## **Report of Independent Auditors**

AbbVie Board of Review

AbbVie Investment Committee

AbbVie Pension Plan for Former BASF and Former Solvay Employees

### **Scope and Nature of the ERISA Section 103(a)(3)(C) Audit**

We have performed audits of the financial statements of AbbVie Pension Plan for Former BASF and Former Solvay Employees (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes (collectively referred to as the “financial statements”).

Management, having determined it is permissible in the circumstances, has elected to have the audits of the financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2024 and 2023, and for the years then ended, stating that the certified investment information, as described in Note G to the financial statements, is complete and accurate.

### **Opinion**

In our opinion, based on our audits and on the procedures performed as described in the Auditor’s Responsibilities for the Audit of the Financial Statements section

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

## **Basis for Opinion**

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

## **Responsibilities of Management for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

## **Auditor's Responsibilities for the Audit of the Financial Statements**

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

NOTES TO FINANCIAL STATEMENTS

**NOTE A - DESCRIPTION OF THE PLAN**

The following description of the AbbVie Pension Plan for Former BASF and Former Solvay Employees (the “Plan”) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan’s provisions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”). Copies of the Plan document can be obtained from the Plan’s sponsor.

***General***

The Plan was originally established by Abbott Laboratories (“Abbott”) on March 2, 2001 as the “Abbott Laboratories Pension Plan for Former BASF Employees,” as a result of Abbott’s acquisition of BASF Corporation’s (“BASF’s”) global pharmaceutical business. The intent of the Plan was to duplicate the pension benefits that had been available to BASF employees, under their participation in the BASF Corporation Salaried Employees’ Pension Plan (the “BASF Plan”), whose employment transferred to Abbott under the terms of the acquisition. Except for the Solvay group (see next paragraph), no new employees were added to this Plan, but new employees were instead covered by a separate Abbott-sponsored plan.

On February 16, 2010, Abbott completed its acquisition of Solvay’s global pharmaceuticals business, and employees of Solvay whose employment transferred to Abbott under the terms of the acquisition also became participants of the Plan. At that time, the Plan was amended to provide the Solvay group with similar benefit provisions to those of their former plan, the Solvay America Companies’ Pension Plan (the “Solvay Plan”), with only slight modifications for compliance and administrative purposes. The name of the Plan was changed to “Abbott Laboratories Pension Plan for Former BASF and Former Solvay Employees” to reflect the addition of the Solvay group and their related Plan benefits.

On January 1, 2013, Abbott separated into two publicly traded companies, and AbbVie Inc. (“AbbVie” or the “Company”) was formed. Effective January 1, 2013, AbbVie became the Plan sponsor, and the Plan was renamed “AbbVie Pension Plan for Former BASF and Former Solvay Employees.” The Plan’s assets are held in the AbbVie Inc. Pension Plan Trust (the “AbbVie Master Trust”) with the assets of the AbbVie Pension Plan, another plan sponsored by AbbVie for AbbVie active employees. Investment decisions concerning Plan assets are made by AbbVie’s Retirement Plans Investment Committee.

The Plan is closed to new entrants.

***Contributions and Funding***

The Company’s funding policy is to make the necessary contributions to satisfy the ERISA minimum funding requirements, as determined by the Plan’s independent actuary. The Plan was in compliance with applicable ERISA minimum funding requirements for the years ended December 31, 2024 and 2023.

***Pension Benefits***

Active employees as of July 1, 2022 who were participating in the Plan as of December 31, 2021 had the opportunity to make a one-time irrevocable election during the period from July 18, 2022 to August 26, 2022 to continue accruing benefit service under the Plan or to have their pension benefits under the Plan frozen as of December 31, 2022 and earn new retirement income benefits beginning January 1, 2023 under the AbbVie Savings Plan, another AbbVie plan (the “Retirement Income Choice event”). Participants who elected during the Retirement Income Choice event to continue to accrue benefit service under the Plan after 2022 are

eligible for additional benefit service under the Plan from and after January 1, 2023. Participants who elected during the Retirement Income Choice event to cease accruing benefit service under the Plan after 2022 are no longer eligible to accrue additional benefit service under the Plan after December 31, 2022, but instead are eligible to participate in the AbbVie Savings Plan Plus (“ASP+”) program. For participants who elected to cease accruing benefit service under the Plan, benefits are frozen effective December 31, 2022, but vesting service will continue to be earned in accordance with Plan terms.

