## INDEPENDENT AUDITOR'S REPORT

The Plan Administrator  
National Health Corporation Leveraged  
Employee Stock Ownership Plan  
Murfreesboro, Tennessee

### Opinion

We have audited the accompanying financial statements of National Health Corporation Leveraged Employee Stock Ownership Plan, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2024 and 2023, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of National Health Corporation Leveraged Employee Stock Ownership Plan as of December 31, 2024 and 2023, and the changes in its net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

### Valuation of Investment - Corporation's Common Stock

As described in Note D, the Plan obtains an independent valuation of its investment in the National Health Corporation's common stock annually to determine the fair market value of the stock for ESOP administration purposes. This valuation is performed in accordance with methods permitted by the DOL and the IRS. The value of the Plan's common stock distributions are derived from this valuation. However, the valuation includes a blockage discount for securities held by the Corporation which is not permitted by the fair value guidance in ASC 820. If the ASC 820 application was followed, the Plan would have one value of the Corporation stock used for distributions and a separate value used solely to meet the DOL and the IRS requirements for the financial statements to be presented in accordance with GAAP. In the opinion of Plan management, with which we agree, reporting the value of the Corporation stock in a manner that is different from that used to determine the amount a participant will actually receive would be misleading to the users of the financial statements. Our opinion is not modified with respect to this matter.

### Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of National Health Corporation Leveraged Employee Stock Ownership Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about National Health Corporation Leveraged Employee Stock Ownership Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

#### **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of National Health Corporation Leveraged Employee Stock Ownership Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about National Health Corporation Leveraged Employee Stock Ownership Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

#### **Supplemental Schedules Required by ERISA**

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of Schedule of Assets (Held at End of Year) is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with generally accepted auditing standards.

In forming our opinion on the supplemental schedule, we evaluated whether the supplemental schedule, including its form and content, is presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedule is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

NOTE A - DESCRIPTION OF PLAN

The following description of the National Health Corporation (the Company or Sponsor) Leveraged Employee Stock Ownership Plan (the Plan) provides only general information. Participants should refer to the Plan document for more complete information.

General

The Plan was adopted on January 22, 1988, and was merged with the original National Health Corporation and Subsidiaries Employee Stock Purchase Plan (the Prior Plan). The Plan is an Employee Stock Ownership Plan (ESOP) under Section 4975(e)(7) of the Internal Revenue Code (IRC) of 1986, as amended and is subject to the applicable provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plan is administered by the Company and the recordkeeper and custodian of the Plan is The Trust Company of Tennessee. The purpose of the Plan is to share the Company's profits with eligible employees by purchasing the Company's stock with cash or loan proceeds (acquisition loans). These securities are held in a trust fund. Individual accounts are set up within the Plan in each participant's name and reflect each individual participant's interest under the Plan. Amounts not recorded in a participant account are held in a suspense account. Employees eligible to participate in the Plan consist of employees of the Company and its affiliates that have adopted the Plan who have 1 hour of service and participants of the Prior Plan. On or after the freeze date, as discussed below, no additional employees will become participants in the Plan.

Contributions

The Company is required by the provisions of the Plan to contribute an amount necessary for the Plan to make, when due, all required payments of interest and principal on all acquisition loans of the Plan. In addition, the Company makes additional contributions of cash or securities in order to fund retirement distributions or make other contributions at its discretion. Employer discretionary contributions and those related to debt and interest payments are allocated to the participants' accounts at December 31 of each year based on the compensation participants received during the year, subject to certain IRC limitations. The acquisition loans were paid in full in 2008. Accordingly, effective with the 2009 Plan year, the Plan was frozen and no more discretionary contributions will be made.

Participant Accounts

Contributions and forfeitures were allocated based on the participant's compensation relative to total participants' compensation. Plan earnings are allocated to participant accounts based on the participant's account balance relative to total participants' account balances at the beginning of the year. Due to the freeze of the Plan on December 14, 2009, no contributions will be made going forward and all participants became 100% vested, effective January 1, 2009.

Vesting

Prior to December 14, 2009, vesting in the Company's contributions plus actual earnings thereon was based on years of continuous service. Effective January 1, 2009, participants became 100% vested upon completion of three years of service with no vesting prior to completion of three years of service. Prior to that date, the vesting period was five years. When the Plan was frozen in December 2009, all participants became 100% vested, effective January 1, 2009.

Payment of Benefits

Upon termination of service due to death, disability, retirement or separation of service, a participant may elect to receive an amount in the form of Company stock or cash equal to the value of the participant's vested interest in his or her account. Distributions can be a lump-sum payment or be made in equal installments over a five-year period. The installment period may be increased if the value of the account exceeds \$500,000. There is also a provision in the Plan allowing for distributions between the ages of 55 and 60 without termination if ten years of service have been completed.

