## Schedule SB, Part V Statement of Actuarial Assumptions/Methods

### Economic Assumptions

#### Interest rate basis

- Applicable month September 2023
- Interest rate basis 3-Segment Rates

#### Interest rates

	Reflecting Stabilization	Not Reflecting Stabilization
--	--------------------------	------------------------------

**Expected long-term rate of return on DCP account balance** 7.20%

**Plan-related expenses** \$51,010 in 2024

**DCP account balance conversion interest rate** IRS Prescribed 417(e)(3) segment rates with November lookback

As permitted by law, rates reflecting stabilization are used to determine the funding target, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates and may be inconsistent with other economic assumptions used in the valuation.

For non-annuitants and disabled participants, the prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code. For annuitants, Cleveland-Cliffs-specific substitute mortality table per §1.430(h)(3)-2 approved by the IRS in 2022 with base year 2018, projected generationally using adjusted Scale MP-2021. The rate of future mortality improvement at any age for any year beginning on or after the valuation date is capped at 0.78%. The table below presents illustrative rates for the base year.

**Form of payment** For DCP benefits, 100% are assumed to elect a lump sum.  
For non-DCP benefits, all are assumed to elect an annuity as follows, split between active and terminated vested participants:

Active		Terminated Vested	
SLA with 5-year certain	50% J&S	SLA with 5-year certain	50% J&S
50%	50%	67%	33%

**Percent married** 80%. These assumptions are used to value pre-retirement surviving spouse benefits.

**Spouse age** Wife three years younger than husband.

**At-risk / loads** None.

**Cash flow:**

- **Timing of benefit payments** Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

## Methods

**Valuation date** First day of plan year

**Funding target** Present value of accrued benefits as required by regulations under IRC §430.

**Target normal cost** Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

**Decrement timing** The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

**Actuarial value of assets** The actuarial value of assets is equal to the market value of assets as of the valuation date plus the discounted present value of contributions made after the valuation date for the prior plan year, discounted using the effective interest rate for the prior plan year.

**Benefits not valued** All benefits described in the Plan Provisions section of this report were valued including based on discussions with the plan sponsor regarding the likelihood that these benefits will be paid. WTW has reviewed the plan provisions with the plan sponsor and based on that review, is not aware of any significant benefits required to be valued that were not.

## Sources of Data and Other Information

The plan sponsor furnished participant data as of January 1, 2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

## Assumptions Rationale - Significant Economic Assumptions

**Interest rate** The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

## Assumptions Rationale - Significant Demographic Assumptions

**Mortality** Assumptions used for funding purposes are as prescribed by IRC §430(h) and informed by Cleveland-Cliffs specific experience.

**Retirement** Retirement rates were based on an experience study conducted in 2023.

**Form of payment** The percentage of retiring participants assumed to take annuities and lump sums were based on an experience study conducted in 2023 over the period 2018 - 2022. Going forward, regular consideration will be given on whether any conditions have changed that would be expected to produce different results in the future.
