INDEPENDENT AUDITORS' REPORT

To the Administrator and Retirement Committee of the
Deloitte Defined Benefit Savings Plan for Partners and Principals:

Opinion

We have audited the financial statements of the Deloitte Defined Benefit Savings Plan for Partners and Principals (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for pension benefits as of May 31, 2025 and June 1, 2024, the related statements of changes in net assets available for pension benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for pension benefits of the Plan as of May 31, 2025 and June 1, 2024, and the changes in its net assets available for pension benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

NOTES TO THE FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED MAY 31, 2025 AND JUNE 1, 2024

(1) Description of plan

The following description of the Deloitte Defined Benefit Savings Plan for Partners and Principals (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for more information.

(a) General

The Plan is sponsored by Deloitte LLP ("Deloitte") and its subsidiaries (collectively the "U.S. Firms"). The Plan was created effective January 1, 2017.

The Plan is a cash balance defined benefit pension plan, which reports accrued benefits to participants in the form of hypothetical account balances. Account balances are increased each year by an interest crediting rate of 4% plus a service credit at the end of the year based on a predetermined table set forth in the plan document. Prior to January 1, 1997, benefits were calculated under the Career Average Formula. Certain participants that performed Service prior to 1997 are grandfathered under the Career Average Formula. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

The Deloitte LLP Master Pension Trust ("Master Trust") holds the investments of assets for the Plan, and its affiliated plans, the Deloitte Pension Plan for Partners, Principals and Managing Directors ("PPMD Plan"), the Deloitte Pension Plan ("Deloitte Plan") and the Deloitte Pension Plan for Independence ("Independence Plan").

During the years ended May 31, 2025 and June 1, 2024, the Plan received asset transfers of \$12,874,285 and \$17,301,502 from the Deloitte Plan and \$637,386 and \$1,108,117 from the PPMD Plan. In addition, the Plan transferred net assets of \$1,557,134 and \$1,101,571 to the Independence Plan during the years ending May 31, 2025 and June 1, 2024.

(b) Participation

Effective January 1, 2023, Partners and Principals who are promoted, hired or rehired to the Deloitte U.S. Firms on or after January 1, 2017 become an active participant in the Plan provided he or she is age 18 or older. Prior to January 1, 2023, the age requirement for participation was 21.

(c) Vesting and pension benefits

Participants are vested after three years of partner service or upon reaching retirement age of 62 while actively employed by the U.S. Firms. After becoming fully vested, participants have the right to their benefit even if they leave the U.S. Firms. Upon termination of employment and satisfaction of the vesting requirements, participants have various options in which to receive their retirement benefit. Each participant may have the option to elect to receive their benefit as a lump-sum payment or in the form of an automatic or optional form of annuity payment for their lifetime, the lifetime of a surviving spouse or the lifetime of a named beneficiary, as described under the Plan document.

(d) Plan funding

Deloitte makes contributions to the Plan, as necessary, as determined by the actuary for the Plan using the unit credit funding method in compliance with the Pension Protection Act of 2006. Deloitte's intention is to make annual contributions in amounts at least sufficient to meet the minimum funding requirements of ERISA.

(e) Fiscal year

The Plan's fiscal year ends on the Saturday nearest May 31.

(f) Plan termination

Although it has not expressed any intention to do so, Deloitte has the right to terminate the Plan subject to the provisions set forth in ERISA.

Should the Plan terminate at some future time, its net assets generally may not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. Some benefits may be fully or partially provided by the Plan's then existing assets and the PBGC guaranty, while other benefits may not be provided at all. The priority order of participants' claims to the assets of the Plan upon termination complies with applicable sections of benefits guaranteed by the PBGC as detailed in the Plan document.

(2) Summary of significant accounting policies

(a) Basis of accounting

The financial statements of the Plan are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP").

(b) Investment valuation and income recognition

The investments of the Plan reside in the Master Trust and are stated at fair value based on the quoted market prices of the underlying securities within each fund on the last day of the Plan year. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 7 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes gains and losses on investments bought and sold as well as held during the year.