***BASF Plan Pension Benefits***

The Plan provides two types of benefit structures for former BASF employees: (1) a traditional pension benefit and (2) a cash balance pension benefit. Former employees under the BASF Plan hired prior to July 1, 1999, who were employed on January 1, 2000, earn traditional pension benefits unless they elected to earn cash balance pension benefits. If they were hired after June 30, 1999, they earn cash balance pension benefits.

*Traditional Pension Benefits* - At normal retirement of age 65, the monthly benefit amount is equal to the greater of (a) or (b).

- (a) 1.50% of final average earnings, multiplied by the number of full and fractional years of benefit service, less the following: 1.67% of the primary Social Security benefit (as defined in the Plan), multiplied by the number of full and fractional years of benefit service (up to a maximum of 30 years).
- (b) 1.25% of final average earnings, not exceeding the Social Security Wage Base in effect for the calendar year of retirement, multiplied by the number of full and fractional years of benefit service.

*Cash Balance Pension Benefits* - At normal retirement age of 65, a participant’s cash balance account is equal to the sum of (a) plus (b) plus (c), but not less than the benefit accrued under the BASF Plan as of December 31, 1999.

- (a) Opening balance - The balance in the participant’s cash balance account under the BASF Plan as of December 31, 1999.
- (b) Basic credits - Monthly basic credits are added to the cash balance account of a participant who has fewer than 40 years of benefit service and are determined using the sum of the participant’s age and vesting service as of the last day of each month and are applied to the participant’s monthly earnings. The credit percentages are as defined in the Plan.
- (c) Monthly interest credits - Interest credits are added to the cash balance account of the participant each month before reflecting the basic credits for that month. The monthly interest credits are based on the cash balance account balance as of the end of the prior month and the average annual interest rate on 30-year U.S. Treasury securities for the third full calendar month preceding the month for which the interest credit is being determined; however, for months beginning on and after January 1, 2014, the percentage used to determine the interest credit will not be less than 3.04%.

Early retirement, late retirement, vested deferred retirement and pre-retirement survivor benefits are also available under both benefit structures.

The Plan's default form of payment for unmarried participants, is a single life annuity, which provides monthly benefit payments until the retiree's death. The Plan's default form of payment for married participants is a 50% joint and survivor annuity, which provides the participant with monthly payments for his or her life and, following the participant's death, provides the surviving spouse with monthly payments for the remainder of his or her life equal to 50% of the amount paid to the participant. The final benefits under the joint and survivor annuity option are adjusted for actuarial factors based on the ages of the retiree and spouse at the date of retirement. In lieu of the default form of payment, retiring participants may elect alternative payment options, subject to applicable spousal consent requirements for married participants. These options include a lump-sum payment; a single life annuity option (for married participants); 50%, 75%, and 100% joint and survivor annuity options; and 10-year certain and life annuity option.

***Solvay Plan Pension Benefits***

The Plan provides two types of benefit structures: (1) a traditional pension benefit and (2) a cash balance pension benefit. Former Solvay Pharmaceuticals, Inc. employees in the United States, who were age 50 with 10 years of service on January 1, 2005, were grandfathered under the Solvay Plan and earn traditional pension benefits unless they elected to earn cash balance pension benefits. All of the former Solvay Pharmaceuticals, Inc. employees in the United States not grandfathered and covered under the Solvay Plan, but not earning traditional pension benefits, earn cash balance pension benefits.

*Traditional Pension Benefits* - At normal retirement of age 65, the annual amount of a participant's accrued benefit as of any date is equal to (a) minus (b), but not less than zero:

- (a) The product of: (1) the number of years of benefit service limited to 35 years, and (2) the sum of: (i) 1.10% of average annual compensation and (ii) 0.60% of average annual compensation in excess of Social Security covered compensation, as defined by the Plan.
- (b) Carve-out Benefits: The actuarial equivalent of the annual pension payable by the Celanese Retirement Income Plan, the Laporte Pension Plan, the Miles Inc. Salaried Retirement Plan, the Tenneco Inc. Retirement Plan, or the BP Retirement Accumulation Plan for service covered by the respective plans.

