Report of Independent Auditors

The Administrative Committee and Investment Committee
Jacobs Consolidated Pension Plan

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Jacobs Consolidated Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 30, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes (collectively referred to as the “financial statements”).

Management, having determined it is permissible in the circumstances, has elected to have the audits of the financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 30, 2024 and 2023, and for the years then ended, stating that the certified investment information, as described in Note 4 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor’s Responsibilities for the Audit of the Financial Statements section

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

**Shape the future
with confidence**

- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions,

Shape the future with confidence

misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Other Matter

Supplemental Schedules Required by ERISA

The supplemental schedules of assets (held at end of year) as of December 30, 2024, and reportable transactions for the year then ended (referred to as the “supplemental schedules”), are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA.
- the information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Jacobs Consolidated Pension Plan
Notes to Financial Statements
December 30, 2024

1. Description of the Plan

The Jacobs Consolidated Pension Plan (the Plan) is a defined benefit plan, providing pension and death benefits to participants. The Plan is sponsored by Jacobs Engineering Group Inc. (the Company) and is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

Bank of America, N.A. serves as trustee and manages Plan assets. Willis Towers Watson is the Plan's third-party administrator. The general administration of the Plan is overseen by the Administrative Committee and the investment-related authorities and responsibilities are overseen by the Investment Committee.

From time to time, the Plan has been amended as discussed in this section and to conform to the provisions of the Internal Revenue Code of 1986, as amended (the Code), to make certain administrative changes to the Plan, to clarify the application of certain of the Plan's terms and conditions, and for other reasons. Participants and all others should refer to the Plan document for a more complete description of the Plan's provisions.

The Company has voluntarily agreed to contribute such additional amounts as are necessary to provide assets sufficient to meet the benefits to be paid to Plan participants. The Company's present intention is to make contributions in amounts sufficient to fund the Plan's current service costs and to fund past service costs, plus interest.

The Plan has met ERISA's minimum funding requirement for the year ended December 30, 2024 and 2023 and as such there were no required contributions for the plan years 2024 and 2023.

Although the Company has not expressed any intent to do so, it has the right to discontinue its contributions at any time and terminate the Plan. In the event of a termination, the assets of the Plan are to be set aside for the payment of accrued benefits derived from participant contributions, then for the payment of vested benefits, and then for the payment of all other accrued benefits. If all liabilities to participants and their beneficiaries have been satisfied, remaining assets may be distributed to the Company. The Pension Benefit Guaranty Corporation guarantees the payment of all non-forfeitable basic benefits, subject to certain limitations prescribed by ERISA. Benefit payments to participants and their beneficiaries cease at death.

The Plan was amended as to all components effective July 1, 2021 to provide individuals in qualifying domestic partnerships the same benefits as individuals in a marriage, to the extent legal and feasible and in a manner consistent with Section 12B of the San Francisco Administrative Code.

Jacobs Consolidated Pension Plan

Notes to Financial Statements (continued)

On September 27, 2024, Jacobs Solutions, Inc. and its affiliates completed a Reverse Morris Trust transaction pursuant to which (i) Jacobs Solutions, Inc. and its affiliates first transferred its Critical Mission Solutions business and portions of its Divergent Solutions business to Amazon Holdco Inc. (SpinCo), which has since been renamed Amentum Holdings, Inc., (ii) Jacobs Solutions, Inc. then effectuated a spin-off of SpinCo by distributing 124,084,108 shares of SpinCo common stock, by way of a pro rata distribution to its shareholders such that each holder of shares of Jacobs Solutions, Inc. common stock was entitled to receive one share of SpinCo common stock for each share of Jacobs Solutions, Inc. common stock held as of the record date, September 23, 2024, and (iii) finally, Amentum Parent Holdings LLC merged with and into SpinCo, with SpinCo surviving the merger. Amentum Holdings, Inc., as the surviving entity of the transaction, is now an independent public company with common stock listed on the New York Stock Exchange under the symbol "AMTM". The spin-off had no material effect on the Plan's assets or obligations.

