Report on the Audit of the Financial Statements

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Detroit Diesel UAW 412 Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits and accumulated plan benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits and changes in accumulated plan benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2024 and 2023 and for the years then ended, stating that the certified investment information, as described in Note 8 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section:

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (GAAP).
- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Emphasis of Matter

As discussed in Note 1 to the financial statements, in March 2024, the Plan was amended to transfer the accrued benefits of non-union employees and related assets and liabilities into the Daimler Truck North America LLC Pension Plan effective May 31, 2024. The Plan name has been updated to the Detroit Diesel UAW 412 Pension Plan. Our opinion is not modified with respect to this matter.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt the Plan's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- exercise professional judgment and maintain professional skepticism throughout the audit.
- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of GAAP.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with GAAP.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Detroit Diesel UAW 412 Pension Plan

Notes to Financial Statements

Note 1 – Description of the Plan

The following brief description of the Detroit Diesel UAW 412 Pension Plan (the Plan) provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

Effective May 31, 2024, the plan name changed from Detroit Diesel Corporation Employees' Pension Plan to Detroit Diesel UAW 412 Pension Plan.

General – The Plan was established in 1988 as a defined benefit pension plan covering all salaried or part-time employees of Detroit Diesel Corporation (the Company) and is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Company is the Plan's sponsor and serves as plan administrator. The plan sponsor froze participation in the Plan for all participants, effective January 1, 2011, with the exception of participants who are a member of the Local 412. Members of the Local 412 are eligible to participate in the Plan on the first of the month following 30 days following the date of hire.

Also effective January 1, 2011, the plan sponsor froze the accrual of benefits under the Plan and applied a special transition credit of 4% per year to the frozen benefit for each year of service through December 31, 2015, with the exception of participants who are a member of the Local 412. The members of the Local 412 continue to accrue benefits. The 4% transition credit did not apply to benefits earned prior to January 1, 1988, under the General Motors (GM) plan.

Effective May 31, 2024, the frozen portion of the Plan covering non-union employees was spun off and transferred to the Daimler Truck North America LLC Pension. The total assets transferred from the Plan to the Daimler Truck North America LLC Pension Plan on May 31, 2024, was \$65,813,112. The total actuarial present value of accumulated plan benefits transferred was \$72,353,857.

The Bank of New York Mellon (the Trustee) holds all of the Plan's investments and also serves as the trustee for the Plan. The Trustee was appointed to hold, invest, and disburse plan benefits to participants of the Plan from the Daimler Truck North America LLC Master Retirement Trust (Master Retirement Trust). The Company is the plan sponsor and administrator of the Plan.

Vesting – Participants become fully vested in their benefits available under the Plan after completing three years of service.

Payment of benefits

Pension benefits – The accrued benefit of a participant shall be equal to the greater of their un-cancelled final average accrued benefit or their career average accrued benefit plus, in either case, their prior plan benefits, as defined in the Plan Agreement. For normal retirement, monthly benefits are the participant's accrued benefit determined as of their normal retirement date. For early retirement, a participant may elect to receive a deferred monthly pension, commencing on their normal retirement date, equal to their accrued benefit determined as of their normal retirement date, or elect to receive a reduced monthly pension commencing on the first day of any month beginning after their severance from service date and prior to their normal retirement date. For late retirement, monthly benefits are the participant's accrued benefit determined as of their late retirement date.

Detroit Diesel UAW 412 Pension Plan

Notes to Financial Statements

Disability benefits – A disabled participant shall receive a disability benefit after completing at least five years of service as of the participant’s disability date. No credited service will be granted during the participant’s disability. The benefit provided will equal the accrued benefit determined as if the participant retired on the normal retirement date but with no credited service credited to the participant during the disability period.

Death benefits – Upon a participant’s death, a lump-sum or survivor annuity benefit may be available provided the participant has a spouse on the date of death and provided the election for survivor annuity has not been waived.