*Cash Balance Pension Benefits* - At normal retirement age of 65, a participant's cash balance account is equal to:

For a participant who accumulated a cash balance pension benefit under the Plan prior to April 1, 2012, but not on or after such date, the participant's cash balance pension benefit is frozen effective March 31, 2012 and is equal to the sum of (a) plus (b) plus (c), but not less than the benefit accrued as of December 31, 2004.

- (a) Transferred account balance – The participant's account balance credited with pay credits and interest credits under the Solvay Plan as of the closing transferred to the Plan from the Solvay Plan plus an additional interest credit for the month containing the closing, as defined by the Plan.
- (b) Pay credits – At the end of each month (or, if earlier, on the day immediately preceding the participant's annuity starting date if occurring during the month) prior to April 1, 2012, the participant's cash balance account was credited with a dollar amount equal to a percentage of the participant's compensation paid during that month not in excess of the Social Security Taxable Wage Base and an additional percentage of the participant's compensation paid during that month in excess of the Social Security Taxable Wage Base. The percentage was based on age, plus years of benefit service, and is defined in the Plan.

- (c) Monthly interest credits – At the end of each month prior to April 1, 2012, the participant’s cash balance account was credited with interest on the amount of the cash balance account at the beginning of that month using an interest rate equal to one month of the average annual interest rate on 30-year U.S. Treasury securities for the last three months of the preceding Plan year; however, the annualized interest credit rate was never less than 3% for any Plan year.

For a participant who accumulates a cash balance pension benefit under the Plan on or after April 1, 2012, the participant’s cash balance pension benefit is the greater of (1) the participant’s cash balance account under the Plan as of March 31, 2012 increased thereafter by interest credits under the Plan, in accordance with the above, or (2) the sum of (a) plus (b) plus (c).

- (a) Opening balance – The participant’s cash balance account under the Plan as of March 31, 2012.
- (b) Pay credits – At the end of each month (or, if earlier, on the day immediately preceding the participant’s annuity starting date if occurring during the month), the cash balance account of a participant who has fewer than 40 years of benefit service is credited with a dollar amount equal to a percentage of the participant’s compensation paid during that month. The percentage is based on age, plus years of vesting service, and is as defined in the Plan.
- (c) Monthly interest credits – At the end of each month, the participant’s cash balance account is credited with interest on the amount of the cash balance account at the beginning of that month using an interest rate equal to the average annual interest rate on 30-year U.S. Treasury securities for the third full calendar month preceding the month for which the interest credit is being determined; however, for months beginning on or after January 1, 2014, the interest credit rate will not be less than 3.04%.

Early retirement, delayed retirement, vested deferred retirement, disability retirement and pre-retirement survivor benefits are also available under both benefit structures.

The Plan’s default form of payment for unmarried participants is a single life annuity, which provides monthly benefit payments until the retiree’s death. The Plan’s default form of payment for married participants is a 50% joint and survivor annuity, which provides the participant with monthly payments for his or her life and, following the participant’s death, provides the surviving spouse with monthly payments for the remainder of his or her life equal to 50% of the amount paid to the participant. The final benefits under the joint and survivor annuity option are adjusted for actuarial factors based on the ages of the retiree and spouse at the date of retirement. In lieu of these default forms of payment, retiring participants may elect alternative payment options, subject to applicable spousal consent requirements for married participants. These options include a single life annuity option (for married participants); 50% (for unmarried participants), 75%, and 100% joint and survivor annuity options; and a 10-year certain and life annuity option. In addition, certain participants may elect a 15-year certain and life annuity option, and certain participants may elect to receive the present value of their accrued benefit in a lump sum at termination or retirement, subject to certain plan limitations and applicable spousal consent requirements for married participants.

***BASF Plan Vesting***

Prior to January 1, 2008, participants were fully vested after five years of vesting service. Effective January 1, 2008, participants who accrue an hour of service on or after January 1, 2008 are fully vested upon completing three years of vesting service. If a participant terminates his or her employment with the Company or any

subsidiary of the Company which has adopted the Plan prior to his or her normal retirement date and has accrued a vested retirement benefit, then, except as noted above, the participant will receive his or her accrued benefit upon attaining the normal retirement age or an actuarially reduced benefit commencing at an earlier age.