Sverdrup Pension Plan Component

Effective December 31, 1984, existing Sverdrup Pension Plan participants made a one-time election to contribute 3% of their annual basic compensation (as defined) either to the Sverdrup Pension Plan (after-tax contribution) or to a separate retirement fund account (before-tax contribution). In addition, plan participants who were transferred into the Sverdrup Pension Plan effective December 31, 1994 had been required to contribute 3% of their annual basic compensation to this plan. The accumulated contributions of these participants totaled \$370,109 and \$520,370 at December 30, 2024 and 2023, respectively, including interest, compounded annually. In general, the interest rate is fixed at 5%, compounded annually, although for certain participants the interest rate is based on 120% of the federal mid-term rate in effect at the beginning of the year following the year of the participant's contributions. Accordingly, interest rates range from 5.00% to 5.79% and 5.00% to 5.12% at December 30, 2024 and 2023 respectively. The contributions and interest will be utilized to provide these participants with retirement benefits, unless an election is made to withdraw the contributions and interest, which would then result in a reduction of their retirement benefits.

After March 31, 1999, the Sverdrup Pension Plan was closed to all new hires. This plan was further amended effective July 1, 1999, whereby participant contributions were no longer allowed. Also pursuant to this amendment, additional years of credited service could be earned only up to a predefined limit, which is based on each participant's age and years of service as of July 1, 1999.

Effective December 30, 2006, the Sverdrup Pension Plan was amended to implement a freeze on all future benefit accruals.

On April 17, 2013, a Sverdrup Pension Plan amendment added an in-service benefit commencement option for members who remain employed from age 65 through age 70. The changes in the amendment were effective December 31, 2012.

Jacobs Consolidated Pension Plan

Notes to Financial Statements (continued)

Effective July 31, 2013, the KlingStubbins, Inc. Pension Trust was merged into the Sverdrup Pension Plan. The KlingStubbins, Inc. Pension Trust provided eligible participants with an accrued benefit that was frozen as of August 1, 2003. An unmarried participant's normal retirement benefit is a monthly single life annuity commencing on his or her normal retirement date. A married participant's normal retirement benefit is a monthly qualified joint and survivor annuity commencing on his or her normal retirement date.

During 2017, Jacobs increased the Plan's automatic cash out threshold \$5,000 and offered an early retirement distribution window to certain eligible participants. The offering, which was communicated to certain eligible participants in September 2017, was generally available to eligible participants that had a vested benefit, were no longer employed by the Company, and were not already receiving benefits. Electing participants received a single lump sum benefit payment or monthly annuity payments.

CH2M HILL IDC Pension Plan Component

The CH2M IDC Plan was a non-contributory defined benefit pension plan covering substantially all employees of CH2M HILL Industrial Design, Ltd. (IDC), IOTECH, Inc. (IOTECH), CH2M HILL International Services, Inc. (CHIS), and CH2M HILL International, Ltd. (CHIL). IDC, CHIS, and CHIL are or were wholly owned subsidiaries of CH2M. IOTECH was a wholly owned subsidiary until it dissolved on January 23, 2002.

The CH2M IDC Plan was amended effective January 31, 1994 to cease future benefit accruals for IDC employees. It was further amended effective December 31, 1994 to cease benefit accruals for IOTECH, CHIS, and CHIL employees. IDC employees who became participants of this plan prior to January 31, 1994 will retain all pension benefits earned as of January 31, 1994. IOTECH, CHIS, and CHIL employees who became participants of this plan prior to December 31, 1994 will retain all pension benefits earned as of December 31, 1994. No additional employees were eligible to become participants of this plan after those freeze dates.

A participant's normal retirement date is the first day of the month coincident with or next following attainment of age 65. An unmarried participant's normal retirement benefit is a monthly single life annuity commencing on his or her normal retirement date. A married participant's normal retirement benefit is a monthly qualified joint and survivor annuity commencing on his or her normal retirement date. Alternative forms of benefit payments are available at the participant's election. For each plan year of participation prior to December 31, 1994 (IOTECH, CHIS and CHIL employees) and January 31, 1994 (IDC employees) participants are credited with a monthly benefit equal to 1/12 of 1.3% of their compensation for such year.

For deferred retirement, participants will receive a monthly retirement benefit equal to the monthly benefit payable at their normal retirement date increased by 1% for each of the first 60 months, plus 2% for each additional month by which their deferred retirement dates follow their normal retirement dates.

Jacobs Consolidated Pension Plan

Notes to Financial Statements (continued)

Participants are eligible for early retirement when they have both attained age 55 and completed at least five years of service. Participants who elect to receive early retirement benefits shall be entitled to a monthly benefit as calculated above, reduced by one-half of 1% for each month by which the date of commencement of monthly benefits precedes the participant's normal retirement date.