(c) Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for pension benefits and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

(d) Administrative expenses

Administrative expenses of the Plan are paid by the Plan to the extent such expenses are not paid by Deloitte.

(e) Payment of benefits

Benefit payments to participants are recorded upon distribution.

(f) Actuarial present value of accumulated plan benefits

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions to service rendered by the participants as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated participants or their beneficiaries, and (b) present participants or their beneficiaries. Benefits for active, retired or terminated participants or their beneficiaries are based on a career average formula or a hypothetical cash balance at the valuation date. Benefits payable under all circumstances – retirement, death, and termination of employment – are included to the extent the benefits are deemed attributable to participant service rendered as of the valuation date.

(g) Subsequent events

Management of the U.S. Firms has evaluated events and transactions that occurred between May 31, 2025 and March 16, 2026, which is the date that the financial statements were available to be issued, for possible recognition or disclosure in the financial statements.

(3) Actuarial present value of accumulated plan benefits

The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Actuarial present values of accumulated plan benefits at the beginning of the Plan years ended May 31, 2025 and June 1, 2024 are summarized as follows:

	<u>2025</u>	<u>2024</u>
Other participants	\$ 231,897,209	\$ 158,654,253
Participants currently receiving payments	463,465	—
Nonvested accrued benefits	2,151,227	1,690,028
Total	\$ 234,511,901	\$ 160,344,281

Significant assumptions and methods underlying the actuarial computations are as follows:

Actuarial Cost Method	- Unit Credit
Discount rate	- 5.25% for 2025 and 5.75% for 2024
Early Retirement Date	- Age 50 with 10 years of service or age 55 with 5 years of service
Normal Retirement Date	- Age 62
Mortality Basis	- Pri-2012 white collar mortality tables projected using Scale MP-2021 for 2025

RP-2006 Employee and Healthy Annuitant mortality tables for males and females with white collar adjustments and generational mortality improvements using Scale MP-2018 for 2024

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Changes in the actuarial present values of accumulated plan benefits at the beginning of the Plan years ended May 31, 2025 and June 1, 2024 are summarized as follows:

	<u>2025</u>	<u>2024</u>
Actuarial present value of accumulated plan benefits - beginning of prior year	\$ 160,344,281	\$ 112,429,358
Net additional benefits accumulated including changes due to plan experience	32,560,833	27,522,039
Increase for interest due to decrease in discount period	9,219,796	5,902,541
Transfers into the plan	19,045,190	24,647,660
Changes in actuarial assumptions	13,341,801	(10,157,317)
Actuarial present value of accumulated plan benefits - beginning of current year	<u><u>\$ 234,511,901</u></u>	<u><u>\$ 160,344,281</u></u>

Changes in actuarial assumptions

- The discount rate was changed from 5.75% in 2024 to 5.25% in 2025.
- The mortality assumption was updated from the RP-2006 white collar combined healthy mortality tables projected using scale MP-2018 to the Pri-2012 white collar mortality tables projected using Scale MP-2021.
- For the full list of assumption changes, please refer to the 2024 Actuarial Valuation Report for the Plan.

(4) Federal income tax status

The Internal Revenue Service has determined and informed Deloitte by a letter dated April 27, 2021, that the Plan was designed to be in accordance with the applicable regulations of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, Deloitte and Plan management believe that the Plan, as amended, is currently designed and operating in compliance with the applicable requirements of the IRC and the Plan continues to be tax exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability or asset if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of May 31, 2025 and June 1, 2024, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

(5) Exempt party-in-interest transactions

During the years ended May 31, 2025 and June 1, 2024, transactions with parties-in-interest included purchases and sales of assets through JPMorgan Chase, the trustee. The Plan paid expenses to various service providers which also qualify as party-in-interest transactions.

(6) Interest in Master Trust

The Master Trust is comprised of various investment funds, some of which are specific to the participating plans. Each plan has a divided interest in the net assets of the Master Trust as allocated in accordance with the plans' provisions. Assets are allocated among the plans by assigning to each plan those transactions (primarily contributions, benefit payments, and administrative expenses) which can be specifically identified. Investment income (loss) is credited to each plan according to its specific interest in the investments in the Master Trust.

