Schedule SB, Line 22 - Description of Weighted Average Retirement Age
Plan Name: Jadestone Clinical Research, LLC Pension Plan
EIN 85-3466147 / PN 001
Plan Year Ending 12/31/2024

Participants are assumed to retire on the anniversary date coinciding with or next following the later of the date they attain age 65 or the date they complete 5 years of plan participation.

Schedule SB, Part V - Statement of Actuarial Methods & Assumptions
Plan Name: Jadestone Clinical Research, LLC Pension Plan
EIN 85-3466147 / PN 001
Plan Year Ending 12/31/2024
Summary of Actuarial Methods

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. A plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that a plan will be adequately and systematically funded. Annual contributions are also affected by a plan's "asset valuation method" (as well as plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

Actuarial Cost Method

The actuarial cost method used for determining the Plan's ERISA funding requirements is the Unit Credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's Normal Cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's benefits. This method is prescribed for ERISA funding requirements by the Pension Protection Act of 2006.

Asset Valuation Method

The Actuarial Value of Assets used for determining the Plan's ERISA funding requirements is equal to the fair market value of assets.

Amortization Method

For the Plan's ERISA funding requirements, incremental Funding Shortfall amounts are amortized over a fifteen-year period, and the related shortfall amortization payment is determined on the first valuation date following the plan year in which it arises based on the segment rates used for ERISA minimum funding purposes on that date, as prescribed under IRC Section 430.

Schedule SB, Part V - Statement of Actuarial Methods & Assumptions

Plan Name: Jadestone Clinical Research, LLC Pension Plan

EIN 85-3466147 / PN 001

Plan Year Ending 12/31/2024

Summary of Actuarial Assumptions

ECONOMIC ASSUMPTIONS

Interest rates

The current funding and IRC 417(e) lump sum interest rates are as follows. The funding and 417(e) lump sum are prescribed under IRS regulations based on the Plan Sponsor's interest rate election.

	Minimum Funding	Maximum Deductible	417(e) Lump Sum
1st Segment	5.01%	5.01%	5.58%
2nd Segment	5.26%	5.26%	5.66%
3rd Segment	5.59%	5.36%	5.56%

ERISA 24-month average segment rates adjusted to reflect the applicable segment rate stabilization corridor.

Minimum Funding:

Rationale: This is a prescribed assumption set by the Internal Revenue Code Section 430. The sponsor has elected to utilize no look-back period, with rates averaged over a 24-month period, limited to applicable minimum and maximum values. These rates are utilized for purposes of calculating the Plan's Funding Target and Target Normal Cost for minimum funding purposes under ERISA and related tax codes.

Maximum Deductible 24-month average segment rates but not adjusted to reflect the applicable segment rate

Contribution: stabilization corridor.

Rationale: This is a prescribed assumption set by the Internal Revenue Code Section 430. The sponsor has elected to utilize no look-back period, with rates averaged over a 24-month period, limited to applicable minimum and maximum values. These rates are utilized for purposes of calculating the Plan's Maximum Deductible Contribution.

417(e) Lump Sum: Spot segment rates for the 4th month preceding the first day of the plan year.

Rationale: This is a prescribed assumption set by the Internal Revenue Code Section 430. The sponsor has elected to utilize a 4-month look-back period.

Compensation Increases

0.00%

Rationale: This assumption is based upon the plan's historical experience and anticipated future experience.

Administrative Expenses

None assumed.

Rationale: This plan does not pay expenses from the trust.

DEMOGRAPHIC ASSUMPTIONS

Mortality

Pre-retirement: None

Post-retirement: Statutory 2024 Applicable Mortality Table for 417(e)

Rationale: This is a prescribed assumption set by the Internal Revenue Code Section 430.

Withdrawal and Disability

None assumed.

Rationale: This plan does not have a significant number of participants who would be subject to withdrawal.

Retirement

All participants are assumed to retire at their normal retirement age.

Rationale: This assumption is based upon the plan's historical experience. Sponsor input and economic conditions that might have influenced prior experience or may impact future experience were considered.

Form of Payment

Assumed form of payment for funding is the lump sum equivalent of the life annuity. Funding Target for lump sum is the greater of the present value of accrued benefit computed using funding segment rates and 417(e) Applicable Mortality Table or lump sum at the assumed retirement date of accrued benefit using plan actuarial equivalence discounted using appropriate segment rate.