Note 2 – Summary of Accounting Policies

Basis of accounting – The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), using the accrual method of accounting.

Use of estimates – The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Cash and cash equivalents – The Plan maintains cash balances with U.S. financial institutions, which at times, may exceed federally insured limits. The Plan has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk related to cash.

Investment valuation – The Plan’s interest in the Master Retirement Trust is stated at fair value. The Plan’s Investment Committee determines the Plan’s valuation policies utilizing information provided by the investment advisors, custodians, and insurance company. The Plan’s trustee, The Bank of New York Mellon, certifies the fair market value. If available, quoted market prices are used to value investments.

Fair value is the price that would be received to sell an asset or paid to transfer a liability (i.e., the “exit price”) in an orderly transaction between market participants at the measurement date. See Note 7 for discussion of fair value measurements.

Income recognition – Purchases and sales of investments by the Master Retirement Trust are recorded on a trade date basis. Interest income related to investments held by the Master Retirement Trust are recorded on the accrual basis. Dividend income related to investments held by the Master Retirement Trust are recorded on the ex-dividend date. The net (depreciation) appreciation in fair value of investments held by the Master Retirement Trust consist of both the realized gains or losses and unrealized appreciation and depreciation of those investments.

Payment of benefits – Benefit payments to participants are recorded upon distribution.

Detroit Diesel UAW 412 Pension Plan

Notes to Financial Statements

Administrative expenses – The Plan’s expenses are paid either by the Plan or the Company, as provided by the Plan Agreement. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in the Plan’s interest in the net investment income of the Master Retirement Trust presented in the accompanying statements of changes in net assets available for benefits.

Subsequent events – Subsequent events are events or transactions that occur after the statement of net assets available for benefits date but before the financial statements are available to be issued. The Plan recognizes in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the statement of net assets available for benefits, including the estimates inherent in the process of preparing the financial statements. The Plan’s financial statements do not recognize subsequent events that provide evidence about conditions that did not exist at the date of the statement of net assets available for benefits but arose after the statement of net assets available for benefits date and before the financial statements are available to be issued.

The Plan has evaluated subsequent events through October 14, 2025, which is the date the financial statements were available to be issued.

Note 3 – Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan’s provisions to services employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on the higher of either (1) each employee’s compensation during the five highest paid consecutive calendar years of the last ten years of service up through December 31, 2010, except for a Local 412 participant, or (2) the accumulation of 6.25% of total base salary (up through December 31, 2010) Local 412 participants continue to accrue through the participant’s termination date, multiplied monthly by an index factor determined annually in accordance with the Plan Agreement, divided by 120. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Detroit Diesel UAW 412 Pension Plan

Notes to Financial Statements

The following significant actuarial assumptions are used in the valuations as of December 31:

	2024	2023
Discount rate	6.10%	6.10%
Mortality table	Pri-2012 White Collar adjusted forward to 2017 with MP-2020 with 3% multiplier	Pri-2012 White Collar adjusted forward to 2017 with MP-2020 with 3% multiplier
Average retirement age assumed	Age 63	Age 63
Interest crediting rate on PERC accounts	4.36%	4.50%

As disclosed in the statement of changes in accumulated plan benefits for the year ended December 31, 2024, the change in assumptions caused a decrease of \$461,345 to the actuarial present value of accumulated plan benefits. For the year ended December 31, 2024, the change in assumption is related to a decrease in the interest crediting rate on PERC accounts due to prevailing capital market conditions and assumed future conditions.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 4 – Funding Policy

Employee contributions – Contributions by participants are not required or permitted by the Plan.

Employer contributions – Contributions to the Plan, if necessary, are made to meet or exceed the minimum funding standards of ERISA and the Internal Revenue Code (IRC). Contributions are intended to provide not only for benefits attributed to service-to-date but also for those expected to be earned in the future.

