## Methods

Valuation Date	First day of the Plan Year
Valuation of Plan Assets	Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The resulting smoothed asset value is limited to be between 90% and 110% of the actual fair market value of assets on the valuation date.
Actuarial Method	Unit Credit Method as prescribed by PPA
Models Used	Liabilities in this report were determined using actuarial valuation software designed by a third party software. This software is designed for the specific purpose of modeling pension plan liabilities and costs and is the standard pension valuation software used by Gallagher Benefit Services, Inc. The results in this report are based on various inputs into the software model, including the plan provisions and assumptions shown in this report, and demographic and financial information provided by Ficosa and Transamerica. While the results have been tested and reviewed for overall accuracy and consistency, we have relied upon the validity of the underlying software coding in preparing this report.
Benefits Not Valued	Based on a review of the Plan Document and discussions with the Plan Sponsor, we believe that all significant plan provisions have been reflected in this valuation.
