ACTUARIAL COST METHODS AND ASSUMPTIONS

Actuarial Cost Methods

Retirement Benefits

The Actuarial Cost Method used in determining the Minimum Required Contribution under Internal Revenue Code Section 430 is the actuarial cost method proscribed in IRC 430 and final regulations. The total cost for the Plan Year is equal to the Target Normal Cost, plus the sum of the Shortfall Amortization Bases in existence (if applicable), less the excess of Plan Assets over the Funding Target (if applicable).

Assets

The asset valuation method is the Fair Market Value of Assets.

Merrimack Valley Oral Surgeons, Inc. Cash Balance Pension Plan
October 31, 2025 Actuarial Valuation

ACTUARIAL CERTIFICATE

We are pleased to submit this report of an actuarial valuation of the Merrimack Valley Oral Surgeons, Inc. Cash Balance Pension Plan as of October 31, 2025 for the plan year November 1, 2024 to October 31, 2025.

The range of contributions for the plan year ended October 31, 2025 is as follows:

Minimum Required Contribution under IRC 430	\$201,735
Recommended Contribution (Balance less Assets)	\$246,042
Maximum Deductible Contribution under IRC 404(o)	\$589,503

The actuarial assumptions and cost method are unchanged from those employed in the prior year's valuation with the exception of the statutorily required segment interest rates and mortality tables under IRC 430.

This report has been prepared for the plan sponsor and his/her professional advisors in accordance with generally accepted actuarial principles and practices and, to the best of my knowledge, fairly reflects the actuarial condition of the Merrimack Valley Oral Surgeons, Inc. Cash Balance Pension Plan.

The purpose of this report is to communicate the minimum required and maximum deductible contributions for the plan year. Certain assumptions used in the determination of these values and related amounts such as the Adjusted Funding Target Attainment Percentage (AFTAP), are prescribed by the Internal Revenue Code, Regulations and other official guidance, including the American Rescue Plan Act of 2021 (ARPA) and the Infrastructure Investment and Jobs Act of 2021. The prescribed mortality table and discount rates were applied in accordance with my understanding of the applicable law and regulations. In my opinion, each other assumption is reasonable both individually and in the aggregate, taking into account the experience of the plan and reasonable expectations and, in combination, offers my best estimate of anticipated experience under the plan. This report, and accompanying schedules describing the actuarial assumptions and methods employed and the principal document provisions on which the valuation is based, are complete and accurate to the best of my knowledge.

In preparing this report I have relied upon employee information provided by the Plan Sponsor and plan asset information provided by the Trustee, both as of the valuation date. In accordance with generally accepted actuarial principles and practices, I have reviewed, but not audited, this information and the data has been found to be of acceptable quality for purposes of this actuarial report.

ACTUARIAL CERTIFICATE
(continued)

Future actuarial measurements may differ significantly from the measurements presented in this report due to such factors as plan experience differing from that anticipated, changes in economic or demographic assumptions, and changes in plan provisions or applicable law. Due to the limited scope of this actuarial assignment, no analysis was performed of the potential range of such future measurements. In addition, determinations of the condition of the plan for other purposes, such as satisfying the reporting requirements of the Financial Accounting Standards Board, if any, and measuring the level of funding for plan termination, may require different assumptions and methods and the results may differ significantly from those presented here.

The results of this valuation are subject to the precepts of Actuarial Standard of Practice No. 51 (ASOP 51). Certain risks are always inherent in the future outcome of the Plan, including investment risk, potential future changes to pension laws and limitations, as well as the future operation of the plan sponsor. The results of this actuarial valuation prepared under IRC 430 and 404 are primarily based on interest and mortality assumptions proscribed by law on an annual basis and are not subject to material change by the plan sponsor or the actuary preparing the valuation. These rates are adjusted annually, so that there are risk changes that can occur to the Plan based on these annual changes by the IRS. A more detailed risk assessment can be performed upon request; however, such an assessment would not alter the results contained in this current year's actuarial valuation.

To the best of my knowledge, there is no conflict of interest which would impair, or appear to impair, the objectivity of my work on this assignment. If the information contained in this report is provided to others, the report should be provided in its entirety to limit the risk of misinterpretation. Please contact me if you require additional explanations for any item(s) contained in this report or for any other communications related to my engagement as actuary for the plan.