***Solvay Plan Vesting***

Participants are fully vested upon completing three years of vesting service. If a participant terminates his or her employment with the Company or a member of the Company's controlled group prior to his or her normal retirement date and has accrued a vested retirement benefit, then, except as noted above, the participant will receive his or her accrued benefit upon attaining the normal retirement age or an actuarially reduced benefit commencing at an earlier age.

**NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

***Basis of Accounting***

The accompanying financial statements have been prepared using the accrual basis of accounting.

***Use of Estimates***

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

***Investment Valuation***

The Plan's investments are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Plan management uses the following methods and significant assumptions to estimate fair value of investments:

The Plan's investments in the AbbVie Master Trust are presented at fair value, which has been determined based on the fair value of the underlying investments of the AbbVie Master Trust. The investments held by the AbbVie Master Trust are valued as follows:

U.S. government securities - Valued at prices obtained from independent financial services industry-recognized vendors.

Corporate stocks - Valued at the published market price per unit.

Collective trusts - Valued at the net asset value ("NAV") provided by the administrator of the fund. The NAV is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the

for Former BASF and Former Solvay Employees  
NOTES TO FINANCIAL STATEMENTS - CONTINUED  
December 31, 2024 and 2023**

---

underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding.

Registered investment companies - Valued at the published market price per unit.

Partnerships - Valued at the NAV provided by the administrator of the fund. The NAV is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding.

103-12 entities - Valued at the NAV provided by the administrator of the fund. The NAV is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding.

The fair value hierarchy under the accounting standard for fair value measurements consists of the following three levels:

- Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets that the company has the ability to access;
- Level 2 – Valuations based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuations in which all significant inputs are observable in the market; and
- Level 3 – Valuations using significant inputs that are unobservable in the market and include the use of judgment by the company’s management about the assumptions market participants would use in pricing the asset or liability.

See Note C – Interest in Master Trust for the AbbVie Master Trust’s investments by level within the fair value hierarchy as of December 31, 2024 and 2023.

***Investment Income***

Purchases and sales of securities are recorded on the trade-date basis. Interest income is recorded when earned. Dividends are recorded on the ex-dividend date.

Net realized and unrealized appreciation (depreciation), along with dividend income and interest income are recorded in the accompanying statements of changes in net assets available for benefits as change in plan interest in AbbVie Master Trust.

***Payment of Benefits***

Benefits are recorded when paid.

***Administrative Expenses***

Investment management fees, trustee fees and Pension Benefit Guaranty Corporation (“PBGC,” a U.S. government agency) premiums are paid by the Plan. All other major administrative expenses are paid by the Company and are excluded from these financial statements.

NOTES TO FINANCIAL STATEMENTS - CONTINUED  
December 31, 2024 and 2023**

Investment management fees and trustee fees related to the assets in the AbbVie Master Trust are allocated to the Plan based on the ratio of the Plan's assets to the fair value of all assets held in the master trust and are presented in the accompanying statements of changes in net assets available for benefits as change in plan interest in AbbVie Master Trust. Expenses paid to the PBGC are specific to the Plan and are presented in the accompanying statements of changes in net assets available for benefits as administrative expenses.

**NOTE C - INTEREST IN MASTER TRUST**

The Plan's investments as of December 31, 2024 and 2023 are in the AbbVie Master Trust, which was established for the investment of assets of the Plan and another plan sponsored by the Company. Each participating plan has an undivided interest in the master trust. The assets of the AbbVie Master Trust are held by The Northern Trust Company ("Northern Trust"), the trustee for the Plan.

The value of the Plan's interest in the AbbVie Master Trust is based on the beginning of year value of the Plan's interest in the master trust plus the actual contributions and allocated investment income or loss less actual distributions and allocated administrative expenses from the master trust. At December 31, 2024 and 2023, the Plan's interest in the AbbVie Master Trust was approximately 8.01% and 8.68%, respectively.