The Plan's interest in the net assets of the Master Trust totaled \$318,763,164 at May 31, 2025 and \$242,876,415 at June 1, 2024, which approximated 4% and 3%, respectively, of the Master Trust's assets.

The net assets and investments of the Master Trust are summarized as follows as of May 31, 2025:

	<u>Master Trust</u>	<u>Plan's Interest</u>
Investments, at fair value:		
Fixed income funds	\$ 5,165,292,169	\$ 195,137,160
Equity funds	2,409,528,543	90,012,146
Real asset funds	177,250,681	12,374,066
Alternative risk premia	27,360,195	—
Hedge funds	821,747,908	19,159,917
Total investments, at fair value	<u>8,601,179,496</u>	<u>316,683,289</u>
Cash and accrued items	84,169,932	2,079,875
Total net assets	<u>\$ 8,685,349,428</u>	<u>\$ 318,763,164</u>

The net assets and investments of the Master Trust are summarized as follows as of June 1, 2024:

	<u>Master Trust</u>	<u>Plan's Interest</u>
Investments, at fair value:		
Fixed income funds	\$ 4,766,611,130	\$ 149,245,399
Equity funds	2,234,001,746	62,053,921
Real asset funds	121,937,230	9,486,972
Alternative risk premia	172,186,351	6,091,783
Hedge funds	744,693,713	15,299,372
Total investments, at fair value	8,039,430,170	242,177,447
Cash and accrued items	240,417,421	698,968
Total net assets	\$ 8,279,847,591	\$ 242,876,415

The following are the changes in net assets for the Master Trust for the years ended May 31, 2025 and June 1, 2024:

	<u>2025</u>	<u>2024</u>
Net appreciation in fair value of investments	\$ 255,829,714	\$ 148,171,868
Interest and dividend income	165,874,054	149,347,933
Total investment income	421,703,768	297,519,801
Net transfers	(16,201,931)	237,299,569
Increase in net assets	405,501,837	534,819,370
Net assets available at beginning of year	8,279,847,591	7,745,028,221
Net assets available at end of year	\$ 8,685,349,428	\$ 8,279,847,591

(7) Fair value measurements

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described below:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at May 31, 2025 and June 1, 2024.

- (i) *Fixed income funds, equity funds, real asset funds, and alternative risk premia:* Level 1 fixed income funds, equity funds, and real asset funds are mutual funds which are valued at the closing price on the major market on which the investments are traded. Fixed income funds, equity funds, real asset funds, and alternative risk premia not actively traded are classified as level 2. The valuations of level 2 fixed income bond funds are sourced from independent pricing services and are primarily based upon a market approach, using matrix pricing and considering a security's relationship to other securities for which quoted prices in an active market may be available. Level 2 equity funds, real asset funds, and alternative risk premia are commingled funds which are valued at their net asset value (NAV) as calculated by the investment manager or sponsor of the fund and have daily, weekly, bimonthly, or monthly liquidity with a redemption notice period from 0 to 30 days. Funds meeting the practical expedient are included in the NAV column in the following tables. Level 2 equity funds for 2024 and fixed funds for 2025 also include credit derivatives which are over-the-counter credit default swap index investments and are valued by the investment managers using available market data.
- (ii) *Hedge funds and other investments measured at NAV:* Hedge funds and other investments measured at NAV are open ended funds, limited partnerships or commingled funds and are valued based on the NAV provided or calculated by the fund administrator or investment manager. These investments are valued using the practical expedient and are included in the investments measured at NAV column in the fair value hierarchy tables. Hedge funds are redeemable monthly, quarterly, semi-annually, or annually and have a redemption notice period from 30 to 120 days. The other investments measured at NAV have daily, bi-monthly or monthly liquidity with a redemption notice period ranging from 0 to 30 days. There are no unfunded commitments related to these investments.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the management of Deloitte believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth, by level within the fair value hierarchy, a summary of the Master Trust's assets measured at fair value on a recurring basis at May 31, 2025 and June 1, 2024. Investments valued using the NAV as a practical expedient are not leveled in the tables in accordance with Accounting Standards Update (ASU) 2015-07, but are included in the total column to allow for a reconciliation to the fair value of plan assets.

