Attachment to Form 5500-SF for Plan Year 2024

EIN 27-2111713

Part V, Line 10d, Loss caused by fraud or dishonesty

The Association of Certified Fraud Examiners Report to the Nations for 2024 reports that they estimate the average organization loses 5% of revenue to fraud each year. As the plan's assets are invested in mutual funds which in turn are invested in securities in the market, it is likely that fraud or dishonesty has influenced either the market value of the investments or the dividends received in some way. Though it is difficult to estimate the impact, we computed an estimate of \$4,445.83 by dividing the plan's actual dividends received for the year by 0.85 and calculating the difference between this figure and the actual dividends. We also divided the beginning assets of the plan and ending assets of the plan less dividend income by 0.85 and compared the difference in these values to the difference in the original values before dividing by 0.85. The assumption is that in the total absence of fraud, the dividends received would have been 17.6% higher than what was actually received and both the beginning and ending net assets of the plan would have been 15% higher than they were. Although a 5% revenue loss could mean a 50% loss in net profit for a company with a 10% profit margin, assuming that all companies lose 50% of their profits to fraud does not seem reasonable.