Rationale: This assumption is based upon the plan's historical experience. Sponsor input and economic conditions that might have influenced prior experience or may impact future experience were considered.

There have been no changes in the actuarial assumptions since the prior valuation except as mandated by applicable funding regulations.

Schedule SB, Part V - Statement of Actuarial Methods & Assumptions

Plan Name: Jadestone Clinical Research, LLC Pension Plan

EIN 85-3466147 / PN 001

Plan Year Ending 12/31/2023

Summary of Actuarial Methods

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. A plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that a plan will be adequately and systematically funded. Annual contributions are also affected by a plan's "asset valuation method" (as well as plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

Actuarial Cost Method

The actuarial cost method used for determining the Plan's ERISA funding requirements is the Unit Credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's Normal Cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's benefits. This method is prescribed for ERISA funding requirements by the Pension Protection Act of 2006.

Asset Valuation Method

The Actuarial Value of Assets used for determining the Plan's ERISA funding requirements is equal to the fair market value of assets.

Amortization Method

For the Plan's ERISA funding requirements, incremental Funding Shortfall amounts are amortized over a fifteen-year period, and the related shortfall amortization payment is determined on the first valuation date following the plan year in which it arises based on the segment rates used for ERISA minimum funding purposes on that date, as prescribed under IRC Section 430.

Schedule SB, Part V - Statement of Actuarial Methods & Assumptions

Plan Name: Jadestone Clinical Research, LLC Pension Plan

EIN 85-3466147 / PN 001

Plan Year Ending 12/31/2023

Summary of Actuarial Assumptions

ECONOMIC ASSUMPTIONS

Interest rates

The current funding and IRC 417(e) lump sum interest rates are as follows. The funding and 417(e) lump sum are prescribed under IRS regulations based on the Plan Sponsor's interest rate election.

	Minimum Funding	Maximum Deductible	417(e) Lump Sum
1st Segment	4.75%	4.21%	4.48%
2nd Segment	5.00%	4.86%	5.26%
3rd Segment	5.74%	4.87%	5.07%

ERISA Minimum Funding: 24-month average segment rates adjusted to reflect the applicable segment rate stabilization corridor.

Rationale: This is a prescribed assumption set by the Internal Revenue Code Section 430. The sponsor has elected to utilize no look-back period, with rates averaged over a 24-month period, limited to applicable minimum and maximum values. These rates are utilized for purposes of calculating the Plan's Funding Target and Target Normal Cost for minimum funding purposes under ERISA and related tax codes.

Maximum Deductible Contribution: 24-month average segment rates but not adjusted to reflect the applicable segment rate stabilization corridor.

Rationale: This is a prescribed assumption set by the Internal Revenue Code Section 430. The sponsor has elected to utilize no look-back period, with rates averaged over a 24-month period, limited to applicable minimum and maximum values. These rates are utilized for purposes of calculating the Plan's Maximum Deductible Contribution.

417(e) Lump Sum: Spot segment rates for the 4th month preceding the first day of the plan year.

Rationale: This is a prescribed assumption set by the Internal Revenue Code Section 430. The sponsor has elected to utilize a 4-month look-back period.

Compensation Increases

0.00%

Rationale: This assumption is based upon the plan's historical experience and anticipated future experience.

Administrative Expenses

None assumed.

Rationale: This plan does not pay expenses from the trust.

DEMOGRAPHIC ASSUMPTIONS

Mortality

Pre-retirement: None

Post-retirement: Statutory 2023 Applicable Mortality Table for 417(e)

Rationale: This is a prescribed assumption set by the Internal Revenue Code Section 430.

Withdrawal and Disability

None assumed.

Rationale: This plan does not have a significant number of participants who would be subject to withdrawal.

Retirement

All participants are assumed to retire at their normal retirement age.

Rationale: This assumption is based upon the plan's historical experience. Sponsor input and economic conditions that might have influenced prior experience or may impact future experience were considered.

Form of Payment

Assumed form of payment for funding is the lump sum equivalent of the life annuity. Funding Target for lump sum is the greater of the present value of accrued benefit computed using funding segment rates and 417(e) Applicable Mortality Table or lump sum at the assumed retirement date of accrued benefit using plan actuarial equivalence discounted using appropriate segment rate.

Rationale: This assumption is based upon the plan's historical experience. Sponsor input and economic conditions that