The AbbVie Master Trust's net assets and the Plan's interest in the AbbVie Master Trust's net assets as of December 31, 2024 and 2023 are as follows:

***Derivative Instruments***

The Plan's investment policy allows use of derivatives by investment managers of the AbbVie Master Trust for managing interest rate or currency exchange risks and for achieving overall investment portfolio objectives. Derivative financial instruments used by investment managers of the AbbVie Master Trust during the year ended December 31, 2024 included futures contracts. No derivative financial instruments were used during the year ended December 31, 2023. The contracts involve elements of market risk in excess of the amount recognized in the AbbVie Master Trust's net assets. The credit risk associated with the futures contracts is minimal as they are traded on organized exchanges and settled daily.

A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instruments at a specified future date in accordance with terms specified by a regulated future exchange. Upon entering into a futures contract, the AbbVie Master Trust is required to deposit either in cash or securities an amount ("initial margin") equal to a certain percentage of the notional value of the contract. Subsequent payments are then made or received by the AbbVie Master Trust, depending on the daily fluctuation in the value of the underlying contracts. Such receipts or payments are known as variation margin and are recorded on a daily basis by the AbbVie Master Trust as a realized gain or loss equal to the difference in the value of the contract between daily closing prices.

Derivative investments are included in the AbbVie Master Trust's investments, at fair value in the net assets of the AbbVie Master Trust. The following table provides the notional amounts and fair value as of December 31, 2024. No derivative investments were held by the AbbVie Master Trust as of December 31, 2023. Notional amounts do not quantify risk or represent assets or liabilities of the AbbVie Master Trust but are used in the calculation of cash settlements under the contracts. Daily margin settlement for future contracts results in maintaining a zero-market value for the contracts.

**NOTE D - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS**

Accumulated plan benefits represent the estimated future periodic payments, including lump-sum distributions, under the Plan's provisions that are attributable to services rendered by employees through the valuation date. Accumulated plan benefits include benefits expected to be paid to the following: (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died and (3) present employees or their beneficiaries. Benefits payable under all circumstances are included to the extent they are deemed attributable to employee service rendered through the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment between the valuation date and the expected date of payment.

Significant actuarial assumptions used in the valuation as of January 1, 2024, are as follows:

Changes to the significant actuarial assumptions used in the January 1, 2024 valuation from those used in the January 1, 2023 valuation include, updating the discount rate from 5.19% to 5.00%.

The foregoing assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of January 1, 2024 is as follows:

Actuarial present value of accumulated plan benefits	
Vested benefits	
Participants currently receiving payments	\$127,456,752
Other participants	<u>219,368,543</u>
Total vested benefits	346,825,295
Non-vested benefits	<u>2,438,892</u>
Total actuarial present value of accumulated plan benefits	<u>\$349,264,187</u>

The change in the actuarial present value of accumulated plan benefits as of January 1, 2024, consists of the following:

Actuarial present value of accumulated plan benefits, January 1, 2023	\$331,987,078
Change during the year attributable to:	
Interest accumulation	16,628,178
Change in assumptions	9,982,768
Benefits paid	(23,493,745)
Benefits accumulated and other	<u>14,159,908</u>
Actuarial present value of accumulated plan benefits, January 1, 2024	<u>\$349,264,187</u>

The actuary estimated the accumulated plan benefits as of January 1, 2024. There were no significant changes to the Plan that would have changed the valuation had it been performed as of December 31, 2023.

**NOTE E - PLAN TERMINATION AND PBGC MATTERS**

Although the Company has not expressed any intention of terminating the Plan, the Company has the right under the Plan to terminate the Plan subject to the provisions of ERISA. In the event of termination of the Plan, distribution of the Plan assets shall be made to the participants according to ERISA, applicable regulations thereunder and the provisions for such distribution in the Plan document.

If the Plan terminates, a portion of the benefits under the Plan is insured by the PBGC. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor benefits. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at

the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and the priority of those benefits to be paid and may also depend on the level of benefits guaranteed by the PBGC.