Surviving spouse benefits are provided for vested participants who have been legally married at least one year at the time of death, if the date of the participant's death is prior to any date selected by the participant for the commencement of benefits. Participants who die while employed on or after April 1, 2015, are eligible to have their CH2M IDC Plan benefit payable to their beneficiary in a lump sum.

Participants are eligible for in-service withdrawals after age 62 and prior to a severance from employment. The benefit equals the monthly benefit at normal retirement date, reduced by one-half of 1% for each month by which the date of commencement of monthly benefits precedes the participant's normal retirement date.

CH2M HILL Pension Plan Component

The CH2M HILL Pension Plan was a non-contributory defined benefit plan covering employees of CH2M and certain affiliated companies, excluding for example employees covered by a collective bargaining agreement that did not specifically provide for coverage under the Plan, employees covered under another pension plan, and leased employees.

Participation commenced on the first of the month following the completion of one year of service in which the employee works 1,000 hours. Effective December 31, 1993, the CH2M HILL Pension Plan was amended to freeze participation. No future benefits were accrued under the CH2M HILL Pension Plan nor were any employees hired after December 31, 1993 eligible to be participants.

Benefit Eligibility

Normal retirement benefit	Age 65
Early retirement benefit	Age 55 with at least five years of vesting service
Deferred retirement benefit	Any time after age 65
Vesting	100% vesting will occur upon completion of five years of vesting service, or attainment of age 65, whichever occurs first

Jacobs Consolidated Pension Plan

Notes to Financial Statements (continued)

Normal Retirement Benefit

Effective before the freeze of benefits, the plan's accrued benefit formula was changed over time. In general, a participant's accrued benefit was calculated as a fixed percentage (for example, 0.75% or 1%) of the participant's compensation for the applicable year (up to a specified compensation limit), multiplied by the participant's years of benefit service. In addition, the plan provided for grandfathered amounts for certain participants.

Early Retirement

The normal retirement benefit is reduced by one-half of 1% for each month that the date of benefit commencement precedes normal retirement.

Deferred Retirement

The normal retirement benefit is increased by 1% for each of the first 60 months after the normal retirement date and 2% for each month thereafter.

Retirees

Effective in 1992 and 1994, the CH2H HILL Pension Plan was amended to provide increased benefits for certain retirees and their beneficiaries and surviving spouses.

Normal Form of Benefits

The normal form of benefits for an unmarried participant is a 10-year certain and life annuity. Unless elected otherwise, a married participant will receive the benefit in the form of a reduced joint and 50% survivor annuity. Other optional forms are available.

Pre-Retirement Death Benefits

Married participants who are vested have pre-retirement survivor's annuity coverage unless it has been waived. There is a reduction in the participant's benefit for this coverage. Participants who die while employed on or after April 1, 2015, are eligible to have their CH2M HILL Pension Plan benefit payable to their beneficiary in a lump sum.

2. Significant Accounting Policies

The accounting records of the Plan are maintained on the accrual basis. Benefits paid to participants or their beneficiaries are recorded when paid.

We measure the Plan assets and obligations as of the end of the month closest to their fiscal year end, which is December 30 as the alternative measurement date in accordance with FASB guidance which allows plans with fiscal year ends that do not coincide with a calendar month end to make an accounting policy election to measure investments and investment related accounts using the month end closest to their fiscal year end.

Jacobs Consolidated Pension Plan

Notes to Financial Statements (continued)

The preparation of financial statements in conformity with accounting principles generally accepted in the United States (U.S. GAAP) requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes and supplemental schedules. Actual results could differ from those estimates.

The Plan's investments are stated at fair value. U.S. GAAP establishes a framework for measuring fair value. This framework is codified in Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurement*. ASC 820 provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The preceding methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The investment in the interest-bearing cash is held within an interest-bearing cash account for which carrying value approximates fair value.

Jacobs Consolidated Pension Plan

Notes to Financial Statements (continued)

Shares of mutual funds are valued at the quoted price of shares held at the Plan year-end.

Shares of common stock and U.S. government securities are valued based on quoted market prices.

Shares of corporate and municipal bonds are valued based on pricing models, which are determined from a compilation of primarily observable market information, broker quotes in non-active markets or similar assets.