Total					\$8,279,847,591

The hedge funds and other investments measured at NAV are not direct filing entities. The investment strategy of these funds are described below.

- Fixed income funds - to seek maximum return consistent with prudent investment management by investing at least 80% in fixed income instruments and to provide income and generate capital gains over the long-term, primarily through investment in a diversified portfolio of debt securities.
- Equity funds - to achieve long-term capital appreciation by investing in a concentrated portfolio of common stocks of publicly traded companies selling at a value less than the intrinsic values of the companies.
- Alternative risk premia - to achieve long-term capital appreciation through professionally managed trading in various financial markets using derivative contracts and other financial instruments.
- Hedge funds - a mix of generating consistent long-term growth through active trading or long and short-term investments in both U.S. and non-U.S. securities (with a focus on undervalued securities) and closely approximate various indices.

(9) Risks and uncertainties

The Plan invests in various investment securities. These investments are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for pension benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and participant demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Schedule SB, Line 24 – Change in Actuarial Assumptions

The following changes were made to the non-statutory assumptions used in the valuation. The impact of these changes on the funding shortfall was such that did not require specific Internal Revenue Service (IRS) approval, and such approval was not needed or requested. These changes were based on an assumption study conducted by Deloitte as of the fiscal year-end 2023.

- Turnover rates
- Marriage – Spouse age difference
- Form of benefit distribution

Actuarial Methods for Funding

Liability Valuation Method

Funding Target and Target Normal Cost as Defined in PPA

The Funding Target is defined to be the present value of the benefits accrued or earned at the valuation date. The earned benefits include retirement-type benefits and ancillary benefits (1.430(d)-1(c)(1)(i)). If the amount of a benefit that is expected to be paid is neither a function of the accrued benefit at the time the benefit is expected to be paid nor a function of the participant's service at that time, then the portion of the benefit taken into account for purposes of determining the Funding Target for a plan year is based on the proportion of a participant's service as of the first day of the plan year relative to the service the participant will have when the participant decrements. The portion of the benefit that is taken into account in the Target Normal Cost is the increase in the proportional benefit for the plan year (1.430(d)-1(c)(1)(ii)(C)). The determination of the Funding Target and Target Normal Cost of a Plan for a plan year is not permitted to take into account any limitations or anticipated limitations under section 436 (1.430(d)-1(c)(1)(iii)).

The Target Normal Cost is the present value of all the benefits expected to accrue or to be earned during the year (benefits attributable to services performed in a prior year that are increased by reason of a compensation increase in the current year are treated as having accrued during the current year). Plan administrative expenses paid (or expected to be paid) from Actuarial Value of Assets for a plan year are not reflected in the determination of a plan's Funding Target for that plan year (1.430(d)-1(c)(2)), but are reflected in the determination of a plan's Target Normal Cost.

Generally if insurance contracts are held by the Plan, they are included in Actuarial Value of Assets and the related benefits are included in the liability. In the case of benefits that are funded through insurance contracts purchased from an insurance company licensed under the laws of a State, the Plan is permitted to exclude the benefits from the liability and the insurance policy from the assets, but only to the extent that the right to receive benefits is an irrevocable contractual right based on premiums paid prior to the valuation date (1.430(d)-1(c)(3)).

The determination of a Plan's Funding Target and Target Normal Cost for a plan year is based on Plan provisions that are adopted no later than the valuation date for the plan year and that become effective during that plan year. Section 412(d)(2) applies for purposes of determining whether a Plan amendment is treated as having been adopted on the first day of the plan year (including a Plan amendment adopted within two and one half months after the close of the plan year) (1.430(d)-1(d)).

For maximum deductible purposes, the cushion amount is equal to the sum of 50 percent of the Funding Target for the plan year and the amount the Funding Target for the plan year would increase if the Plan were to take into account increases in compensation which are expected to occur in succeeding plan years. If the Plan does not base benefits for service to date on compensation, increases in benefits which are expected to occur in succeeding plan years (determined on the basis of the average annual increase in benefits over the six preceding plan years) are taken into account in lieu of expected increases in compensation. For plans that have less than 100 participants, increases in benefits for highly compensated employees as a result of Plan amendments within the last two years are excluded from the calculation of the cushion amount.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Actuarial Methods for Funding

Asset Valuation Method

Actuarial Value of Assets are determined using the two-year averaging method as set forth in Notice 2009-22. Under this method, the Actuarial Value of Assets is the average of the fair market value of the assets on the valuation date and the adjusted fair Market Value of Assets determined as of the two prior determination dates. The adjusted fair Market Value of Assets as of a determination date is the Market Value of Assets on that date, increased by contributions that were not included in the plan's asset balance on the determination date and decreased by benefits and administrative expenses between that determination date and the valuation date plus an adjustment for expected earnings as the sum of the expected earnings separately determined for each period between the determination date and the valuation date. The calculated value is then further constrained to be no more than 110% of the Market Value of Assets plus discounted receivable contributions and no less than 90% of the Market Value of Assets plus discounted contributions.

Procedures

Financial and census data: Financial data was submitted by the Trustee and census data was submitted by the employer. Information provided was reviewed for internal consistency and we have no reason to doubt its substantial accuracy.

No benefits of materiality were excluded from the valuation of the liabilities.

The limitations of the Internal Revenue Code 415(b) and 401(a)(17) have been incorporated into our calculations.

No liability is included for participants who terminated without vesting in their benefit prior to the valuation date.

The employer provided us with the data on its employees as of the valuation date, but only those employees who have completed the Plan's eligibility requirements are included in the valuation of liabilities.

The normal cost associated with participants who have transferred to or from the Deloitte Pension Plan, the Deloitte Pension Plan for Partners, Principals, and Managing Directors, the Deloitte Pension Plan for Independence, and the DTTS Pension Plan have been calculated as of the beginning of the year, and allocated based on the transfer date of the transferred participants. This is not inconsistent with the requirements of Code section 430.

Model Use

Actuarial Standard of Practice No. 56 – Modeling requires disclosure of certain information regarding the actuary's use of models when issuing actuarial reports for work performed on or after October 1, 2020. For this valuation, the liability calculations were determined using industry-leading defined benefit valuation software developed and maintained by a third-party vendor. The model was designed specifically for the measurement of defined benefit pension liabilities and the actuary has updated the applicable parameters for the specific plan provisions and assumptions selected for this valuation.

An Excel-based model that calculates a supportable long-term rate of return on assets with inputs of a target asset allocation and publicly available capital market assumptions by asset class was used to assess the reasonableness of the long-term rate of return assumption.

Method Changes Since Last Year

There were no method changes since the prior valuation.

Plan Name: Deloitte Defined Benefit Savings Plan for Partners and Principals**EIN: 13-5133500****Plan Number: 008****Attachment to the 2024 Schedule SB (Form 5500)****Schedule SB, Part V – Summary of Plan Provisions****Plan Provisions Summary**

Effective Date of the Plan	January 1, 2017.
Plan Year	Plan years coincide with the firm's fiscal years (fiscal year begin on the Sunday following the Saturday closest to May 31).
Eligibility for Participation	Partners and Principals who are promoted, hired or rehired to the Deloitte U.S. Firms on or after January 1, 2017, provided the participant is aged 21 or older. Effective January 1, 2023, the Plan was amended to lower the eligibility age from age 21 to age 18.
Eligible Partner	A partner who is admitted or readmitted to Deloitte LLP or any Employer on or after January 1, 2017.
Continuous Service	Elapsed time rule – subject to break-in-service rules. Service is computed in terms of completed years and days (i.e., 365 days of Service equals one year of Service). Service includes employment as both an employee and a Partner.
Credited Service	The period of continuous service after first entering the Deloitte Pension Plan ("Employee Plan"), the Deloitte Pension Plan for Partners, Principals and Managing Directors, Deloitte Defined Benefit Savings Plan for Partners and Principals, or the DTTS Pension Plan.
Normal Retirement Date	Age 62 with payment commencing on the first day of the month coincident with or next following the participant's 62 nd birthday.
Early Commencement Date (applicable for Participants who terminate on or after June 4, 2017)	Partners are eligible to commence benefits upon completion of at least three years of service.
Early Retirement Date	The earlier of the participant's 50th birthday and completion of at least ten years of service and the participant's 55th birthday and completion of at least five years of service.
Normal and Deferred Retirement Benefit	A Partner Cash Balance Account will be established and will be credited with Partner Service Credits and Partner Interest Credits. See the rules below that govern how those items are calculated. The amount of benefit is determined so that its actuarial value is equal to the balance in the Partner Cash Balance Account and, if applicable, Employee Cash Balance Account ("Combined Cash Balance Account"). In the case of a Lump Sum payment, the benefit is equal to the balance in the Combined Cash Balance Account. <u>Employee Cash Balance Account</u> - If there was a benefit previously accrued in the Employee Plan attributable to service as an employee, the Employee Cash Balance Account is equal to the value of "cash balance account" under such Plan. The Employee Cash Balance Account will continue to grow with interest credits based on the interest crediting rate used under the Employee Plan. <u>Interest Credits</u> - at the last day of each Computation Period, prior to the crediting of any Service Credits pursuant to this Section 6.1 for such Computation Period, each Partner Cash Balance Account shall be credited with an amount equal to interest at a rate of four percent (4.00%) multiplied by the balance of such Partner Cash Balance Account as of the first day of the current computation period. <u>Service Credits</u> - at the last day of each Plan Year on which he is both a Participant and an Eligible Partner (and with respect to an Eligible Partner who ceases to be an Eligible Partner during a Plan Year, as of the date such Eligible Partner ceases to be an Eligible Partner) with the amount determined pursuant to the Table of Service Credits listed below:

¹ Service Year shall mean the number of years credited within a particular peering group, determined as of the earlier of (i) the last day of the Plan Year, or (ii) the date as of which a Participant ceases to be an Eligible Partner (the "Determination Date"). A Participant's Service Year shall always be a whole number. A Participant will be credited with an additional Service Year in the peering group he is in on the last day of each Plan Year while an Eligible Partner, though if the Participant ceases to be an Eligible Partner, he shall be given credit for an additional Service Year in the peering group he is in as of the date he ceases to be an Eligible Partner if he provided any Service as an Eligible Partner during the Plan Year. The Service Year shall equal one (1) for a Participant who changes peering groups during a Plan Year, unless such Participant was previously credited with any Service Years in the latter peering group (in which case, the Service Year shall equal the number of years previously credited with the latter peering group plus one (1) additional year for the current Plan Year). Notwithstanding the foregoing, a Participant will receive only one Service Credit for a given Plan Year in accordance with the above table, determined by reference to the peering group and Service Year applicable as of such Plan Year's Determination Date.

For any year in which a participant commences, recommences, or ceases participation, Service Credit will be prorated.

A participant who was an "eligible employee" in the Deloitte Pension Plan before becoming a Partner, may be entitled to receive a retirement benefit for the pre-Partner service.

