Pre ARPA – 4.52% for the benefits expected to be paid in the first five years, 5.05% for benefits expected to be paid in the next 15 years and 5.04% for benefits expected to be paid thereafter. These rates use a 4 month lookback.

Premium Funding Target for PBGC variable premium – 4.52% for the benefits expected to be paid in the first five years, 5.05% for benefits expected to be paid in the next 15 years and 5.04% for benefits expected to be paid thereafter.

Effective Interest Rate – 5.15%

Mortality@: Pre Retirement – none, and Post Retirement - IRS 2024 Combined Table separately for males and females based as per Notice 2023-73 as permitted under IRC Section 430.

Termination: None assumed.

Disability: None assumed.

Salary Scale: Not applicable.

Retirement Age^: Normal Retirement Age.

Administrative Expenses^: Based on previous years actual amount.

Form of Distribution^: As there would be no material change whether lump sums were taken or not by active participants, we have assumed that participants will not take the lump sum form at retirement.

Insurance^: The value of any insurance policies are included in the plan assets of the plan while there will be no carve out for benefits provided by insurance policies in determining the Target Normal Cost and Funding Target. All insurance premiums payments will come directly from the plan assets.

@ All interest and mortality assumptions are as necessitated by statute.

^ These assumptions are those that were deemed reasonable at the time this plan was first serviced by our firm. I deem them still to be reasonable as they are ultimately based on the demographics of the plan population along with plan provisions. They are not expected to be changed in the future, barring major provisional changes.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

THE MASSARO GROUP PENSION TRUST

Actuarial Cost Method

The actuarial method used to determine costs for this plan is the prescribed method as called for under the Pension Protection Act of 2006. This method develops a Funding Target, which is equal to the present value of all benefits accrued or earned under the plan as of the beginning of the plan year. The Funding Shortfall is equal to the excess of the Funding Target over the value of plan assets as reduced by any utilized funding standard carryover and prefunding balances.

The Target Normal Cost is equal to the present value of all benefits which are expected to accrue or to be earned under the plan during the plan year.

Under this prescribed method, annual costs consist of the Target Normal Cost and Shortfall Amortization Charge, which is an amortization based on the Funding Shortfall for a 7 year period. However, the plan sponsor has elected to adopt the 2 plus 7 amortization schedule for the plan year 2011 – 2012 as per IRC 430(c)(2)(D)(ii). As per the plan administrator's election, all shortfall amortization bases and shortfall amortization installments were reduced to zero at 6/1/20. Any shortfalls as of 6/1/20 and subsequent will be amortized over a 15 year period, instead of 7 years.

Actuarial Value of Assets

The actuarial value of assets has been determined using the smoothed market value method. The method is equivalent to that as found in Notice 2009-22. Under this method the actuarial value of assets is equal to the market value of assets less a decreasing fraction ($2/3$, $1/3$) of the investment gain or loss for each of the two most recent years. The investment gain or loss for a year is the difference between the market value of assets and the expected value of assets on the valuation date. The expected value of assets is the market value of assets on the valuation date for the prior year plus contributions less benefit disbursements and administrative expenses all adjusted with interest at a rate as determined according to Notice 2009-22. The asset value must be adjusted to be no greater than 110% and no less than 90% of the fair market value of assets.

Also note, that the assets have been reduced by a liability resulting from a settlement agreement with New England Insurance Company, to pay back a past overpayment of death benefits.