Realized gains or losses and the change in the difference between fair value and the cost of investments (unrealized gains or losses) are reflected in the accompanying statements of changes in net assets available for benefits as net appreciation (depreciation) in fair value of investments.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date.

Administrative expenses for certain professional services, including trustee, investment, legal, audit, and actuary fees, are paid by the Plan.

There were no significant contributions, distributions, or significant events between the fiscal year-end and the measurement date (the month end closest to the fiscal year end).

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are the actuarial present value of future payments attributable under the Plan's provisions to services rendered by participants as of the valuation date. This amount results from applying actuarial assumptions, which reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

Accumulated plan benefits include benefits expected to be paid to retired or terminated participants and present participants. Benefits for retired or terminated participants are based on the participants' compensation during their last five years of creditable service.

The accumulated plan benefits were calculated as of December 31, 2024 and 2023. Had the valuation been performed as of December 30, 2024 and 2023, there would be no material difference.

Jacobs Consolidated Pension Plan Notes to Financial Statements (continued)

The significant actuarial methods and assumptions used in the actuarial valuation as of December 30, 2024 and 2023 were as follows:

December 30, 2024 Assumptions:

Actuarial cost method	Unit Cost Method
Interest rate	5.50%
Mortality	Benefit weighted White Collar Pri-2012 tables with a multiplier of 97.9%, with a base year of 2012, with separate rates for annuitants and non-annuitants (based on Employees table) and separate rates for retirees/contingent annuitants and contingent survivors projected forward using Scale MP-2021 modified with proxy SSA long-term improvement rates with generational projection.
Retirement age	Rates of retirement vary by age for employees beginning at age 55

December 30, 2023 Assumptions:

Actuarial cost method	Unit Cost Method
Interest rate	5.90%
Mortality	Benefit weighted White Collar Pri-2012 tables with a base year of 2012, with separate rates for annuitants and non-annuitants (based on Employees table) and separate rates for retirees/contingent annuitants and contingent survivors projected forward using Scale MP-2021 modified with proxy SSA long-term improvement rates with generational projection.
Retirement age	Rates of retirement vary by age for employees beginning at age 55

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Jacobs Consolidated Pension Plan

Notes to Financial Statements (continued)

The Plan's actuary determined present value of accumulated plan benefits as of December 30 is as follows:

	2024	2023
Vested benefits:		
Participants currently receiving benefits	\$ 163,764,521	\$ 162,717,274
Other participants	25,290,846	28,319,748
	<u>189,055,367</u>	<u>191,037,022</u>
Non-vested benefits	—	—
Total accumulated benefits	<u>\$ 189,055,367</u>	<u>\$ 191,037,022</u>

The following table summarizes the changes in the actuarially determined present value of accumulated plan benefits for each of the years ended December 30:

	2024	2023
Actuarial present value of accumulated plan benefits as of the beginning of the year	\$ 191,037,022	\$ 191,429,435
Increases (decreases) during the year attributable to:		
Interest due to decrease in discount period	10,661,885	11,610,992
Benefits paid	(20,654,207)	(20,015,372)
Assumption changes	6,265,137	6,658,964
Actuarial (gains) losses	1,745,530	1,353,003
Actuarial present value of accumulated plan benefits as of the end of the year	<u>\$ 189,055,367</u>	<u>\$ 191,037,022</u>

4. Investments

All investment information disclosed in the accompanying financial statements and supplemental schedules, including investments held and accrued income at December 30, 2024 and 2023, and net appreciation (depreciation) in fair value of investments, interest income, and dividend income for the years then ended, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by Bank of America, N.A.

The Plan's concentrations of both credit risk and market risk are dictated by the Plan's investment objectives. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of those investments, it is at least reasonably possible that changes in risks in the near term could materially affect the amounts reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits.

5. Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service (IRS) dated May 18, 2021, stating that the Plan is qualified under Section 401(a) of the Code and, therefore, the related trust is exempt from taxation. Subsequent to this determination, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The plan administrator has indicated that it will take the necessary steps, if any, to bring the Plan's operations into compliance with the Code.

U.S. GAAP requires Plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded there were no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Jacobs Consolidated Pension Plan
Notes to Financial Statements (continued)

6. Transactions With Parties-in-Interest and Related Parties

There were no other transactions with parties-in-interest other than purchases and sales of assets through the Plan's investment manager and the money market fund investment being managed by the Plan's trustee. The Plan investment manager's fees are based on customary and reasonable rates for such services and are paid by the Plan. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transaction rules under ERISA.