The Company contributes to the Plan based on actuarial calculations performed by the Plan's consulting actuary. The Company's contributions for 2024 and 2023 met or exceeded the minimum funding requirements of ERISA.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

Note 5 – Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

Detroit Diesel UAW 412 Pension Plan Notes to Financial Statements

- a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination.
- b. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).
- c. All other vested benefits (that is, vested benefits not insured by the PBGC).
- d. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2025, that ceiling is \$7,432 per month. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants, or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

Note 6 – Interest in Master Retirement Trust

The Plan invests in the Master Retirement Trust, which was established for the investment of assets of the Plan and other Company sponsored retirement plans. The assets in the Master Retirement Trust are held in separately managed investment accounts. The investment accounts are combined into investment pools according to the asset class in which they invest. Each participating plan has a divided interest in the Master Retirement Trust but an undivided interest in the investment pools of the Master Retirement Trust. The assets of the Master Retirement Trust are held by The Bank of New York Mellon, the Plan's trustee.

Detroit Diesel UAW 412 Pension Plan

Notes to Financial Statements

The value of the Plan's interest in the Master Retirement Trust is based on the beginning of year value of the Plan's interest in the Master Retirement Trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses. Investment income and administrative expenses relating to the Master Retirement Trust are allocated to each individual plan in the same proportion as its interest in the investment pools of the Master Retirement Trust at the end of each month. As of December 31, 2024 and 2023, the Plan's interest in the net assets of the Master Retirement Trust was approximately 1.07% and 4.77%, respectively.

The following table presents the net assets of the Master Retirement Trust as of December 31:

Note 7 – Fair Value Measurements

The framework for measuring fair value provides a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3).

The three levels of the fair value hierarchy are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Detroit Diesel UAW 412 Pension Plan

Notes to Financial Statements

Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation techniques used for assets measured at fair value. There have been no changes in the techniques used at December 31, 2024 and 2023.

U.S. government securities, state and municipal securities, and corporate debt securities – Shares of government, agency, and debt securities are valued at the closing price reported on the major market on which the individual securities are traded or have reported broker trades which may be considered indicative of an active market. Where quoted prices are available in an active market, the investments are classified within level 1 of the valuation hierarchy. If quoted market prices are not available for the specific security, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics, discounted cash flows and other observable inputs. Such securities are classified within level 2 of the fair value hierarchy.

Collective trusts – Units held in collective trusts are valued using the net asset value (NAV) practical expedient of the collective trust as reported by the collective trust managers. The NAV practical expedient is based on the fair value of the underlying assets owned by the collective trust, minus its liabilities, and then divided by the number of units outstanding. The NAV practical expedient of a collective trust is calculated based on a compilation of primarily observable market information.

Limited partnerships – Investments in limited partnerships have an inactive public market or no public market. As such, limited partnership interests are valued at the NAV practical expedient or its equivalent published by the investment manager.

Equity securities – Shares of equity securities are valued at the closing price reported on the active market on which the individual securities are traded and are classified within level 1 of the fair value hierarchy.

* Remaining life reflects a range of dates at which the partnerships are scheduled to terminate plus the maximum period for which the partnership agreements may be extended.

**Redemptions are not permitted during the life of these investments.

The valuation methods used by the Plan may produce a fair value calculation that may not be indicative of net realizable value or reflective of future values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Notes to Financial Statements

Note 9 – Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated September 7, 2012, that the Plan and related trust are designed in accordance with applicable sections of the IRC. Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and, therefore, believes that the Plan is qualified, and the related trust is tax-exempt.

In accordance with guidance on accounting for uncertainty in income taxes, the plan administrator evaluated the Plan's tax positions and does not believe the Plan has any uncertain tax positions that require disclosure or adjustment to the financial statements. The Plan is subject to routine audits by tax jurisdictions; however, there are currently no audits for any tax periods in progress.

