviewed in detail and at a high level for accuracy, reasonability and consistency with prior results. Gallagher also reviews the model when significant changes are made to the software. The review is performed by experts within the company who are familiar with applicable funding rules as well as the manner in which the model generates its output.

### **Future actuarial measurements**

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report. However, in accordance with ASOP 51, an assessment of risks for the plan was performed.

\* Used for minimum funding and benefit restriction purposes.

\*\* Used for maximum tax-deduction reporting purposes.

\*\*\* The Plan elected to use the Alternative Premium Funding Target starting with the 2021 plan year and the election cannot be revoked until the 2026 plan year.

#### Mortality

Mortality tables mandated by applicable law and regulation as specified in IRS Regulation 1.430(h)(3)-1, as amended in the Federal Register on October 20, 2023, in TD 9983, 88 FR 72357, applied on a static basis, using the blended annuitant/non-annuitant table applicable to small plans.

#### Actuarial cost method

The Funding Target is the present value of accrued benefits based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including expected plan administrative expenses to be paid from plan assets during the year.

#### Cost-of-living

3.00% per year.

The cost-of-living assumption is the enrolled actuary's best estimate. The assumption was updated in 2023 to better reflect anticipated inflation experience.

#### Frequency of optional payment forms

Based on 2016 experience study. The 2022 experience study review resulted in no change in assumption.

#### Marital percentage

85% of participants are assumed to be married at death. Husbands are assumed to be 3 years older than their wives. The 2022 experience study review resulted in no change in assumption.

#### Expenses

Expected plan administrative expenses of \$96,981 were added to the Target Normal Cost. Expected plan administrative expenses were determined as prior year administrative expenses (excluding prior year PBGC premium), increased by 3.00% to reflect inflation, plus current year PBGC premium.

### Non-Prescribed Funding Assumptions and Methods (continued)

#### Asset valuation method

The Actuarial Value of Assets is market value as of the valuation date, including the discounted value of accrued contributions, reduced by 2/3 of the gain/(loss) for the immediately preceding plan year and reduced by 1/3 of the gain/(loss) for the plan year before that. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by current law and regulation to be not greater than the applicable third Segment Rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

The expected asset return assumption was based on analysis of long term expected returns for the asset classes in which the plan's assets were invested as of the measurement date.

	Actuary's Assumption	Third Segment Rate	Reflecting PPA Limit
2024 Expected Return	7.00%	5.59%	5.59%
2023 Expected Return	7.00%	5.74%	5.74%

Prior Year:	2023 IRC Section 417(e)(3)(D) mortality

#### Summary of Changes from the January 1, 2023 Valuation

- The interest rates were updated in accordance with IRS published rates applicable to the valuation date. These rates are constrained in accordance with relevant legislation.
- The mortality assumption was updated according to applicable law and regulation as specified in IRS Regulation 1.430(h)(3)-1, as amended in the Federal Register on October 20, 2023, in TD 9983, 88 FR 72357, applied on a static basis, using the blended annuitant/non-annuitant table applicable to small plans.
- The mortality assumption for converting to optional forms subject to IRC Section 417(e) was updated from 2023 IRS 417(e) Applicable Mortality to 2024 IRS 417(e) Applicable Mortality.

The changes in the assumptions listed above increased the Funding Target by approximately \$19,000.