7. Subsequent Events

The Plan has evaluated subsequent events through October 15, 2025, the date the financial statements were available to be issued.

No material subsequent events have occurred since December 30, 2024, that require recognition or disclosures in the financial statements.

Schedule SB, Part V Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis

- Applicable month 4th month prior (August)
- Interest rate basis Segment Rates from 4th Month Preceding Valuation Date

Interest rates

	Reflecting Corridors	Not Reflecting Corridors
• First segment rate	4.75%	3.42%
• Second segment rate	5.00%	4.33%
• Third segment rate	5.74%	4.43%
• Effective interest rate	5.08%	4.24%

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP, the PBGC 4010 FS, and the estimated maximum deductible contribution.

Plan-related expenses \$860,000

Calculation of Lump Sum Lump sums were valued using the substitution of annuity form under IRS Regulation 1.430(d)-1(f)(4) without application of generational mortality.

StepDemographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee becomes a participant.

At-risk assumptions For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 50% Joint & Survivor Annuity form of payment.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date First day of plan year.

Funding target Present value of accrued benefits as required by regulations under IRC §430.

from plan assets during the plan year as required by regulations under IRC §430.

Decrement timing

The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.40% (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued except disability benefits. Based on discussions with Jacobs Solutions Inc., such benefits are considered to have a de minimis likelihood of being paid

and thus are not required to be valued, and will not be valued, until and unless the triggering event occurs.

The plan pays small benefits (with a present value up to \$7,000 in a single lump sum payment). Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

Data Sources

The plan sponsor furnished participant data on employees and former employees to allow WTW to assist with the administration of the Plan. The provided information was combined by WTW during the administrative process and extracted as of the valuation date. Information on assets, contributions and plan provisions was supplied by the plan sponsor and the plan trustee, Bank of America.

Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. We are not aware of any significant errors or omissions in the data that would have a significant effect on the results of our calculations.

The following assumptions were made for missing or apparently inconsistent data elements:

- Missing beneficiary birth dates for participants with a contingent beneficiary were estimated based on the spousal age difference assumption of the plan.
- Missing beneficiary gender for participants with a contingent spouse was assumed to be the opposite gender of the participant.
- Missing frozen benefit amounts for deferred participants were assumed to be the average benefit amount for all non-zero deferred vested benefits.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Lump sum conversion rate	As required by IRC §430, lump sum benefits are valued using “annuity substitution”, so that the interest rates assumed are effectively the same as described above for the discount rate.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).
Assumed return for asset smoothing	The assumed return used for asset smoothing is the expected return on assets assumption chosen by the client for the 2023 plan year under U.S. GAAP. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client’s best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation.

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates were based on an experience study conducted in 2019, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Retirement	Retirement rates were based on an experience study conducted in 2019, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Benefit commencement date for deferred benefits:

- Preretirement death benefit
Surviving spouses are assumed to begin benefits at the earliest permitted commencement date, because ERISA requires benefits to start then unless the spouse elects to defer.
- Deferred vested benefit
Deferred vested participants' assumed commencement age is at normal retirement date (or current age if later). Deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at multiple ages is not expected to be significant.

Form of payment

Form of payment assumptions were based on an experience study conducted in 2019, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

- The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.
- The mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC §430.
- The assumed plan-related expenses added to the target normal cost were changed from \$970,000 to \$860,000 for

Statement by Enrolled Actuary
To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Plan Name	Jacobs Consolidated Pension Plan
Valuation Date	December 31, 2023
Enrolled Actuary	Landon W Horton
Enrollment Number	23-07451

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

SCHEDULE SB ATTACHMENTS

Schedule SB, Line 22 Description of Weighted Average Retirement Age as of December 31, 2023

Schedule SB, Part V Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis

- Applicable month 4th month prior (August)
- Interest rate basis Segment Rates from 4th Month Preceding Valuation Date

Interest rates

	Reflecting Corridors	Not Reflecting Corridors
• First segment rate	4.75%	3.42%
• Second segment rate	5.00%	4.33%
• Third segment rate	5.74%	4.43%
• Effective interest rate	5.08%	4.24%

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP, the PBGC 4010 FS, and the estimated maximum deductible contribution.

