72-160062 / 002

For the plan year 01/01/2024 through 12/31/2024

The age reported is the weighted average of the assumed retirement ages for all active participants as of the valuation date based on their funding target or target normal cost should the funding target of the plan be zero rounded to the nearest whole age. For an active late retiree, the assumed retirement age may be later than the Plan's normal retirement age. Each participant's rate of retirement is assumed to be 100% of his/her assumed retirement age.

Valuation Date: 12/31/2024

The Actuarial Report is comprised of the Actuarial Communications and Documents listed below for the above reference plan year:

- Valuation report including Plan Provisions and applied Actuarial Assumptions and Methods
- Form 5500 Schedule SB and its attachments
- AFTAP Certification(s)
- Contribution letter/communication
- Any other written, electronic or oral communications with respect to actuarial services provided in connection with the issuance of the valuation report

Additional Communications: No additional materials are incorporated into this Actuarial Report.

Compliance with Actuarial Standards: The Actuarial Standards of Practice (ASOPs) offer broad guidelines on whether the assumptions, data, methods, and models utilized in the Actuarial Report are suitable for the intended purpose, ensuring they are adequately reasonable, consistent, and comprehensive. The Actuary, in their professional judgment, has applied the pertinent ASOPs to assess, document, disclose, and present the Actuarial Report, along with the mentioned materials, to the designated recipients. Details regarding the Actuary's assessments, comments, modifications, and disclosures are outlined in this Actuarial Certification and Disclosure report.

Intended Users and Scope: The Actuarial Report is exclusively intended for the Plan Sponsor, ERISA Plan Administrator, and Trustee(s) of the Plan. It should not be relied upon for purposes beyond its specified scope, such as FAS Accounting, Participant Distribution, or Plan Termination. The report's focus is on providing the Minimum Required Contribution for the plan year, supporting compliance with Internal Revenue Code Sections 430 and 436.

Legislative Considerations: The Actuarial Report takes into account the provisions of the Pension Protection Act of 2006, incorporating modifications introduced by the Worker, Retiree, and Employer Recovery Act of 2008 (WRERA), the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010 (PRA 2010), Moving Ahead for Progress in the 21st Century Act (MAP-21), the Cooperative and Small Employer Charity Pension Flexibility Act of 2014 (CSEC Act), the Highway and Transportation Funding Act of 2014 (HATFA), the Bipartisan Budget Act of 2015 (BBA'15), the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), the American Rescue Plan Act of 2021 (ARP), and any other amendments to the funding rules that have been enacted. It's essential to note that the report doesn't assess the likelihood or consequences of potential future changes in laws and regulations.

Reliability and Quality of Data: Data, including employer contribution(s) and plan documents, are sourced from the Plan Sponsor, ERISA Plan Administrator, Trustee(s), or their representatives. Data is relied upon for accuracy while quality reviews have been conducted consistent with ASOP 23. Inaccurate data may impact the correctness of the Actuarial Report.

Selection of Economic Assumptions: The Statement of Actuarial Assumptions/Methods and Summary of Plan Provisions provides a comprehensive overview of the techniques, procedures, and assumptions utilized in forming the actuarial opinion for the plan year. Prescribed assumptions, mandated or selected within specified acceptable ranges by legal, regulatory, or authoritative constraints, are meticulously outlined. This includes details on the prescribed funding method, interest and mortality rates, plan asset value, and valuation date permissible under Internal Revenue Code Section 430. In instances where multiple options exist within these prescribed items, the Plan Sponsor's choices are clearly indicated. Importantly, since prescribed assumptions are mandated, their reasonableness is not subject to evaluation within the scope of the valuation report.

The Salary Scale assumption is employed to enhance the current considered compensation for projecting ultimate benefits under the plan. However, it is explicitly clarified that any assumed salary scale in this plan is expected to have minimal impact on funding computations. This is primarily due to the compensation for the majority owner significantly exceeding any anticipated allowable increase under Internal Revenue Code 401(a) (17), and the present value of the majority owner's retirement benefit being constrained by Internal Revenue Code 415.

Actuarial Certification and Disclosures

P'NUT PRODUCTIONS, INC. DEFINED BENEFIT PENSION PLAN

For the plan year 01/01/2024 through 12/31/2024

Valuation Date: 12/31/2024

Selection of Demographic and Other Noneconomic Assumptions: 1. Pre-Retirement Mortality Assumption: This assumption is employed to determine the likelihood of an employee, not eligible for retirement, passing away. Given the plan's census, all participants are assumed to survive until retirement. The use of a pre-retirement mortality table is not expected to yield materially different results due to the plan's small covered population.

2. Withdrawal Assumption: This assumption determines when an employee, not eligible for retirement, will terminate employment. Based on the plan's census, participants are assumed to remain employed until retirement. In the event of early termination, a similar employee is assumed to be hired to sustain the benefits stream.