---

**NOTE F - TAX STATUS**

The Plan has received a determination letter from the Internal Revenue Service ("IRS") dated April 13, 2016, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code of 1986, as amended (the "Code"), and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plan was amended and restated. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualified status. The plan administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and therefore believes that the Plan, as amended and restated, is qualified and the related trust is tax-exempt. If necessary, steps will be taken to bring the Plan's operations into compliance with the Code.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. The plan administrator has analyzed the tax positions taken by the Plan and has concluded there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

**NOTE G - INFORMATION CERTIFIED BY THE TRUSTEE**

Certain information related to investments disclosed in the accompanying financial statements, including investments held at December 31, 2024 and 2023, investment income for the years then ended, and Note C - Interest in Master Trust: net assets of the AbbVie Master Trust as of December 31, 2024 and 2023 and net investment income in the AbbVie Master Trust for the years then ended, except for accrued expenses and investment management fees, was obtained or derived from information provided to the plan administrator and certified as complete and accurate by the trustee of the Plan.

---

**NOTE H - RELATED-PARTY AND PARTY-IN-INTEREST TRANSACTIONS**

A portion of the Plan's assets is invested in funds managed by Northern Trust, the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions for which there is an exemption from the prohibited transactions rules of ERISA.

NOTES TO FINANCIAL STATEMENTS - CONTINUED

---

**NOTE I - RISKS AND UNCERTAINTIES**

The Plan's investments are exposed to various risks, such as interest rate, credit and overall market volatility risks. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits and may impact the funded position of the Plan. As a result, the Plan may require additional funding in subsequent years.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

---

**NOTE J - SUBSEQUENT EVENTS**

Management of the Plan has evaluated subsequent events from December 31, 2024 through October 13, 2025, the date these financial statements were available to be issued. There were no subsequent events that require recognition or disclosure in these financial statements.

**Surviving Spouse Benefits**

It is assumed that 80% of male employees and 60% of female employees have an eligible spouse, and that male(female) employees are two years older(younger) than their spouses.

**Valuation Compensation**

Compensation used in the valuation includes annual rate of base pay, cash profit sharing, management incentive bonus, and annual incentive pay rolled forward one year with the salary increase assumption.

**Benefit and Compensation Limits**

Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of \$275,000 and the IRC section 401(a)(17) compensation limit of \$345,000.

**Valuation of Plan Assets**

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

**Decrement Timing**

**Surviving Spouse Benefits**

It is assumed that 80% of male employees and 60% of female employees have an eligible spouse, and that male(female) employees are two years older(younger) than their spouses.

**Valuation Compensation**

Compensation used in the valuation includes annual rate of base pay, cash profit sharing, management incentive bonus, and annual incentive pay rolled forward one year with the salary increase assumption.

**Benefit and Compensation Limits**

Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of \$275,000 and the IRC section 401(a)(17) compensation limit of \$345,000.

**Valuation of Plan Assets**

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

- (2) 1.25% of final average earnings, not exceeding the Social Security wage base in the calendar year of retirement, times years of credited service.

**Early Retirement**

Benefit

At or after age 62, the benefit payable to the participant is equal to the greater of (1) and (2) below:

- (1) (a) 1.50% of final average earnings times years of credited service projected to the normal retirement age, reduced for early commencement as described on the previous page; less
- (b) 1.67% of the primary Social Security benefit times years of credited service projected to the normal retirement age (maximum 30); and
- (2) 1.25% of final average earnings, not exceeding the Social Security wage base in the calendar year of retirement, times years of credited service projected to the normal retirement age, reduced for early commencement as described on the previous page.

This benefit is then multiplied by a fraction equal to:

- (1) Credited service as of the date of termination; divided by
- (2) Credited service projected to the normal retirement age.

**Vested Deferred Retirement**

Schedule SB Attachment (Form 5500) —2024 Plan Year  
AbbVie Pension Plan for Former BASF and Former Solvay Employees  
EIN: 32-0375147 PN: 003

Participants with 10 years of service at termination may commence this benefit as early as age 55. The benefit is reduced  $6\frac{2}{3}\%$  for each of the first five years and  $3\frac{1}{3}\%$  for each of the next five years that the benefit commencement date precedes age 65.

A participant entitled to a deferred vested benefit may elect to have such benefit commence as of the first day of any month after termination of employment but before normal retirement date in an actuarially equivalent amount.

To determine the benefit payable under the offset formula, the Social Security offset is reduced for early commencement.

Disabled participants continue to accrue credited service while disabled. Final average earnings at retirement are calculated assuming that the participant continues to accrue earnings based upon the greater of earnings during the 12 months prior to disability and final average earnings at the date of disability. The benefit is payable at age 65.

**Preretirement Survivor Benefit**