Plan-related expenses \$860,000

Calculation of Lump Sum

Lump sums were valued using the substitution of annuity form under IRS Regulation 1.430(d)-1(f)(4) without application of generational mortality.

StepDemographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee becomes a participant.

At-risk assumptions For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 50% Joint & Survivor Annuity form of payment.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date First day of plan year.

Funding target Present value of accrued benefits as required by regulations under IRC §430.

Target normal cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid

from plan assets during the plan year as required by regulations under IRC §430.

Decrement timing

The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.40% (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued except disability benefits. Based on discussions with Jacobs Solutions Inc., such benefits are considered to have a de minimis likelihood of being paid

and thus are not required to be valued, and will not be valued, until and unless the triggering event occurs.

The plan pays small benefits (with a present value up to \$7,000 in a single lump sum payment). Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

Data Sources

The plan sponsor furnished participant data on employees and former employees to allow WTW to assist with the administration of the Plan. The provided information was combined by WTW during the administrative process and extracted as of the valuation date. Information on assets, contributions and plan provisions was supplied by the plan sponsor and the plan trustee, Bank of America.

Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. We are not aware of any significant errors or omissions in the data that would have a significant effect on the results of our calculations.

The following assumptions were made for missing or apparently inconsistent data elements:

- Missing beneficiary birth dates for participants with a contingent beneficiary were estimated based on the spousal age difference assumption of the plan.
- Missing beneficiary gender for participants with a contingent spouse was assumed to be the opposite gender of the participant.
- Missing frozen benefit amounts for deferred participants were assumed to be the average benefit amount for all non-zero deferred vested benefits.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Lump sum conversion rate	As required by IRC §430, lump sum benefits are valued using “annuity substitution”, so that the interest rates assumed are effectively the same as described above for the discount rate.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).
Assumed return for asset smoothing	The assumed return used for asset smoothing is the expected return on assets assumption chosen by the client for the 2023 plan year under U.S. GAAP. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client’s best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation.

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates were based on an experience study conducted in 2019, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Retirement	Retirement rates were based on an experience study conducted in 2019, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Benefit commencement date for deferred benefits:

- Preretirement death benefit
Surviving spouses are assumed to begin benefits at the earliest permitted commencement date, because ERISA requires benefits to start then unless the spouse elects to defer.
- Deferred vested benefit
Deferred vested participants' assumed commencement age is at normal retirement date (or current age if later). Deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at multiple ages is not expected to be significant.

Form of payment

Form of payment assumptions were based on an experience study conducted in 2019, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

- The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC §430.
- The mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvement, as required by IRC §430.
- The assumed plan-related expenses added to the target normal cost were changed from \$970,000 to \$860,000 for

Credited service:

- SvC/pre-85

The number of years and completed months of continuous service through the earlier of termination of employment or the end of a transition period, or December 30, 2006. The transition period varies depending upon age and membership service on July 1, 1999 as follows:

Age plus service	End of transition period
<45	July 1, 1999
≥45	July 1, 2004
≥55	July 1, 2009
≥65	July 1, 2014

- KEY

The number of years and completed months of continuous service beginning from either the date their accruals under SvT Plan II ceased or the date transfer to a location without a defined benefit plan, whichever is applicable and continuing through the earlier of termination of employment, or December 30, 2006.

- SvT pre-12/31/94

Sum of (a) + (b), where:

- (a) Completed years and months of service from date of participation through 12/31/94;
- (b) Accumulated sick, vacation and severance hours as of 12/31/94 divided by 2080.

Post-12/31/94

Completed years and months of service from 12/31/94 through the earlier of termination of employment or the end of a transition period, or December 30, 2006. The transition period varies depending upon age and membership service on July 1, 1999 as follows:

Age plus service	End of transition period
<40	July 1, 1999
≥40	July 1, 2004

(a) $[(.5\% * \text{credited service to 20-year breakpoint}^{(1)}) \text{ plus } (.6667\% * \text{credited service beyond 20-year breakpoint}^{(1)})] * \text{FAE 5}$

For those participants satisfying the Rule of 60 (Age plus membership service greater than or equal to 60 on January 1, 1997 for SvC employees, January 1, 1998 for KEY employees, or November 1, 1998 for LANG employees) the benefit formula is:

(b) $[(.85\% * \text{credited service to 20-year breakpoint}^{(1)}) \text{ plus } (1.1\% * \text{credited service beyond 20-year breakpoint}^{(1)})] * \text{FAE 5}$

For those SvC participants who were age 60 and had five years of membership service on January 1, 1997, the formula is the greater of (B) and the prior plan formula.

