Schedule SB, Part V – Statement of Actuarial Assumptions / Methods

Actuarial Cost Methods:

Traditional Unit Credit

The actuarial cost method used in the valuation was the traditional unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. The normal cost is zero for active participants whose credited service equals or exceeds the plan maximum, and for non-active participants.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded liability is the actuarial accrued liability less the valuation assets.

The total annual cost of the plan is the normal cost plus an amount to amortize the shortfall amount.

Projected Unit Credit

The actuarial cost method used in the development of the maximum contribution and the at-risk liabilities, if applicable, was the projected unit credit cost method.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumptions, divided by the participant's expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

Asset Valuation Method:

The actuarial value of the assets is determined as the market value of the plan's assets at the valuation date and includes contributions receivable.

Participants included in valuation:

All employees who are eligible to participate as of the valuation date, plus retirees, beneficiaries and terminated participants entitled to current or future benefits.

Schedule SB, Part V – Statement of Actuarial Assumptions / Methods (Continued)

Discount Rates:	<i>ARPA basis</i> Interest rate basis for the 2024 valuation is 4.75% / 4.87% / 5.59%. The Plan's effective rate, based on the ARPA segment rates, is 4.87% for 2024.
Expected Rate of Return on Plan Assets:	The expected return assumption is the applicable 3 rd segment rate as detailed in Notice 2009-22 (5.59% for 2024).
Mortality:	No pre-retirement mortality was assumed.
Retirement Age:	Age 65
Turnover:	No turnover was assumed.
Salary Scale:	3%
Disability:	None assumed.
Percent married:	100%; female spouse is assumed to be 3 years younger than male spouse.
Conversion of Hypothetical Account to an Annuity:	Mortality – 83 IAM Mortality Table, male rates, set back 3 years Interest – 5%
Lump Sum Assumptions:	100% of participants elect a lump sum; Hypothetical Accounts are assumed to grow with 3% interest each year.
Administrative Expenses:	Administrative expenses are estimated based on the prior year's expenses. For 2024, this amount is \$7,500.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
