Actuarial Methods for IRS Funding Purposes

1. Actuarial Cost Method

The actuarial cost method for funding calculations is the Unit Credit method. Under this method the funding target liability is calculated as the actuarial present value of accrued benefits as of the valuation date. The funding target normal cost is the actuarial present value of the benefits to be earned during the valuation year, plus administrative expenses expected to be paid from the pension trust assets during the year.

2. Asset Valuation Method

The actuarial value of assets is equal to the market value of assets, including receivable contributions discounted with interest as appropriate.

3. Changes From Prior Valuation

None.

Summary of Plan Provisions

The plan provisions used to determine the plan funding requirements were based upon the provisions of the plan in effect on April 1, 2024. A summary of the major plan provisions is presented below.

<u>Effective Date</u>	April 1, 1982. Amended and restated as of April 1, 2011. Further amended to freeze all benefit accruals effective August 31, 2020. Amended effective August 1, 2022, to allow a full lump sum distribution option.
<u>Plan Year</u>	April 1 to March 31.
<u>Eligibility for Participation</u>	April 1 or October 1 coincident with or next following the date on which employee attains age 18 and completes 1,000 hours of service.
<u>Years of Service</u>	One year of service is credited for each plan year during which an employee completes at least 1,000 hours of service. Years of Credited Service are frozen for all plan participants effective August 31, 2020.
<u>Eligibility for Retirement Benefits</u>	
Normal Retirement	Age 65, or if later, 5th anniversary of participation.
Early Retirement	Age 60 with at least 11 Years of Service
Late Retirement	Termination subsequent to normal retirement.
Termination of employment prior to retirement (vesting)	Two years of vesting service.
<u>Average Annual Compensation</u>	The average of annual compensation for the 5 consecutive plan years during a participant's last 10 years of service that produces the highest average. Average Annual Compensation is frozen for all plan participants effective August 31, 2020.
<u>Accrued Benefit</u>	0.85% of average annual compensation plus 0.65% of average annual compensation which exceeds the participant's Covered Compensation, times the participant's years of service to a maximum of 35 years. The calculation of this gross benefit is frozen for all participants effective August 31, 2020. The gross benefit is reduced by the actuarial equivalent of the participant's profit sharing account balance in the TAM International, Inc. 401(k) Profit Sharing Plan (for employer contributions made prior to August 31, 2020).

Amount of Benefits:

Normal retirement	Equal to the participant's accrued benefit calculated using benefit service and compensation as of the participant's Normal Retirement Date.
Early retirement	The accrued benefit as of the early retirement date shall be payable commencing at normal retirement. However, a participant may elect to have the benefits commence prior to normal retirement in a reduced monthly amount determined by applying a reduction of 5/9% for each month (i.e., 6.67% per year) by which the commencement date precedes the normal retirement date.
Late retirement	The greater of the accrued retirement benefit as of the late retirement date or the benefit payable at normal retirement actuarially increased to the late retirement date shall be payable commencing at late retirement.

Vesting upon termination of employment prior to retirement Accrued normal retirement benefit based upon benefit service as of the severance date, multiplied by the vesting percentage:

<u>Years of Vesting Service</u>	<u>Percentage Vested</u>
2 but less than 3	20%
3 but less than 4	40%
4 but less than 5	60%
6 but less than 7	80%
6 or more	100%

A participant may elect to have the benefits commence prior to normal retirement in a reduced monthly amount that is the actuarial equivalent of the vested accrued benefit payable at normal retirement.

Disability retirement The plan does not provide any special benefits for termination on the account of disability.

Pre-retirement death benefit For the surviving spouse of a vested participant, a monthly amount equal to 50% of the joint and survivor annuity the participant would have been entitled to receive if the participant had terminated employment on the date of death, retired with a qualified joint and 50% survivor annuity, and died the next day.

In lieu of a lifetime annuity, the surviving spouse may elect to receive the benefit as a single lump sum payment or as an annuity payable with a 120 month guarantee period.

Forms of Retirement Benefit:

Annuity payments

The optional annuity forms of payment include monthly annuities payable for life, with either 0, 5, 10, 15, or 20 years of payments guaranteed, and life annuities that provide survivor annuities to a beneficiary with continuation percentages of 50%, 75%, or 100%.

The actuarial basis for determining optional annuity forms is an interest rate of 7.50% and the mortality table specified in IRS Revenue Ruling 2001-62.

Single lump sum payment

A single lump sum payment is available in lieu of an annuity benefit. A partial lump sum may not be elected in addition to an annuity.

Interest rates for determining the single lump sum are the IRS segment interest rates under Internal Revenue Code Section 417(e) in effect as of the first day of the plan year. The mortality assumption for determining the single lump sum is the Applicable Mortality Table under IRC Section 417(e).

Changes Since Prior Valuation

There were no changes to plan provisions from the prior year valuation.