**December 31, 2024 and 2023**

---

NOTE A - DESCRIPTION OF PLAN (continued)

Payment of Benefits (continued)

Participants in the Plan who held shares in the Prior Plan (Prior Plan shares) are guaranteed a per share fair market value equal to the greater of the fair market value of a share of the Company's stock or the sum of the fair market values of a share of stock, for National HealthCare Corporation (NHC) and National Health Investors, Inc. (NHI). As of December 31, 2024 and 2023, the Prior Plan shares of 5,505 shares and 7,789 shares were valued at \$176.86 and \$148.27 per share, respectively.

Benefits are recorded when paid.

Forfeitures

Forfeitures consist of the nonvested portion of participant accounts remaining after termination. However, should a terminated participant who was not vested return to employment of the Company prior to a five-year break in service, any forfeitures attributable to such participant's prior termination of employment shall be fully reinstated. Forfeitures of \$4,039 were made in December 31, 2024. Forfeitures of \$12,207 were made in December 31, 2023. Forfeitures were allocated in the same manner as contributions to remaining active employees at December 31 in accordance with the Plan agreement. On December 14, 2009, the date the Plan was frozen, all participants became 100% vested effective January 1, 2009.

Plan Termination

The Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants will remain 100% vested in their employer contributions.

Administrative Expenses

Certain administrative expenses are paid by the Plan and totaled \$0 in 2024 and \$0 in 2023. The Company pays other administrative expenses incurred in operating the Plan.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements have been prepared under the accrual method of accounting.

Investment Valuation and Income Recognition

The investments in the Company's common stock are recorded at fair value as established annually by an independent appraiser. Investments in the Company's common stock purchased with the proceeds of an acquisition loan were maintained in a suspense account and were not initially assigned to participants' equity. The fair value of the investments in the suspense accounts was assigned to the participants' accounts as the related loan principal and interest were paid. See further discussion in Note D. Interest income is recorded on the accrual basis.

Risks and Uncertainties

The Plan investments consist primarily of the Company's common stock, which is exposed to various risks such as interest rate, market, and credit risks, as well as valuation assumptions including earnings and cash flows. Due to the level of risk associated with the investment in the common stock and to uncertainties inherent in the valuation and related assumptions, it is at least reasonably possible that changes in the value of the common stock will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Use of Estimates

The preparation of the Plan's financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of changes in net assets available for benefits during the reporting period. Actual results could differ from those estimates.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Cash and Cash Equivalents

Cash and cash equivalents include cash held in non-interest bearing accounts.

Date of Management's Review

Subsequent events were evaluated through December 16, 2025 which is the date the financial statements were available to be issued.

NOTE C - INCOME TAX STATUS

The Plan has received a determination letter from the Internal Revenue Service (IRS) dated February 4, 2015, stating that the Plan is qualified under Section 401(a) of the IRC and therefore the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualified status.

Accounting principles generally accepted in the United States require Plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2024, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2021.

NOTE D - INVESTMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from, or corroborated by, observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The fair value of the National Health Corporation common stock held by the Plan is valued annually at estimated fair value based upon an independent appraisal. Plan management accumulates the data for the appraiser from unaudited financial statements of the company. This appraisal was based upon a combination of the market and income valuation techniques consistent with prior years. The appraiser took into account historical and projected cash flow and net income, return on assets, return on equity, market comparables and net book value and estimated fair value of the Company's assets and liabilities. Plan management has concluded that a market participant would also recognize a discount for lack of marketability.

**NATIONAL HEALTH CORPORATION LEVERAGED  
EMPLOYEE STOCK OWNERSHIP PLAN**

**Notes to Financial Statements (continued)**

**December 31, 2024 and 2023**

NOTE D - INVESTMENTS (continued)

The independent appraisal also includes the application of a blockage discount for securities held by National Health Corporation. While this method is permitted for Department of Labor (DOL) and Internal Revenue Service (IRS) purposes, it is not permitted by the fair value guidance in ASC 820. If the ASC 820 application was followed, the Plan would have one value of the Corporation stock used for distributions and a separate value used solely to meet the DOL and IRS requirements for the financial statements to be presented in accordance with generally accepted accounting principles. Therefore, in order to present financial statements that are not misleading to the users, the financial statements depart from generally accepted accounting principles and include a blockage discount for securities in the value derived for the common stock of National Health Corporation.

The carrying amount of cash approximates fair value due to its short-term nature.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while management of the Plan believes its valuation methods and assumptions are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of the common stock of National Health Corporation held by the Plan could result in a different fair value measurement at the reporting date.

The valuation of financial instruments carried at fair value as of December 31 is as follows:
