Attachment to 2025 Form 5500
Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

PCA Management Corp Cash Balance Plan
46-2743366 / 002
For the plan year 01/01/2025 to 12/31/2025

The following actuarial assumptions were used in determining the costs of the Retirement Plan.

a. Mortality:

The 2025 Static Mortality Tables as prescribed by IRC Section 430 were used post-retirement. Since this plan is a small plan, no pre-retirement mortality was assumed. The optional combined tables for small plans were used, separately for male and female lives. To value benefits subject to IRC Section 417(e), the 2025 Applicable Mortality Table was used. In order to be consistent with the Internal Revenue Code funding regulations, no mortality improvement after the measurement date was assumed.

b. Interest:

The following are the Funding Segment Rates prescribed by IRC Section 430 as of January 1, 2025. Benefits were discounted by 5.00% (first segment rate) for payments expected from January 1, 2025 to December 31, 2029, by 5.27% (second segment rate) for payments expected from January 1, 2030 to December 31, 2044, and by 5.50% (third segment rate) for payments expected on or after January 1, 2045.

The following are the Funding Segment Rates prescribed by IRC Section 404 as of January 1, 2025. Benefits were discounted by 5.00% (first segment rate) for payments expected from January 1, 2025 to December 31, 2029, by 5.27% (second segment rate) for payments expected from January 1, 2030 to December 31, 2044, and by 5.40% (third segment rate) for payments expected on or after January 1, 2045.

c. Salary Scale:

It was assumed that salaries would remain constant for the current plan year. This assumption is an estimate of future experience based upon current and past experience.

d. Severance of Employment:

No discount for severance of employment was included in the factors on which costs were based. This assumption is an estimate of future experience based upon current and past experience. Participants who would first be eligible to enter the Plan after the valuation date were included for purposes of determining the current year's Target Normal Cost.

e. Retirement Age:

It was assumed that all employees would retire at their Normal Retirement Age, or in one year if at or past Normal Retirement Age. This assumption is an estimate of future experience based upon current and past experience.

f. Form of Benefit Payment:

It was assumed that there would be a 100% probability of electing a lump sum and a zero percent probability of electing monthly annuity payments. This assumption is an estimate of future experience based upon current and past experience.

g. Actuarial Value of Asset Valuation Method:

The fair market value of assets was used.

h. Expenses:

The Target Normal Cost was increased by \$0 to reflect anticipated expenses to be paid from the plan in the current year. Expenses were recognized as an investment loss.

i. Actuarial Cost Method:

The method prescribed by IRC Section 430 was used.