For select participants, the benefit is the sum of the benefit above plus a percentage of FAE 5 in excess of \$100,000. This additional benefit is frozen as of July 1, 1999.

All benefits are subject to a minimum of \$12 per month times years of service.

Death with preretirement spouse benefit

Monthly preretirement spouse benefit is payable

Disability

None after July 1, 1999

Forms of Payment and Internal Revenue Code Limitations

Forms of Payment

Preretirement spouse benefits are payable only as described above. Monthly Pension Benefits will be paid as a monthly lifetime annuity with 120 months guaranteed if the participant has no spouse as of the date payments commence, or if the participants so elect. Otherwise, they will be paid in the form of the 50% joint and survivor annuity option or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan.

Optional Forms of Payment

- Contingent annuitant options

Retirement income payments are made to the member during his lifetime based on actuarial equivalent factors, with payment on his death equal to 50%, 75%, or 100% of the reduced payments previously payable to the member to be continued to and for the lifetime of his contingent annuitant.
- Straight life

Retirement income payments are made to the member during his lifetime, with no further payments from the plan on his behalf after his death except the refund to his beneficiary of his own contributions with interest credited to actual retirement date which exceed the aggregate payments made to him during his lifetime.

Credited service:

- SvC/pre-85

The number of years and completed months of continuous service through the earlier of termination of employment or the end of a transition period, or December 30, 2006. The transition period varies depending upon age and membership service on July 1, 1999 as follows:

Age plus service	End of transition period
<45	July 1, 1999
≥45	July 1, 2004
≥55	July 1, 2009
≥65	July 1, 2014

- KEY

The number of years and completed months of continuous service beginning from either the date their accruals under SvT Plan II ceased or the date transfer to a location without a defined benefit plan, whichever is applicable and continuing through the earlier of termination of employment, or December 30, 2006.

- SvT pre-12/31/94

Sum of (a) + (b), where:

- (a) Completed years and months of service from date of participation through 12/31/94;
- (b) Accumulated sick, vacation and severance hours as of 12/31/94 divided by 2080.

Post-12/31/94

Completed years and months of service from 12/31/94 through the earlier of termination of employment or the end of a transition period, or December 30, 2006. The transition period varies depending upon age and membership service on July 1, 1999 as follows:

Age plus service	End of transition period
<40	July 1, 1999
≥40	July 1, 2004
≥50	July 1, 2009
≥60	July 1, 2014

- LANG

The number of years and completed months of continuous service beginning on November 1, 1998 and continuing through the earlier of termination of employment, or December 30, 2006.

Compensation

employees, the hourly rate on January 1 multiplied by 2,080 hours. Compensation is limited to the pre-EGTRRA limits, except for select participants.

Five year average Basic Compensation (FAE 5)

The average compensation of a participant for the five consecutive January 1's preceding or coinciding with retirement which produce the greatest total.

Three-year average Basic Compensation (FAE 3)

The average compensation of a participant for the three consecutive January 1's preceding or coinciding with retirement which produce the greatest total.

Normal retirement date (NRD)

Attained age 65 and five years of membership service.

Monthly pension benefit

- SvC/KEY/LANG

(a) $[(.5\% * \text{credited service to 20-year breakpoint}^{(1)}) \text{ plus } (.6667\% * \text{credited service beyond 20-year breakpoint}^{(1)})] * \text{FAE 5}$

For those participants satisfying the Rule of 60 (Age plus membership service greater than or equal to 60 on January 1, 1997 for SvC employees, January 1, 1998 for KEY employees, or November 1, 1998 for LANG employees) the benefit formula is:

(b) $[(.85\% * \text{credited service to 20-year breakpoint}^{(1)}) \text{ plus } (1.1\% * \text{credited service beyond 20-year breakpoint}^{(1)})] * \text{FAE 5}$

For those SvC participants who were age 60 and had five years of membership service on January 1, 1997, the formula is the greater of (B) and the prior plan formula.