Note 10 – Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility, and credit risks. Market risks include global events which could impact the value of investment securities, such as a pandemic or international conflict. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 11 – Transactions with Parties-in-Interest

The Plan paid expenses related to the Plan's operations and investment management to various service providers. Certain plan investments are managed by The Bank of New York Mellon. The Bank of New York Mellon is the trustee of the Plan and, therefore, transactions with this entity qualify as exempt party-in-interest transactions.

Baker Tilly Advisory Group, LP and Baker Tilly US, LLP, trading as Baker Tilly, are members of the global network of Baker Tilly International Ltd., the members of which are separate and independent legal entities. Baker Tilly US, LLP is a licensed CPA firm that provides assurance services to its clients. Baker Tilly Advisory Group, LP and its subsidiary entities provide tax and consulting services to their clients and are not licensed CPA firms.

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions

The most recent amendment reflected in the following plan provisions was effective January 1, 2011. Plan provisions may not be the same for the Accounting and Funding valuations.

Covered employees Any salaried, part-time or UAW Local 412 employee participating in the prior plan on December 31, 1987 shall participate in this plan as of the effective date. Any other salaried, part-time or UAW Local 412 employee shall become a participant on the first day of the month 30 days after his employment commencement date.

Participation date First of the month after 30 days of being hired as a covered employee. An employee who becomes a covered employee immediately participates, provided completion of 30 days employment.

The following only apply to nonunion employees: Effective January 1, 2011, the plan will be closed to new hires and benefit accruals will cease. A special transition credit of 4% per year will apply to the frozen final average accrued benefit only for each year of service through December 31, 2015. The 4% transition credit will not apply to the 6.25% career average accrued benefit nor to any benefits earned prior to January 1, 1988, under the GM plan. The indexing factor will continue to apply for the PERC account.

In addition, the lump sum factors were amended prospectively to reflect those under IRC 417(e) such that a lump sum distribution will be the greater of (1) the frozen age 62 accrued benefit as of December 31, 2010, based on the PBGC lump sum basis as of the date of distribution, (2) the frozen age 62 accrued benefit as of December 31, 2010, based on the 417(e) lump sum factors or (3) the age 65 accrued benefit at termination based on 417(e) lump sum factors.

- (b) Final average accrued benefit: 1.31% of final average earnings multiplied by pension service plus .32% of final average earnings in excess of twice covered compensation multiplied by pension service up to a maximum of 35 years

Monthly preretirement death benefit

The minimum preretirement spouse's benefit for a vested participant is a monthly life annuity commencing on the later of (1) the participant's earliest possible retirement age or (2) 1st of the month following date of death, equal to the survivor's portion of an actuarially equivalent 100% joint and survivor annuity for the participant's accrued benefit at time of death, reduced for payment prior to when the participant would have reached age 65.

Alternatively, the surviving spouse may elect to receive the lump sum death benefit plus the surviving spouse portion of the residual annuity. The value of the surviving spouse portion of the residual annuity may be elected as a lump sum, in lieu of a monthly benefit.

Lump sum death benefit

A lump sum death benefit is payable to the beneficiary of a non-married participant. The lump sum death benefit is equal to the lump sum value of the participants' GM accrued benefit plus a lump sum of 10 times the career average accrued benefit.

Nonvested participants receive a return of the employee's accumulated contributions.

Disability benefit

Monthly DDC pension benefit as of the date of disability with service to the earlier of retirement date or 24 months following the last day of employment.

Monthly GM Part A Pension benefit as of disability date based on \$24.20 benefit level, reduced 21% if less than 85 points (no reduction if 85 points or more). The 21% reduction is eliminated upon attainment of age 62 and one month.

Monthly GM Part B Pension benefit as of disability date based on accrued Part B Primary and Supplementary benefit without reduction for early commencement.

Part A temporary monthly benefit payable until age 62 is equal to \$19.20 multiplied by Part A pension service as of the date of disability or January 1, 1988, if earlier, maximum 30 years.

