#### Assumptions prescribed by law

Mortality	<a href="#">Before benefit payment period</a> IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.
	<a href="#">During benefit payment period</a> IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.

#### Assumptions selected by actuary

Inflation	2.40% increase per year.  Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.
Asset return	7.00% for the current plan year.  The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.
Expected expense	The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets. This is the best estimate available of upcoming year's expenses.
Retirement	Active and inactive participants are assumed to retire at normal retirement age as defined in <a href="#">Plan provisions</a> .  This assumption is based on the results of recent experience analysis and anticipated future experience.
Disability	None. This plan does not offer a subsidized disability benefit therefore the disability assumption is built into the withdrawal assumption.
Marriage	100% married; husbands are 3 years older than wives.  This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.
Withdrawal	None. Due to the size of the plan and limited experience, we're not recognizing a withdrawal assumption prior to retirement.
Form of benefit	Participants are assumed to receive their benefits on the normal form at the assumed retirement age.

Methods prescribed by law

**Liability measure** Funding target is the present value of the benefits accrued on the valuation date.  
 Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

Methods selected by plan sponsor

**Asset method** The asset valuation method is prescribed by law for plans that elect to use a value other than market value.  
 For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.  
 The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.  
 When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.

**Segment rates** 24-month average with no weighting to prior law basis. Use rates where November is the last month included in the average.

**PBGC premium basis** Your plan is a small plan as defined by PBGC. Variable rate premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the one-month average of corporate bond rates.

Segment 1 years 0-5	Segment 2 years 5-20	Segment 3 years 20+
4.66%	5.25%	5.57%

Methods elected by actuary

**Retirees** Assets and liabilities for current and future retirees are included.

**Vested benefits** A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.  
 The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

**Assumptions and methods elected by actuary - plan accounting (ASC 960)**

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

**Mortality** Based on Pri-2012 Total dataset base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2024).

**Mortality base rates**

**Before benefit payment period**  
 Employee amount-weighted, male and female

**During benefit payment period**  
 Retiree amount-weighted, male and female

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

**Mortality improvement**

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

Principal 2024 MI scale is based on MIM-2021-v4 application tool issued by SOA in October 2023 with the following parameters:

Parameter	Principal 2024
Historical dataset	SSA
Whittaker-Henderson Graduation	Order 3
Interpolation Structure	Basic
Graduated MI data last year ("jumping off" point)	2017
H/D transition ultimate year by age/cohort	2030/2030
Weight placed on interpolation by cohort	50%
Initial Slope periods (constraint)	2016-2017 (0.000)
LTR	SSA LTR 2024
COVID-19 or Excess load	None <sup>1</sup>

<sup>1</sup>Based on the sponsor's input, plan experience does not show a need for long-term excess death or Covid death load adjustments. See [Mortality documentation](#) for rationale and additional information.

Interest rate used to value liabilities

6.00%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age  
 Ductile Iron Pipe Research Association Revised Pension Plan  
 EIN 36-0879010 Plan No. 001

Active participants are expected to retire at the plan's assumed retirement age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

Effective June 1, 2011, benefit accruals are frozen, and no new entrants will be allowed into the Plan.

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document. The original effective date of the Plan was December 31, 1961. The Plan was amended and restated effective as of December 31, 2017.

#### Normal retirement benefit

Date	Age 65
Form	Monthly annuity payable for life. Married Employees shall receive their benefit in the form of an equivalent actuarial value 50% Joint and Survivor pension. Optional forms may be elected prior to retirement.
Amount (accrued benefit)	1% of Average Monthly Compensation times Years of Service. In no event will this amount be less than the accrued benefit determined as of April 30, 2004 under the prior formula.  Benefit accrual is frozen for all participants effective 06/01/2011.

#### Early retirement benefit

Date	Age 55 with 10 years of service.
Form	Same as normal retirement benefit.
Amount	Accrued Benefit as of the Employee's Early Retirement Date reduced actuarially for each month the benefit commences prior to Normal Retirement Date.

#### Termination benefit

Vesting percentage	0% for the first two years of service and 20% for the next five years of service, producing 100% vesting at seven years of service.
Form	Same as normal retirement benefit with income deferred until normal retirement date.
Amount	Accrued benefit on date of termination multiplied by the vesting percentage.

#### Death benefit

Eligibility	Qualified married participant fully or partially vested in an accrued benefit.
Form	Monthly annuity payable to spouse, deferred to participant's earliest retirement date if later than the date of death.
Amount	If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day.

## Definitions

Average compensation	Average of highest consecutive 5 years of earnings from date of employment to termination.
Compensation	Annual earnings actually paid to an employee limited to IRC 401(a)(17) except bonuses, commissions, overtime, expense allowances, and fringe benefits. No compensation after June 1, 2011 is considered.
Year of service	An employee will earn one year of service in each Plan Year in which the employee works at least 1,000 hours. No service after June 1, 2011 is considered.
In-service distributions	Beginning July 1, 2017, in-service distributions are allowed for participants at age 65.
Plan year	Beginning December 31 and ending the following December 30.
Optional forms of benefit payments	<p>The optional forms of benefit payments are:</p> <ul style="list-style-type: none"><li>• Monthly annuity payable for life, or 5, 10, or 15, years certain and life.</li><li>• Monthly annuity payable as a survivorship 50%, 66 2/3%, 75% or 100% of the benefit payable to a beneficiary for the remainder of the beneficiary's life.</li><li>• Monthly annuity payable for 5, 10 or 15 years guaranteed.</li><li>• A cash option shall be available to participants with respect to the participant's accrued benefit earned under the plan as of 12/30/1994, if any.</li></ul> <p>The optional form conversion basis is 8.0% interest and applicable mortality table as set forth in Code Section 417 for payments other than lump sums. The optional form conversion basis uses the applicable interest rate and applicable mortality table as set forth in Code Section 417 for lump sum payments. The applicable interest rate uses the second calendar month preceding the first day of the plan year that contains the annuity starting date.</p>

## Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

## Significant Event

The enrolled actuary has not been made aware that any significant events have occurred during the year.

Schedule SB, Line 24 – Change in Actuarial Assumptions  
Ductile Iron Pipe Research Association Revised Pension Plan  
EIN 36-0879010 Plan No. 001

Certain non-prescribed assumptions have been changed since last year. These assumptions were changed to better reflect the anticipated experience of your plan. See the attachment, Part V – Statement of Actuarial Assumptions/Methods, for the rationale for each assumption.

- The assumed asset return for the current year has increased from 6.75% to 7.00%. This rate is used in the calculation of the actuarial value of plan assets.