3. Disability Assumption: This assumption is utilized to determine when an employee becomes disabled and qualifies for disability benefits. However, as the plan does not provide disability benefits or subsidies, no disability assumption is incorporated.

4. Form of Payment Assumption: A lump sum payment is assumed. While this assumption inherently includes a subsidy per 417(e), the valuation method for funding benefits payable as lump sums considers the impact of prescribed method and funding segment rates, requiring no further assumption.

5. Marital Status Assumption: This assumption considers the impact of marriage, divorce, or remarriage on benefit payments. Since the value of benefits is not contingent on marital status, and lump sum payments are assumed for all participants, no assumption regarding marital status is applied.

Any non-prescribed assumption, not chosen by the Plan Sponsor, incorporated in the valuation is reasonably related to the Plan's experience and reflect the best estimate of anticipated Plan experience.

Asset Valuation Method: The asset valuation method employed is the Market Value of Assets (MVA). In this method, the Actuarial Value of Assets is determined by utilizing the MVA and includes interest-adjusted contribution(s) from the prior plan year not included and excludes interest adjusted contribution(s) for the current plan year made during the year. The Actuarial Value of Assets is then reduced by credit and prefunding balances elected by the Plan Sponsor. Opting for the MVA as the asset valuation method allows for the recognition of full value of market fluctuations within a plan year. Consequently, both the Actuarial Value of Assets and plan cost may exhibit less stability even when assets are prudently invested.

Measuring Obligations and Determining Contributions: The Minimum Required Contribution (MRC) represents the outcome of the funding method based on census data, asset value, and assumptions, both prescribed and non-prescribed by laws and regulations. It signifies the minimum amount to be contributed to fulfill the plan's liabilities for the given plan year. The Low-Default-Risk Obligation Measure (LDROM) goes beyond the MRC, calculated using an interest rate derived from a high-quality bond yield rate of 4% and/or non-stabilized segment rates higher than those used to determine the MRC.

The LDROM suggests a contribution level, typically larger than the MRC, indicating the potential additional cost the Plan Sponsor might need to cover if the plan's investments shift to an all-bond or more conservative asset portfolio. Alternate LDROM measures project potential savings based on a diversified portfolio. It's crucial to note that the funded status in the actuarial valuation isn't based on LDROM rates. However, if the plan's investment policy were to change, especially towards all bonds or conservative assets, the LDROM predicts a lower or significantly lower reported funded status.

Risk Assessment: While the Actuarial Report outlines its scope, it is important to acknowledge certain events and anomalies that are now identified to transparently disclose risks and their potential impact on the Plan and its cost. Recognizing that the assessment and disclosure of these risks may reasonably anticipate differences from actual future results, it is crucial to note that these risks can significantly influence pension obligations, actuarially determined contributions, and the funded status of the Plan.

Investment Risk: As the return on the plan trust assets is subject to market return, should the actual rate of return be lower than the expected return the cost of the plan will rise and vice versa.

Asset Liability Mismatch Risk: The changes in assets are not tied to the changes in the value of liabilities.

Interest Rate Risk: As the prescribed interest segment rates mandated under Section 430 are 24-month averaged rates further constrained to stated corridors change, the valuing of liabilities of the plan benefits are adjusted. If the segment rates are higher than previous years, the impact will be to lower the stated liabilities owed by the plan. This may not align with the payable liabilities and thus, the plan liabilities may need to be reviewed on a plan termination basis. This amount has been estimated by the shortfall on a plan termination basis provided by the Contribution Requirements report included in the annual valuation.

For the plan year 01/01/2024 through 12/31/2024

Valuation Date: 12/31/2024

Longevity and Other Demographic Risks: Cessation from employment due to termination, disability or death prior to the assumed retirement date under the plan may greatly sway the total liabilities payable from the plan. However, due to the small plan population, including these more unlikely events under this plan may greatly overstate the plan liabilities and likely cause the plan to be over funded. Thus, these decrements are not considered as in all likelihood, any unfunded benefits owed under the plan may be foregone by the substantial owner.

Actual retirement of plan participants may not directly align with the assumed retirement assumption(s) used to value the liabilities for the minimum required contribution. Typically, if a participant retires earlier than normal retirement, the liabilities will be lower than expected.

Contribution Risks: The minimum required contribution as stated in this valuation is mandated. Should this amount go unfunded, certainly the liabilities of this plan will become less covered by its trust assets. The current plan funding policy indicates that the minimum required contribution will be funded; thus, this valuation has not considered the possibility of unpaid contributions. If the Plan Sponsor knows of events that might impact its abilities to fund the minimum required contribution; these events should be discussed and evaluated as to how they may or may not impact the overall funded status of the plan.

Other Risks: No additional risks require emphasis at this time.

Modeling: The CalcAir Employee Benefit Systems, Inc. pension system was utilized for computations, leveraging its parameter-driven structure for accurate actuarial results. The decision to use this software was based on its reliability, efficiency, and the Actuary's expertise.