If the disabled participant has at least 30 years of service or 85 points, an additional monthly Part A supplemental benefit is payable until age 62 equal to \$1,611 per month for retirements prior to September 1991 (\$1,711 for retirements after September 1991, \$1,811 for retirements after September 1992, and \$1,911 for retirements after September 1993) prorated for GM Part A service over 30 less Part A basic, Part B Supplementary and Part A temporary disability benefits and the temporary supplemental disability benefit, minimum zero.

GM supplemental benefits:

Part A interim supplement

For participants who are eligible for early retirement with 85 points and retire before age 62, a Part A interim supplemental benefit is payable until age 62 equal to the rate at age of retirement multiplied by Part A pension service as of January 1, 1988 and reduced by the Part B Supplementary Benefit (if any):

Forms of payment

Preretirement death benefits are payable only as described above. Monthly pension benefits are paid as described above as a life annuity, if the participant has no spouse as of the date payments begin, or if the participant so elects. Otherwise, benefits are paid in the form of 100% joint and survivor annuity option or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan. Optional forms are a 50%, 60% and 100% joint and survivor annuity, and a lump sum. Participants who are members of UAW Local 412 can elect a Social Security level income option.

Maximum on benefits and pay

All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are not assumed.

spouses and female participants are assumed to be 3 years younger than their spouses.

Covered Pay

Annualized base rate of pay as of the valuation date

Timing of Benefit Payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date

First day of plan year

Funding target

Present value of accrued benefits as required by regulations under IRC §430.

Target normal cost

Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Decrement timing

The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2023 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan

assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits Not Included in the Valuation

All benefits described in the Plan Provisions section of this report were valued based on discussions with the plan sponsor regarding the likelihood that these benefits will be paid. WTW has reviewed the plan provisions with Daimler Truck North America LLC and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor, through its third party administrator, furnished participant data as of January 1, 2024. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available. Data assumptions made were documented in the issues log provided to the plan sponsor on May 23, 2024. Data summaries were provided to the plan sponsor on May 23, 2024.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash balance interest crediting rate	The plan credits interest to cash balance accounts using the 10-year Treasury rate for the November proceeding the plan year
Lump sum conversion rate	Lump sum benefits for the plan are valued using a long term assumption for the plan's lump sum conversion rate that is not significantly inconsistent with what would be reasonable and consistent with other economic assumptions used, other than the discount rate.
Rates of increase in compensation	Assumed increases were chosen by the plan sponsor and represent an estimate of future experience.
Assumed return for asset smoothing	The assumed return of 5.74% used for asset smoothing is the third segment rate. Although we have not explicitly determined an expected return on assets, based on an analysis of the plan

sponsor's investment policy we believe the rate to be above the third segment rate.

Assumptions Rationale – Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are prescribed by IRC §430(h).
Termination	<p>Termination rates were based on an experience study conducted in 2023, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.</p> <p>Assumed termination rates differ by service because of observed differences in termination rates.</p>
Retirement	Retirement rates were based on an experience study conducted in 2023, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Form of Payment	Form of payment assumptions are based on an experience study conducted in 2020, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Benefit commencement date for deferred benefits:	
● Preretirement death benefit	Surviving spouses are assumed to begin benefits at the earliest possible commencement date permitted by the plan because experience indicates that most spouses do take the benefit as soon as it is available. Surviving spouses are assumed to commence at early retirement eligibility.
● Deferred vested benefit	Deferred vested participants are assumed to begin benefits at age 62 or current age if later. Because the plan's experience is not considered to be credible and deferred vested early commencement factors are not subsidized so that the difference

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC 430.

The mortality table used to calculate the funding target and target normal cost was updated to reflect the latest mortality improvement scale, as required by guidance issued by IRS under IRC §430.

The interest crediting rate on PERC accounts used to calculate the funding target and target normal cost was updated from 3.89% to 4.50%.

The assumed plan-related expenses added to the target normal cost and service cost were changed to account for expected expenses to be paid from the trust during 2024.

The immediate PBGC lump sum conversion rate was updated from 2.35% to 2.75%.
