**SCHEDULE SB, PART V  
STATEMENT OF ACTUARIAL ASSUMPTIONS/METHODS**

**A. Actuarial Methods**

1. Actuarial Funding Method

The Accrued Benefit actuarial funding method is used in developing the contribution requirements of the plan. The actuarial funding method is the procedure by which the actuary annually identifies a series of annual contributions which, along with current assets and future investment earnings, will fund the expected plan benefits. The normal cost for the plan is the sum of the individually determined normal cost for each active participant. Each active participant's normal cost is determined as the present value of benefits that the participant is expected to accrue during the year of valuation.

The plan's current accrued liability is the sum of the individually determined accrued liability for each active participant plus the present value of future benefits for all retirees and vested terminated participants. Each active participant's accrued liability is the present value of all benefits which have accrued as of the valuation date.

The unfunded accrued liability is the amount by which the accrued liability exceeds the current plan assets. The unfunded accrued liability is recalculated each time a valuation is performed and is amortized in level dollar annual contributions in accordance with IRS guidelines.

2. Plan Value of Assets

Assets are valued at fair market value as determined by the plan trustee, including the present value<sup>1</sup> of any receivable contributions made for a prior plan year which were not recognized by the plan trustee.

<sup>1</sup> Present value is determined using the effective interest rate for the preceding plan year.

**B. Actuarial Assumptions**

1. Mortality: The active, vested terminated and retired participants of the plan are expected to exhibit mortality in accordance with the following published mortality tables:

a. For purposes of IRC §430 and IRC §436:

- |                             |  |
|-----------------------------|--|
| i. Healthy Lives Mortality: | Optional Combined Static Tables for small plans under Regulation 1.430(h)(3)-1 in effect for 2024 plan years |
|-----------------------------|--|

No additional future mortality improvement has been assumed other than that used to develop the IRS prescribed mortality table identified above. The IRS prescribed mortality table identified above incorporates mortality improvement beyond the valuation year using Projection Scale MP-2021 projected for a period of years as described in Regulation 1.430(h)(3)-1(c)(3)(ii). The combined mortality tables were developed by applying the applicable weighting factors for small plans to the separate annuitant/non-annuitant tables using the methodology and factors described in Regulation 1.430(h)(3)-1(b)(2).

2. Withdrawal: N/A, no active participants are covered under the plan.
3. Interest Rates:

	For purposes of:	
	Minimum Required Contribution under IRC §430 and IRC §436 reflecting Pension Funding Stabilization	Maximum Tax Deductible Contribution under IRC §404
1 <sup>st</sup> Segment Rate	4.75%	4.64%
2 <sup>nd</sup> Segment Rate	5.12%	5.12%
3 <sup>rd</sup> Segment Rate	5.59%	5.10%

The segment rates used in this valuation are consistent with the plan sponsor's election to:

- use the segment rates under IRC Section 430(h)(2)(C) for purposes of determining the Funding Target and Target Normal Cost; and
  - use March as the applicable month for the segment rates.
4. Earnings Progression: None
  5. Retirement Age: N/A, no active participants are covered under the plan.
  6. Disability: N/A, no active participants are covered under the plan.
  7. Expenses: Target Normal Cost is required to be loaded with plan-related expenses expected to be paid from plan assets during the year. These plan-related expenses are assumed to be \$8,000 for the 2024-2025 plan year.
  8. Recognition of IRC Sections 401(a)(17) and 415(b) Limitations: The limitations under IRC Sections 401(a)(17) and 415(b) have been reflected in the determination of plan costs.
  9. Marital Status: N/A, no active participants are covered under the plan.
  10. Additional At-Risk Assumptions [Treas. Reg. §1.430(i)-1(c)(3)(ii) and (iii)]:
    - a. All *participants* who are not otherwise assumed to retire as of the valuation date but who will be eligible to commence an immediate distribution during the plan year and the ten succeeding plan years are assumed to retire at the earliest retirement date (i.e., the earliest date on which a participant can commence receiving an immediate distribution *of a fully vested benefit*) under the plan but not before the end of the plan year for which the At-Risk Funding Target and At-Risk Target Normal Cost are being determined.
    - b. All *participants* are assumed to elect the optional form of benefit available under the plan at the assumed retirement age (determined after application of (i) above) which results in the highest present value of benefits.

- a. Limitations on Benefit Accruals:
  - i. Benefit accruals are frozen if Plan's AFTAP falls below 60%, as required by PPA.
  - ii. Benefit accruals are not restarted automatically when the Plan's AFTAP increases above 60%.
  - iii. Benefit accruals that otherwise would have been earned when the Plan's AFTAP was below 60% are not restored automatically when the Plan's AFTAP increases sufficiently.
- b. Shutdown or Other Unpredictable Contingent Event Benefits:

IRC Section 436(b) does not apply because the plan does not and shall not provide any: (a) special benefits in the event the employer shuts down a business segment ("shutdown benefits") or (b) other unpredictable contingent event benefits.
- c. Limitations on Prohibited Payments:
  - i. The election of certain payment forms that include a prohibited payment are prohibited when the Plan's AFTAP falls below 60%. The Plan does not allow special optional payment forms in this situation.

d. Limitations on Plan Amendments Increasing Benefit Liabilities:

The plan prevents certain Plan Amendments that would increase liabilities from taking effect if the Plan's AFTAP would be under 80% after the amendment unless additional funding is made in an amount equal to the lesser of: (i) the amount necessary to ensure the Plan's AFTAP is 80% after the amendment, or (ii) the amount of the increase in the Plan's Funding Target Liability due to the amendment (note that this option (ii) is not available if the Plan's AFTAP is presumed to be less than 60%).