For select participants, the benefit is the sum of the benefit above plus a percentage of FAE 5 in excess of \$100,000. This additional benefit is frozen as of July 1, 1999.

All benefits are subject to a minimum of \$12 per month times years of service.

- Pre-85

Sum of (a) and (b):

(a) $1.25\% * \text{FAE 5} * \text{credited service pre 7/1/99}$

(b) $[(.5\%) * \text{credited service post 7/1/99 to 20-year breakpoint}^{(1)} \text{ plus } (.6667\% * \text{credited service post 7/1/99 beyond 20-year breakpoint}^{(1)})] * \text{FAE 5}$

For those participants satisfying the Rule of 65 (age plus membership service greater than or equal to 65 on July 1, 1999) the benefit formula is

- (ii) $[(.85\% \times \text{credited service post 7/1/99 to 20-year breakpoint}) \text{ plus } (1.1\% \times \text{credited service post 7/1/99 beyond 20-year breakpoint}^{(1)})] \times \text{FAE 5}$

¹⁾ The 20-year breakpoint occurs upon reaching 20 years of membership service.

Monthly preretirement spouse benefit

If death occurs while employed or after termination while eligible for Early, Normal or Deferred Retirement, larger of (i) or (ii), or if married, spouse can elect (iii) in lieu of (i) or (ii):

- (i) 18 months basic compensation less the accumulated employee contributions and (ii);
- (ii) The commuted value of the 120 guaranteed payments if eligible for retirement at time of death and had retired as of last day of month preceding death;
- (iii) Monthly benefit determined as if member had separated from service (or retired if eligible for early or normal retirement) on the date of death, survived to the earliest retirement age, elected to have his pension commence in the joint and 50% survivor form, and died immediately thereafter.

If death occurred while vested but not employed, and termination occurred prior to eligibility for Early Retirement, the benefit is determined as in (iii).

Monthly Benefits Paid Upon the Following Events

Normal retirement Monthly Pension Benefit determined as of NRD

Early retirement:

- SvC/pre-85/KEY/LANG Monthly Pension Benefit determined as of early retirement date, reduced by 1/3% for each month by which commencement precedes age 65
- SvT Sum of (a) and (b), where:
 - (a) The normal retirement benefit in (a) above (portion based on pre 12/31/94 service) calculated as of the early retirement date and reduced 1/2% for each month which commencement precedes age 62.
 - (b) The normal retirement benefit in (b) and (c) above (portions based on post 12/30/94 service) calculated as of the early retirement date and reduced 1/3% for each month by which commencement precedes age 65.

Early retirement supplement (SvT only) Lump sum payment based on earnings rate and service as of 12/31/88. The amount payable is multiplied by the following applicable percentage.

Retirement Age	Percentage
Less than age 62	0%
Age 62 and 0 months	100%
Age 62 and 1 month through age 63	66 2/3%
Age 63 and 1 month through age 64	33 1/3%
Greater than age 64	0%

Deferred retirement Accrued Pension determined on Deferred Retirement Date. Employees that defer retirement will receive an actuarial increase beyond age 70.5.

Termination with deferred vested benefit The sum of (1) and (2) below:

- (1) The benefit derived from employee contributions
- (2) The Accrued Pension less the benefit derived from employee contributions, multiplied by the Vesting Percentage below. If deferred beyond normal retirement date, the participant can choose retroactive payments or an actuarially increased Accrued Pension

Death with preretirement spouse benefit

Monthly preretirement spouse benefit is payable

Disability

None after July 1, 1999

Forms of Payment and Internal Revenue Code Limitations

Forms of Payment

Preretirement spouse benefits are payable only as described above. Monthly Pension Benefits will be paid as a monthly lifetime annuity with 120 months guaranteed if the participant has no spouse as of the date payments commence, or if the participants so elect. Otherwise, they will be paid in the form of the 50% joint and survivor annuity option or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan.

Optional Forms of Payment

- Contingent annuitant options Retirement income payments are made to the member during his lifetime based on actuarial equivalent factors, with payment on his death equal to 50%, 75%, or 100% of the reduced payments previously payable to the member to be continued to and for the lifetime of his contingent annuitant.
- Straight life Retirement income payments are made to the member during his lifetime, with no further payments from the plan on his behalf after his death except the refund to his beneficiary of his own contributions with interest credited to actual retirement date which exceed the aggregate payments made to him during his lifetime.