Normal and Deferred Retirement Benefit (continued)	If such a participant is grandfathered under the Career Average formula, the pre-Partner benefit will be the greater of: • The benefit calculated under the Deloitte Pension Plan's Employee Cash Balance formula (the formula in effect on and after January 1, 1997), or • The benefit calculated under the Deloitte Pension Plan's former Career Average formula, plus any frozen benefits earned as a participant in the former Deloitte Haskins & Sells Employees' Pension Plan (as of June 3, 1989) or the former Touche Ross Retirement Plan (as of August 31, 1989). If such a participant is not grandfathered under the Career Average formula, the pre-Partner benefit will be calculated under the Deloitte Pension Plan's Employee Cash Balance formula only.
Early Commencement Benefit	The early commencement benefit is the benefit payable before the participant's Early Retirement Date, with further actuarial reduction to the participant's Early Commencement Date.
Early Retirement Benefit	<u>Pre-1997 Plan</u> – A Participant retiring on or after his Early Retirement Date and before his Normal Retirement Date is eligible to receive a monthly benefit payable for life. For Touche Ross employees and Partners, the monthly benefit equals the normal retirement benefit accrued for service through August 31, 1989, reduced by 1/180th for each of the first 60 months or fraction thereof by which the date of commencement of benefits precedes age 65, and reduced actuarially for the next 60 months, and with the benefit accrued for service after August 31, 1989, reduced by 1/2 of 1% for each month or fraction thereof by which the date of commencement of benefits precedes age 62. For Deloitte Haskins & Sells employees, the monthly benefit equals the normal retirement benefit, reduced by 1/2 of 1% for each month by which the date of commencement precedes age 62. For certain Deloitte Haskins & Sells employees that attained age 50 and had at least 10 years of service as of June 1, 1991, the benefit accrued for service through June 3, 1989, is reduced 1/2 of 1% per month before age 60. For Deloitte employees, the monthly benefit equals the normal retirement benefit accrued for service as of the date of termination reduced by 1/2 of 1% for each calendar month or fraction thereof that the participant's benefit commencement date precedes age 62. <u>Cash Balance Formula</u> – The early retirement benefit is the monthly benefit which is the actuarial equivalent of the cash balance accumulated to the participant's Early Retirement Date. If a participant is grandfathered, the minimum early retirement benefit is calculated under the provisions of the pre-1997 Plan as described above.
Disability Benefit	A participant that becomes totally disabled and qualifies for Social Security disability benefits will continue to accrue credited service towards a normal retirement benefit which commences on the first day of the month coincident with or next following attainment of age 62. If early retirement is elected, credited service accruals cease upon benefit commencement, and an early retirement reduction will apply if benefits start before age 62 (or age 65 for the pre September 1, 1989 portion for former Touche Ross Plan Participants).
Termination of Employment	Each participant will acquire a vested, nonforfeitable right to a deferred retirement benefit after completing three years of continuous service, in the form of a monthly benefit for life commencing at Normal Retirement Date (if elected) in an amount equal to 100% of his accrued benefit to the date of termination. Payment of benefits may commence prior to Normal Retirement Date, in which case the accrued benefit would be reduced as described under "Early Commencement Benefit" and "Early Retirement Benefit".

Pre-retirement Death	The pre-retirement death benefits are based on marital status, as follows: <u>Automatic Coverage - Single participant</u> If the participant is not married at the time of death, the Plan provides for payment of the vested benefit to the beneficiary in a single lump sum payment as soon as practicable following death (unless the beneficiary elects an optional preretirement death benefit in the form of an actuarial equivalent Life Only annuity or a Life and Term Certain Annuity). The beneficiary's benefit will be <i>the greater of</i>: • The value of the Cash Balance Account; • For grandfathered participants only, the present value of the participant's normal retirement benefit under the Career Average Formula; or • For grandfathered participants only, the present value of the payments that the beneficiary would receive, based on the Career Average Formula, as if the participant had retired immediately prior to his death and commenced payment in the form of a Joint and 100% Survivor Annuity. <u>Automatic Coverage - Married participant</u> If the participant is married at the time of death, the Plan provides for a Life Only Annuity payment to the surviving spouse (unless the spouse elects an optional preretirement death benefit in the form of an actuarial equivalent Lump Sum, or Life and Term Certain Annuity). The spouse's benefit will be a Life Only Annuity that is actuarially equivalent to the greater of: • The value of the Cash Balance Account; • For grandfathered participants only, the present value of the participant's normal retirement benefit under the Career Average Formula; or • For grandfathered participants only, the present value of the payments that the beneficiary would receive, based on the Career Average Formula, as if the participant had retired immediately prior to his death and commenced payment in the form of a Joint and 100% Survivor Annuity.
Normal Form of Benefits	Unmarried Participants - Life Annuity. Married Participants - Actuarially reduced Joint and 50% Survivor Benefit unless another form of benefit is specifically selected by the Participant with appropriate spousal consent.
Optional Forms of Benefit	The following forms of benefit are payable from the Plan upon early commencement, early, normal, or deferred retirement: • Life Annuity • Life Annuity with a 120 or 150 month Term Certain • Joint and Survivor Annuity (50%, 75%, or 100%) • Joint and Survivor Annuity (50%, 75%, or 100%) with a 120 or 150 month Term Certain • Lump Sum
