## SUMMARY OF ASSUMPTIONS

**Funding Discount Rates**      IRS-Prescribed Three-Segment Rates, for the fourth month prior to the valuation date (September).

	Non-Stabilized	Limited to 25- Year Corridor
Segment 1:	3.62%	4.75%
Segment 2:	4.46%	4.87%
Segment 3:	4.52%	5.59%

The "Limited to 25 Year Corridor" rates are adjusted by the applicable maximum and applicable minimum percentages of the 25-year average segment rates, as set forth in the American Rescue Plan Act of 2021 ('ARPA-21') for use in Minimum Required Contribution calculations. The IRS Maximum Deductible Limit Calculations use the rates from the "Non-Stabilized" column above.

The interest rates used to value the Target Liability for determining the minimum and maximum contributions are prescribed by law and based on elections made by the Plan Sponsor.

**Effective Interest Rate**      The Effective Interest Rate (EIR) for the current Plan Year is 5.08%. For the prior Plan Year, the EIR was 5.18%.

The EIR is the single rate of interest which, if used to determine the Funding Target, would result in the same Funding Target determined using the Plan Sponsor's above-elected discount rates. The EIR is used to discount contributions for minimum funding requirements and to accumulate excess contributions to the end of the year.

**Funding Expected Return on Assets** The Expected Return on Assets (EROA) used in the calculation of the Actuarial Value of Assets is the lesser of (a) or (b), below:

(a) The expected long-term rate of return on assets based on policy trust allocations; or

(b) The third segment rate in the IRS-prescribed three-segment rate assumption, based on the elections made by the Plan Sponsor for minimum funding purposes.

The results are as follows:

Plan Year	Assumption (a)	Seg. III (b)	EROA (smaller of (a) or (b))
2023	6.65%	5.74%	5.74%
2022	6.65%	5.92%	5.92%

The Expected Return on Assets assumption for the calculation of Actuarial Value of Assets is based on input by the Plan's investment advisors and reflects their view of the long-term rate of return on assets, based on current and target asset allocations at each valuation date.

**Funding Administrative Expenses** Administrative Expenses are not assumed to be paid from the trust.

All administrative expenses are paid by the Employer.

**Salary Scale** None, Plan is frozen.

**Funding Mortality** §430(h) Optional Small Plan Combined Annuitant/Non-Annuitant Tables for the Current Plan Year.

The mortality assumptions used to value the Target Liability for determining the minimum and maximum contributions are prescribed by law and based on elections made by the Plan Sponsor.

**Withdrawal Rates**

**Spousal Assumptions**

100% of males and 100% of females are assumed to be married.

Females are assumed to be 3 years younger than males.

**Form of Payment**

All benefits are assumed to be paid in the Normal Form defined under the terms of the Plan.

An experience analysis with respect to form of payment was not performed. As a result, the current assumption has been selected based on observations of recent form of payment elections, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

**Changes in non-required  
funding assumptions since  
the prior valuation**

None.

**Changes in Prescribed  
Funding assumptions  
since the prior valuation**

The funding mortality tables were changed from the IRS Optional Small Plan Mortality for 2023 to the IRS Optional Small Plan Mortality for 2024.

The discount rates for funding and PBGC premiums were updated from the rates shown in the 2023 valuation report to the rates shown above.

## SUMMARY OF METHODS

**Actuarial Cost Method**

The Pension Protection Act (PPA) requires the calculation of the Target Liability and Target Normal Cost. The Target Liability represents the present value of benefits accumulated as of the valuation date. The present value is calculated by projecting future payments of the accrued benefit, adjusting for probability of receipt according to demographic assumptions, and discounting the payments back to the valuation date using the segment interest rates. Payments expected within five years of the valuation date are discounted using the first segment rate, payments expected at least five but within 20 years of the valuation date are discounted using the second segment rate, and payments expected at least 20 years from the valuation date are discounted using the third segment rate. The calculation of the Target Normal Cost is identical, except that the future payment stream is based on the benefit expected to accrue during the plan year.

**Asset Method**

We used financial data submitted by the trustee as of the valuation date without further audit. We have reviewed the information for internal consistency, and we have no reason to doubt its substantial accuracy.

**Funding Actuarial Value of Assets Method**

For funding purposes, Actuarial Value of Assets is a smoothed market value assets adjusted by the applicable percentage of gain or loss calculated in each year during the smoothing period. The gain or loss is the difference between the current year's market value, and prior year's market value brought forward with contributions, benefit payments, and administrative expenses, all adjusted at the expected interest rate to the valuation date. The expected interest rate for each year is the lesser of the expected rate of return and the third segment rate. The applicable percentage is 66-2/3% for the year preceding the valuation date, and 33-1/3% for the second year preceding the valuation date. The Actuarial Value of Assets will be adjusted to be no greater than 110% and no less than 90% of the market value of assets as of the current year valuation date.

Accrued contributions are discounted back to the valuation date at the prior year's effective interest rate.

**Changes in methods since the prior valuation**

None.

**Statement by Enrolled Actuary**  
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
